The church was organized the following week on the historic 17th of June, by the joint acceptance of statements of doctrine in harmony with Baptist views, and a covenant, and was publicly recognized July 2d by an ecclesiastical council consisting of delegates from the Baptist Churches in Groton, Harvard and Littleton. The following is a list of the constituent members: John Pingry, Eunice Pingry, Andrew Gardner, Eliza Gardner, Oliver Pierce, Elizabeth Pierce, Joseph Barden, Anna Ames, L. Felch, Sarah T. Nutting, Andrew W. Felch, Mary A. Pingry, David A. Smith, Eliza A. Pingry, Mercy Blaney.

At first they met at such places as afforded them an open door. As we have seen, they organized in the house of Andrew B. Gardner, which at that time was at the corner of Main and Newton Streets, where the Unitarian Church edifice now stands. Subsequently they worshiped in the railroad depot, and with the permission of the town of Groton, they, for a short time, occupied the brick school-house. Later, Deacon John Pingry moved from Littleton the building which formed the nucleus of the present Union House. The second floor was finished into a hall, and here the society worshiped for a considerable time. The present church edifice, which was built by Morey Lapham, was dedicated in the spring of 1856. In the spring of 1878 an addition was made to the building to provide suitable rooms for social meetings. The meeting-house was dedicated during the pastorate of Rev. J. M. Chick, who was instrumental in securing a part of the funds therefor. Deacon John Pingry contributed largely, the lot of land upon which the building was erected being his gift. The bell was

put in the belfry in the summer of 1872. The first clerk was David A. Smith.

The following have been deacons in the church since its organization: John Pingry, David A. Smith, Samuel A. Childs, Walter Wright and Robert N. Kendall, the two latter being now in office. Before the formation of the church Rev. Amasa Sanderson, then pastor of the Baptist Church in Groton, preached here quite regularly.

The first pastor, Rev. Jonathan Guild, was called January 13, 1852, and was ordained on the 29th of the following September, and resigned May 15th of the next year. Shortly after, Rev. G. D. Crocker began his labors, and, although no formal call appears on the records of the church, he did the work of a pastor for about a year. He was succeeded by Rev. J. M. Chick, who accepted a call October 1, 1854, entering at once upon his labors and continuing them until June 7, 1857. At the time the church was dedicated it had an indebtedness of about \$1900, which was secured by a mortgage on the property. After about a year Rev. George B. Gow, from Newton Theological Seminary, accepted a call and was ordained September 23, 1858. His pastorate terminated in July, 1861. In March, 1862, Rev. Frank Rogers Morse assumed the pastorate and was ordained on the 6th day of July following, and June 20th of the following year he resigned. For an interim of about nine months, between this and the succeeding pastorate, Rev. James B. Donovan and Rev. Eleazer Robbins officiated. In January, 1865, Rev. C. A. Skinner became pastor, with the understanding that he would also become agent for the liquidation of their indebtedness. This seems to have been accomplished shortly, as under the date of June 27th, following, a vote of thanks to Mr. Skinner is recorded as having been passed on account of this service. On the last day of this year (1865) a call was extended to Rev. W. P. Upham, who began his labors and served until June 27, 1867. Then after a lapse of more than a year, Rev. E. H. Page began his labors. He came August 16, 1868, and his resignation is dated May 12, 1870, October 31, 1870, Rev. J. S. Harradon became the pastor and officiated until May 1, 1873. Reverend George H. Allen was the next pastor. His service was the longest in the history of the church, as he officiated until the fall of 1885. During his service he was one of our most prominent and respected citizens. Since Mr. Allen, Rev. Enoch Sweet and S. P. Everett, the present incumbent, have been pastors.

UNITARIAN SOCIETY.—February 1, 1885, Rev. Lyman Clark, then pastor of the First Unitarian Parish of this town, delivered before the society a historical discourse so complete in its details and correct in its narrative of events that I have here depended largely upon it for the following sketch of this society.

September 28, 1853, a circular sheet was issued in behalf of an association formed to erect a chapel for

worship, and from this circular we learn that Rev. J. Cooper had issued a call for a meeting "for the purpose of taking into consideration the subject of building a meeting-house or chapel, and attending to other business mentioned in the call." Articles of association were adopted, the preamble to which declares that "This meeting, being desirous of promoting the glory of God and the spiritual interest of our fellowmen, we deem it expedient to erect a meeting-house at South Groton, to be known by the name of the South Groton Chapel, for which purpose this meeting has been called together, and the following resolutions or Articles had been prepared, and are now submitted for its consideration." After the adoption of the preamble and articles of building association, Nathaniel Stone, Calvin Fletcher, Robert Woods, David Chambers and Walter Lackey were chosen a committee to procure a site; Rev. J. Cooper, Calvin Fletcher, Robert Woods, David Chambers and Ebenezer Willis were chosen a building committee; Benjamin Felch was chosen collector and Calvin Fletcher treasurer.

Rev. J. Cooper came to this village as a Methodist, but sought and obtained recognition as a Trinitarian Congregationalist. His labors came to an early close. But the movement in favor of a chapel went forward, and it was finished in the spring of 1855. A church organization was effected on the 12th of the following August, by the adoption of the covenant of the "South Groton Christian Union," which was written by Rev. David Fosdick, who preached here after the departure of Mr. Cooper. The chapel built, church society organized, a formal dedication of the house of worship took place on the 5th of September, 1855. This chapel, which was known as the White Church, stood upon the easterly half of what is now the town-house lot. For a more particular description of its appearance, reference is hereby had to the files. Mr. Fosdick was chosen pastor of the Union Society on August 27, 1855, and his ministry continued until July 1, 1860. He was succeeded by Rev. William A. Start, a graduate of Tufts College, in the class of 1862, who took charge of this society March 1, 1861, and was ordained and installed on September 4, 1862. Mr. Start resigned April 30, 1863. Rev. Mr. Whitney officiated for a time. He was followed by Rev. Josiah K. Waite, who was installed on May 24, 1865. In the year 1867, owing to a refusal of the church to settle a colleague, Mr. Waite resigned. The fourth pastor was Rev. Crawford Nightingale, who was born at Providence, R. I., November 3, 1816, being a son of Samuel Nightingale and Elizabeth Kinneutt Nightingale, *née* Tompson. He attended a private school at Providence, entered Brown University September, 1830, graduating in 1834; prepared for the ministry at Cambridge, 1835-38. He was ordained at Providence, November, 1838. He subsequently served in the ministry at Charlemont, Heath, Shelburne and Greenfield, Mass., followed by service as

minister-at-large at Lowell, and pastorates at Chicopee and Athol. Mr. Nightingale was invited to the pastorate by a vote of the society, October 12, 1867, and was installed April 8, 1868, and it was during his pastorate that the church edifice was destroyed in the great fire of March, 1872.

A meeting of the society was called Saturday evening, March 2, 1872. The chief item of business appears to have been,—“to take into consideration repairing, remodeling and enlarging the church, the building of a vestry room and any other rooms that may be thought desirable for the benefit and convenience of the society.” The meeting adjourned until April 13th. A committee was then chosen to consider and report upon the necessary repairs. The committee apparently not ready to report, further adjournment was ordered for two weeks. Before the light of another morning the building, with forty others in the village, were in ashes. With liberal courtesy, the Orthodox Congregational Society offered the use of their church. Supt. C. L. Heywood, in behalf of the Fitchburg Railroad Company, offered the use of the restaurant, where an informal meeting was held Saturday evening after the fire. Thanks of the society for courtesy received were duly expressed, and a committee chosen to solicit aid in building a new church. That committee consisted of Rev. Crawford Nightingale, Robert P. Woods, Abel Prescott, Pembroke S. Rich, Abel L. Lawton and Henry A. Woods. The offer for the use of the refreshment-room for religious purposes was accepted, and one service maintained; this, apparently, being the beginning of one preaching service on Sunday instead of two. A committee on location and plan of building, consisting of Rev. Crawford Nightingale, Levi W. Phelps and Abel L. Lawton, was chosen. This meeting being informal, a second one was called in due form to ratify the action taken, the notice being posted up on an oak tree, which remained upon the lot near where the church stood, and upon the door of the refreshment-room at the station where the society worshiped. Subsequently the society worshiped in a hall in the new building of Harvey A. Woods, on Main Street, on site of Filiebrown building. In due time the stately and beautiful church edifice, designed by Messrs. Earle & Fuller, of Worcester, architects, and built by Messrs. Henry C. Sherwin and Charles F. Williamson, was erected on land purchased of Mary A. W. Champney and George H. Champney. The vestry was first occupied for worship, the auditorium being without pews or organ, which were provided later, largely through the efficient labors of John E. Hosmer. The church was dedicated September 1, 1875.

Mr. Nightingale tendered his resignation, to take effect April 1, 1878, having served as minister of the society for ten years. His pastorate, the longest of this society, was a tribute to his ability and courteous disposition which won a large measure of friendship, which is still felt by people of the parish and town.

Rev. Alfred Everett Goodnough, the fifth pastor, was born at Montpelier, Vermont, April 10, 1855, and graduated from the Meadville Theological School in 1878, subsequently taking a post-graduate course at the Harvard Divinity School. Mr. Goodnough assumed the charge of the church June, 1878, and was ordained as pastor on September 11th of that year. His pastorate closed in July, 1879.

The sixth pastor was Rev. Rushton D. Burr. His labors began April 1, 1880, and continued two years.

Rev. Lyman Clark was the seventh pastor. He was born December 30, 1838, near the town of Buchanan, Upshur County, West Virginia. He was the son of Cornelius Clark, born at Bridgewater, Massachusetts, and Abigail Clark, *née* Wright, born at Westford, Massachusetts. He attended private schools in West Virginia, and after the removal of the family to Illinois he enlisted in the Fifth Illinois Volunteer Cavalry in 1861, serving more than four years in the successive grades of sergeant, second lieutenant and captain. He entered the Meadville Theological School in 1865, graduating in 1869. On June 11, 1872, he married Isabel Clough at Bethel, Maine. He began his pastoral labors in Ayer on the first Sunday of September, 1882. The installation service was delayed, for the purpose of first removing the indebtedness of the society on account of the church edifice, until March 7, 1884.

The Unitarian name was first taken November 1, 1864, the form of the name having been altered several times. It was first the “South Groton Christian Union,” this name being taken in 1855. In 1862 the name “Union Society” was chosen. Two years later the name “Unitarian Society” was taken, which was further amended in 1867 so as to read “The First Congregational Unitarian Society,” the name at the present time being the “First Unitarian Parish of Ayer.” By act of Legislature passed in the year 1886, the latter name was ratified, and all acts and proceedings of the society under the former names were confirmed.

The church organization within the parish began with the pastorate of Rev. Rushton D. Burr, previous to that time one organization representing both church and parish. The records of the Sunday-school are found to begin with the year 1862.

CATHOLICS.—A Catholic Mission was first established in this village about 1855, and was supplied by priests from the Fitchburg Parish, of which it formed a part. At first services were held in private houses, principally in that of Bartholomew McCarty, on the westerly side of Washington Street, and occasionally in the house of John McGuane, on the southerly side of the old Shirley road, now owned by Michael Shea. The Mission at several times worshiped in the grove on the south side of the Fitchburg Railroad, near Scully's Crossing, and several times in the woods in the vicinity of what is now the Catholic Cemetery. Subsequently the Mission occupied, for about a year,

Pingry's Hall, now the Union House. This was their first established place of worship.

The first priests were two brothers, Edward and Timothy Turpin, of the Fitchburg Parish. The first church edifice was erected by Thomas H. and Alfred Page in 1858, on the lot on the southerly side of West Main Street, now occupied by the parochial school building. It was a small, plain structure, and was subsequently moved on to the church lot on Shirley Street, where it is now occupied as the stable of the parsonage. Charles Foley was the first settled priest of the Parish of St. Mary, which included with Ayer the towns of Groton, Pepperell, Townsend, Littleton, Harvard and Shirley. Father Foley was succeeded by Father Moran.

In December, 1867, Joseph Nicholas Barrata came here from Richmond, Virginia, where had been settled during the War of the Rebellion, and was ordained priest. He was a native of Italy, and a man of great energy and superior business tact. He immediately set about to erect a more commodious church edifice. He purchased of A. H. Fuller the Shirley Street lot, and built thereon the second church building of the parish, which was completed and dedicated on Sunday, December 4, 1870, Archbishop Williams officiating. He also erected the present parsonage.

The second church edifice stood where the new church now is, and faced east. It is now the parochial school building on West Main Street. During Father Baratta's pastorate the parish was increased to 3000. He also built a new church at Pepperell (St. Joseph's), which was dedicated December 4, 1870, and took steps to erect another in Townsend, purchasing a lot of land there for that purpose. The increased labor was so great that Father Baratta was obliged to ask leave of absence, when he visited Europe to recuperate his health. During his absence, Michael J. McCall, now located at Concord, Massachusetts, occupied his position. December 12, 1876, Archbishop Williams appointed Joseph Mohan to the pastorate, with Rev. William F. Riordan, assistant pastor, who remained here until January, 1879. In April, 1880, Henry J. Madden was appointed to the pastorate, and while it was under his charge the beautiful church edifice, that is such a commanding object in the westerly part of our village, was built. Father Madden left here to take charge of the Parish at Pepperell, which up to that time had been a mission, where he is now settled. He was succeeded by John H. Flemming, who officiated until June, 1890. The present pastor is Patrick J. Sheedy, recently of Bridgewater.

CONGREGATIONAL SOCIETY.—The fourth religious society organized in this town was the Congregational. In 1887 Rev. Alfred S. Hudson, then its pastor, compiled a pamphlet of 136 pages, which was published by the church, containing a very interesting history of that organization. With the author's permission, I have largely followed it in these pages.

The church was organized by an ecclesiastical council, September 5, 1861, under the name of the "South Groton Orthodox Congregational Church." It was subsequently called the "First Congregational Church of Ayer." Until recently it was, like other churches, connected with the parish, which took for its name "The Union Orthodox Congregational Society of Groton Junction." In 1867 the parish voted that the word "Union" be dropped from its name.

In 1887 the parish voted to transfer its property to the church. These changes in its name being without any legal authority, the Legislature of 1887 was appealed to to legalize its doings under a different name, and to confirm the name which it then bore, and a special act was passed for its relief.

The preliminary steps which resulted in the organization of this church were taken in the spring of 1861. Of the meetings, one of the early, if not the earliest meetings, the parish record states, that "about April 1, 1861, the members of the Congregational and other Christian Churches, also individuals favorable and desirous of establishing a Church and Society of Congregational sentiments and belief in this place, invited the Rev. Mr. Mann to preach to them a few Sabbaths to ascertain the feelings of the community in regard to the above object."

The encouragement seems to have been good, for at a meeting held at Union Hall, May 6, 1861, a committee was appointed to prepare Articles of Agreement that should govern this new company of worshippers. The form proposed and approved and the signatures affixed are as follows:

"We, the undersigned, hereby agree to form ourselves into a religious society, to be called the South Groton Orthodox Congregational Society, for the support of public worship in South Groton, so called, and to do and perform all matters and things necessary and proper for a Religious Society, until we shall become organized as a regular Corporate Society.

"In witness whereof we have hereunto set our hands, this sixth day of May, in the year of our Lord one thousand eight hundred and sixty-one,—

Jesse Whiting, Jehiel Todd, Daniel Livermore, Daniel G. Waters, William F. Goulding, Nathan W. Frye, B. F. Taft, William H. Harlow, Levi Wallace, J. H. Gibson, Edwin W. Taft, T. H. Heald, E. H. Sawtell, I. C. Litchfield, Joel Garfield, N. G. Pierce, B. L. Howe, Charles Livermore, Mowry Lapham, Sylvester P. Cutler."

But three of the original members are now living in Ayer. Shortly after this the organization of the church was effected. At the time of the organization twenty members united, of whom but three are present resident members. The following have served as deacons of the church: Daniel Livermore, Jehiel Todd, Simeon Burt, John F. Robbins, Charles Brown, Isaac Hovey, Harrison Dexter Ewins, Edwin Hobart Hayward and Henry McGregor. Nine persons have acted as pastors of the church: Rev. E. P. Tenney, acting pastor, began service November 1, 1861; Rev. Daniel M. Bean, installed July 23, 1863, dismissed 1864; Rev. E. C. Stebbins, installed October 25, 1864, dismissed April 16, 1867; Rev. Daniel Phillips, acting pastor, 1866 to December 31, 1868; Rev. Samuel Bell,

installed September 1, 1869, dismissed October 4, 1870; Rev. F. J. Fairbanks, installed January 1, 1872, dismissed January 1, 1874; Rev. Horace Parker, acting pastor, January 25, 1874, to May 6, 1877; Rev. De Forest B. Dodge, acting pastor, February, 1878, to July 31, 1878 (closed his labors on account of ill-health); Rev. Henry M. Holmes, acting pastor, December 8, 1878, to 1882; Rev. A. S. Hudson, acting pastor, November 1, 1882, still officiating.

Since the formation of the church nearly two hundred members have belonged to it, the greatest accession at any one time being twenty. Formerly two sermons were preached on the Sabbath, but latterly there has been but one.

The first services of this society were held in Union Hall, then standing at the southerly end of Merchant's Row, where the American House now is. An early movement was made for the erection of a house of worship. November 8, 1864, a committee was appointed to procure a building lot, and they purchased the one on which the present church edifice stands. April 2, 1866, a building committee was constituted, as follows: John Spaulding, Daniel G. Waters, Simeon Burt, Joel Garfield. The corner-stone of the new edifice was laid April 16, 1867, by the Middlesex Union Conference. Rev. Dr. Hooker, secretary of the Massachusetts Home Missionary Society, assisting in the service. The house was built by Daniel G. Waters, and cost, with its furnishings, about \$8000. The house was dedicated September 1, 1867. The pews came from the Universalist Church at Harvard. Its bell has an interesting history; it was purchased in 1872 of a society in Fitchburg, who worshiped in the building now used as the post-office. From the inscription upon it and the rumors connected with it at the time it was purchased, it was supposed that at one time it had done service upon some plantation in the South, and in consequence the following letter was sent to the *New Orleans Pivayune* and copied quite extensively in the papers in the South:

"AYER, MASS., July 15, 1887.

"MR. EDITOR:—The late controversy between General Butler and the *Washington Post* respecting the New Orleans bells, calls to my attention, that on each Sabbath morning there peals forth in our quiet New England village the sonorous tones of one of these relics of our late unpleasantness. Coming among us at a time when there was a satiety of things militant, it settled into its new resting-place without exciting a curiosity as to its early history. But as we recede from that great drama every act and thing associated with it momentarily grows in interest.

"The bell in question weighs about eight hundred pounds. Upon one side in relief are the words "B. D. Beavin, Plains, Miss., 1856," and around the top, "Cast by G. W. Coffin & Co., Buckeye Foundry, Cincinnati, 1856."

"It may interest its former owners and noble bellmen acquaintances to know its present resting-place, and it would the writer to know its early history.

Geo. J. BURNS."

In a short time a pleasant correspondence was opened with the Beavin family, of which two members are now still residing upon the old homestead. Mr. Beavin, whose name is inscribed upon the bell, went to Mississippi from Maryland in 1840 and was employed by the proprietor of Plains Plantation,

Mr. David Hunt, as manager. In 1854 he became its owner. It was named the Plains probably on account of the level character of its land. It contained about 1400 acres, and at the breaking out of the war had in the neighborhood of one hundred and twenty-five slaves. Mr. Beavin died a short time after the breaking out of the Rebellion. During the war the plantation, being off the traveled road, suffered little molestation. When there came a demand for material from which to cast cannon for the use of the Confederacy, the executors of Mr. Beavin's estate, without any legal authority for so doing, sent the bell to New Orleans, and with others, collected from different places, it was in the public square, preparatory to being sent to the foundry. At that time the city fell into the hands of the National forces, and General Butler confiscated the bells and sent them north, where they were disposed of in different parts of the country. The bell was teamed from the plantation to the river landing by an old slave, Uncle John Hadden, who continued to reside in the family until the time of his death, September 24, 1889.

METHODIST SOCIETY.—The Methodist people were among the first to hold religious services at Groton Junction. Rev. J. Cooper, at the time of his advent in this village, proclaimed himself of this denomination. On May 23, 1869, Rev. Abraham D. Sargent collected Oliver B. Richardson, Abbie W. Swan, Jennie L. Barber, probationers; and Jabez Bigelow, Mary Johnson, Abbie A. Farrier, Luke Farnsworth and George Little, members, and organized them into the Ayer Methodist Episcopal Church.

Since that time ninety-nine probationers have given their names to the church, and 232 have been received in full connection. The following have been pastors of the church at different times, but I regret that I am unable to give the dates between which each of them served: Abraham D. Sargent, G. W. H. Clark, Mr. Hannah, William E. Baird, Erastus Burlingham, Mr. Canney, N. F. Penney, Nathan D. George, George E. Sanderson, Samuel N. Noon, Increase B. Bigelow, Ichabod Marsey, Herbert G. Buckingham, Albert R. Archibald, Frederick W. Hart, Albert H. Bennett, Edward P. F. Dearborn, Cassius C. Whidden.

Like several other religious societies, the first services were held in private houses of the members. For a short time the society worshiped in the engine-house hall on the northerly side of Main Street, which was destroyed in the fire of October 31, 1869. They afterward worshiped in Union Hall, and subsequently in Page's Hall. In 1876-77 the society occupied the District Court room as a place of worship and afterward the lower Town Hall.

Moves looking towards the erection of a house of worship were made at different times. At one time the lot of S. Wilson Smith, at the corner of Main and School Streets, was under consideration for a site. In 1886 these efforts culminated in success. A lot at

the corner of Newton and Columbia streets, at the rear of the Town House, was secured, and Tuesday evening, May 17, 1887, the corner-stone of the new edifice was laid. The exercises were conducted in the Town Hall, at which prominent citizens and the pastors of the different churches participated. The address was delivered by G. S. Chadbourne, D.D., at the close of which the audience and speakers repaired to the church site, and amidst impressive ceremonies the corner-stone of the new edifice was laid. The new house of worship was constructed under the personal supervision of Otis S. Flanders, of Martha's Vineyard, the architect of the building, the cost of which was rising of five thousand dollars. The new house was completed in October, 1887, and dedicated on October 12th, Lewis B. Butts, D.D., officiating. It is built with a basement containing a convenient vestry and other accommodations for the Sunday-school and social work. The audience-room is furnished with comfortable pews and carpeted throughout and with its stained windows presents a very attractive appearance.

CHAPTER LVI.

AYER—(Continued).

Fires and Fire Companies.

BELIEVING it is the duty of the historian to record his observations and recollections as well as to research. I will offer no apology for whatever there may be in these pages within the recollection of the reader. I believe there is nothing that has a more proper place in the history of a community than the conflagrations by which its physical appearance is changed and oftentimes the whole channel of its existence is diverted. I have here given place to only such fires as have resulted in substantial destruction of property, and have purposely omitted many where the damage resulting was slight.

We are nothing if not combustible. The first conflagration of which we have any information was the burning of the garrison-house of Major Simon Willard by the Indians in 1676. As has been elsewhere stated, this building stood upon what is now known as "The Plains," west of the Boston and Maine Railroad and near the Harvard line. It was the first Groton house destroyed in King Philip's War.

In 1760 a school-house in the southerly part of Groton was burned. I am unable to state where it stood or whether it was in the limits of our village.

In the spring of 1836 Jesse Stone's tavern, then standing where James Gilson's dwelling house now is, was burned. For further particulars concerning this building and its history, see "Taverns."

June 15, 1837, the paper-mill of Edgarton, Priest and Company, on the Nashua River, at what is now

known as Mitchellville, was destroyed by fire with all its contents, including several tons of finished paper. John M. Sherwin, one of the operatives in the mill, fell a victim to the conflagration.

About 1850 the school-house in Sandy Pond District was burned. It was a brick building, and when rebuilt the following season, the original walls were used. This building was torn down in 1870 to give place to the present structure.

At November meeting, 1855, Stuart J. Park, Luther Page, Samuel W. Rowe, Hibbard P. Ross, Oliver Wentworth and Ezra Farnsworth were chosen a committee to take into consideration the advisability of purchasing a fire-engine to be stationed at Groton Junction, but, like the majority of such references, it came to naught.

At March meeting, 1858, the attempt was repeated. A new committee was chosen, of which Marshall Frye and Hibbard P. Ross were members, but, like its predecessors, was unable to accomplish its object.

At November meeting, 1859, another attempt was made, but the article was indefinitely postponed.

January 5, 1860, a fire caught around the chimney in the attic of the Haynes house, on the easterly side of Washington Street, now owned by George V. Barrett. It was extinguished with pails, the principal damage being by water. At this time there was no organized Fire Department in town, and to this fire is due the agitation which resulted in our first Fire Department, and ultimately in the procuring of a fire-engine. The *Railroad Mercury* is authority for the statement that the Haynes fire was the first conflagration in our village. It is, however, claimed by some that the house owned by Hiram P. Ross, then standing on the westerly side of Forrest Street, and at the time of its destruction occupied by Warren Eastman, was the first fire in the village. It is certain that this and the Haynes fire occurred about the same time.

At March meeting, 1880, a motion to appropriate \$600 for a fire-engine at Groton Junction was lost, and the same fate met an attempt to get an appropriation of \$800 at the April meeting.

The first considerable fire in our village was the burning of Alden Lawrence's stable, in the spring of 1861. This building stood in the rear of what is now Page's Block, between Washington and Pleasant Streets, and was built by David Chambers, and at the time it was burned it was owned by Thomas H. and Alfred Page, and occupied by Alden Lawrence. Seven horses were burnt in this fire.

About this time the first Fire Department was organized, of which Morey Lapham was fire-warden. As perseverance conquers all things, the town of Groton was finally induced to make an appropriation for a fire-engine for the junction, the committee appointed being N. W. Frye, C. H. Waters and B. F. Taft. The first fire-engine stationed at this village was the "Massasoit," that had seen all the service it

was capable of performing, before being purchased by the town of Groton. It was a cumbersome, unwieldy tub, and utterly incapable of coping with a fire of any magnitude. It was first stationed in a building erected for it on the south side of Main Street, on the lot now owned by Leonard J. Spaulding, and subsequently, with the Hook and Ladder truck, occupied the first floor of the town-building opposite, the original building being purchased by Charles J. Frye and moved on to his lot on the west side of School Street, between Prospect and Grove Streets, where it was for several years used as a junk-shop.

In the winter of 1860-61 Albert Worcester built, at the corner of West Main and Shirley Streets, a building first used as a liquor store, and subsequently changed by him into a hotel, which became popularly known as the "Break o' Day House." There was a stable in the rear that had formerly stood where Mead's Block now is. The store was at one time occupied by Brigham & Worcester, and the hall overhead was occupied by a temperance society and Caleb Butler Lodge of Masons. In 1864 Worcester sold the building and land to Reed & Church, and while owned by them, it was, on the evening of April 9, 1864, destroyed by fire. It would probably have been saved, had it not been for an accident caused by a stone getting into the suction-hose of the fire-engine, which utterly disabled it for use during the fire. At the same time an attempt was made to burn the mill of Phelps & Woods.

Camp Stevens ceased to be used by the Government in the fall of 1863, and the next season several of the buildings were destroyed by fire.

In the late fall or early winter of 1864 the large livery stable standing on what is now the Mead lot, on the northerly side of Main Street, was burned, with its contents, consisting of nine horses, a large number of carriages, harnesses and a quantity of hay. This building was originally erected by a Mr. Brigham, and was, at one time, owned and occupied as a livery stable by Albert Worcester. It stood back from the street about fifteen or twenty feet farther than the present line of buildings, and was large and well-constructed. Opposite it was the flag-staff of the Democratic Club, erected during the Douglas campaign of 1860. The large flag was flown from the staff to a pole at the rear of the stable. At the time the stable was destroyed it was owned by one Austin Bacon. Just west of the stable was the meat and provision market of Andrew W. Felch, which was also destroyed, with most of its contents.

January 5, 1866, the paper-mill of John N. Roberts at Mitchellville was burned. Relief was sent from this village; but, on account of the excessive cold weather and high winds, the efforts of the firemen were entirely unavailing.

April 20, 1867, the large currying-shop and part of the yard buildings of the extensive establishment of

J. B. Alley & Co. were destroyed. Very little was saved from this fire. The present currying-shop was built upon the site of the burned one immediately after. At the time of this fire there was also burned a dwelling-house, just northerly of the shop, owned by George H. Champney and occupied by John Sullivan; also the wood-shed of the Worcester and Nashua Railroad Company, on the westerly side of their road, and just south of the present tank-house. A short time after this one of the tan-houses of J. B. Alley & Co. was partly destroyed.

The following winter the buildings on the southerly side of the Fitchburg Railroad at Flannigan's Crossing, that were erected by Calvin Fletcher and John Blanchard as a brewery about ten years previously, were entirely destroyed. At the time of the fire they were owned by Leonard A. Spaulding and Thomas H. Page, and were occupied as a saw and stave-mill and cooper-shop. In this fire Mr. Spaulding nearly lost his life in attempting to save the books of the firm.

October 27, 1869, a fire broke out over the engine and boiler-rooms of the Ames Plow Company, but through the prompt and courageous action of the company's employees, with the assistance of the Fire Department of the village, the fire was subdued, after a loss of from one to two thousand dollars.

The first of what might be designated as our three great fires was discovered October 31, 1869, in the pop-corn and confectionery factory of Bacon & Rockwood, in what was at that time known as the Harmony Hall Building, standing between Main Street and the Fitchburg Railroad, easterly of the Milk Stand. We were at that time practically without a fire apparatus, the "Massasoit" being practically useless. The need of better facilities for extinguishing fire in this village had for a long time been recognized by the parent town, and a committee had been appointed to procure for us a new fire-engine, but, with a laxity that generally prevails with such a body, had failed to attend to their duty, a neglect that resulted in a serious loss to our village. This fire spread from the building in which it originated to those adjoining, and before it could be checked three were laid in ashes. Harmony Hall Building was a two-story, pitch roof, wooden structure, erected by Jephtha R. Hall, of Groton, about 1858. The upper floor was finished into a hall, which gave the name to the building, and in the early part of the war was occupied as a rendezvous for the soldiers quartered in this village. The first floor was divided into two stores, and was originally occupied by John Brown as a harness manufactory, Mr. Brown being also the lessee of the hall. Charles Livermore at one time kept a grocery-store in the westerly side, and subsequently Charles Frye occupied the entire lower floor as a furniture and undertaking establishment, removing to it from the basement of Union Hall Building, where he first begun business in this village. Mr. Frye was suc-

ceeded by Walter Wright, who removed to the Waters Building, at the corner of Main and West Streets. Latterly the Harmony Hall Building passed into the hands of Newell & Balch, who occupied the first floor as a grain-store, leasing Harmony Hall to the town as a grammar school-room, and excavated the cellar, which they used as a cheese manufactory. Henry C. Rolfe succeeded Newell & Balch in the grain business. He remained in the Harmony Hall Building until the summer of 1869, when he moved to what is now known as the Cushing Building, on Main Street.

Next to the west of Harmony Hall stood what was then known as the Town Building. It was the wooden school-house that was built on the Main Street lot in 1850, and moved on to this lot in 1865. It had been raised to a second story, and a fire-engine-room and hook-and-ladder truck occupied the first floor. The second floor, or school building proper, was used for a fireman's room and hand-room, until, in 1866, it was converted into a grammar school. The entrance to the upper hall was by a covered stairway on the east side. The southerly half of the basement was furnished for a lockup, having four cells, while the easterly half was let for general purposes, being occupied principally as a paint-shop. Between the Town Building and Harmony Hall was a ramshackled structure of a shed. East of Harmony Hall, and on the site of the present cheese-factory building, was a dwelling-house, for many years occupied by Solomon Keyes. At the time of the fire it was occupied by Noah Lee. In 1850 Ebenezer Willis occupied this building with the first store ever kept in this village. Immediately following the fire Newell & Balch purchased the town lot, and we had bright promises of a large brick block being erected thereupon. These promises, unfortunately, did not materialize, and the larger part of the territory has remained unoccupied for twenty years. The agitation on account of this fire was sufficient to stir up the Fire-Engine Committee, and April 27, 1870, the new hand-engine, named in honor of our distinguished townsman, Colonel Daniel Needham, arrived here, and in January following the new engine and hook-and-ladder house in the rear of the Unitarian Church was completed ready for occupancy. The house was formally dedicated April 1, 1870.

On the afternoon of July 15, 1870, a fire broke out in the hotel stable in the rear of Merchant's Row, owned by Mark W. Ray, of Fitchburg, and occupied at the time by Samuel Reed. In an incredible short space of time the entire row, with the exception of the dwelling-house of Mr. Coughlin, was destroyed. It was fortunate that the fire occurred in the daytime, for, had it been in the night, there certainly would have been loss of life; as it was, there were many narrow escapes. The railroad depot was on fire several times, but was saved through the exertion of the railroad employés. A steamer was sent from Fitchburg,

but did not reach here until the fire had burnt itself out. The total loss was estimated at about \$25,000, which was partly covered by insurance.

Merchant's Row was originally rightly named, for upon it nearly all of the business of the village at one time was conducted; but the fire scattered the merchants in other directions, and very little of the original business returned, and to-day it scarcely deserves its original name, which, in fact, is rapidly fading from the tongue and memory. With the exception of the stable-lot in the rear, in which the fire originated, the row stood upon land leased of the Worcester and Nashua Railroad Company.

The first building erected was Bartlett's block. It stood at the southerly end, on the present site of the Adams house. Mr. Bartlett moved here from Townshend, and succeeded Mark W. Ray, who was our first merchant tailor. Mr. Ray afterwards occupied a part of the Bartlett building as a hotel, and erected in the rear an addition which he connected with his stable. Mr. Bartlett's clothing and gents' furnishing store and tailoring shop was on the southerly half of the ground-floor, and over his store was the printing-office of George H. Brown, who moved it here from Harvey A. Woods' (now Cushing's) building. Mr. Bartlett's business is now conducted by Sampson & Brown. A Mr. Gibbon, a manufacturer of melodeons, occupied the upper part of the building. W. B. Lewis kept a stock of blank-books for sale here, and it was as agent for Mr. Lewis that Levi Sherwin first came here from Townsend in 1859. In 1861 Mr. Sherwin, who had become the owner, moved to the Union Hall building. Bartlett's Block was a two-story, pitch-roof, wooden building, with the end towards the railroad. Mr. Bartlett occupied it until the fire. The printing-office had been purchased by John H. Turner, and by him, in 1865, moved into a room in the Union Hall building, in the rear of the stores. At the time of the fire the hotel business was conducted by Samuel Reed.

The next building to the north was owned by James Gerrish, Esq., of Shirley, and known as Gerrish's Block. The original building was a barn, moved here by Mr. Gerrish, and remodeled into the block. Day's building now occupying the site, is as near a *fac simile* of the Gerrish building as the builders could produce. The southerly half of the first floor was originally occupied by Stevens' bread store, commonly then called "the bakery," although no baking was ever done there. The other store was originally occupied by A. A. Hutchinson as a shoe-store. Mr. Hutchinson sold his shoe-store to James C. Tenney, who moved it into the Warren building, where he, at that time, kept a clothing store. George G. Day, who had been with Mark W. Ray, hired the store vacated by Mr. Tenney for a refreshment saloon, and a short time afterwards bought the building of Mr. Gerrish. Mr. Gerrish had his office on the second floor, and subsequently Abel L. Lawton, real estate

agent, and George E. Underwood, insurance agent, occupied the rooms with Mr. Gerrish. There was also a barber shop on the same floor. On the third floor was Moses G. Gilpatrick's daguerreotype gallery. Probably no character was better and more popularly known in this village thirty years ago than Mr. Gilpatrick. His gallery was the first one ever established here, and his camera was faced by nearly every person connected with our early history.

Next north of the Gerrish building was what was known as the Warren Block, erected and owned by Ralph Warren, of West Townsend. It was also the third block built upon the Row—a large white structure, and one of the most pretentious then known in the village. The southerly part of the store was first occupied by a Mr. Randall, clothier, who sold out to a Mr. Heald, and he to James C. Tenney, who moved his stock of shoes from the Gerrish building, and thus laid the foundation of the business that is to-day conducted by Fletcher & Stone. The other store in the Warren Block was occupied by A. D. Simmonds, millinery goods. In the northeasterly corner of the second floor were the dental rooms of Dr. James Dennis Brown, who came here in 1859; and in the southeasterly corner were different lawyers' offices, among them John Spaulding and Joshua K. Bennett. The rear of this floor was occupied by Horace C. Hovey, watchmaker, jeweler and machinist. On the third floor of the Warren building was a hall occupied by the various societies. It was here that the Knights of Malta organized and caroused. Various temperance societies also occupied this hall, and at the time of the fire it was occupied jointly by the Good Templars and Post 48, Grand Army Republic, both of which societies lost all their property.

The Union Hall building stood where the American House now is. At the time of its erection this building was considered the largest and best store and business block in South Groton. It was begun by Henry C. Haynes in 1860, and February 10th of that year, when the frame was in the course of erection, it was blown down and destroyed by a heavy wind. Mr. Haynes then sold his interest to E. S. Clark, by whom the building was erected and completed. The northerly store in the Union Hall Block was first occupied by George H. Brown as a drug-store. This business was subsequently conducted by his son, George P. Brown, on a more extensive scale, and subsequently by Doctor Babcock. One side of the drug-store was occupied by Ed. Taft, jeweler, who sold out to A. F. Colburn. Subsequently G. C. Brock bought out both the drug-store and the jewelry business. Mr. Brock subsequently took as a partner James R. Gray, to whom he afterwards sold his interest in the business. The southerly side of Union Hall was first occupied by Levi Sherwin as a book-store, which became the nucleus of the extensive business now conducted by his sons. In the rear of the stores was a room first occupied by Edwin Sanders as a res-

taurant, and afterwards by John H. Turner, who succeeded George H. Brown in the printing business, and it was in this room that the *Public Spirit* was first printed. On the second floor of the building was Union Hall, the largest public hall in the village, and here the Congregational Society held its religious meetings previous to the erection of their church on Washington Street, in 1867. The third floor of Union Hall building was a banquet hall. The Union Hall building was purchased by Thomas H. and Alfred Page in 1868, and by them moved to their lot at the corner of Washington and Pleasant Streets, thus escaping the fire of 1870, to be destroyed in the great conflagration of 1872. The lot between Union Hall and the Warren building was unoccupied until a short time before the fire, when William A. Baker erected thereon a one-story building, a part of which was occupied by him as a harness manufactory and repair shop, and the rest by George Leavens as a saloon.

The buildings now standing upon Merchant's Row were erected immediately after the fire. The *Public Spirit* building, now standing at the corner of West and Main Streets, was built by Mr. Baker, on the site of his former building, and purchased by Mr. Turner, and moved from its former location in 1878.

August 10, 1870, about nine o'clock in the evening, a fire was discovered in the rear of the market in the basement of Harlow's post-office building, at the corner of Main and West Streets, but was extinguished, the principal loss being from water and smoke. The market at that time was occupied by A. A. Jenkins.

June 8, 1871, a fire broke out in the building used by Ames Plow Company as the paint-shop and storehouse, which was totally destroyed with its contents, together with the large shed filled with hay-tedders, which were also a total loss. The fire communicated to the main building, but was checked before any serious damage was done. Benjamin Lincoln Howe, who was fire-ward at that time, contracted at the fire a severe cold which developed into pneumonia, and resulted in his death June 24th. Mr. Howe was one of our most prominent citizens, and in his death the village met with a severe loss, he was born at Shrewsbury, Massachusetts, in 1816, and came to this village in 1855, and entered the employ of Nourse, Mason and Company. He succeeded Eusebius S. Clark as deputy sheriff, serving three terms, and was also a member of the State constabulary force.

November 28, 1871, the livery stable building belonging to Phelps & Woods, and until the fire occupied by Burgess Taylor, was entirely consumed. Mr. Taylor saved his horses, carriages and harnesses. This building stood in the rear of Merchant's Row, almost directly back of what is now the American House, and faced south. It was originally the barn at Silas Nutting's place. For several years it was the only livery stable in this village.

Between half-past eleven Saturday night, April 14,

1872, and six o'clock the next morning, there raged in this village a fire that, when the percentage of our valuation is considered and the proportion of business industries destroyed, is second in its results to no fire in New England. Within a period of scarcely more than six hours was destroyed more than forty buildings, comprising nearly all the business portion of the village, entailing a net loss of over \$100,000. The fire originated on the second floor of a three-story, brick front, wooden building, midway between Pleasant and West Streets, and, fanned by a strong westerly wind, was soon beyond the power of our feeble Fire Department to check it. In fact, it simply burnt itself out. The territory on the northerly side of Main Street, extending from Columbia Street to the Worcester & Nashua Railroad, and bounded northerly by Newton Street and land of Dennis McCarty, Harvey Wadsworth, Jason Hill and Levi W. Phelps, that, at sundown Saturday evening, contained nearly half of the wealth of our village, was a tract of smoking ruins Sunday morning. The origin of the fire is unknown. The great amount of loss sustained excited the public to sources of investigations and prosecutions, that in the end proved entirely groundless and utterly insufficient to warrant the jury before whom the case was tried, in returning other than a verdict of not guilty, without even requiring the defendants to introduce any evidence in their behalf.

If the village of Ayer should be pictured, the portrait must be her main street, and the change in the character and description of the buildings which were erected after this fire have been so great that there is nothing that one only acquainted with it as it was before could now recognize.

The lot at the corner of Main Street and the Worcester & Nashua Railroad, now owned by Washburn & Woodward, was, prior to the fire, occupied by what was known as Phelps & Harlow's building. This block was erected in 1858 by Levi W. Phelps, William H. Harlow and Charles C. Tarbell. This lot was formerly covered by a large gravel bank, an extension of the one on which Doctor Ebenezer Willis' and E. H. Hayward's houses now stand. A large part of the gravel taken from this lot was used in filling in between Main Street and the Fitchburg Railroad, principally in the vicinity of what is now Cushing's building. The first building that ever stood upon this lot was a small structure erected by the Peterboro' and Shirley Railroad Company, near what is now known as Camp Stevens, and used for a short time as the Wood's Village station on that road. On account of its fantastic color, the clap-boards being painted alternately red and white, it was dubbed "the striped pig," and in this Andrew B. Gardiner kept the post-office when it was first established at South Groton. Subsequently this building was purchased by David Chambers and moved to the easterly part of the village, and is now an ell of the dwelling-house occupied by James Gilson. The Phelps & Harlow building

was at first occupied on the first floor, first by a grain store and afterwards William H. Harlow, then Harlow & Bennett, and later Harlow & Stuart, as a grocery store. The westerly half of the basement was occupied as a market which was kept by various parties.

On the second floor, at the time of the fire, was the office of John E. Parsons, M.D., and the office and dwelling of W. H. H. Hines, dentist. On the third floor was the hall occupied by the Caleb Butler Lodge of Masons, of Ayer, and the St. Paul Lodge of Masons, of Groton. The mystic symbol of these lodges upon a gable glass window was one of the most conspicuous objects of the building. In the rear of the Felch & Harlow building was the lumber-shed of Phelps & Woods, of about the same size and appearance as the one now standing there. On the other corner of West and Main Streets was the building of Thomas H. Page, occupied at the time of the fire by C. W. Mason, dry-goods, and W. Wright & Son, furniture. The store then owned by Mason was formerly owned by W. H. Sherman, and previous to that by Jehiel Todd.

Next easterly of Page's building was that in which the fire itself originated. This building was constructed of what, at Camp Stevens, was the restaurant of Charles J. Frye and William B. Fenner. It had been raised to a second story and a brick front added. At the time of the fire the first floor was occupied by J. F. Boynton, stoves, tin and hardware. Mr. Boynton had succeeded Samuel Reed, who in turn had succeeded Reed & Whitney, the pioneers of that business in this village. The third and a part of the second floor was occupied by L. B. Tuttle, furniture and undertaking establishment. The larger part of the second floor had formerly been a saloon, but, on account of the prohibitory legislation and vigorous prosecution of the State constabulary, was then closed to business.

The next building to the east was Mrs. E. M. Nutting's block, which stood at the corner of Main and Pleasant Streets. It was a two-story frame building with basement, with a broad flight of steps in front. In the basement was Franklin G. Lufkin's fish market, the entrance to which was upon Pleasant Street. The first floor was occupied by Mrs. Nutting's millinery parlors, her family occupying the rest of the building as a residence. In this store the once well-known Workingmen's Union Store was conducted.

On the easterly side of West Street, in the rear of Thomas H. Page's block, was the confectionery store, restaurant and dwelling-house of Abbott A. Jenkins, over which was Jenkins & Wright's Hall. In the rear of this, facing Pleasant Street, was a two-story tenement-house, then occupied by two families, Luther Osborn on the second floor, and Mrs. Rebecca K. Bigelow, now Mrs. Leonard J. Spaulding, on the first floor. This latter building was erected as a carriage and paint-shop, and subsequently the first floor was

occupied by Taft & Rich's tag factory, and afterwards as a boot and shoe repair shop. Subsequently the whole building was finished as a tenement-house. The site of this building is now occupied by the residence of Daniel W. Fletcher. Between West and Pleasant Streets, where the residence of William U. Sherwin now is, was the dwelling-house then occupied by Mrs. Sewall Gates, formerly Mrs. William S. Nutting. This was one of the oldest buildings in the village. At the corner of Main and Pleasant Streets was the Union Hall building. At that time the west half of first floor was occupied by L. Sherwin, Yankee notions and books. The other store had been occupied by James C. Tenney since the August previous, J. C. Brock having moved into the new brick block.

Adjoining Union Hall building was the large brick block of four stories that was erected by Thomas H. and Alfred Page in 1870. It was thought that the conflagration could be stopped here, but as the coverings were of wood they soon caught fire and all efforts to save it proved unavailing. In this block J. C. Brock occupied two connecting stores as apothecary and jeweler, having removed there from the Union Hall building; next to him was the shoe-store of John S. Fernald, and adjoining that the hair-dressing saloon of Joseph St. Catrina. The upper part of this building was constructed for a hotel, but at the time of the fire had not been occupied.

At the corner of Washington and Main Streets, adjoining Page's Block, was the handsome three-story building of George W. Stuart. Mr. Stuart occupied the principal part of the first floor with his general store. The balance of that floor was occupied by Doctor Ebenezer Willis, apothecary and town liquor agent, and E. A. Markham, watchmaker and jeweler. The site of Mr. Stewart's building was that occupied by the two first stores ever conducted in this village. The original building was twenty-two by thirty, with a room in the rear fourteen by eighteen, and was occupied by Joseph H. Gardoer for store and post-office. Subsequently the premises were purchased by David Chambers, who, for a time, conducted the only store in South Groton. This building soon after passed into the hands of Levi Goss, of West Boylston, who leased it to Harvey A. Woods, by whom it was occupied while the building opposite, now known as Cushing's Block, was being erected. Mr. Woods moved into his new building July 5, 1853, and Mr. Fanning occupied the site vacated by Mr. Woods a short time. In January, 1855, George W. Stuart came from Worcester, and located where Mr. Fanning had left. He raised the building, making a basement and attached an ell for a tenement, and converted the whole front of the building to store purposes. In the basement thus formed was located one of our earliest markets in the village. This building was moved to the rear when the new block was erected.

Immediately in the rear of Union Hall building was a dwelling-house that formerly had stood at the

corner of Pleasant and Main Streets, built by Wm. S. Nutting, and subsequently owned by David Chambers, and beyond that the handsome residence of George G. Day, and farther north, on the same street, the large two tenement dwelling-house of Levi Sherwin, which at the time of the fire was occupied by Mr. Sherwin and John Burns. Immediately in the rear of the brick block was a large barn of Thomas H. Page's, and near it on Washington Street was a dwelling-house owned by him. It may be interesting to here note that the lot occupied by this latter building was the one from which the dwelling-house on the westerly side of West Street, in the rear of Mr. Phelps', was moved one night in 1860, on account of some legal controversy between the owner of the building and the owner of the land.

Just north of this lot, on Washington Street, was the large dwelling-house and barn of Stephen Barrett, and next north of that the two-story brick school-house, occupied by a primary and the intermediate schools. On the opposite corner of Main and Washington Streets was the yellow cottage-house formerly owned by John Park, and occupied at the time of the fire by offices, the principal of which were those of Doctor B. H. Hartwell and John Spaulding, Esq. In the rear of the Park house was a barn, and beyond this the dwelling-house owned by Samuel W. Dickinson, and on the corner of Washington and Newton Streets the dwelling-house of Mary A. N. Champney. Next east of the Park house on Main Street was the cottage-house owned by Andrew W. Felch. The site of the present Meade Block was then occupied by a large building, the first story of which was brick, and occupied by Wheeler & Brown, who were the successors to Robbins & Ames, who immediately succeeded Harvey A. Woods' general store. The upper part of the Mead building was occupied by Asher Peabody as a boarding-house. This building was built in 1867 by Woods Brothers, principally from the material of the Universalist meeting-house of Harvard. The Mead lot was originally occupied by Albert Worcester's stable, so called, which was destroyed by fire in 1864.

Where the Fillebrown building now stands was a two-story pitch-roof wooden building, owned by Harvey A. Woods, and at the time of the fire occupied on the first floor by A. D. Simmons, dry and fancy goods, and J. M. Bruce, musical instruments. On the second floor was the office of F. A. Worcester, Esq., dental rooms of J. D. Brown and tailoring establishment of E. A. Flagg and Horace C. Hovey, watchmaker; the hall overhead being occupied by the Odd-Fellows and Post 48, Grand Army Republic. It was upon this lot that the old brick school-house formerly stood, and at the southeast corner, for a long time, was the dwelling-house occupied by John Toughy, that to make place for Woods' block, Mr. Woods moved on the "Flat-Iron Square," so called, now occupied by the hose-house of the Alfred Page Hose

Company, a spot that has always been a favorite for squatters. The Toughy house remained there long enough to be a repeated source of complaint from the public, and was finally moved on to the lot on the west side of the Peterboro' and Shirley Railroad, where it now stands, and afterwards passed into the hands of Mrs. James Hosley, the present owner.

In the rear of Woods' Block at the time of the fire, there stood a two tenement block, that was originally built for a shoe shop. On the lot next west of Harvey A. Wood's Block, was the dwelling-house of Nahum Sawyer. This building stood well back from the street. Upon the southwest corner of the Sawyer lot there stood for many years a small building occupied as a boot and shoe repair shop. This building was moved across the railroad a short time before the fire, and thus escaped the conflagration. It now forms a part of George G. Day's dwelling-house, on Forest Street. Next east of the Sawyer lot was the Unitarian, or, as it was sometimes called, the White Church, the first church edifice erected in the village. It was quite a handsome structure, faced south, and approached by a broad flight of steps. In its belfry was the only bell of the village, whose notes pealed forth until a few moments before the spire fell. In the rear of the church was the new engine and hook-and-ladder house, erected by the town of Groton in 1870, to take the place of the town building destroyed in the fire of November, 1869. In the second story of this building was Colonel Needham Hall, used by the engine company for their meetings. At the corner of Columbia and Newton Streets was a two-story, French roof dwelling-house of Joel E. Fletcher, the first structure of the kind erected in this village. In the rear of Mr. Fletcher's, facing Newton Street, was the cottage-house of Henry H. Bliss. The fire crossed Columbia Street and there destroyed a two-story dwelling-house owned by Joel E. Fletcher, and a long building that was erected for Bacon & Rockwood, candy manufacturers, after they were burnt out in the fire of 1869. At the time of the great fire this latter building was used principally as a harness shop. A stable of Mr. Fletcher's was also burned. The amount of property destroyed by this fire was in the vicinity of \$250,000.

The first person to begin business upon the burnt district was Alonzo D. Simmons, who purchased from the Stevens Machine Company a small building, for a time used as an office by the chair company. He moved this building on to the Andrew W. Felch lot, and was ready for business before the embers of the burnt territory had done smouldering. This building has recently been moved on to the Rufus Brock lot, on the easterly side of the old road to Groton. The first new building erected upon the burnt territory was Harvey A. Woods' three-story, mansard-roof block, which was finished ready for occupancy in the early fall.

This block of Mr. Woods' also had the distinction

of being the first new building to be destroyed by fire. It was burned Monday morning, June 9, 1879, the lot remaining vacant until the next year, when Abel Prescott's building, that formerly stood in the square west of the brick freight house, was moved on to it. In 1886 Mr. Fillebrown erected the three-story building now occupying that site.

At the present day there are only two lots made vacant by the great fire upon which buildings have not been erected, and they are the Samuel W. Dickinson on Washington Street and the George G. Day lot on Pleasant Street, both of which remain to-day as they were the morning following the fire.

Immediate steps were taken to rebuild. Besides Mr. Woods' block, Mead's brick block, the brick block of Thomas H. and Alfred Page and that of Mrs. E. M. Nutting were completed the following fall. The last lot to become occupied was that of Thomas H. Page, at the corner of Main and West Streets, onto which, in April, 1878, Mr. Turner moved the *Public Spirit* building from Merchant's Row. Immediately following the fire there was a great demand for locations in which merchants could establish themselves. The Fitchburg Railroad Company generously gave the use of the brick freight-house, and for a while it seemed as though Merchant's Row was destined once more to come to the front as a business centre, but upon the rebuilding of Main Street the former occupants returned.

Monday afternoon following the fire, a citizens' meeting, presided over by Henry C. Rolfe, was held at the brick depot, and the following committee were appointed to solicit aid for those who had suffered by the fire: Thomas H. Page, Calvin D. Reed, Harvey A. Woods, James C. Tenney, Leonard J. Spaulding, Rector T. Bartlett, Abel L. Lawton, Oliver K. Pierce and Charles Brown. By this committee the sum of \$2429 was raised and distributed to those who sustained losses in the fire, proportionately. Beside this a large sum of money was raised and distributed by private parties. The same meeting authorized the above committee to petition the selectmen to call a town-meeting, and draw up a statement of the extent of the disaster, and to send circulars to all the religious societies in the surrounding towns, with the request that collections be taken in all the churches, for the benefit of the homeless sufferers, who, in many instances, had lost all their possessions. It was also voted that as soon as all the losses were ascertained, the Legislature be petitioned to ask an abatement of the State and County taxes for the present year.

The first relief sent was by several of the Harvard Shakers, who contributed seventy-five dollars in money and a lot of provisions and cooked food. They also kindly volunteered the use of their teams to any one needing them, and canceled a number of bills due them by parties who had suffered by the fire. At this same meeting was also considered a plan of extending Main Street farther to the north. It is to be regretted

that this latter plan did not materialize, as the street would thus have had two sides practical for building, and the value of the property upon it be greatly enhanced.

July 15, 1872, the saw-mill formerly the pencil factory of Charles Snow, of Pingry Village, was burned.

May 3, 1873, Prescott's building in Railroad Square was almost entirely destroyed. The basement was occupied by a Mr. Penaro, shoe-shop, confectionery and fruit. On the first floor were Prescott & Hill, grain, and B. H. Graves' meat market. The second floor was occupied by Mr. Mudgett, photographer.

August 4, 1873, the brick mill of William Mitchell, at Mitchellville, occupied by him as a shoddy manufacturing establishment, was entirely destroyed, throwing about fifty employees out of employment. It was believed that the building would soon be rebuilt and the business resumed. The plant has recently been purchased for a rubber factory, and will soon enter upon a new era of its history.

January 14, 1874, a fire caught in the cellar of Mead's Block on Main Street, occupied by Brown & Kittridge, who also occupied the easterly half of the first floor, where the National and Savings Banks now are. The fire was confined to the cellar, the chief damage being from smoke and water.

June 18, 1874, a spark from their furnace set fire to the roof of the pattern-shop of Briggs & Kelley. The roof was burned off, and the contents, consisting of valuable patterns, were considerably damaged.

October 25, 1874, the barn of Michael Barry, near his dwelling-house on the northerly side of Shirley Street was, entirely consumed, and the fire also communicated to the dwelling-house, to which it did but slight damage.

February 4, 1875, a fire was discovered under the floor of Wood's Block, on what is now the Fillebrown lot on Main Street. There was no cellar under this part of the building, and the origin of the fire was unquestionably incendiary. It communicated to the central part of the store, then occupied by the post-office and E. H. Hayward, insurance agent and musical instruments. The damage was slight.

February 6, 1875, as the result of storing hot ashes in the hall-way, the Haynes house, on Washington Street, at that time owned by Simeon Burt and occupied by John S. Clark, was again visited by the fiery fiend. The damage was slight, being principally confined to the attic.

About 1876 a barn on the easterly side of West Street, occupied by William Parsons was totally consumed with its contents. This barn had formerly stood on Pleasant Street and was a part of the home place of William S. Nutting.

May 27, 1876, the building known as the Stoue Hall, situated on the northerly side of West Main Street, a short distance from Waste Brook, was totally destroyed.

May 8, 1877, a building standing where George H.

Hands' house now is, at the corner of Pine and Main Streets, and occupied by Albert F. Fletcher as a grocery-store, was destroyed by a fire which was probably of an incendiary origin.

July 27, 1877 a fire caught in the clothing and boot and shoe store of J. C. Tenney, in Page's Block, now occupied by Fletcher & Stone. Had it not been discovered seasonably, we would again have been visited by a serious conflagration, certainly by the loss of this building; as it was, it was only through prompt and courageous action that the flames were subdued.

October 18, 1877, the marble-cutting shop of N. A. Spencer, situated near his dwelling-house, on the Harvard road, was burned with its contents.

July 6, 1878, the dwelling-house of Mrs. Michael Hart, situated opposite the Catholic Cemetery, and on the westerly side of the Peterboro' & Shirley Railroad, was burned.

August 4, 1878, a fire destroyed the barn of William McHugh, on the westerly side of the Peterboro' & Shirley Railroad.

April 1, 1879, the large barn at the corner of Groton and Pleasant Streets, on the site now occupied by Thomas Donahue's dwelling-house, was entirely consumed with its contents, consisting of hay, wagons, harnesses and two horses owned by Charles Blood.

June 9, 1879, the three-story mansard-roof building known as Wood's Block, then owned by Alfred Page, standing on Fillebrown's lot, was totally consumed. The fire was of mysterious origin, many circumstances tending to show that it was incendiary. At the time it was occupied by J. F. Boynton, hardware, tinware, stoves, etc., and F. P. Carlton, grocer, on the first floor. On the second floor were the law-offices of Frederick A. Worcester, James Gerish and George J. Burns, Henry Stone, dentist, and William H. Lane, photographer, and Horace C. Hovey, civil engineer, who also occupied a room on the third floor. The Good Templars and the Ancient Order of Hibernians occupied the halls in the upper story. Great credit is due to the firemen, through whose efforts the fire was confined to the building in which it originated. Mead's Block was considerably damaged.

March 25, 1880, the town lost one of its best known and most interesting landmarks by the destruction of the Calvin Fletcher red house, so called. This building was nearly opposite the pumping station, on the Harvard road. At the time of the fire it was owned by James McCarty. This building was over 100 years old at the time it was destroyed.

March 27, 1880, a fire started in the wood-shed of the dwelling-house then owned and occupied by R. N. Kendall, situated on the southerly side of Prospect Street, and now owned by Augustine A. Farr and occupied by William A. Wright. The fire communicated to the house, the ell was nearly consumed and the roof of the main house burned off.

May 10, 1880, about two o'clock in the afternoon, a fire was discovered upon the roof of what at that time

was known as Duffy's Hotel, an establishment that had previously been known as the Luke House, and prior to that time as the Ross House. This building stood on the easterly side of Tannery Street, where Chandler's machine-shop now is. The building was practically totally consumed. It was occupied at the time of the fire by John Duffy, dealer in ardentia.

May 17, 1880, the house of George Little, situated on the northerly side of the Stony Brook Railroad, near Lewis Lapoint's, was entirely consumed, the family barely escaping with their lives.

September 4, 1880, the cottage-house of Catherine Barry, between the road from Ayer to Wood's Village and the Peterboro' & Shirley Railroad, was entirely consumed.

December 20, 1880, the northerly of Alfred Page's two mills was totally destroyed by fire. At the time of its loss it was occupied by the Union Heel Company and Aaron Patten, manufacturer of cabinet work, neither of which again resumed business in this town.

This was followed February 25, 1881, by the destruction of the southerly mill, thus completely wiping out that extensive plant. At the time of the fire, George Stevens, machinist, occupied about one-third of the first floor, and his loss was a very serious one to him, as he had no insurance at the time and much of his machinery was very valuable.

April 16, 1881, a large farm barn at Mitchellville, owned by Mary Page Heath, was destroyed by fire.

February 7, 1882, the two buildings standing on the northerly side of Main Street, between Nutting's block and the *Public Spirit* building, were destroyed by a fire that originated in the restaurant of William Parsons. These were two one-story buildings, the easterly of which was owned by Rector T. Bartlett, and at the time of the fire occupied by John D. Shaw, stoves and tinware. These two buildings stood upon the site of the Reed building, in which originated the great fire of April, 1872.

May 4, 1882, the barn of John B. Baggin, on the northerly side of Sandy Pond and easterly side of Snake Hill road, was destroyed with several head of cattle.

June 25, 1882, the wooden bridge of the Peterboro' & Shirley Railroad across the Nashua River near Wood's Village was entirely consumed. This bridge was erected about twenty years previous at a cost of about ten thousand dollars. It was a Howe truss covered bridge. The fire took place Sunday morning. A foot-bridge was put across the river during the day, and on Tuesday a pile-bridge was completed to admit the passage of trains, which continued in use until the present iron structure was put in place. Monday forenoon the construction train, loaded with piling for the bridge, was run into by the Worcester & Nashua freight near the Main Street crossing, and the two roads were thus blockaded for several hours.

October 14, 1882, the building formerly occupied by Phineas Nutting near Pingry Village was destroyed.

The large building erected by Andrew Atwood on the easterly side of Columbia Street in the fall of 1876 as a boot manufactory, and at the time of the fire used as a storehouse and skating rink, was entirely consumed by fire on the night of January 20, 1884.

September 13, 1885, the dwelling-house of Alexander Falconer at Sandy Pond, where Benjamin F. Taft's handsome summer cottage now stands, was entirely destroyed. The building was unoccupied at the time.

April 12, 1886, the story-and-a-half two tenement house on the southerly side of Main Street, known as the Ann Park house, was entirely destroyed.

May 7, 1886, the Fire Department was called during the night to two fires, in what is known as the Fuller property, owned by Oliver Pierce, on the southerly side of Main Street, and occupied by Gardner W. Randlett as a dwelling-house and livery stable. The first call was at 1.30 A.M., for a fire in the ell of the dwelling-house, which was promptly extinguished. At 3.30 the department was again summoned, this time to a fire in the stable. This time the fire had gained such headway that the firemen were unable to cope with it in that quarter, and turned their attention to saving the dwelling-house, and with their usual good judgment and indomitable pluck accomplished wonders with the facilities that they had in hand. The principal part of the dwelling-house was saved. In this fire several horses were burned, and quite a number of carriages and harnesses.

December 2, 1886, about twelve hours before the time that Dr. Abbott, of the Health Department of Massachusetts, was expected to visit Ayer, with respect to the alleged nuisance of the Beader Glue Company that occupied the Ames Plow Company building, their buildings were discovered to be on fire, and the flames had gained such headway that the department directed their efforts to the saving of the surrounding buildings. While the loss of the business then conducted was not serious, still our village, by the loss of that extensive plant, sustained a serious blow.

May 12, 1887, the unoccupied cooper-shop of Augustus Lovejoy, between Main Street and the Fitchburg Railroad, near his dwelling-house, was entirely consumed. It is claimed that the fire originated from the locomotive of the Fitchburg Railroad.

July 4, 1887, the barn of Fred. B. Felch, on Cambridge Street, was burned with a stock of carriages and harnesses that were stored therein.

May 27, 1888, the cottage-house of Mary Quarry, on the northerly side of West Main Street, was entirely consumed. The fire also communicated to the two tenement house just westerly, where it was checked after considerable damage to the building. These buildings were among the oldest erected in that part of our village, the material for which was brought from Groton from a building that at one time stood on Main Street.

November 5, 1888, a fire was discovered in the suspender factory of James R. Gray, on the southerly side of Fletcher Street, which, however, was extinguished after having burned through the north-easterly corner of the building and damaging the contents largely from smoke and water.

December 30th, following, this building again took fire, this time the loss being total.

October, 1889, the dwelling-house of William McHugh, on the westerly side of the Peterboro' and Shirley Railroad, was entirely consumed by fire.

CHAPTER LVII.

A YER—(Continued).

New Town—Agitation for Set-off—Incorporation.

THE agitation that resulted in the set-off from the towns of Groton and Shirley of the territory incorporated by the Legislature of 1871, as the town of Ayer, was the result of a desire for separate municipal existence, that from the first settlement of the village always lay near to the surface, and required but little agitation to make prominent.

The South Groton Literary Association, organized October 5, 1855, and which was, doubtless, the earliest organization of the kind at South Groton, at a meeting held December 14, 1855, discussed the following question: "Would it be good policy for the inhabitants at South Groton to petition the Legislature, the coming winter, to be incorporated as a new town?" Affirmative, Nathan W. Frye and Hibbard P. Ross; negative, Benjamin F. Felch and Ebenezer Willis. After a somewhat spirited debate, the question was decided on its merits in the affirmative, with but two "dissenting votes." It was then voted to appoint a committee of five to take the matter of the division of the town into consideration, and report at an adjourned meeting two weeks hence. The chair appointed as that committee Silas Nutting, Deacon John Pingry, Calvin Fletcher, Benjamin F. Felch and Abel Prescott. December 26, 1855, the committee reported "what progress they had made, and on motion were granted further time to make final report." I am unable to learn from the records whether a final report was ever made, or just what progress the committee reported. At about this time a petition was prepared and extensively signed for the incorporation of a new town, but it was never presented to the Legislature. February 2, 1859, the same society agitated the following: "Resolved: that it is not expedient for the inhabitants of South Groton and vicinity to petition, or in any way attempt to obtain an act of incorporation as a distinct town." Affirmative, B. F. Felch and Charles Jacobs, Esq.; negative, Ebenezer Willis and Abel Prescott. The affirmative question prevailed. For the next ten years

the "new town" project always remained to us an interesting topic, finding abundant supporters. There always existed a feeling that the people in the south part of the town were never remembered impartially in any respect, except, perhaps, in the question of taxes. It was easy to induce our people to believe that we did not receive the full measure of the benefit resulting from the town patronage. The erection here, in 1867, of an entirely inadequate school building, at a cost of seventy-five hundred dollars, believed to be grudgingly appropriated, and the immediate building of an unnecessary thirty thousand dollar high school building at the Centre, did not, in any sense, appease the rising spirit of dissatisfaction. The distance from the town centre was a source of impediment to our citizens who desired to attend town-meeting. We keenly felt the want of a high school, public library, public building, side-walks, street-lamps and other common perquisites of a town centre.

The particular agitation that resulted in our municipal birth may be traced directly to the following communication printed in an edition of the *Public Spirit* under date of August 5, 1869. The initials signed to it can be readily translated into Edmund Dana Bancroft.

"A PLEA OF SECESSION.—It seems to one of your readers that the time has arrived when the citizens of this part of the town of Groton should agitate the subject of separation from our good old grandparents at the Centre. Any one who has observed the progress of events in our village for years past can but have seen that it was only a question of time when there should be a final dissolution.

"A diversity of interests, the distance from one village to the other, are constant reminders that we are not suited to each other, and that a divorce must be decreed. Let us enumerate some of the disadvantages of the present situation. A citizen of this village is obliged to go four miles to deposit a ballot, and from past experience we know that it is impossible to get enough voters to travel that distance and properly represent our interests. It is very well known that, numerically, we of this village are a majority of the town, but from the aforesaid cause we are never represented by more than one selectman, and sometimes not even one.

"It is very evident, therefore, that the popular idea of the town officers representing the people of the town is a fallacious one, so far as we are concerned.

"Our streets need attending to; sidewalks ought to be built; in fact, we are suffering for many of those conveniences and improvements which we could and should have were it not for the oninous two to one majority on the board of selectmen. Again, nearly a year ago a committee of five were appointed to procure a new fire-engine for the use of their village. Four out of the five were carefully selected from the centre, and the result is no action can be had from that committee. The chairman never has even called the members together for consultation. Is there not enough 'public spirit' in this village to set the ball in motion, and secure our just rights or a final separation?"

"E. D. E."

As voicing the becoming general wish for a new town, the *Public Spirit*, in its edition of November 10, 1870, says, editorially: "We understand that there is a growing desire with the citizens of this village to have this place set off and made a new town. The columns of this paper would be a proper place to discuss it, and we should like to hear from the people here on this important point."

In the next edition of the paper appeared the following communication :

"Mr. Editor :—The right name for the new town is a matter of more than usual importance here. Groton Junction is one of the most important railroad centres in the county, as such it is known far and wide. Its success as a place of population and business is owing to the fact of its being a railroad centre; that is, it is Groton Junction. Why not call the new town Groton Junction then? That will keep the old name, with an addition that means something. This means the very thing which has given the place an existence, and upon which the growth and prosperity of the new town will depend. To change it would be to make a great deal of trouble and uncertainty in railroad connections. Unless a change for the better can be made, will it not be best to let well enough alone?"

(Signed)

"PHILE."

The number of inhabitants in this village as furnished by the census marshal in 1870 was 1600.

Before the Legislature of 1871 convened, the sentiment in favor of the new town had assumed such proportions that a petition was prepared, which received the signatures of 270 of the citizens residing within the limits of the proposed new town. This petition, which was presented in the House by Albert Leighton, of Pepperell, asked that the territory be set off and incorporated under the name of Groton Junction. The following is the full text of the petition :

"To the Honorable Senate and House of Representatives of the Commonwealth of Massachusetts in General Court Assembled: We the undersigned legal voters of Groton, Shirley and Littleton, represent that the public exigency requires that we, with the other inhabitants of the territory hereinafter described, be incorporated into a town by the name of Groton Junction, comprising a part of each of the towns above named, and to be bounded and described as follows, namely: Beginning at the northwesterly corner of said territory at the mouth of James Brook, so called, in said Groton and running thence southerly by the Nashua River, until it comes to the town line of Harvard; thence easterly by said Harvard town line, until it comes to the Littleton town line, thence northeasterly in a straight line to a stake in stones, at a point where the southerly side of the County road leading from said Groton by the Ridge Hill Tavern, so called, to Littleton Old Common, so called, intersects the northwesterly town line of said Littleton; thence westerly in a straight line to the point of beginning.

"And your petitioners respectfully request that the said town of Groton Junction be incorporated by law, with the territory above described.

"Groton Junction, November 10, 1870."

Harvey A. Woods had the distinction of being the first signer.

"At a meeting of the inhabitants of Groton, held January 3, 1871, to take such action as may be deemed expedient in relation to the proposed division of the town. It was voted: not to oppose the division of the town; also voted that a committee of three persons be selected from that part of the town not embraced in the territory which is proposed for the new town, to be joined to the selectmen for the purpose of considering, in connection with a committee of the petitioners for the new town, all questions that are involved in the petition, and that they be requested to report at an adjourned meeting of the town, and Henry A. Bancroft, John Gilson and Willard A. Torrey were chosen said committee to be joined to the selectmen."

A meeting of the citizens of Groton Junction was held, and the following committee chosen to take the census of the proposed new town: Peter Tarbell,

Rufus R. Fletcher and Benjamin L. Howe, and at an adjourned meeting they reported the following figures: from Shirley, 90; Littleton, 31; Groton, 1890; total, 2003. In speaking of this report the *Public Spirit* of January 5, 1871, says: "The new town will then have more inhabitants to start with than any town adjoining it now has, with a much better chance for growth. The valuation of the district to be set off is about one-quarter of that of the town of Groton, and it is estimated that the new owe the old about \$10,000 towards the town debt."

At an adjourned town-meeting held at Groton, January 24, 1871, the committee chosen January 3d reported as follows:

The committee chosen under Article III., January 3, 1871, offered their report, which was read upon motion by Abel Prescott, and voted that the town do not oppose the petitioners: 191 yeas, 123 nays. Voted: to adjourn and meet at Union Hall, Groton Junction, three weeks from this day, February 13th, at one o'clock: 168 yeas, 138 nays.

It would be seen that the original petition prayed that the new town be named Groton Junction. This, however, did not meet with entire approval, as there were some objections on the part of the citizens of the old town to having the new town retain the name of Groton as a part of its title, and many of the citizens of the village believed that our material prosperity would be advanced by assuming a name entirely new, in order that we might be distinguished as a town from the village which was formerly known only as a part of Groton. January 26th, a correspondent in the *Public Spirit* suggested the name of "Ayer as easy to spell and speak; not likely to be confounded with any other town in the state; associated in the minds of every one in the sweet strains of Robert Burns," and relieved the citizens of the old town of their objections to having the new town keeping the name of Groton Junction.

A hearing before the Legislative Committee on Towns was had January 27th, and at that time the petitioners who were represented by their committee and John Spaulding, Esq., their counsel, presented a bill which he had previously prepared. It followed, practically, the terms of the description in the petition, excepting that the easterly line did not include any part of the town of Littleton. George S. Gates, chairman of the Board of Selectmen of Groton, represented that town at the hearing, but did not raise any serious objections to granting the prayer of the petitioners. The town of Shirley, at a town-meeting, consented to the division, making the middle of Nashua River the dividing line, on condition that the new town pay to the town of Shirley \$500, as its share of the town debt, and to secure the payment of that sum, Abel L. Lawton and Robert P. Woods gave to the town of Shirley their personal bond. The objection on the part of the town of Groton to the petitioners' line was due largely to a misapprehension as to its loca-

tion. At a meeting of the citizens of Groton, held January 16th, the expression of those present would seem to indicate that they believed that the new line would embrace the farm of Nathan C. Culver within the new town. February 1st, a meeting of the petitioners was held in the Washington Street School-house, and they unanimously voted that the name of our new town be Ayer. The action of this meeting was communicated to the Committee on Towns, and the name of Groton Junction, wherever it occurred in the bill, was struck out and the name of Ayer inserted. There being some objections raised to the new name, February 8th another meeting of the petitioners was held in the Washington Street School-house and was largely attended, the purpose being to come to a clear understanding about the name that the new town should assume, and the following resolution to put a quietus upon all opposition to the name of Ayer was unanimously adopted :

"RESOLVED: That we learn with regret that some of our citizens are making efforts to still retain the name of Groton Junction for our new town; that we look upon all such efforts as injurious and directly opposed to the best interests of our proposed new town, and to the interest of a large majority of our petitioners."

The name of Ayer thus adopted by the new town, however dear it may be on account of its association with the "sweet strains of Robert Burns," was not, however, intended to honor the Scottish river, but was in compliment to Doctor James Cook Ayer, a prominent and esteemed citizen of the city of Lowell. The action of the meeting of the petitioners held February 1st was duly communicated to him and acknowledged by him, as appears by the following letter:

"LOWELL, 6th February, 1871.

"ABEL PRESCOTT, ESQ., for the committee of petitioners, etc., Groton Junction, Massachusetts :

"Dear Sir:—I have the honor to receive your favor of the 2d inst., informing me of the actions of your fellow-citizens in the adoption of my name, 'Ayer,' as the name of your new town, with Mr. Felch's certificate as clerk of the meeting.

"I pray you, Sir, to convey to your fellow-citizens my appreciation and acknowledgment of the high honor they seek to confer upon me and my sincere hope that the future will present no occasion to regret the choice which they have made.

"I should be insensible to the influences that govern men, if the partiality of your citizens did not awaken in me an interest in the well-being of 'Ayer,' and I assure you, Sir, that I shall wait with readiness to aid therein as opportunity or occasion may arise.

"With sentiments of personal esteem, I have the honor to remain,

"Your obedient servant,

"JAMES C. AYER."

Doctor Ayer had stated, when the subject of the town's adopting his name was first proposed to him, that he knew what was due from him in case such an honor should be conferred upon him while living. Subsequently he stated to some gentlemen of the petitioners' committee, that he thought it best, in view of the fact that they had reason to expect some contribution from him, when the matter in which they are engaged should be accomplished, and in consequence of what he had previously said, he wished to define the sum early, lest some rumors

of widely different amounts circulating in the community might, in the future, leave him in a false position. He believed that public rumor, if left to itself, would be liable to give very large, as well as very small sums, and he would, therefore, in order to be subjected to no importunities, name his views to the committee, which he did. He stated further that, in view of the uncertainty of life and thought, and wishing to make what he said secure, he submitted to them a document to that end, but protested against either favor being as a consideration or trade.

On the 14th of February, an Act of Incorporation was passed by the Legislature, and received the signature of Governor Claflin the succeeding day.

In accordance with the provisions of the Act of Incorporation of February 21st, John Spaulding Esq., issued to Peter Tarbell his warrant, calling a meeting of the inhabitants of the new town to be held at Union Hall, Monday, the sixth day of March, at ten o'clock in the forenoon: "To choose all such town officers for the year ensuing, as towns are by the law authorized and required to choose to their annual meeting." This first town-meeting was well-attended, and great interest was manifested in the town's organization. Edmund Dana Bancroft had the distinction of being chosen our first moderator. Divine blessing was invoked by Rev. J. S. Haradou, pastor of the Baptist Church. Andrew W. Felch was elected town clerk; Ebenezer C. Willard, first selectman. The meeting then adjourned to Tuesday morning, at which time the balance of the town officers were elected as follows: selectmen, Lewis Blood, Oliver K. Pierce; assessors, Gibson Smith, Joel E. Fletcher, Alfred Page; town treasurer, George W. Stuart; road agent, Nathaniel Holden, with Emerson Hazzard and Thomas H. Page, assistants; constables, Peter Tarbell, Emerson Hazzard, Calvin D. Reed; school committee, Charles Brown for three years; Edwin H. Hayward, two years; Benjamin H. Hartwell, one year.

At a caucus of the citizens of the town, held some time prior, the following committee of arrangements having in charge the exercises commemorating the incorporation of the new town was elected: Abel Prescott, Harvey A. Woods, Abel L. Lawton, Pembroke S. Rich, Leonard J. Spaulding, Jesse J. Angell, Benjamin F. Felch, E. Dana Bancroft, Thomas H. Page, Levi W. Phelps, Ebenezer Willis, Henry A. Brown, Andrew W. Felch.

The exercises celebrating the birth and organization of the new town were held in Union Hall, Monday afternoon and evening, March 6th. The invited guests were met at the station by the committee of arrangements and escorted to the Needham (now Union) House, where dinner was had. They then proceeded to Union Hall. The hall was elaborately decorated with laurel and evergreen, hung with pictures and draped with flags, and mottoes were displayed—on one side of the entrance being the words, "United in All That is Right," and on the other, "Opposition

Thomas H. Page

Sifred Page

to Any License of Wrong." On the left of the hall, in large letters of evergreen was the word "AYER," and the words, "Organized March 6, 1871." The Ayer Band furnished excellent music, and a choir of home talent gave some fine singing during the exercises. Abel Prescott presided. The address was given by Dr. Ayer, and speeches were made by Col. Daniel Needham, of Groton, Col. Charles H. Taylor, private secretary to his excellency, Governor Claflin, Rev. Crawford Nightingale, of Groton, Adjutant-General Cunningham, Charles Cowley, Esq., Hon. Tappan Wentworth and Rev. B. F. Clark, of Chelmsford. A poem was read by Hon. George A. Marden, of Lowell. The celebration extended into the night. In the evening there was a grand banquet, in which addresses were made by Abel Prescott, Nathan W. Frye, Ambrose Lawrence and D. D. Gove. A ball closed the festivities of the day in a most enjoyable manner.

As an extended sketch of the life of Dr. Ayer and his son Frederick Fanning Ayer, are given in another part of this publication, I can do no more than refer the reader to them, for life of the man whose name we bear, except to say that it is interesting to note that Dr. Ayer was born in the town of Ledyard, Conn., that was set off from Groton in that state, the year (1836), that Dr. Ayer first came to Lowell, which was to be the scene of his business life, and where he was to accumulate his fortune.

September 26, 1871, in accordance with a wish of the citizens, Dr. Ayer forwarded to the selectmen a letter, in which he expressed his desire that the town should choose three trustees to receive and invest the sum of \$10,500, the interest to be expended in promoting the education of youth in the town. This proposition not being entirely acceptable, on October 21, 1871, he addressed another letter to E. Dana Bancroft, in which he submitted his readiness "to pay over the amount to the selectmen of the town, or any person authorized by them, upon call, for the benefit of the town, its schools or whatever its people shall direct." October 25th, the town voted to accept the money and authorized the selectmen to instruct the treasurer to receive it. There was a feeling on the part of the citizens that a town-house was needed, and that the money invested in such a building would be a more satisfactory investment. To this Dr. Ayer acceded, and offered to join with the town in building one, making use of the amount already given to the town.

In accordance with Dr. Ayer's modified proposal the town building was erected. It was completed in the autumn of 1876, and dedicated on the 1st day of November of that year. Dr. Ayer having deceased in the mean time, the keys of the edifice were delivered by his son, Frederick F. Ayer, accompanied by an eloquent address. The oration of the day was delivered by Colonel Daniel Needham,

The new town started upon its municipal career, accompanied by the well wishes of all, and congratu-

lations upon the bright future which all signs seemed to indicate that it had before it.

THOMAS H. AND ALFRED PAGE.—The business and social lives of Thomas H. and Alfred Page, whose portraits appear herewith, are so inseparably associated that it is practically impossible to write the life of one without dealing extensively with the acts of the other. As has hereinbefore been stated, one of the principal original proprietors of land in the southerly part of Groton was John Page, of Watertown, from whom has descended nearly all who bear that name in this vicinity. He seems to have disposed of the principal part of his Groton property to his children, by deeds, a few years prior to his death. The principal part of his lands in this vicinity were conveyed to his son, Jonathan, who married Mary Farnsworth, of Lunenburg, on November 8, 1728, and died on October 10, 1751, at the age of seventy-four years. Among Jonathan's sons was John, who married Mary Parker, of Groton, on September 12, 1733. They had eight children, of whom Phineas, born March 24, 1745, was the fifth. He married Hannah Stone, daughter of Simon Stone, of Groton, on February 2, 1769, and resided in the westerly part of Shirley, on the farm now owned by John Holden. When the British troops marched on Concord and Lexington, April 19, 1775, he was one of the volunteers, who, as minute-men, were called out for the defence of the Colonies.

Eli, the seventh of his eight children, was born at Shirley, September 19, 1784, and married Clarissa Harkness, of Lunenburg, June 19, 1810. A short time after his marriage Eli moved to Lunenburg, on to a farm that formerly belonged to his wife's father, where he resided for eight years; and it was here that his two sons, Thomas H. and Alfred, were born,—the former September 8, 1811, and the latter on December 28, 1817. In 1818 Mr. Page moved with his family to what was then known as the Brook's farm, situated about a mile north of Lunenburg Centre. Here he remained seventeen years. From 1835 to 1839 he resided at Lunenburg Centre, and from March, 1839, to January 8, 1840, he resided on the Holden farm in Shirley. November 19, 1839, he purchased of the assignees of Edgerton, Priest & Company the water-power and mill-privilege on the Nashua River, at what has since become known as Mitchellville. This purchase also included a farm of about 215 acres. The paper-mill formerly standing here had burned June 15, 1837, and was in ruins when Mr. Page purchased the property. With an energy that has always characterized him and his two sons, he immediately set about to reconstruct the mills, putting in a four-engine plant and a Fordner machine. He rented the paper-mills to Carlton and Wilder for the term of twenty years, at an annual rental of \$400, but continued to own and operate the saw and grist-mill until he sold them to his two sons.

Mrs. Page died at Shirley on October 6, 1858, and Mr. Page on December 19, 1862.

Thomas H. and Alfred formed a co-partnership for the transaction of general business as early as 1843,—a relation that was continued until Thomas's decease.

Their first venture was the purchase of a wood-lot of fourteen acres near Charles Dodge's. During the construction of the Fitchburg Railroad he furnished that corporation with large amounts of lumber and material that entered into the original construction of the road and its station buildings. About 1861 the original lease of the paper-mill having expired, and the mill gone considerably to decay, they rebuilt it, and leased it to Stephen Roberts, furnishing him with the capital with which to equip and run it. Shortly after this, Mr. Roberts died, and the plant was purchased by John N. Roberts, of Waltham.

There is scarcely a branch of business that has been conducted in this vicinity in the last half century with which Page Brothers were not identified. They were large contractors and builders, having erected in this town, alone, over twenty-five buildings, many of them being large manufacturing plants. Their credit and financial means have always been large, and the success that they have attained has been due to liberal and shrewd business sagacity.

Thomas H. was married to Emily Longley, daughter of Asa and Sarah (Hazen) Longley, on December 29, 1842. Mrs. Page was born January 10, 1819, and died on September 19, 1850, leaving one child, Mary Emily, who married Messena Morris Heath, December 5, 1876, and is now living. Mr. Page married for a second wife Mary Amelia Jacobs, daughter of Sylvester Jacobs of Groton, November 1, 1853. The second Mrs. Page died March 1, 1871.

In 1856 Page Brothers purchased of David Chambers the lot of land now owned by Alfred Page, on the northerly side of Main Street, between Pleasant Street and Washington Street, with the exceptions of a small lot in the southeasterly corner, since known as the Stuart lot. In 1868 Thomas moved from the Mitchellville farm to this village, where he continued to reside until the time of his decease, August 23, 1873. He was influential in the incorporation of the new town, and always had a strong belief in its future prosperity. He was a man of public spirit, keen business insight, and of liberal though very positive opinions. His affection for the new town is manifested by the following clause in his will :

"*Third*:—I give, devise and bequeath unto my brother, Alfred Page, the sum of fifteen thousand dollars in trust, for the following uses and purposes, namely: I order and direct the said Alfred to safely invest the

said sum of fifteen thousand dollars in safe and productive securities or stocks, to collect and pay annually the interests and income thereof to my daughter, Mary E. Page, during her natural life; and in case my said daughter shall leave no child or children living at her decease, then I order the said Alfred or his successor in said trust, to pay the said principal sum of fifteen thousand dollars to said child or children of said Mary, living at her death, and issue of any deceased children of said Mary by right of representation. But in case my said daughter shall die without leaving any child or issue of any deceased children living at her death, then I order and direct the said Alfred or his successor in said trust, to pay over the sum of fifteen thousand dollars, at the decease of said Mary to the town of Ayer in the County of Middlesex, to be held forever by said town of Ayer and interest and income thereof to be expended annually by said town, for the use and benefit of the common schools in said town forever.

Alfred was married to Sally Maria Felt, daughter of John and Huldah Hobart (Conant) Felt, Dec. 29, 1862. Mrs. Page was born at Stow, September 7, 1828. Their son, John Eli, was born May 8, 1864, and died August 5, 1864. They have one daughter, Clara, born November 24, 1866, who married Edward A. Richardson, November 24, 1888. Alfred continued to reside on the home-farm until it was sold to William Mitchell, in 1871. He then moved to Shirley village, where he resided until he came to this village, in 1874.

He is entitled to the honor of being, of all citizens in the towns in which he has resided, the one most trusted in the public offices at their command. From 1858 to 1870 he served almost continuously in town offices in Shirley, being a member of the board of selectmen during the war. He was a member of the first board of assessors in this town, and for the past fifteen years has served almost continuously upon the board of selectmen. Besides these he has held various important offices. He has been identified with nearly all of our business industries, always willing to lend his money, credit and active interested assistance to any commendable undertaking in the town and whose assistance can always be counted upon in any worthy object. Many of our citizens remember with gratitude the assistance that Mr. Page gave them when they began a business life.

A few years since he presented to this town the extensive farm lying at the summit of the hill on which our village is built, and a few years later erected upon it, and presented to the town, the extensive buildings whose location is one of the most pleasant and sightly in the country, the only condition annexed to the gift being that the town maintain thereupon a town-farm, which would forever be a home for the needy and poor in our midst.

When we consider the various branches of business with which Mr. Page has been identified, we can but wonder at the great ability which has enabled him to make them all successful.

CHAPTER LVIII.

WESTFORD.

BY REV. C. H. ROWLEY, PH.D., F.R.M.S., ASSISTED BY HIS WIFE.

To write history, as well as to thoroughly understand it in the reading, one needs to conceive the events of the past as actually transpiring before his very eyes—the actors of the olden time as living in the present. If it is easier for the writer or reader, let him, in imagination, transport himself backward to the time when the events occurred, and consider himself one of the very people of whom he writes or reads. Thus the scenes shall become real, and the people living actors in life's moving drama.

As far as possible, let the reader do this, as scanning these pages, he shall read of the past. Those who lived, breathed and made history were of mold like ourselves who write and read to-day. They were not mere mental and spiritual essences floating through the air, but actualities, bone, flesh and blood, like ourselves, and, like ourselves, too, were making history. There is in people an innate desire to trace descent from some noble ancestry—we love to be of a stock that age stamps with dignity; heraldic devices are something, but power and character more. In order to understand Westford people aright, it must be borne in mind that, in common with the early settlers of New England, they had a fortunate birth. Ages had wrought to build the character of our Puritan fathers; they were men of heroic mold, moved by thoughts that live and burn in the bosom of the Infinite. The "Mayflower" was manned by men of "defiant courage, shaped by the keen edge of discipline, steel-hardened, who faced alike storms, starvation and the savage."

There was the iron of age in their blood; they were men of battles, and grasped this continent for freedom and for God; they came here to hold this land and make it the rallying-place for the noble souls escaping from the tyranny of the Old World. Their sharp-cut virtues cut their way westward even across the continent to the milder shores of the Pacific coast,—everywhere planting the church and the school-house by its side. Faults they had, it is true, but the principle that guided them, allegiance to God as the law of life, was sublime. They stamped their children with their own courage and progressive spirit till, so soon after the day of small beginnings, we see a *nation* ranking among the first in the world.

The people of Westford sprang from that stock, and while there is now no ringing war-whoop to summon them to arms, nor perils of wilderness to be encountered or to call forth deeds of daring and endurance, yet the blood of heroes courses through the veins of the descendants, producing characters solid, symmetrical, beautiful. How was it possible that the settle-

ment of Westford could be other than a success and its prosperity assured when men came here to do or to die, to hew their way in the New World as they cut the timber for their cabins, to make a highway for commerce as they blazed their path through the forest?

Men are influenced everywhere by their surroundings, and here our fathers found everything without harmonizing with everything within. That which made Westford the favorite hunting-grounds of the Indian, on account of its picturesqueness (the nestling valleys, the smiling landscape, the stony brook, the quiet pond, the conical hills), made it also a charm to the settler, calling forth in him the softer beauty of his life, as well as the rugged strength of purpose and will. The settler knew well that what was in such harmony with himself would be an aid in keeping his posterity loyal to the principles he loved so well. Westford has fully its share of woodland and meadow, ponds, brooks, dale and hill, causing it to be loved by every one who makes it his home, as well as by all who visit its attractive scenes. Few of our townships have seven ponds within their limits of the size and beauty of ours, and each of these has a charm of its own. Nabanussuck Pond, situated near Brookside, with its area of 123 acres, is frequented more than any other in the vicinity; it has much to call forth the admiration of every beholder, and tempt him to linger in the groves that skirt its waters. One realizes that there is much in nature akin to himself as he reclines on the mossy bank and feels the quieting influence of the silent life around him. This stillness is vocal, and speaks in cadences of love to all. A boat-house has been erected at a point easy of access from the railroad, where a goodly number of boats are kept in readiness for the use of the many pleasure-parties that come here from Lowell and the towns about. The other ponds are: Long-sought-for Pond, with its area of 107 acres; Keyes Pond, 40 acres; Flushing, 20 acres; Burges, 25 acres; Grassy, 18 acres, and Ford Pond, though only a part of the latter is included within the limits of our township, viz., 104 acres.

This pond has an important industry upon it, which will be described further on. It is noted also as a favorite "fishing-ground" for the people in the vicinity, thus furnishing amusement as well as pleasant food for the table to all who enjoy the angling sport. Many of the people of Westford not only train themselves in handling the rifle like their fathers, but also the rod and line; concerning the fascination of the latter the following anecdote will illustrate: "A minister, very fond of fishing, when away on his vacation often tried to persuade his wife to join him in a day's sport, but without success. She could see no pleasure in it. At last one day, to please him, she went. He prepared for her a rod and line and a carefully-baited hook. She had not held the rod long before it began to shake and bend,

and with great excitement she landed a pickerel weighing five and three-quarter pounds. The minister says that since that time it has been a difficult task for him to find time to go fishing often enough to satisfy his wife."

The hills of Westford constitute a part of its diversified scenery, though a few of them are slight elevations only. These are Fletcher Hill, Nashoba Hill, Snake-Meadow Hill, Conscience, Spaulding, Oak, Flushing, Milestone, Kissacook, Cowdry, Providence and Francis Hills. The largest of all is situated near the centre of the township, and is more than 300 feet above the Stony Brook valley. The Indian name was Tadmuck Hill, which was afterwards changed to Prospect Hill, the view from its summit fully justifying the name, for, standing upon its highest point, the eye sweeps the whole horizon in a radius of twenty or thirty miles. The village of Westford is situated on the highland, just at the foot of the still higher elevation of Prospect Hill.

"The Central Village is beautiful 'for situation,' being built on a commanding eminence, the northern terrace of Tadmuck Hill, which is 238 feet above the level of the railroad at Westford Station. The view of the distant mountains in clear weather is especially attractive and inspiring. The stretch of the western horizon is broken into wavy lines by the summits of Wachusett, Watic, Monadnock, the Temple Hills, Kearsarge, Joe English Hill and the Uncanoonucks. The White Mountains of New Hampshire can be seen in favorable times. Its elevated position and picturesque scenery entitle it to rank among the loveliest villages of Northern Middlesex. Here are the church edifices of the First Parish and of the Union Congregational Society, the Academy and the Town-House, a large building, two stories high, and furnished with modern conveniences for the town offices, a fire-proof vault and room for the town library; also a large hall for public meetings and armory for the Westford Squad of Company F, Massachusetts Cavalry. The Common is a gem of rural beauty, not large in extent, but fringed with a double row of evergreen and deciduous trees. Here in the twilight of pleasant summer evenings the young and the old do sometimes gather to listen to sweet music, or in the spell of the witching moonlight the light-hearted sit and while the glad hours away. The main street is shaded with elms and maples, and the ample sidewalks tempt to evening promenades amid the perfumes of June or the golden sheen of October. To those who know there is a lane that leads to 'paradise,' where green mosses deck the border of the spring, and birds 'sing love on every spray.' Prospect Hill is within easy reach of the adventurous foot, and is often visited by those who wish to see the 'lovely and the wild mingled in harmony on nature's face.' The general intelligence and social refinement of the people, the good influence of the Academy, and the healthfulness and general thrift

that are apparent, together with the neatness and tidiness of dwellings, gardens and enclosures, all conspire to make this a desirable place of residence for all who seek a home far from the mills and shops and counting-rooms of care-worn men."

The following description of the view from the belfry of the Unitarian Church has been kindly furnished by Mr. Leonard Wheeler, to whom credit is here given:

"The landscape visible from Westford Hill is always praised by those whose tastes incline them to appreciate the beauties of nature. The undulating hills and valleys, the forest areas of mingled evergreen and deciduous trees, alternating with cleared tracts dotted with fertile farms, the peaceful New England villages perched on hill-top or built beside never-failing streams, turning the wheels of busy factories; pond and quarries, blue peaks of mountains in the background, with fleecy clouds of fantastic shape overhead, form a picture to be cherished in the memory of the beholder.

"The two most favorable points of observation are the top of Prospect Hill, a rise of land on the southwest part of Westford Hill proper, and the belfry of the Unitarian Church. The view southward from the belfry is obstructed by Prospect Hill and shade trees in the village; otherwise the belfry seems to the writer the better point of observation.

"Looking south from either point, one sees, within the town limits, Bear Cathead and Nashoba Hills. Westward is Forge Village, at the foot of Forge Pond. Here can be seen T. Hittinger's ice-houses and mills of the Abbot Worsted Company. Turning toward the north, the town farm at the foot of a high hill can be seen. Northwest is Graniteville, with Snake Meadow Hill, dotted with granite quarries, behind. Plainly visible here are C. G. Sargent's Sons' Machine Shops and the original mills of the Abbot Worsted Company. North, about one and one-fourth miles, is Westford depot and the mill-pond used by Heyward and Burbeck for their saw and grist-mills. At the far north extremity of the town is Oak Hill, on which are quarries of granite. Northeast is Brookside, close beside West Chelmsford, where the ruins of the Eagle Mills are painful reminders of what has been. Turning eastward, Francia Hill covered with apple orchards, holds the eye. A little nearer repose many of our former citizens who have been gathered to their fathers. Farther east is Providence Hill, from whose foot Tadmuck Swamp stretches toward Bear Hill, our starting-point.

"The trains on the Stony Brook Railroad may be followed by the smoke nearly their whole route from Ayer to Lowell. The smoke of locomotives may also be seen on the Nashua and Acton ('Red Line'), Framingham and Lowell, Boston and Lowell (main line and Lexington branch); Fitchburg and Worcester and Nashua Railroads.

"Summer mornings patches of fog betray the course

of the Merrimack and Nashua Rivers, and, within the town, Stony Brook and the location of several ponds.

"Acton Centre (not visible from the belfry), Littleton Common, Princeton, Ayer, church spires in Lunenburg and Groton, Ashby (a New Hampshire village that could not be identified by the writer), Tyngsboro', West, North, South and Centre Chelmsford, Lowell, a bit of Lawrence, Tewksbury, Billerica and Bedford are visible.

"At night the reflection on the clouds of electric lights in Boston, Lynn, Salem, Lowell, Lawrence, Nashua, Fitchburg, Clinton and Waltham can be seen.

"Round hill, in Ayer, Gibbett hill, in Groton, and Robin hill, in Chelmsford, are the principal elevations of land visible in adjoining towns.

"Looking now at more distant hills westward, Wachusett, in Princeton, is plainly visible. As the observer turns toward the north he may note successively the highest points in Shirley, Lunenburg and Ashburnham, Watatic mountain, in Ashby, Monadnock, in Jaffrey, N. H., then a range of mountains extending from New Ipswich to Frankestown, comprising Barrett and Kidder in New Ipswich, Spofford in Temple, separated from the preceding by Spofford's gap, Temple, Pack Monadnock in Peterborough, Pinnacle in Lyndeborough and Crochet in Frankestown. Next are two peaks, visible from the belfry only, and in fine weather, Bald Mt. in Antrim and Knight's hill in Bradford. Joe English, in New Boston, is easily identified, as it is a solitary dome-shaped hill. Next are Black and Kearsarge mountains in Warner, then come the twin Uncanoonucks in Goffstown. Directly north at times of extreme visibility, preceding a storm, Mts. Jefferson and Washington can be seen. A little eastward Strafford hills are visible. Resting the eye for a moment on the forest-clad hills in Pelham, we leave the rugged New Hampshire mountains and turn toward the more level tract of Essex County in the Bay State. The most noticeable point here is the Insane Asylum in Danvers. Due south of the observer is Fay's Mt. in Westborough."

GRANITEVILLE.—This village takes its name from the quantities of granite quarried there. It is comparatively a new village, for, while there were but few houses and some quarrying done prior to 1854, it was during that year that Mr. C. G. Sargent settled there, and from that time the development of the place has been rapid, its population outnumbering, at the present writing, that of the Central Village. Eighty-five years ago there were but two saw-mills, one grist-mill and but three dwelling-houses in the place, occupied by Messrs. John Reed, Jacob Abbot and Robert Wilkinson. Forty-two years ago the Stony Brook Railroad was built, while forty years ago there were but eight houses in the place. In one decade, ending in 1880, over sixty buildings were erected, including a church, school-house and depots, since which time

the place has continued its growth. The village was called "Stone Quarry" till about 1856, when the name was changed at the suggestion of Mr. Sargent. It is situated on both sides of Stony Brook, in the valley between Snake Meadow Hill and the highlands of the Centre. Standing upon these highlands and looking down upon it, we see it nestling in the basin between the swelling eminences. The neat chapel church and new school-house are seen standing prominently out in the foreground, while beyond are the long buildings of the manufactories and dwellings on the terraces of Snake Meadow Hill. In the early evening the light in the long rows of windows in the manufactories shine out in the darkness, telling us of the busy hands engaged in the important industries in the place.

The site is picturesque, and Graniteville is a village attractive to the workmen and their families and to all others who have made it their home. Besides the buildings already noted, there are two railroad stations, a tin-shop, club-house, post-office, milliner's shop, machine-shop, worsted-mill and a few stores.

FORGE VILLAGE.—This is a pleasant place, situated on the margin of Forge Pond, and contains a railroad-station, a school-house, an ice-house, post-office, store and Abbot & Co.'s large woolen-mill.

Captain David Prescott Lawrence furnished Mr. Hodgman these items, which we quote :

"On the west side of Beaver Brook near the bridge was located a house, known as the Cogswell place. It was afterward occupied by Calvino Green, and later by Charles Reed. It was once a hospital for small-pox patients, it being customary at that time for people to go there and be vaccinated for small-pox. Following the road to the village we find the next house, called the Kent place, at the corner of the road leading to Westford Centre, where was also a blacksmith shop. Within my remembrance there lived in the house one Isaac Durant, a revolutionary soldier, who was blind and was guided about the village by a little grandson. Afterward it was owned by Ebenezer Blood, who was noted for telling very improbable stories. Next it was owned by Charles Mizer, who was a soldier in the last war and never returned. Some years ago the buildings were burned by an incendiary, and the place is now owned by D. P. Lawrence. Next was the Patch house, occupied by Isaac Patch and Elisha Kent. The latter had two wives and five children; the last wife being a sister of Asa Wright. The house where George Wright now lives was built and occupied by Amos Heywood, who married Lydia Buck. The house nearly opposite was built and occupied by Eben Prescott, who had three wives and a large family. The next house was owned by Col. David Goodhue, the father of Imila Goodhue, who married a sister of Judge Locke, of Lowell. The house nearly opposite was owned by Eben Prescott, but was occupied by Eleazer Wright, a blacksmith, and after by one Pushee, and still later by Horatio Clerk, a blacksmith. The next dwelling-house was the "garrison house," so called on account of its being built for defence against the attacks of the Indians, having a brick wall between the woodwork. The house was occupied successively by four generations of the name of Ebenezer Prescott, the last being an uncle of Luther Prescott, and who died where Mr. Sprague now lives. The next house stood where George Henry Prescott's house now stands, and was occupied by Joseph Prescott (a son of Eben Prescott), who was father of several children, one of whom was Avery Prescott, who built the house where Edward Prescott now lives at Westford Centre; and another son built the house where Samuel Blodgett died, now demolished. The next house we find at the extreme west end of the village, occupied by Jonas Prescott, great-grandfather of Oliver Prescott, who also lived there and who married Bethiah Underwood. He had four sons and eight daughters; was farmer and inn-keeper. At that time Ann Lee had founded a society of Shakers at Harvard, Massachusetts. Through her influence the mother

and five daughters were induced to leave home and join them. This circumstance so wrought upon the mind of the deserted husband and father that he became demented, and continued so to the end of his life. Three of the daughters lived and died with the Shakers. The others left at different times and had families. The eldest son removed to Jaffrey, New Hampshire, where he had a large family. The second son went to Whitestown, now New Hartford, New York, when that country was a wilderness; he also had a large family. The third son, Abram, remained at home, and in the years 1808-'9 built the brick house near the site of the old one. His first wife was Polly Fletcher, of Westford; the second Olive Adama, of Chelmsford. He was captain of a military company; was a representative to the General Court several years in succession; was a deacon of the First Church, town clerk, and held various civil offices.

"Retracing our steps through the village we come to the house where Levi Prescott recently died, now occupied by his son, Nelson L. Prescott. Here was formerly a house inhabited by Jonas Prescott, great-grandfather of Levi. He had three wives and nine children. Passing toward Graniteville, at the railroad crossing was the old school-house of the village. Where the poor house now stands was an old house owned and occupied by Dea. John Prescott, son of Jonas, above named, who exchanged property with John Read, and Read sold it to the town. Next was an old house at David Reed's, owned by Timothy Prescott, also son of the above Jonas, and afterward occupied by his two sons, Isaiah and Amos.

"About fifty five years ago Forge Village was in a very prosperous condition. It had a store, hotel, three iron forges, two blacksmith's shops, two wool-carding machines, one clothier's mill, a grist-mill, and a wheelwright's shop, all located near the saw worsted mill."

"To these interesting statements of Captain Lawrence, it is pertinent to add that this village is situated on one of the great thoroughfares of travel from Vermont to Boston. The great road, as it was called, from Bellows Falls to Boston, passed through Groton to Groton Ridges, where there was a choice of routes to Boston, one road leading through Forge Village, Carlisle, Bedford and Lexington, the other through Littleton, Acton and Concord. As all merchandise was then transported in heavy wagons drawn by horses or oxen, the amount of travel on both roads was very great. One man now living says he has counted seventy teams in a line on the road through Forge Village; and another affirms that he has seen a hundred teams on the road in the south part of the town.

"There were numerous taverns in town to accommodate the wayfarers, five or six in all. They preferred the route on which they found the best entertainment. In winter, when the snow was deep, the people, encouraged and rewarded (with plenty of the 'good creature,' it is said), turned out to make a path for the teams; and there was a strong competition between the people living on the two routes for the travel. Sometimes the party from Westford would reach the tavern at Groton Ridges by daybreak, and thus tempt the snowbound teamsters through this town. Taverns were kept at Forge Village, at the house now occupied by Capt. Jacob Smith, at George Yapp's house, Henry P. Ruggles' house and at Dupee's Corner. Among the landlords, whose names are remembered, are Willard Reed, who was at Capt. Smith's, and after him Joseph Bailey; Seth Reed at Mr. Yapp's, and Timothy Hartwell, who came from Concord, and was the last one in the business there. He sold to Leonard L. Gibson. John Raymond and Josiah Hayward, who came from Concord, were on the Ruggles place; and Solomon Woods, Samuel Wright, Josiah Boynton, Samuel Lancy and William Dupee (from Dedham) were at Dupee's Corner. These are only a few of the men who were in that business. A living witness testifies that he has known seventy or seventy-five teams to 'put up' for the night at the three taverns severally called Reed's, Raymond's and Hartwell's. The times are changed, and the wayside inn is rapidly becoming a thing of the past in this Commonwealth."

In looking over some old records at Forge Village the following papers were found, which are, perhaps, of sufficient interest to be recorded here. One reads thus:

"Province of the Massachusetts Bay. In the House of Representatives, Sept. 10th, 1730:—A Petition of Jonas Prescott, Ebenezer Prescott, Abner Kent, and Ebenezer Townsend, Inhabitants of the Town of Groton, Praying that they and their Estates contained in the following Boundaries, viz., Beginning at the North West Corner of Stoney Brook Pond, from thence extending to the North West Corner of Westford,

commonly called Tyng's Corner, & bounded Southerly by said Pond, may be set off to the Town of Westford for their greater convenience in attending the publick Worship. Read & Ordered with the Petition within named with their Estates, according to the bounds recited. he and hereby are to all intents and purposes set off from the Town of Groton and annexed to the Town of Westford. True Extract from the Records of the Gen^l Court. Attest,

"JOHN AVERY, D. Sect."

Another paper reads:

"At a Town-meeting Novr. 19th, 1673. By the agreement of the Town, Jonas Prescott is to grind the Town Corn for the Town every second day and every sixth day in every week. A true Copy from the book of Records for Groton.

"Attest OLIVER PRESCOTT, Town Clerk."

[Of course this was the set off.]

Other papers read as follows:

"At a general Town-meeting at Groton June 13th 1681. Then granted to Jonas Prescott Liberty to set up his Corn Mill, at Stoney Brook on the side next Concord in any place betwixt the Spring and the Bridge and to have Liberty to make up of so much and no more of the water as may sufficiently serve for the said mill, provided that what damage thereby may be to the Town's highway, the sd Prescott shall at his own Charge constantly make good. A true Copy from Groton old Book &c.

"Attest OLIVER PRESCOTT, Town Clerk."

"June 25th 1683. An agreement made between Jonas Prescott and the town of Groton, that he the sd Jonas Prescott have liberty to set up a Saw-mill at Stoney Brook, and to have the use of the stream upon conditions as followeth, first, that he shall accommodate the Town with merchantable Boards at six pence a hundred cheaper than are sawed at any other Saw-mills and for the Town's pay, and that the Town shall be supplied before any other persons, and he is to have this privilege until there may appear something that may be of greater advantage for the Town whether by Iron Work or any other ways, always provided the Saw-mill do not hinder the Corn Mill, and the said Prescott is to have the use of the Town's Timber for his own use, and the sd Prescott is to make and maintain a sufficient Cart Bridge from time to time. A true Copy from the old town Book &c.

"Attest OLIVER PRESCOTT, Town Clerk."

A long deed difficult to decipher ends in this way:

"I have set too my hand a'd sele this eleventh-day of february and in the year of our lord God one thousand seven hundred and nine 1708:9 in the seventh year of the rain of our sov'ren Lady Anne of England Scotland France and Ireland Queen &c.

"Charlestown Decemb^r the 12th: 1711. Rec^d and accordingly Entered on the Registry of Deeds &c for Middlesex. Feb: 15^o—pag: 570, 571. By Sam^l Phipps Beg^r."

BROOKSIDE is a little village in the eastern part of the town, near West Chelmsford. Here the first fulling-mill was built, which has given place to another important industry. In the year 1857 Mr. Theodore H. Hamblet bought a combined grist-mill and saw-mill of "Davis and Kidder," who, with their other work, manufactured a patent magneto-electric machine. Mr. Hamblet put in a flouring-mill, and kept the grist-mill for custom work. In 1862 he sold out to the Moore Brothers, and soon the large worsted-yarn mill was started, which will be described later on.

PARKERVILLE is a well-settled school district in

the southern part of the town, composed of thriving farmers.

NASHOBA, in the extreme southern part, is the name of a post-office situated on the Framingham and Lowell Railroad.

The township is the central one in the county, and is the largest. It has Tyngsborough on the north, Carlisle and Acton on the south, Chelmsford on the east, Groton on the west, and Littleton on the south-west.

RAILROADS.—There are three that pass through the township in such direction that access to other towns and communication with the surrounding cities is easy. Stony Brook Railroad connects with the Fitchburg Road at Ayer, and with the Boston and Nashua Road at Lowell, and, as there are four stations on the road—Brookside, Westford, Graniteville and Forge Village—the convenience of the road is manifest.

The Framingham and Lowell Railroad passes through the southern part of the town, having one station, called the Carlisle Station. The Nashua, Acton and Boston Railroad passes through the western part of the township, having three stations—Graniteville, Westford and East Littleton.

Nearly all the present township of Westford was formerly a part of Chelmsford and continued thus till September 23, 1729, when a bill before the General Court, "For erecting the West Precinct of the town of Chelmsford into a Township by the name of Westford," was passed to the third reading and the charter was granted. The act was "passed to be enacted" sixteen years after the struggle for a separate existence began. A small triangular part of the township, having for its base Forge Pond and its northern apex resting on Millstone Hill, was set off from the town of Groton and annexed to Westford by an act of the "Council, read and concurred September 10, 1730," since which date the boundary has remained intact.

INDIANS.—Like all the other parts of the country, Westford was the home of the Indian. The Pawtuckets or Wamesits and the Nashobas hunted here, and on the banks of Forge Pond held their council-fires. "On the eastern margin two places are shown where the encampments or lodges were fixed, which are indicated by slight excavations and the finding of arrow-heads." On the hill east of Eli Tower's there is a flat rock where, it is said, the "squaws kindled their fires and baked Indian cake in the best style of Indian cookery." Not only in the vicinity of Forge Pond, but at other places in the town, there are occasionally found, even now, stone implements and flints of their handiwork. The writer has seen their hatchets and other tools, and he has in his possession a large pestle, a chisel and several arrow-heads. Is it surprising that the heart of the red man is saddened, as he thinks that his beautiful hunting-grounds are in the possession of the pale-faces, that the young brave shall no longer woo the dusky maiden at some

trusting spot, that his defiant war-whoop shall no longer ring out on the yielding air and be echoed from hillside to hillside, that he shall no more wildly ride his pony in the chase, nor hunt the bear, nor challenge his foe to mortal combat? all the life his fathers loved shall be his no more. While we glory in the achievement of the heroic Puritan, let us not forget that the red man, though a savage, had a heart in his breast as well as the pale-face.

CEMETERIES.—We have not a Greenwood nor a Sleepy Hollow, in which lie the classical dead or the honored of the ages, yet we have places where we lay our loved ones, who sleep until the resurrection.

"It is a fact worthy to be mentioned, that the first burying-place in Westford was not near the meeting-house. It was the custom to lay out a lot around or very near the sanctuary. In Westford the oldest burial-ground is a mile east of the meeting-house, and is not, therefore, a church-yard. Indeed, the early settlers never used the word *church* to designate the house of worship or the place of burial. Inasmuch as the eastern portion of the town was first settled, the spot was selected long before the precinct or town was formed. The oldest head-stone bears this inscription: 'Abram Wright, died 1702.' But burials may have taken place before this; and as the records of Chelmsford give no information about it, it is perhaps impossible to fix the time when the first grave was made there. There are two other cemeteries in town."

POST-OFFICES.—There are five post-offices in town, one at each of the following places: Nashoba, Westford, Cold Spring, Graniteville and Forge Village. The following list of postmasters of the Westford office is here given, with the date of their appointment. It will be noticed that the date of establishment was March 25, 1803.

Postmasters.—John Abbot, appointed March 29, 1803; John W. P. Abbot, August 24, 1831; Samuel Fletcher, October 4, 1839; Sherman D. Fletcher, May 23, 1849; David C. Butterfield, June 10, 1853; Samuel Fletcher, March 3, 1856; John B. Fletcher, March 1, 1860; Sherman D. Fletcher, April 22, 1861; Francis L. Fletcher, September 24, 1866; John B. Fletcher, September 20, 1867; Sherman D. Fletcher, August 12, 1869; John M. Fletcher, October 26, 1885; Sherman H. Fletcher, April 22, 1889.

Attention is called to the above list of names, on account of the fact that, out of thirteen appointments ten of the men were Fletchers.

FARM PRODUCTS.—The general products of agriculture are such as are usually raised in New England, though more fruit is produced in Massachusetts than in the northern States and more in this town than in many others. Vegetables are raised for city markets by many farmers. Apples are grown in great abundance and in many varieties, from the many orchards throughout the town, early apples as well as the winter Baldwin; and during the bearing

year thousands of barrels are sometimes shipped to Europe. Occasionally they are shipped by rail at Westford or Acton, but more commonly, carried by heavily-loaded teams to Boston. Several large vineyards are in the town, and tons of grapes are raised, making this one of the most important products of the soil. Of late years the peach crop has been abundant, the yield being large and the fruit the equal of any in New England, at least. It is generally conceded that the peaches, sometimes received in Boston from our town, are the largest and best flavored of any received there. Small fruits are also successfully raised, such as strawberries and blackberries; thousands of crates of these are marketed every year. In short, Westford is widely noted for raising a large variety of an excellent fruit as is produced anywhere in New England.

Some idea of the healthfulness of the town can be obtained by considering the ages of some of our people now living, as well as of some recently deceased. There are now living probably twelve people who are over eighty years old; two are ninety-one; and one person, ninety-four. Mrs. Hildreth died in August, 1884, aged one hundred and one years and one day.

MILITARY HISTORY.—Little can be learned from the early records of the town in regard to the action taken during the French and Indian War. From other sources we find the Westford people were not wanting in this time of peril; but that the town gave her share of brave men for the defence of the Colonies.

One muster-roll of a company under the command of Jonas Prescott gives the names of sixteen men from Westford. This company started for the relief of Fort William Henry, but, hearing of its surrender, went only as far as Springfield.

The spirit of independence early manifested itself, and from the beginning of the Revolutionary struggle until its triumphant conclusion the people were outspoken in their indignation of the conduct of the British Parliament; and showed their determination to withstand such oppression. They were alive and full of interest in the thought of the possible freedom from the bondage which the mother country was imposing upon them. Their hearts were stirred to the depths when the news of the Stamp Act reached their ears, and they took immediate action to express their disapprobation. Soon they procured fire-arms and prepared for defence, as they saw the difficulties could be settled by no amicable means.

In March, 1774, Dr. Fletcher drew up a paper expressing the sentiments of the people in the following forcible manner: "In faithfulness to our country, ourselves and posterity, we hold ourselves obligated, according to the utmost of our abilities, to make repeated oppositions against repeated attempts to extinguish the just rights and liberties of this people, or every attempt to annihilate our freedom, the price of which was no less than the price of blood, even the precious blood of our worthy ancestors."

When there came the call *to arms!* the people of the town did not hesitate, but were among the first to leave their homes to enter the bloody conflict, which lasted long, but which, eventually, secured glorious liberty and equal rights to our great "American Commonwealth," now the most honored and beloved nation in the world.

On April 19, 1775, in Concord, on the North Bridge, the British troops were met and driven back by the brave and toil-worn yeomen of this new country, the character of whom is most ably pictured to our present generation in the stalwart arm and expressive features of the "minute-man," now standing as a monument of this first decisive strike for liberty. Rev. Dr. Ripley, in his account of this struggle, says: "A company from Westford had just entered the bounds of Concord when the fight took place. But individuals from that town were present and engaged in the battle, among whom was the brave Col. Robinson." He also says further on in his narrative: "The situation of Major Buttrick, as it was more dangerous and important, has gained him distinguished celebrity and honor. But this ought never to operate as an eclipse upon any other officer on that occasion. There is satisfactory evidence that on the march to meet the enemy, Major Buttrick requested Col. Robinson to act as his superior, he being an older man and of higher rank in another regiment; but he modestly declined, and consented to march at the right hand and be considered a volunteer. The late Col. John Buttrick, then a fifer, repeatedly affirmed that he was present and heard the conversation between his father and Col. Robinson. . . . The Americans commenced their march in double file. . . . In a minute or two the Americans being, in quick motion and within ten or fifteen rods of the bridge, a single gun was fired by a British soldier, which marked its way, passing under Col. Robinson's arm and slightly wounding the side of Luther Blanchard, a fifer in the Acton company." Rev. Joseph Thaxter, then preaching at Westford, in connection with William Emerson, were the first chaplains of the Revolution. Mr. Thaxter afterwards went with a company of Westford soldiers to Lake George and Ticonderoga; he offered prayer at the laying of the corner-stone of the Bunker Hill monument.

In Colonel William Prescott's regiment of minute-men were twelve officers and fifty eight privates from the town of Westford—Timothy Underwood, captain. In the regiment commanded by James Prescott, Esq., there were nine officers and thirty-six privates—Oliver Bates, captain. In Captain Joseph Minot's company, under Col. James Prescott, Esq., there were eleven officers and thirty-six privates.

"PERSONAL TESTIMONY.

"Mrs. Jonathan Prescott, a grand-daughter of Colonel Robinson, who died in this town, April 14, 1876, at the great age of ninety-one years, distinctly remembered the colonel, being twenty years old at the time of his death, in 1805. She testified to the compiler of this work

that when the alarm came on the night of the 18th of April, he stood not on the order of his going, but mounted his horse and hurried to Concord, leaving orders to his hired man to follow with provisions. She said, likewise, that he was invited to take the command, and the tradition in her family has always been that he did assume it and ordered the troops to fire. Her recollection accorded with the inscription on his gravestone which affirms that he commanded the soldiers at the Bridge." ("History of Westford," page 109.)

It is stated that Captain Oliver Bates died from the effects of a wound received as they were driving the British from Concord to Lexington. Col. Robinson's bravery was also shown in the battle of Bunker Hill. The death of a colored man from Westford is also recorded in the returns from this battle.

The War of 1812 being unpopular in Massachusetts, there was no very enthusiastic response to the call for troops; there were, however, a few men from Westford engaged in this war.

When there came the call for men to protect our beloved nation when a dissolution of our United States was threatened, military enthusiasm revived. It was not a struggle for enlargement of power or for personal aggrandizement, but to preserve entire one Republic, and the free institutions that had been the pride of our countrymen ever since that memorable Independence Day, July 4, 1775, which brought to us our liberty and the right to a national government.

It was to our Northern men a war that called forth every patriotic feeling. Rev. Mr. Hodgman says: "It involved the question whether might makes right; whether liberty is the birthright of every human soul, however lowly; whether the all-embracing air and the vivifying sun in the heavens are God's free gifts to all His creatures; whether every man, while submitting to the requirements of just law, has a right to himself, to the ownership of his own faculties of body and mind—the right, which is inalienable and untransferable, to liberty and the pursuit of happiness."

Although before the war there were two parties in the North, differing with each other in regard to the question whether it was best or right to force their Southern brethren to give up their slaves,—when it became a question of union or dissolution, there was nearly a unanimous response to the call to help preserve our Union. The large calls for men were met with such wonderful alacrity that other countries looked on with wonder at an army so easily raised without compulsion.

The result of the war shows that not only were our States still united, but that all the above vexed questions were settled, we trust, permanently so far as our own country is concerned; and henceforth all American-born children, whether black or white, shall have the rights of citizenship.

The first enlistment of men from Westford occurred immediately after the disgraceful shooting of the troops of the Sixth Massachusetts Regiment while passing through Baltimore. Our men were filled with indignation and were eager to help in the repression

of a rebellion that had caused their comrades to be shot down like brutes in cold blood. Twenty-one men from Westford were then enrolled and were in Company C, Sixteenth Massachusetts Regiment of Volunteers. Five of these men never returned to their homes, but gave their lives to their country.

This company, under their captain, L. G. King, were present at the raising of the flag-staff on the Common and took part in the exercises. This flag-staff was cut by Mr. Abijah Fletcher, from a tree near Cold Spring; the flag was bought of Col. William Beale for sixty dollars.

"May 18, 1861.—Saturday forenoon. All things being ready, the flag-staff was raised by Samuel Fletcher, of Graniteville, aided by many citizens of the village and other parts of the town. At two o'clock the stars and stripes were run up, amid the cheers and hurrahs of a large collection of men, women and children from all parts of the town, who had assembled to witness the patriotic scene. The chairman of the committee then called for a song, and 'The Flag of Our Union' was sung with a will. An appropriate and patriotic address was given by the chairman, and then the assembly went into the hall under the First Parish Church. The chairman again called the meeting to order, and prayer was offered by Rev. Edwin B. Hodgman. Speeches were made by Revs. Leonard Luce, George M. Rice and Edwin B. Hodgman; also by Col. George F. Sawtelle, of Lowell, and Luther Prescott, Esq., of Forge Village, and after singing another patriotic song the assembly returned to the common, and, gathering around the flag-staff, with the flag flying aloft, pledged themselves anew to stand by their country and government through weal or woe in the struggle just commenced, and then separated, after giving twelve hearty and rousing cheers for the whole Union.

J. W. P. ABBOT, Chm. Selectmen."

The patriotic feelings here expressed were afterwards carried out in actions. The town was prompt to act, liberal with her means, and her zeal and enthusiasm did not flag during the entire contest. The record in regard to the number of men and the money expended is most honorable. The twenty-one men in Company C, Sixteenth Massachusetts Volunteers, were the first to enlist, and others soon followed. Our soldiers were in the thickest of the fight, were in the battle of Gettysburg, in the battle of the Wilderness, at Spottsylvania Court-House and at Petersburg.

The first man from Westford who died for his country was John L. Taylor. He died in the hospital at Baltimore, November 8, 1861. The first man from Westford killed in battle was William Dane, killed at Winchester, Virginia, May 25, 1862. The names of thirty-three more brave men, who died for their country, are inscribed on a marble tablet in the Town Hall, making thirty-five upon the Roll of Honor from Westford.

The "History of Massachusetts in the Civil War" speaks of the town of Westford in the following words: "It was not behind any town of its size and wealth in the Commonwealth in fulfilling every obligation demanded of it by the State or nation during the entire period of the Rebellion. It furnished 172 men for the war, which was a surplus of fifteen men over and above all demands. Four were commissioned officers. The whole amount of money raised and expended by the town on account of soldiers' families and repaid by the State was \$10,525." Two ladies went from

Westford and were employed as nurses in a hospital at Alexandria, Virginia,—Miss Emma D. Southwick and Miss Eliza M. Weeks. Miss Southwick was afterwards a teacher among the freedmen of South Carolina, and during the Centennial Exhibition at Philadelphia was connected with the famous "Log Cabin." For a fuller account of Miss Southwick see biographical sketch. Miss Sarah E. Keyes also went from Westford as a teacher to the freedmen in October, 1865. She encountered the opposition so common to all who first went to teach that benighted race, but continued to teach until her death at Kingston, North Carolina, June 5, 1866. The ladies of Westford did a noble work for the soldiers, in furnishing clothing, delicacies, etc., which were sent to the Sanitary Commission.

One of the finest military organizations in the State is the Spaulding Light Cavalry. It is the only unattached cavalry company in the Commonwealth, and when recently the State militia was reorganized, and some companies were disbanded, the Westford company was retained on account of its soldierly bearing, its efficiency in drill, its good financial condition and the pride the men take in the organization. Though squads are stationed in other towns as well as in ours, and many men recruited from those places, yet, because the armory and headquarters are here, and also because Captain Fletcher has done so much to bring up the company to its high state of efficiency, it seems proper that its history should be connected with our town. On September 5, 1889, the company, officially known as Troop F, Cavalry, First Brigade, Massachusetts Volunteer Militia, celebrated the twenty-fifth anniversary of its organization, in Nabasset Grove. Many men eminent in civil and military life were present, and from the "toasts" and replies, as well as the addresses given, it was clearly seen that the troop is a favorite in the military circles of the Commonwealth, and has a high position in the State militia.

The troop held its first encampment at Westford in 1865. Colonel Joseph W. Gelray, United States Army, was detailed as the inspecting officer, and Dr. Samuel L. Dutton, now of Boston, who had just returned from the army, acted as medical officer at the request of the adjutant-general.

Among the men active in raising the troop was Deacon Otis Adams, of Chelmsford, who, in his younger days, had commanded the Old Chelmsford Troopers. Although he had passed the age of seventy years, his martial enthusiasm was so great that he became an active member and served in the ranks at several encampments of the troop.

The troop has always maintained a high reputation for efficiency, is in splendid condition financially, and that harmony has prevailed in its midst is shown in the few changes in the roster of its officers, the following being the names of all the past officers of the troop:

Capt. Christopher Roby, Chelmsford; Capt. Sherman H. Fletcher, Westford; Lieut. Allen Cameron, Westford; Lieut. A. M. Clement, Boston; Lieut. B. F. Day, Westford; Lieut. James A. Davis, Dunstable; Lieut. N. B. Lapham, Chelmsford; Lieut. W. L. Kittredge, Westford; Lieut. E. C. Williams, Groton; Asst. Surg. Levi Howard, M.D., Chelmsford; Asst. Surg. Joseph B. Heald, M.D., Pepperell; Asst. Surg. W. F. Leighton, M.D., Lowell.

The composition of the troop of to-day is as follows:

Capt. Horace W. Wilson, Carlisle; First Lieut. Elisha H. Shaw, North Chelmsford; Second Lieut. Amos R. Leighton, Westford; Asst. Surg., First Lieut. Amasa Howard, M.D., Chelmsford; Hospital Steward Charles H. Bealls, Lowell; First Sergt. Daniel H. Robbins, Carlisle; Quartermaster Sergt. John Feeney, Westford; Sergt. George V. Herrig, Pepperell; Sergt. Charles J. Hall, Groton; Sergt. William J. Quigley, North Chelmsford; Sergt. Sidney A. Bull, Carlisle; Corp. D. E. Weston, Pepperell; Corp. E. H. Keyes, Westford; Corp. H. V. Hildreth, Westford; Corp. Charles F. Scribner, North Chelmsford; Guidon P. J. Hayes, Pepperell; Bugler J. S. Gilchrist, Luoenburg; Bugler E. S. Trudu, Ayer.

Captain Christopher Roby, the father and first commander of the troop, is a hale and hearty gentleman of seventy-five years. He was born in Dunstable, Mass., October 18, 1814.

Captain Sherman H. Fletcher was born in Westford December 24, 1846, and was educated at Westford Academy. He enlisted in Troop F, December 9, 1864; appointed corporal April 1, 1871; sergeant May 1, 1871; first sergeant August 9, 1873; commissioned second lieutenant May 27, 1874, and captain May 14, 1877. He resigned December 1, 1888, and retired from active service with a record of which any officer may be proud.

Captain Horace W. Wilson, the present commander of the troop, was born in Billerica, Mass., and resides in Carlisle.

The company has taken two State prizes for the best carbine-shooting, and Corporal E. H. Keyes, of the Westford squad, has taken the prize for the best individual shooting with the carbine in the State.

ECCLESIASTICAL HISTORY.—In the year 1727 the inhabitants of the "West Precinct" of the town of Chelmsford, the part of the town now Westford, assembled to choose a minister of the Gospel; and at that meeting voted a certain amount of money as a salary, and appointed a committee of three to confer with the Reverend Willard Hall in regard to a settlement.

Mr. Hall accepted the call, and his answer shows that the human nature of the divines in that age was very like that of ministers now. There was a clause in the call, namely, "Voted that they agree with him that his Sallary shall rise and fall according to the vallue of money," which proved a bone of contention for many years. It was easier to diminish his salary when silver was high than to raise it when silver was low.

The reverend did not think that fair play, and in 1739 entered a complaint to that effect, which came before the town in form of a vote for and against raising his salary. This vote was decided in the negative, and Mr. Hall appealed to the courts of justice.

How it was settled is not recorded, but we conclude

peaceably, as Mr. Hall remained with his people as their pastor until aged and infirm.

During the Revolutionary period he was a Tory, feeling it his duty to be loyal to King George. This caused much feeling among his people and he was not allowed to preach for a time, and it eventually led to his final dismissal from the church, but not until after he had given up active pastoral work and a colleague had been appointed. His ministry extended over forty-eight years. Mr. Hall had his avocation as well as his vocation: he was an excellent farmer and his garden was the admiration of many; he also acted as a physician when such services were needed.

The church records state that Mr. Hall was ordained and a church organized November 27, 1727, with the following members:

"Willard Hall, John Comings, William Fletcher, Joseph Underwood, Joshua Fletcher, Aquila Underwood, Jonas Prescott, Jonathan Hildreth, Andrew Spalding, Jacob Wright, Samuel Chamberlin, Samuel Fletcher, Aaron Parker, John Proctor, Jonas Fletcher, Nathaniel Boynton, Benjamin his X mark Robbins, Josiah Whitney."—18.

We find no record of any female signers; perhaps husband and wife were considered one in a very literal sense; but what became of the maiden ladies?

During Mr. Hall's ministry there seemed to be a "half-way covenant," granting certain privileges, such as the baptism of infants, but not giving them the right to partake of the communion at the Lord's table; reminding the writer of the associate members of our modern Christian Endeavor Societies, who have some of the privileges, but not the spirit of the active members.

The church discipline of those days was an actual thing, not a dead-letter; for we read that in 1745 several were disciplined on the part of the church for "frequently absenting themselves from public worship and from communion at the Lord's table." The question is suggested whether it would not be better if the present generation had more of the disciplinary oversight of its church-members which these early Christians possessed. For possibly it might result in securing a larger attendance upon our church services. It is evident that these early disciples would not have been in sympathy with Mr. Moody's school of lay-workers at Mt. Hermon. For another instance is recorded in this same church, and in the same year, when several were censured for "attending a private meeting under the ministrations of a lay-exhorter in time of public worship on the Lord's day." The name of this lay-exhorter was Paine, sometimes spelled Pain, which suggests something of the subsequent feelings on the part of those who had attended his ministrations.

After Mr. Hall's dismissal from the church they were some time without a pastor, there being rival factions in the church, the political condition of

the country being such that it was hard to find harmony anywhere.

Finally, after hearing many candidates, the church voted to extend a call to Rev. Matthew Scribner, and chose a committee of five "to inform Mr. Scribner of the proceedings of the church, and, also, to inform the selectmen of the town that the town may act thereon as they think proper." It seems that the church could not act independently of the town in choosing a minister, for the salary was decided by a vote of the town. This was the order of things until February, 1828, when, the town and church not agreeing, a change was made, the church having the power to call a minister, but the town still voted to raise a certain sum toward the salary.

Mr. Scribner's pastorate is spoken of as being a short one of ten years, and that a pleasant feeling did not exist between him and some of the inhabitants of the town. After Mr. Scribner's dismissal from the church in Westford he spent the remainder of his days on a farm in Tyngsboro.

The succeeding ministers were as follows: Rev. Caleb Blake, Rev. Ephraim Randall, Rev. Ephraim Abbot, Rev. Jonathan Farr, Rev. Luther Wilson, Rev. Claudius Bradford, Rev. Edward Capen, Rev. Hermon Snow, Rev. John B. Willard, Rev. Stillman Clark, Rev. George M. Rice, Rev. George H. Young, Rev. William A. Cram, Rev. Joseph S. Moulton and Rev. E. B. Maglathlin. Many of these preached but a short time, and during this time there were many candidates, whose names are not here given. Mr. Maglathlin remained about two years, beginning his work May 1, 1887. He was educated in the Boston schools, State Normal School, at Bridgewater, Antioch College, and the divinity school at Harvard University. After graduating from the university he taught six years in the Partridge Academy, Duxbury. He taught also in the Cambridge High School. During his pastorate the church was revived, the communion service re-instituted, and the rite of baptism solemnized for the first time in many years. It was also during his pastorate that the church was repaired outside and within, costing about \$1500. He remained here till May 31, 1889, resigning his pastorate to take the superintendency of schools in the district formed by the union of Easthampton, Southampton and Westhampton.

Mrs. Maglathlin is an elocutionist.

During Mr. Blake's ministry they expended money for the purchase of books for a Sabbath-school library; and during his ministry, also, we have the first account of the conflict of theological opinions. He took a decided stand against Unitarianism, but in a few years retired to private life and spent the remainder of his years on a farm. He was dismissed Feb. 28, 1826, and on December 25, 1828, the Union Congregational Church was organized. It was composed of those who withdrew from the First Church on account of difference of opinion in regard to the funda-

mental doctrines of belief, and of others who removed their connection from churches in other towns.

The original membership numbered 75. On Jan. 29, 1829, by unanimous vote of the church, Mr. Leonard Luce was called to be their pastor, and remained until July 1852.

The following pastors were: Rev. Thomas Wilson, Rev. David O. Allen, Rev. John Whitney, Rev. Edwin R. Hodgman,¹ Rev. George T. Stanton, Rev. James Fletcher, Rev. Edwin A. Spence, Rev. Henry D. Woodworth, Rev. Nathan R. Nichols, Rev. Henry H. Hamilton, Rev. Rufus C. Flagg, Rev. Charles H. Rowley, who is still with the church.

Methodist Church.—The first regular services of this church held in Westford were by Rev. John Naylor, in 1856.

In 1860 Rev. L. Luce conducted worship in the school-house during the warm months. Early in the spring of 1863 the services of Rev. Mr. Howarth, a Methodist preacher from Lowell, were secured, and he labored through the summer. During the summer of 1864 Rev. George M. Rice held services in the school-house at 4 o'clock P.M. In the winter of 1866-67 Rev. E. A. Spence preached in the school-house several times on Sabbath evenings.

In 1869 Mr. Charles S. Graves, for many years the conductor on the Stony Brook Railroad, took measures to secure the establishment of a Methodist Episcopal Society in Graniteville. Mr. Minor H. A. Evans preached in the old school-house, July 4, 1869. The congregation filled the room to its utmost capacity, and many stood in the ante-room and around the windows. Mr. Evans, the next morning, drew up a subscription paper for funds to build a church edifice. Mr. Charles G. Sargent promptly headed the list with \$2000 and site. Another \$1000, in smaller sums, was added during the day. July 12th, Mr. Evans was appointed preacher in charge by the presiding elder. July 18th the congregation being unusually large, a platform was erected and seats arranged in the grove in the rear of Mr. Samuel Fletcher's house, and there the services were held for the remainder of the summer. July 20th a class was formed, consisting of twenty members, and Arthur Wright was appointed class-leader. August 3d a Quarterly Conference was held, at which Mr. Evans, the preacher in charge, Mr. Wright, the class-leader, and Mr. J. K. Proctor, the Sabbath-school superintendent, were present, and the following persons were chosen trustees: Arthur Wright, Charles G. Sargent, Cyrus Hosmer, William Reed, Samuel Fletcher, Lyman A. Smith and Josiah K. Proctor; stewards, Cyrus Hosmer, Arthur Wright and J. K. Proctor.

August 13th the Board of Trustees was organized

¹ From June 26, 1859, to July 3, 1864, he was acting pastor of the church in Westford, Massachusetts. During his residence in Westford he gave several addresses on public occasions and some of them were printed. He also compiled the history of that town, a volume of about 400 pages, published in 1883.

by the choice of Charles G. Sargent, president, and Arthur Wright, secretary and treasurer. A Building Committee was elected, consisting of Messrs. Sargent, Wright and Smith, who were duly authorized to build a church. Soon after, the site given by Mr. Sargent was conveyed by deed; a design by S. S. Woodcock, architect, was adopted, and the contract for building was made with Messrs. Mead, Mason & Co., of Concord, N. H., to build the edifice, above the foundation, for \$8900.

In March, 1870, Mr. Evans was ordained deacon and appointed to Graniteville. The church edifice was dedicated March 22, 1871.

Mr. Charles G. Sargent, the chief financial patron of the church, died July 16, 1878. He had contributed about \$5000 and the site to the church, and he left a further pledge of \$1000.

The official board passed the following preamble and resolution:

"WHEREAS, Divine Providence has removed from this life Charles G. Sargent, chairman of our Board of Trustees,

Resolved, That the official board expresses its profound esteem for the life and character of Mr. Sargent, and its sympathy with the family and the society, which have lost a devoted friend and faithful counsellor."

Since the death of Mr. Sargent the debt incurred by building the church has been entirely extinguished, partly by the efforts of the society and partly by the generosity of Mr. Sargent's heirs, who paid the last installment of \$2400.

A medallion of Mr. Sargent has been placed in the church by Rev. M. H. A. Evans, the first pastor.

The following is a list of pastors: Revs. Minor H. A. Evans, Nathaniel B. Fisk, James F. Mears, Minor H. A. Evans (second pastorate), Alfred Woods, W. D. Marsh, S. C. Cary, W. C. Townsend, J. H. Emerson, J. H. Tompson, and Alfred Woods (second pastorate).

EDUCATIONAL HISTORY.—The town of Westford early felt the need of education for her children, and favored the idea of public schools. The early advantages of education were necessarily very meagre, in comparison with the educational advantages now afforded by the town. In those early days the children enjoyed school privileges but a few weeks in the year, and the school was held in a private house. There are now in the town fifteen schools and ten school-houses, and the children attend school 165 days in the year. As we look back over the records, in regard to the action taken concerning schools, in the beginning of the history of our town, we notice the peculiar spelling, and conclude that either our fathers must have been adepts in the phonetic art, or that the need of schools must have been apparent. We quote: "March 4, 1733-'34, voted to chose four men for a Comity to provide a schule-mastre for the insuing year. Voted, Ensign Jonathan Hartwell, Joseph Underwood, Ensign Joseph Keyes, and Joseph Hildreth, Jr., Comt. to provide a scool for insuing year." "March 3, 1734-'35, voted to raise twenty pounds money to pay ye scool-master." "December 4, 1738,

voted to choos a commity to higher a schooll master for keeping schooll this winter." "£40 for the scholl and the rest for town debts or county ratio or taxes and squirls and burds. The selectmen have liberty to dra money out of the treasury for these squirls and burds as the law diricts."

The first teacher of whom we have any knowledge was Joseph Underwood, Jr., a graduate of Harvard. The first female teacher was Mrs. Edward Bates; she taught in 1740 and for several years afterwards. The first record of a school building occurs in 1787. At that time the town voted to build a school-house in each school squadron, and for this purpose voted to raise £145. There may have been school-houses before this, but no record is found of such. In 1647 there was a law requiring every town having within its limits 100 families, to have at least one school in which the scholars could be fitted for college. Later, in compliance with this law, a college graduate was employed as teacher in one school in the town, and it was called a "Grammar School." This college graduate did not teach all the time in one school, but went from one school to another, in a partial degree meeting the demands for a higher education.

"The sum appropriated to the support of schools in those early days will not suffer in point of generosity or liberality when compared with the amount now granted. Wealth had not then accumulated, and to many of the people it was a hard struggle to live in any way; but education was not neglected.

"In due time the lines of the several districts were defined. The term squadron ceased to be used about 1798. That known as Stony Brook was divided in 1795, and that known as the Southeast was separated from the South soon after.

"In 1808 the town voted to 'give to the southeast district (now No. 6) fifty dollars toward erecting a school-house.' This was the first school-house in the district. In 1809, voted 'to choose a committee to regulate the several schools in their inspection the year ensuing.' This looks like a veritable School Committee, but the law of the State requiring the election of such a committee was not enacted until 1827. This town plainly anticipated the enactment. The men to whom belongs the credit of being the first School Committee of Westford were John Abbot, Esq., Colonel Benjamin Osgood, Reuben Leighton, Levi Wright, Nathaniel Hildreth, Jonathan Prescott, Amos Read and Bill W. Stevens. This appointment was not exceptional, but continued to be made year by year.

"In 1822 the territory of the town was divided into eight school districts. These were the Centre, Stony Brook, Forge, the Southwest, the South (No. 5), the Southeast (No. 6), the Northeast (No. 7), and the North (No. 8 and No. 9). In 1826 the North District was divided, and one part called the Northwest. In 1851 the Forge District was divided. Some time previous to this division the school-house of that district stood near the poor-house.

"April 6, 1835, 'Voted that the scholars in the several districts shall be numbered by the committee on the first Monday or Tuesday of November, with the names of the heads of families.'

"March 7, 1836, the selectmen were made a committee to number the school-houses, and then the present numbers were given.

"In 1851 Graniteville became No. 10. The houses, with one exception, have all been built since the repeal in 1869 of the law relating to school districts."

In 1882, in consequence of the resignation of Rev. E. R. Hodgman as superintendent of the schools, Rev. J. Sidney Moulton was chosen in his place, and has been retained as a member of the School Board and superintendent to the present time. Since his connection with the schools four new ones have been opened—one at Forge Village, one at the Centre and two at Graniteville. The large graded school building at Graniteville was completed and opened in the autumn of 1886. It has four rooms, and there are four grades of classes in the building; it cost about \$6500. The new Long-sought-for School-house was built the year following. The school-houses are all in good repair and are of the most improved construction. Mr. Moulton favors the normal method of teaching, and has striven to employ teachers who could use it. He has given the teachers such instruction as he could and has recommended books for them to read on the subject, so that they could inform themselves as to the methods, and use them as far as possible. A few of the teachers only are, as yet, capable of thoroughly teaching them; but where they are used, it is claimed, excellent results have followed. He is convinced that it is the only proper way of teaching, and says the new instruction makes the child more independent, so that he will know what to do rather than to follow a rule in the book—he will get the rule later. The schools have certainly improved since Mr. Moulton took charge of them. There is a better grade of scholarship; he has marked out a course of study for the children and has planned work also for the teachers, so that they know just what they are to accomplish each year; thus a *system* is followed and greater efficiency is attained. The teachers are required to have examinations every month, and Mr. Moulton has always given an examination himself every month—generally a written one—and has also given oral work every time he has visited a school. He visits them oftener than the law requires—as often as every two weeks, sometimes oftener—and he thinks much better work could be done if a superintendent could be engaged who could give his whole time to it. He needs to be in the school often, to see that the teachers do as required and that the methods arranged are properly carried out, and also to see where the children are in their studies all the time. He is conscientious in his work, enjoys it, is liked by the teachers, and has brought the schools up to a standard, at least, as high as in

any of the towns surrounding. He visits schools in various cities and towns, and strives to ascertain all the improved methods of instruction. There are very few truants in the schools, only six or eight during the year, and when it is considered that there are six schools in two manufacturing villages in the town, this number cannot be large. People wish their children educated; they keep them in school, hoping they will secure a better education than their parents. Mr. Moulton was born in Plainfield, New Hampshire, April 12, 1852. He graduated at Kimball Union Academy, in his native town, June, 1869, and at Dartmouth College in 1873. He studied theology at the Cambridge Divinity School, graduating in 1876. He was ordained here, June 12, 1878, having preached here nearly two years before his ordination, as acting pastor of the Unitarian Society. He resigned his pastorate in 1885, when he began preaching in Stow, Massachusetts, where he is still the acting pastor and the superintendent of their schools, giving them about one-third of his time—the remainder he spends in Westford.

The Academy.—In 1792 several gentlemen met together and “agreed to form themselves into a society by the name and institution of the Westford Academy.” Articles of agreement and subscription were then drawn up and signed by fifty-four persons; and at the head of the list stand the names of Zaccheus Wright, John Abbot and Abel Boynton, each of whom subscribed £30. The town also contributed to the original fund and became entitled to its benefits.

August 3, 1792, the proprietors adopted certain rules and by-laws for the regulation and government of the school; and among other things it was provided, “that the English, Latin and Greek languages, together with writing, arithmetic and the art of speaking, should be taught, and, if desired, practical geometry, logic, geography and music; that the school should be free to any nation, age or sex, provided that no one should be admitted a member of the school unless able to read in the Bible readily without spelling.”

The act of incorporation was passed September 28, 1793. It recites that over £1000 had been given by various parties for the establishment of the academy; but the records of the early meetings of the subscribers specify only the gifts before mentioned. In the meantime, however, these may have been increased by additional subscriptions.

The first meeting of the trustees under the act of incorporation was held on the 2d of April, 1794, at the house of Mr. Joel Abbot, and was continued by several adjournments to the 21st of July following. At this meeting the arrangements seem to have been completed, or nearly so, for the orderly working of the institution. At this meeting Mr. Levi Hedge was requested to have a public exhibition on the 4th of July. This is the first intimation on record of his being in office as teacher or preceptor.

Public exhibitions seem to have been continued for many years, and tradition says that they were attended with great interest. Academies were rare then, and the attendance from other towns and from considerable distances was much larger than it now is.

First among the early friends and promoters of this institution stands the name of Zaccheus Wright. His interest in it is evinced by the liberality of his gifts; and the estimation in which he was held is apparent from the fact that he was elected the first president of the board of trustees, and was annually re-elected to that office till 1808, when he declined further service.

John Abbot, eldest son of John Abbot, was born in Westford, January 27, 1777, and died April 30, 1854, at the age of seventy-seven. He graduated at Harvard University in 1793, in a class distinguished for talent, in which he took a high collegiate rank. He immediately became preceptor of this academy and held that place two years. He then studied law and opened an office in Westford, and about the same time he was chosen a trustee. On the decease of Jonathan Carver in 1805, he was chosen treasurer of the academy, which office he held by successive annual elections till his death, a period of fifty years, less three or four months. To his careful management and prudent foresight the institution is chiefly indebted for its present funds. During his long administration they increased nearly or quite threefold. The academy had no wealthy patrons like its neighbor at Groton, but depended for the increase of its means on small but carefully husbanded accumulations. It was the aim of the treasurer to save something from the annual interest of the funds to be added to the principal; and almost every year's report showed some increase in their amount. The trustees had implicit confidence in his integrity, fidelity and skill, and rarely, if ever, interfered with his plans. During this long period his services were rendered gratuitously to the institution whose welfare he had so much at heart, and he will always be remembered as one of its staunchest friends. Mr. Abbot was also held in high respect by his fellow-townsmen, being often chosen to places of trust. He was regarded as a sound lawyer, and a faithful and reliable legal adviser. He served one term as a Senator in the State Legislature, and was a member of the convention for revising the State Constitution in 1820. He was also a distinguished member of the Masonic Order. He was twice Grand Master of the Royal Arch Chapter of the Free Masons of Massachusetts, and in that capacity laid the corner-stone of the monument on Bunker Hill in 1825, General Lafayette being present and assisting in that ceremony.

He was succeeded in the office of treasurer by his son, John William Pitt Abbot, who held it till his death, in 1872. The latter, like his father, gave his services gratuitously, being animated by the same desire to further its prosperity. He was born April 27,

1806, in Hampton, Connecticut, the early home of his mother, Sophia Moseley, a daughter of Ebenezer Moseley, Esq., of Hampton. He was chiefly fitted for college at this academy and graduated at Cambridge in 1827. After studying law in the Law School at Cambridge he entered his father's office, the business of which was not long after transferred entirely to him. He was a member of the House of Representatives in 1862, and of the State Senate in 1866; and was selectman and town clerk for many years. During the late war his services as a town officer were invaluable. He was particularly interested in the affairs of the First Parish, and for a long time was entrusted with the management of them. In all these relations he was trusted as an able and faithful counselor and public servant, and he was universally regarded with esteem and affection for his urbanity, benevolence and generosity.

Levi Hedge, the first preceptor, graduated at Harvard University in 1792, a distinguished member in a distinguished class. He came directly to Westford with a high reputation as a scholar, and left two years after with an equally high reputation as a teacher. He returned to Cambridge to take the place of a tutor in the college, and after several years was promoted to a professorship of logic and metaphysics.

Miss Susan Prescott, daughter of Hon. James Prescott, president of the board of trustees, was the first female assistant employed, and her instructions were confined solely to the classes of young ladies. She was justly regarded as an accomplished teacher, but she held that position only for two successive seasons in summer.

Rev. Ephraim Abbot took charge of the school in 1828, and was the preceptor for nine years. He was born in New Castle, Maine, September 28, 1779, and was the son of Benjamin and Sarah (Brown) Abbot. He graduated at Harvard College in 1806, and at Andover Theological Seminary in 1810, in the first class that left that institution. His name stands at the head of the list of graduates. He was ordained pastor of the Congregational Church in Greenland, New Hampshire, October 27, 1813, and was dismissed on account of ill health October 27, 1828. While in Greenland he was for a time the principal of the Brackett Academy in that place. During his residence at Westford he represented the town in the State Legislature in 1839. He was a land surveyor and justice of the peace, and was a very useful and philanthropic man and an earnest and devout Christian. He was a true friend of the academy, and never ceased to take an interest in its prosperity. He died in Westford July 21, 1870, aged 90 years, 9 months and 23 days.

Hon. John Davis Long, late Governor of the Commonwealth, was born in Buckfield, Maine; graduated at Harvard in 1857, and came at once to Westford, where he remained two years. The school under his management was very prosperous. The number of

pupils was unusually large, and the enthusiasm of both teacher and scholars was high-toned and abundant. Mr. Long, during his preceptorship, started a literary society in which debates were held and a paper, called the *Literary Gatherer*, was edited by the members. The versatility of Mr. Long's gifts was shown in his contributions to that paper, and his ready tact in the discussions. The society was kept up for several years after he left. He is remembered with affection and esteem by his pupils and associates, and such of them as yet reside here welcome him to their homes as one whom they honor and love. His honorable career as a lawyer and statesman have won for him golden opinions which many may emulate but which few attain.

C. O. Whitman, Ph.D.—The immediate predecessor of Mr. William E. Frost, as preceptor of the academy, was Dr. Whitman. After leaving Westford he held the position of sub-master in the English High School, Boston, three years, then studied three years in Leipzig, where he took the degree of Doctor of Philosophy. Returning to America, he taught another year in the English High School, then accepted a Professorship of Zoology in the Imperial University of Japan, remaining there two years. He returned home through Europe, spending six months in study at the Naples Zoological Station, on the way. He then went to Harvard University for three years and finally published—jointly with Alexander Agassiz—"Embryology of Fishes." From Cambridge he went to Milwaukee, accepting the directorship of the Lake Laboratory, established there by Mr. E. P. Allis. He is at present Professor of Animal Morphology in Clark University, Worcester, Mass. He is also the editor of the *Journal of Morphology*, and director of the Marine Biological Laboratory at Wood's Holl, Mass. His appointment to the professorship at the university was made in August, 1889.

The place of preceptor is now filled by Mr. William Edwin Frost, a native of Norway, Maine. He was born December 6, 1842; graduated at Bowdoin College in 1870, and took charge of this academy, April 26, 1872, being the thirty-sixth in the line of preceptors. He is a very careful and thorough teacher, and a most efficient disciplinarian. His work in the school has been excellent, and for seventeen years it has secured the just and hearty praise of all who have been familiar with his methods and witnesses of his achievements.

Previous to Mr. Frost's taking charge of the school, the only examinations of the classes were oral ones at the close of each term; and as these were limited to one day's session, some of the classes were not examined at all. The first change made in this matter was to have the oral examinations include all the classes, two and sometimes three days being devoted to this purpose. In order to secure greater care and thoroughness in the preparation of lessons, a system of written examinations was soon introduced in addi-

tion to the oral ones, three being held each term at regular intervals. The rank of each student and class is impartially made up from these examinations and kept on record. This judicious system of examining and ranking the students has proved to be a strong incentive to faithful study, and has greatly improved the quality of the work done in the school.

No small acknowledgment of meed is due Mr. Frost as an educator, from the fact that, while he has sent quite a number of young men to college, every one he has fitted to enter such an institution has been received without a single condition, every one has passed successfully through the difficult and protracted examinations.

Mrs. Helen Keith Frost, the wife of the preceptor, is a direct lineal descendant of Rev. James Keith, the first settled minister at Bridgewater, Mass. She is a graduate of the Maine Wesleyan College at Kent's Hill, Maine; is interested in literary pursuits, and consequently assists the educational interests of the community and stimulates its literary activity.

The present lady assistant teacher is Miss Nettie M. Stevens, of Westford. She graduated at the academy in 1880; taught school a year in Lebanon, N. H.; went from there to Westfield, Mass., and entered the Normal School, taking the four years' course in one and one-half years, and receiving her diploma.

She then taught for a year or two, and in January, 1885, entered upon her work as teacher in the academy from which she had graduated five years before. In 1877 she took the French course at the Amherst Summer School of Languages.

She is specially interested in botany. She has recently purchased a compound microscope, and is becoming proficient in the preparation of slides, by which she studies the biology of animal as well as plant life.

LIST OF GRADUATES, 1872-1889.

College Preparatory Course.—Oscar Brikerhoff, Forge Village, 1873; Edward H. Chamberlain, Westford, 1877; John O. Cummings,¹ Westford, 1873; Frederick A. Fisher, Westford, 1877; Francis A. Frost, Westford, 1889; Ida E. Leighton, Westford, 1877; Henry L. McClusky, Westford, 1889; Charles O. Prescott, Westford, 1873; Arthur G. Robbins, Carlisle, 1882; Nettie M. Stevens, Westford, 1880; Emma J. Stevens, Westford, 1882; Leonard W. Wheeler, Westford, 1882; Henry M. Wright, Westford, 1880.

English and Classical Course.—Lillie B. Atwood, Westford, 1877; Carrie L. Adams, Chelmsford, 1887; Emma S. Abbot, Westford, 1882; Lucy K. Abbot, Westford, 1887; George G. Drew,¹ Westford, 1879; Edea J. Drew, Westford, 1882; A. Mabel Drew, Westford, 1887; Addie M. Fisher, Westford, 1879; Clara A. Fisher, Westford, 1882; Lenie H. Fletcher, Westford, 1887; Julia E. Hall, Westford, 1889; Herbert V. Hildreth, Westford, 1880; M. Luella Hutchins, North Billerica, 1887; Rosina Keyes, Westford, 1877; James L. Kimball, Westford, 1880; Delia Martin, Westford, 1878; Abby M. Pond, Dedham, 1873; Issie A. Parker, West Chelmsford, 1881; Albert E. Prescott, Westford, 1881; Carrie E. Read, Westford, 1879; Stella E. Reed, Graioitville, 1880; Carrie M. Robbins, Carlisle, 1882; M. Dora Spaulding, Westford, 1882; Mlonie A. Worden, North Chelmsford, 1882; M. Ella Wiley,¹ Westford, 1882.

English Course.—John C. Abbot, Westford, 1888; Willie F. Blodgett, Dunstable, 1888; Arthur D. Butterfield, Dunstable, 1888; Ella Bennett, Westford, 1883; Charles A. Chamberlin, Westford, 1889; John Fisher, Westford, 1887; Luanna W. Fletcher, Westford, 1883; Harrison C.

Hall, Westford, 1887; Charles D. Howard, Westford, 1889; Augusta G. Hutchins, Chelmsford, 1889; M. Belle Parkhurst, West Chelmsford, 1881; Rena E. Prescott, Forge Village, 1888; Charles G. Sargent, Graniteville, 1883; Edith E. Walker,¹ Burlington, 1879; Roy B. Wheeler, Westford, 1888; Clarence W. Whidden, Westford, 1881; Annie E. Wilson, Westford, 1888; J. Florence Wilson, Westford, 1888; S. Eva Worthen, Chelmsford, 1882; Walter C. Wright, Graniteville, 1883.

Many of the above graduates have taught in the schools of our town, or of other towns. We speak of a few of the graduates whose homes were in Westford: Frederic A. Fisher graduated from the academy in 1877, afterwards graduated at Bowdoin College, Maine, and acted as tutor there. He studied law as a profession, and is at present a successful lawyer in Lowell, but keeps up his interest in Westford. He is on the School Board, one of the Town Library Committee, one of the committee for obtaining a pulpit supply in the Unitarian Society, and his influence for good is felt in many ways. Charles O. Prescott, a graduate of the academy in 1873, graduated at the Institute of Technology, receiving the title of B.S.; afterwards took a post-graduate course of three years; then taught at Plymouth, at Knapp's School, for some years. He then went abroad, going nearly around the world, spending some time in Australia and the Old World; he brought back much valuable information and many curiosities and works of art. Mr. Leonard Wheeler, Miss Emma J. Stevens, Miss Lillie B. Atwood, Miss Clara Fisher, Miss Rosina Keyes, Miss Delia Martin, Miss Carrie E. Read, Miss Dora Spaulding, Miss Ella Wiley, Miss Ella Bennet, Miss Luanna Fletcher, Miss Annie Wilson, graduates from the academy, have all taught in our town schools, and some are teaching at the present time.

James L. Kimball graduated in the class of 1880, and after studying one year at Bryant & Stratton's Commercial College, Lowell, entered the Institute of Technology, Boston, remaining three years. Choosing electricity as his specialty, he began working with "Thomson-Houston Electric Company" in 1886, and has been with the company most of the time since then. He has studied all branches of the work, and has been sent out by the company to oversee the planting of electric lines in different parts of the country. He is now in the Railway Department of the city office, Boston. He has invented an accessory for the electric-lighting apparatus, which is used quite extensively.

Henry M. Wright, another Westford boy, graduated from the academy in 1880, went to Bowdoin College, Maine, graduated from there in 1884, taught school in Wilmington, Vt., in the fall of 1884, then returned to Bowdoin and took a post-graduate course in chemistry. After that he went to Hingham, Mass., as the principal of the High School, where he is still a successful teacher.

Albert E. Prescott, a graduate in 1881, has devoted his life to music. He is still taking lessons of the

¹ Deceased.

best masters in Boston, and is himself teaching scholars in all the surrounding cities. He kindly shows his interest in his old home by doing all he can to advance the musical interest here, whenever he can find time to do so, among so many urgent and pressing calls elsewhere.

Edward H. Chamberlin, a graduate in 1877, is a successful practicing physician in Chelmsford, Mass. Miss Nettie M. Stevens, a graduate in 1880, is now the assistant principal in the academy. Some of the later graduates are now pursuing courses of study in college: Francis A. Frost is in Bowdoin, Maine; John C. Abbot and Charles G. Sargent in the School of Technology, in Boston, Mass.; Lucy Abbot in Smith's College, Northampton, Mass.; Julia E. Hall in Mt. Holyoke College, South Hadley, Mass.; Mabel A. Drew in the Normal School, Bridgewater, Mass.; Roy Wheeler in the Commercial College, Lowell, Mass. Harrison C. Hall with the firm of N. Boynton & Co., manufacturers and dealers in cotton, duck and cordage, Boston, Mass., is becoming a successful business man. Others are successful in other occupations; and all these graduates, whether from Westford or other town—so far as we can learn—have become honorable men and women, worthy of their *alma mater*.

Microscopy.—In this connection, it may not be wholly inappropriate for the writer of this historical sketch to speak of a course of study in which he has been specially interested, viz., microscopy. As it has been his purpose to write of any such thing concerning others, he takes the liberty of speaking of this most fascinating field of scientific research. And as this history will probably be read by some who are not acquainted with the microscope or the many uses to which it is applied, it may be well to state that magnifying glasses have been used for hundreds of years, even as far back as the philosophers of Greece.

Valuable discoveries were made by using only a drop of water as a magnifier; but it has been only within the last fifty or sixty years—since the construction of the achromatic lenses—that the instrument has been of scientific importance.

The compound microscope is now an instrument of the highest optical perfection, and has been brought up to its present efficiency by the united labors of men who have given their lives to its improvement. Devised in its compound form about 200 years ago, it was long considered an ingenious toy; and though it gave wonderful revelations to the scientist whenever used, it was generally considered a thing to amuse his leisure hours and not of any practical utility. The past few years have changed all that, and the time has gone by for it to be considered a "plaything" alone, as it is now conceded that even a moderate knowledge of any one of the physical sciences is possible only by its aid. What the telescope is to the heavens, the microscope is to the earth, with this difference, however: that where the telescope reveals

one fact the microscope reveals a thousand. It is but a truism, now, to say, that a good microscopical outfit is of the utmost importance in scientific investigations, for in many of them it has proven itself of the greatest utility. Some of our sciences have been made possible only by its aid,—*e. g.*, biology would never have been known without it; for it was by the glass that the cellular structure of the plant and the animal were discovered, as well as the "streaming of the protoplasm." The latter can be seen only by an excellent objective, and not even then without careful manipulation. No student, now, expects to attain even a moderate excellence in botany, without some kind of a magnifier, while the *biological* study of plants can be carried on by a good compound microscope. Biological investigation is now one of the most fascinating of scientific pursuits, and it must look to the compound instrument for whatever triumph it expects to achieve in the future. The microscope furnishes men with a second sight, and whoever uses it acquires a double power over nature. The geologist, the chemist, the mineralogist, the anatomist and the botanist have all found the microscope necessary to any complete knowledge of their all-absorbing researches. It is applied now in forensic medicine, and has aided in determining the guilty as well as in liberating the innocent. The germ theory of disease is a result of careful microscopical investigation and experiment, and has been placed among the verities of science. To the teacher, the glass has proved itself, in many circumstances, a valuable aid in fixing the attention of the pupils upon the wonders of the invisible world, which has been proven larger, even, than the world we can see with the unaided eye. The results of its use has surpassed the widest stretch of imagination,—no one twenty-five years ago would have deemed it possible to discover all that is well known to-day. It is said that, "No one, who possesses even a pocket microscope of the most limited powers, can fail to find amusement and instruction even though he was in the midst of the Sahara itself. There is this great advantage in the microscope, that no one need feel in want of objects as long as he possesses his instrument and a sufficiency of light." By its aid, new lives have been discovered in the sand beneath our feet, in the drop of water from a stagnant pool, and in the very air we breathe; and every one of these lives is a link in the chain of existence. By the multiplicity of lives discovered a new "classification" has been made imperative, several times, in natural history.

Not long has it been since the hydrozoa and polyzoa were classified, while the diatoms are yet causing much discussion. But one of the great benefits resulting from its use comes from the relaxation it gives to the tired men of business, to the teacher weary from the school-room, and to people who are ill and confined to the chamber—relaxation, rest and material for after-thought as well. What more help-

ful occupation to the aged one who is "tenting on the beach," awaiting the summons from the other shore, than studying the works (as well as the Word) of Him who made all things, and which he may be permitted to study with better facilities by and by. Surely, in the word and works of God we have enough to enlist all our powers in eternity as well as in time.

The writer has received such stimulus and instruction from this study that he, without any reserve, can recommend it to the attention of all. Very few are so poor that they cannot possess some kind of a magnifying power, and by its use knowledge shall be discovered everywhere it is sought, and often where it is least expected. The writer has endeavored to follow the trail of investigation as well as to find some new beauties and truths of his own, and he has not been disappointed. With 1800 microscopical slides, covering pretty well the different fields of research, he is never at a loss for instruction and amusement, for such a recreation enlarges the armamentarium of the mind and increases the furniture of the soul. He has thirty different species and varieties of fresh-water sponges, as well as a good collection of insects mounted by himself, and by exchange he has received 400 histological and pathological slides, illustrating nearly every appearance the normal and abnormal tissues of the human body assumes. The work is not difficult, and he knows of no branch of science that will give such large returns for the time employed, as *microscopy*.

Social and Public Library.—"It is now eighty-five years since the establishment of a library in this town. It was at first the effort of a few benevolent men to secure a wider diffusion of knowledge among the people by means of good books; but that early inception has widened into a large and useful public library. Evidently these men took a just view of the needs of society, and it is gratifying to be able to point to the result of their wise forecast and philanthropy. The following document makes known their purpose in their own words:

"WESTFORD, 14th February, 1797.

"We the subscribers, Inhabitants of the Town of Westford, feeling ourselves willing to promote Literature and useful knowledge among ourselves and our families, think it for the benefit of us, and for the Town in general to establish a Social Library to be put under such rules and regulations as shall appear to be the most beneficial to the subscribers; and it is proposed that two dollars shall constitute a share to each member that shall subscribe that sum, and so in proportion to those that shall subscribe for a greater sum; and we pledge ourselves each of us severally and Individually to pay all the monies that we subscribe for, on the first Monday in April next ensuing, when there shall be a general meeting of the subscribers at the house of Mr. Samuel Wood at 6 o'clock afternoon, at which time there will be appointed a Committee to receive the subscription money and to purchase such Books as shall be most likely to subserve the purposes aforesaid, and to act upon all other matters that shall come before us."

"According to agreement the subscribers held a meeting at Mr. Wood's tavern, April 3, 1797, at which Zaccheus Wright was chosen moderator, and Caleb Blake clerk. Rev. Caleb Blake, Col. Zaccheus

Wright, James Prescott, Jr., Francis Leighton and Ebenezer Prescott were appointed 'to draw up rules and laws for the intended Library in Westford.' At an adjourned meeting held at Mr. Samuel Adams', May 8th, the subscribers 'voted to accept the Rules and Regulations that have been drawn up by the committee;' and elected James Prescott, Jr., Rev. Caleb Blake and Dr. Charles Proctor, directors; and Richard Kaeeland, librarian and treasurer. The 'preamble' to the code of laws recites that 'the subscribers, being desirous of increasing their own information and promoting useful knowledge in the community, especially among the rising generation, agree to form themselves into a society under the name of the Westford Library Company;' and the rules state that 'the Library shall consist of fifty shares at least, and shall always be kept in the town of Westford.'

"The first assessment was paid by thirty-six persons on forty-nine shares; and the second by thirty-one persons on forty-one shares. The first book on the list was Ferguson's 'Roman Republic,' in three volumes. A printed catalogue, issued in 1816, gives the titles of 102 books in 179 volumes. In 1801 a vote was passed 'that the members of said Company shall be hereafter called and known by the name and style of "the proprietors of the social library in the town of Westford."' With the exception of the year 1800, Zaccheus Wright was president down to the year 1806, when Francis Leighton was chosen, who died the same year and was succeeded by Isachar Keyes.

"In 1853 the town chose a committee 'to report a plan for establishing a Town Library and ascertaining at what price the Social Library can be purchased.' There is no hint on the town records of any report from that committee. The matter was again brought before the town in 1858, November 2d, when a committee was appointed 'to see if any measures can be adopted by which a Town Library can be established and the Proprietors' Library merged in the same.' March 7, 1859, this committee made report as follows:

"Your committee met the committee chosen by the Proprietors on the 4th of February, 1859, and after an interchange of views on the subject-matter, received from said committee the following propositions:

"1st. Said Inhabitants shall annually expend in the purchase of books for said Library a sum of money not less than thirty dollars.

"2nd. Said Inhabitants shall provide, furnish and keep in good order a suitable room in the middle of said Westford where said Library shall be kept under the charge of a suitable Librarian.

"3rd. Said Inhabitants shall make suitable and proper regulations respecting the preserving, keeping in repair, and loaning the books in said Library.

"4th. Whenever said Inhabitants shall refuse to make the appropriation before mentioned, said Library shall revert back to said proprietors or their heirs.

"And your committee recommend the acceptance of the above propositions.

"THOMAS RICHARDSON,

"D. C. BUTTERFIELD,

"P. CHAMBERLIN."

"On the same day the town voted to accept the report, and chose Leonard Luce, Sherman D. Fletcher and Elbridge G. Parker to carry the vote into effect. Upon these conditions the Social Library came into

the possession of the town as a gift, and became in fact and of right a town library.

"About thirty-two years ago a collection of books was made, called the Agricultural Library, consisting of one hundred volumes. The funds were obtained by subscription, each person paying three dollars. This also passed into the hands of the town some ten years ago, and was merged in the Public Library. This library is now kept in a commodious apartment in the Town Hall. Three directors, chosen annually, have the entire management of it."

The annual appropriation of the town for new books is about three hundred dollars. The number of volumes at present is 6150. In 1886 the library was enriched by a legacy of \$1000 from Mr. Stephen S. Stone, a native of Westford, but for many years a resident of Revere, Massachusetts. In 1887 the library received another legacy of \$1000 by the will of the late Augustus K. Fletcher, of Chippewa Falls, Wisconsin, a native of Westford. Owing to some informality in the execution of the will on presentation for probate it was declared void. But the legacy was paid from her own share of the estate by Mrs. Fletcher, out of respect for the wish of her husband, and in full sympathy with his purpose.

TOWN-HOUSE.—The present town-house was erected in the autumn of 1870, and on "February 4, 1871, the town appropriated six hundred dollars for furnishing the town-house. The house was dedicated March 3, 1871, at which time the address was given by Rev. George H. Young, then minister of the First Parish. Prayer was offered by Rev. E. R. Hodgman. The chairman of the building committee presented the keys, after a brief speech, to the chairman of the Board of Selectmen, who responded, and the building passed into the possession and under the control of the town."

In 1880 the building was remodeled at a cost of \$3663. A new front and tower were put upon the building; a gallery was made over the front entrance, and fifteen feet were added to the rear. There are four ante-rooms, and the edifice is now very convenient for all the purposes required by the town. One of the large lower rooms has been used by the Town Library.

"It was deemed fitting that the completion of the remodeled and renovated building should receive some public recognition, and accordingly a celebration was arranged for Thursday, December 9, 1880, which was largely attended by the citizens of Westford and of the adjoining towns. Governor Long was invited to be present, and an address was delivered by Rev. Edwin R. Hodgman, by invitation of the committee of arrangements. The address related to the early history of the town. Governor Long, in his address on the occasion, recalled the remark of John Adams, that 'the four corner-stones of the Commonwealth are the town, the church, the school and the militia,' and said that all were fittingly rep-

resented in this celebration. He congratulated the citizens of the town on the evidences of growth and improvement, not only in material things, but in culture and refinement, and he called attention to this wonderful growth all over our country. But while we congratulate ourselves on the progress we are making in tangible things, he said the best progress is, after all, in those principles which have been referred to in the address as possessing and animating those who founded our New England municipalities. Brief addresses were also made by George A. Marden, of Lowell, and Allan Cameron, of Westford. Music was furnished by the Dunstable Cornet Band."

INDUSTRIES.—"The first concernment of the early settlers was to provide for the three urgent necessities of human existence—food, clothing and shelter. They had no luxuries, and they resolutely set their faces against all 'foreign superfluities.' Their chief business was to till the soil. It was no easy task to cut down the forests, dig out the stumps and stones and get the ground ready for the seed. In the early years little else was done, and the work required much hardship and self-denial. Yet there was a real joy in it, such as the pioneer feels when he starts out to make a home for himself with all its endearments and pleasures. Their houses were built for protection, not for show; their food was plain, but nutritious; their garments were homespun, but neat; their hearts were true and their minds elastic and cheerful. Gradually, as the settlement went on, they gave attention to the manufacturing of such articles as they needed. The peripatetic cordwainer, or cobbler, with his supply of tools, made his annual visit to the scattered houses, at which time the 'rising generation' were appropriately shod.

"In 1669 the town of Chelmsford granted to Thomas Henschman, William Fletcher and Josiah Richardson a parcel of land to encourage the erection of another saw-mill. This was a tract of land now principally in Westford, but partly in West Chelmsford. In included the mill-site, now unused, on the tributary of Stony Brook, at Westford corner. The brook is the outlet of Nubanusuck Pond, and is called Saw-mill Meadow Brook in the old deeds. This was the first mill of any kind within the limits of Westford, and the second saw-mill in Chelmsford, the first standing on River Meadow Brook, in the southeast part. Neither of them were on Stony Brook. On this stream, from Forge Pond to its mouth, there are at least seven mill-sites, with a height of fall varying from eight to twenty-two feet, but not one of them had been used at this date, 1669. The water-power at Forge Village, then in Groton, was first used about 1680, and this was the first point at which a mill was built on the brook.

"Nearly all fabrics for garments were spun and woven at home on the hand-loom. The early deeds show that men were often weavers by trade. The

cloth, after it was taken from the loom, must be dressed by the clothier. The first fulling-mill was at Brookside. The first tannery was built on the east side of the town by Zaccheus Wright. Col. Wright, having no children, gave up his property and business by sale or will to Benjamin Osgood, who carried it on at the same place for many years. Another tannery was situated near the centre of the town, on Heywood Street. The first proprietor was Col. Abel Boynton. After him was John Osgood, then Ira G. Richardson. It is now many years since both of these were abandoned."

Thus early did the colonists begin to think of supplying their own wants, that they might be measurably independent of the Old World. As their wants increased they devised means of satisfying them, and thus grew up steadily and surely the various industries of our country, including those of Westford. They did not wish to live in log-houses always, and soon began to cut timber in the various saw-mills erected, with which they built their framed and boarded dwellings, more roomy and healthful than those so hastily put together. Then, after the independence of the Colonies was assured, they began to see still more clearly that they must depend, to a great degree, upon themselves for the comforts and necessities of life, and hence an additional stimulus to industrial pursuits was given; and as the wants of a growing nation enlarged, the people realized that they could exchange commodities with other countries, and thus, by the medium of barter or sale, secure other things not so easily manufactured in a new commonwealth. Thus steadily and rapidly grew up the vast industries which have made us not only self-supporting, but one of the most powerful nations in the world. Little did our fathers think, even in their wildest imagination, when they "moored their bark on the wild New England shore," that the land to which they had self-exiled themselves would grow to be what we see to-day. Many things have been accomplished which would have seemed to them impossibilities. The progress of our nation has been a wonder to itself, while its progress in the arts, in literature and in science has astounded the Old World. Think of our labor-saving machines and how much they have done for us. Who would have thought of all this 100 years ago? Think of the art of photography, and that of printing; think of the schools, colleges and the associations formed for the advancement of science; think of our railroads, steamboats and telegraphs; think of the vast area of our cultivated lands; of our cities, villages, schools and churches; the products of our mines and quarries; the progress in trade and commerce, which now, by the ocean cable (carried to success by an American), brings the whole world to our doors.

The continent blooms with its gardens, shines with its cities, roars with its wheels of labor, sings with its joyful congratulations, and throbs with its 65,000,000

hearts. Such has been the progress of the descendants of the early colonists, and Westford has had its full share in it all, as, let the various industries of the town attest. Some of the industries that were early started were given up after a time for others more remunerative.

"Brick-making.—This was early begun in the south part. The clay-hills on the farms of George H. Elliott and John Wilson furnished the materials for the purpose. The business was carried on by Aaron Parker and his successors, and by Captain Jonathan Minot and his sons. The last men who were concerned in it were Addison Parker and David Whitney. The old house, torn down not long since by George Hutchins, and the house now occupied by Wayland F. Balch, were built of brick burnt near by. The last kiln was burnt by Samuel Wiley.

"Coopering.—This has been done here, but never on a large scale. The town annually goes through the form of choosing a 'culler of hoops and staves.'

"Pottery.—There was once a yard for this in the rear of the residences of Nathan S. Hamblin and John W. Abbot. The clay was dug for a while on the north side of Prospect Hill, where the pit is still to be seen. As this did not prove to be of good quality, clay was afterward brought from another source. Mr. James Burns was the first and perhaps the only proprietor. He lived, it is said, on the farm lately owned by Samuel N. Burbeck, and died at a very advanced age. Fragments of pottery have been found on the site of the old yard.

"Lime-burning.—This has been practiced on a very limited scale. Limestone is found in Chelmsford and Carlisle, and perhaps occasionally crops out in the south part of this town. The ruins of a lime-kiln are to be seen near the so-called Carter place.

"Carpet-weaving.—The house at Westford Corner, lately occupied by Frederic Parker, was once used for this purpose. This was before the invention of power-looms, when all weaving was done by hand.

"Potash.—A building with its necessary appendages for the manufacture of potash stood on the old road from Asaph B. Cutter's to George Yapp's house, which was once a tavern-stand, at the junction of the two roads."

In 1680 the water-power at Forge Village was first utilized. Hon. Caleb Butler, in his "History of Groton," says:

"After King Philip's War and the resettlement of the town, Jonas Prescott built a mill at Stony Brook, near its issue from Forge Pond, now in Westford. Previous to the erection of Prescott's mill, an Indian by the name of Andrew sold his weir at Stony Brook, as appears by the following record: 'The twenty shillings due to Andrew, the Indian, from the town for his *uarre* at Stony Brook, assigned by said Indian to Richard Blood, the said Richard Blood assigns it over to James Parker.' Prior to 1730, Jonas Prescott had 'greatly enlarged and improved the works on

Stony Brook by erecting forges for manufacturing iron from the ore, as well as other purposes.

"It is difficult to fix the precise date of the building of the forges, but it was perhaps as early as 1710. This enterprise of working iron was the fourth or fifth of the kind in New England. The ore used was the variety known as bog-iron, and was procured in Groton. The 'Groton iron,' produced at the forge, was not of very good quality, being brittle, and it was not extensively used. The business was carried on until the year 1865, when the Forge Company ceased to exist. It was not exclusively the process of smelting, but of manufacturing forges and other implements. During this long period of 150 or 160 years the Prescotts, descendants of Jonas of Groton, held a controlling interest in the company and managed its affairs, except during the last few years of its existence. Jonas, who died in 1870, five years after the forging ceased, was the owner of forty shares in 1863, and was the last who worked at the business.

"The Forge Village Horse-Nail Co. was formed January 5, 1865. It succeeded to the franchises of the Forge Company, used the water-power and buildings of that company, and put in machinery for making nails. The capital stock was \$30,000, with the right to increase it to \$100,000. The officers were John T. Daly, president; John F. Haskins, secretary, and Alexander H. Caryl, treasurer. The capital was increased to \$100,000 in 1868. The business was prosperous and remunerative for some time, but it gradually declined until 1877, when it came to an end."

Granite Quarrying.—Of the several villages in the town of Westford, Graniteville leads as a manufacturing centre; its very name suggests one of its earliest industries. There are several quarries in town, and three of them are in Graniteville. The business of quarrying granite began in 1826 or '27; ledges were not worked at first, but the large granite rocks in the north part of the town, already on the surface, were first used.

"The granite pillars of the Market-House in Boston were hewn of huge boulders left ages ago on a lot of land lying northwest of the old school-house in district number seven, on the old stage road from North Chelmsford to Groton, and were hauled through the centre of the town by twenty yoke of oxen. They were obtained by Charles Hollis.

"Isaac Carkin was the first man to open the ledge on Oak Hill. The quarrying began there fifty-five or fifty-six years ago, that is, in 1826 or '27. After Mr. Carkin, Major Jesse Colburn carried on the business for many years, and more recently George W. Merrill. Much of the stone from this source is drawn to the stone-yard at North Chelmsford, but some is hauled into Lowell."

"The first quarrying from the ledges on Snake Meadow Hill was done by Benjamin Palmer, a native of Camden, Maine. In the summer of 1847 the railroad bridge across the brook was begun, and there

was a demand for split stone on the spot," and it was furnished by several parties. "Benjamin Palmer came to this town in March, 1847. At first he worked on boulders or cobbles, as the quarrymen call them, and his stone was drawn by team to Lowell. He soon began to work on the ledges," quarrying the granite in large quantities. He died May 19, 1888, but his son, Lewis Palmer, carries on the business, furnishing about the same quantity of stone as his father. About twenty men are employed, also four horses and a yoke of oxen. Some stone is furnished to private parties by filling small orders for people in the vicinity, but the greater part is furnished to railroads and corporations. Stone is sent "to numerous cities and towns of this Commonwealth, which make the chief demand for it; but it is sometimes sent to New York, New Orleans and Chicago. It is used for paving, for engine-beds, foundations for buildings, street curbing, flagging for city sidewalks, windows and door-caps, door-sills and caps, bridge-building and various other purposes. Being free from mineral substances, it holds its color for a long time, and seldom shows any rust or stain; but being hard to bring to an edge, it is not much used for monuments, although it is often prepared for edge-stones around lots in cemeteries. The traffic is an important source of income to the town."

Mr. Palmer has furnished stone to the Hamilton Mills, Lowell; caps and sills to the Lawrence corporation, as well as underpinning. He furnished foundation stones for the Stevens Central Block, Lowell; also for the locks and canals, and for the Hamilton corporation.

"In 1848 Samuel Fletcher, a native of Groton, engaged in the business and hired a ledge on the hill. During the summer of that year he drew a large quantity of stone to the landing near the railroad, and had it all ready for transportation when the railroad was opened. It was carried to Lawrence and used in the construction of the dam across the Merrimack River at that place. Mr. Fletcher now owns a quarry on the hill, and two quarries elsewhere. He employs fifteen or twenty men, and the amount of his annual sales is \$10,000.

"March 1, 1853, William Reed (1st), a native of Acton, bought of Thomas Hutchins sixty-one acres of land on Snake Meadow Hill, and, in connection with his brother, David Reed, began the business of quarrying. The lot lies on the crest of the hill, and is long and narrow. In a year or two the lot was divided between the brothers, William taking the portion on the top of the hill, and David the western part, toward and including some part of Cowdry Hill."

Mr. David Reed died on February 5, 1885, but Mr. Samuel Fletcher works his ledge, having hired it for a term of five years.

Mr. William Reed still continues to do an increasing business; it has been larger this year than for the two years past. He furnishes cut stone for founda-

tions, dams, bridges, underpinning, sills, etc., as well as all kinds of rough-hammered work. Before the Civil War he furnished stone for the pavement of the streets in New Orleans, La., much of which General Butler took up and made his fortifications with it. He furnished the first paving-stone ever laid in Worcester, Mass. Stone has been purchased of him, by the city of Lowell, for foundations of bridges, also edge-stone for the sidewalks. The corporations of Lowell have bought of him underpinning, window-sills, door-caps, edge-stone and dimension-stone. In 1888, \$1200 worth of stone was sent to Leominster to be used as underpinning, steps and large paving-blocks. Headers and covering-stone was sent to Chesham, wall-stone to Belchertown, dimension-stone to Marlboro', headers to East Harrisville, pinners to Winchester, foundation-stone for the water-tank at Portsmouth, N. H., and junk-stone to Hardwick, Mass.

In Amherst Mr. Reed built a large drainage-ditch, having the walls three feet wide, and covered by stone five feet in width. Recently, edge-stone has been furnished to Arlington, and also underpinning for the new hospital of the State almshouse in Tewksbury, also caps and sills for Lexington and Revere, rubble for Amherst and Winter Hill, edge-stone for Harvard, stone for the dam in Nashua, N. H., catch-basins and bound-stone for Stoneham, bound and covering-stone for Weston, and underpinning for the Fairchild Paper Company, of East Pepperell. He has furnished stone to the railroads for the repairs of the wall at West Chelmsford, the cost of which was \$585.49. Even his chips have been sold for ballast.

Mr. Reed employs about twenty men, and uses six horses and a yoke of oxen. His sales have recently amounted to about \$10,000 or \$12,000 annually. The competition has been so sharp recently that more stone was furnished for the above compensation than formerly. Once the price of the stone per yard was \$3, while now it is only \$1.25. One of the reasons why Mr. Reed has been able to compete with other companies is that his quarry is near the railroad, necessitating the drawing of the stone only about a third of a mile.

This granite ledge is large enough to give employment to seventy-five or one hundred men—it is not yet half uncovered. As it is in a hill, the drainage is easy, and an engine is not necessary for the handling of the stone—a simple hand-derrick is all that is required for the purpose. It is easily seen that such an industry is an important one to the town, and must continue to be for a long time to come.

N. P. Prescott & Son have been quarrying granite in Westford since 1871, about nineteen years. They worked in the north part of the town till 1882, when they began to obtain the stone from Oak Hill, where they now have a stone-yard, shipping their work from Brookside, two and one-half miles from the hill. They employ fourteen men and use four horses; their sales amount to about \$9500 per year. They quarry

mostly rough, hammered work, selling edge, bridge and paving-stone. The larger part is sold to the cities and corporations, going to Lowell, Worcester, Lawrence, Boston, Brockton, Newton and Taunton. They furnish caps, sills and underpinning. Teams from Lowell sometimes come out for the chips and grout. The granite at Oak Hill can be cut to a finer edge than that from Snake Meadow Hill; but even this cannot be cut into any monumental work, as it "flies," or chips as soon as a sharp edge is cut.

Fifteen years ago it sold for fifty cents per foot, now for only thirty cents. When Mr. Noah Prescott began quarrying he did the whole of the work himself and without derricks—everything was hand-work. He then hired two or three hands, and the work has gradually grown to its present proportions. He has cut down into the hill about twenty-five feet, and drains it by a siphon. The granite in the hill is practically unlimited, and the firm of Sweat & Davis are working a different part of it.

Sweat & Davis have worked here for twelve or fifteen years and have got out more stone than Mr. Prescott, selling not only cap, sills and paving-stones, but also building material. They have a "yard" in Lowell, where they ship a part of their stone and cut it in the city instead of at the quarry. They employ twenty men and use four horses and two yoke of oxen. They have a steam-engine with which they operate their derricks and drills. They get out many large stones—some pieces weighing as much as ten tons.

Worsted-Mills.—"The Abbot Worsted-Mills began business in 1855, with John W. Abbot as managing partner, and John W. P. Abbot and Charles G. Sargent as special partners. At first they manufactured fine worsted yarns for the making of braids and upholstery goods, employing about twenty hands. In 1857 Mr. Sargent retired from the firm, and Mr. Allen Camerou became an active partner," purchasing the interest of Mr. J. W. P. Abbot. "On December 5, 1858, their works, as well as those of Mr. Sargent, were entirely destroyed by fire; but in January, 1860, they again began business in one-half of a large stone mill, built by Mr. Sargent about one-eighth of a mile below the former site. These premises they have continued to occupy to the present time, with frequent additions to give increased facilities for production. When they started anew they began the manufacture of worsted yarns used in making carpets." In 1873 Mr. Abial J. Abbot was admitted as a partner to the firm. "In 1878 Abbot & Company leased the part of the mill formerly occupied by Sargent & Sons, and also built a stone addition to the mill occupied by themselves, sixty feet long and two stories high, and proceeded to fill it with machinery. Finding this still insufficient to meet the growing wants of their customers, they purchased, in October, 1879, the buildings and water-power at Forge Village, formerly occupied by the Forge Village Horse-Nail Company, and filled the buildings with improved machinery.

They now employ at Forge Village 200 hands, and make 1,200,000 pounds of worsted yarn per annum. About the same number of hands are employed at the mill in Graniteville, and about the same quantity of yarn is produced,—making at both of the mills 2,400,000 pounds of yarn annually, using for the same 5,000,000 pounds of wool. About fifteen years ago they began using camel's hair, making it into yarn and mixing it with the wool for carpets and other worsted goods; they did this to supply orders from some of their customers who wished that kind of yarn. They are using now about 80,000 pounds of camel's hair each month, or 960,000 pounds a year.

They were the first in the country to use this hair for worsted yarns, and they used it for three years before any of the other manufacturers ascertained the fact. The wages paid the employés amount, collectively, to \$100,000 each year; and \$100,000 is also paid the United States Government for duties on the wool. The price of the wool averages fifteen cents per pound, thus making the total cost of the wool used in both mills to be \$750,000. It is evident that a large amount of machinery is required for the running of these two mills, and it is all of the most improved and recent manufacture; if they hear of anything new and highly recommended they immediately try it, and if found satisfactory it is bought at once. All of the machinery needs renewing every twenty years. They use two engines at Graniteville—one of sixty, and the other of 175 horse-power; one is used at Forge Village, which is 650 horse-power.

Their markets are in Massachusetts, Connecticut and New Jersey, but chiefly in Philadelphia; they sell to the weavers, and always by wholesale. These yarns are not shipped to foreign countries, but are mostly kept here in our own country, and used for the manufacture of ingrain carpets, Wiltons, Brussels and tapestry. Only foreign wool is used, and is purchased in nearly every wool-growing country in the world. Their agents are the wool brokers at Liverpool, Marseilles, Russia (near the Black Sea), Smyrna, Palestine, Buenos Ayres, Scotland, Valparaiso, Bagdad, Mossoul and even in the old Mesopotamia of the Scriptures,—well named from "mesos" and "potamos," between the rivers, viz.: Tigris and Euphrates. Mr. J. W. Abbot attends principally to the mill at Forge Village, and Mr. A. J. Abbot to the one at Graniteville, while Mr. Cameron attends to the buying, selling and the finances. Nearly every day cablegrams are received from Liverpool, giving the firm the market prices of the world, so far as wool is concerned; their business is much facilitated by this means, as the following incident will show. A few years ago they gave their broker in Liverpool orders to buy wool for them at a given limit; the auction sale opened above that limit, and the broker cabled to know if they would advance it; they concluded to do it, and so informed him, and the wool was bought before the closing of the sale, prob-

ably within two hours. Abbot & Co. take a personal interest in all their employés, and do their utmost to promote their welfare. A club-house has been built near each mill expressly for the help. Libraries are connected with them; lectures are given and dramatic entertainments are held,—the actors composed of the hands in the mills. Every man with a family is encouraged to own his own house, and he is assisted financially to that end; many do own them, and some of them own other houses than their own and have become quite wealthy. There are no labor strikes in these mills. Let any one, who wishes to study the relation of capital to labor, and learn how to settle differences between them, come to Westford and find out what has made the relationship existing between the company and the help so pleasant and profitable to all concerned. For the reasons given above, as well as others that might be stated, the men find it more profitable to follow the plans of the company than any directions given by officers of league or labor organizations. Educated, skilled labor-hands generally know what is for their interests financially, and these men never join in labor-strikes. They feel that they have an interest in the success of the company's business, well knowing that the company's success means their own advancement; they, therefore, become trusted workers and earnest men. Some of them have been in the employ of the company for twenty or twenty-five years. It should be stated that before the new school law came into effect prohibiting children working in the mill during the school term, the company employed children of fourteen years of age and under, allowing them to work half of the day and attend school the other half.

The State police, visiting the mills during the time the children were thus employed, for the purpose of seeing that they attended school, and learning that they complied with the law as it then was (attending school every day, though but half the time), and after talking with the teachers, came, it is said, to this conclusion: that the children learned as easily as those who attended the whole day, and kept up evenly with their classes. The inference has been drawn that the plan devised by the company for the children to help themselves and the families to which they belonged, was a better one than is now in operation throughout the State, and that this company is the only one which tried the plan and found it a success and had it indorsed by the State authorities.

Moore's Woolen-Yarn Mill.—It has been already stated that in 1862, Mr. Hamblet sold his flouring-mill to the Moore Brothers,—they were Messrs. Seth and John Moore,—and they immediately changed the flouring-mill into one for the manufacturing of worsted yarns. In 1881 Mr. George C. Moore, a nephew of the brothers, purchased the mill of them and has continued the manufacturing of yarn till the present time. Mr. Edward A. Moore, a brother of the owner of the mill, is the overseer of it. They have manu-

factured worsted carpet yarns, and of about the same quality as the yarn sold by Abbot & Company. They have foreign machinery in the drawing department and home machinery in the spinning-rooms. They employ 65 hands and their sales amount to about \$156,000 per year. They use both steam and water-power. They are using mostly camel's hair for their yarn, making the yarn entirely of it. Most of it is bought in the New York market, and such quantities do they use, that, a few years since, they were compelled to send to China for much of their supply, having already purchased two thirds of all the hair that came to this country. They have increased their working capacity very much from the beginning; for they used only two machines at first and now eighteen, and they intend to soon build a two-story stone addition, 197 feet long by 52 feet wide, the foundation of which is already laid. It will be more than twice the size of the present mill, and they will then also employ two or three times as many hands.

They have no strikes connected with their industry. They take an interest in their help, as can be readily seen from the fact that, with the exception of one or two, all have been with them for ten years or longer; some have remained all the time since the present mill was started. The help are paid well, so that they are satisfied, and thus all strikes are avoided. The writer visited the mill and brought home some of the camel's hair that was in process of preparation for the looms; it is fine and silky, and makes—it is claimed by them—the best carpets in the world. The yarn is sold to the commission merchants in Philadelphia, who sell in turn to the weavers. There is evidently a good market for the yarn, as the firm sell all they can make, and larger quantities will soon be produced on account of the increased facilities for manufacture, soon to be in operation. They have a chimney that lacks an inch or two only of being 125 feet high, 10 feet square at the base, with a six-foot flue; 105,000 bricks were used in its construction. The writer was specially interested in a manikin made by Mr. E. A. Moore's father; it was in the position of the front wheel of a tricycle, and when the crank was turned, its legs and feet would all move in regular order and as naturally as life. It was of life-size, with internal machinery, which moved accurately every part. The elder Moore has made also a horse manikin (?), which moves forwards or backwards and as perfectly as the former. Much study must have been required to make so perfectly all the adjustments. Both are curiosities. It remains to be seen whether they can be applied to any useful purpose,—they show at least mechanical skill and an inventive turn of mind.

Sargent's Machine-Shop.—Charles G. Sargent was born in the town of Hillsborough, N. H., in that part called Hillsborough Upper Village, July 17, 1819. He worked on neighboring farms, and his schooling was obtained in the meantime. At the age of fourteen he began as an apprentice the trade of cabinet-

maker, but his employer sold out before the expiration of his apprenticeship, and he then entered the services of a clock-maker, with whom he remained one year and a half. He then went to Lowell, Mass., where he obtained service with a job contractor of the Lowell Machine-Shop for three years as an apprentice. Having mastered the machinist's trade, he engaged to do machine repairs for a worsted-mill at West Chelmsford, where he stayed four years, employing his spare time in learning the details of the manufacture of worsted yarns, in which he became proficient.

In about the year 1841 he entered the service of the Lowell Manufacturing Company, and the next year was made an overseer. It was while connected with this company that he invented a valuable burring-machine. In about the year 1850 Mr. Sargent resolved to enter into business for himself, and, although being offered good inducements to remain with the Lowell Manufacturing Company, he gave up his position and hired a small shop on Market Street, and began the manufacture and sale of wool-burring and other machines; afterwards he took in company with him a partner. A few years after he entered into co-partnership with Marvel & Lane, and the firm erected a large stone shop on Fletcher Street, which is now used as a worsted-mill, where they carried on the machine business. He sold out his interest in this company to Marvel & Lane, and a short time after he again went into the business of manufacturing worsted yarn in a small stone mill on Broadway, near the corner of Fletcher Street, Lowell, which he continued for several years, but, owing to ill health, he was forced to relinquish it.

On October 17, 1854, Mr. Sargent and Francis A. Calvert bought the mill property and land connected therewith belonging to Asahel Davis, formerly belonging to Thomas Richardson. This property, situated in Graniteville, then called Stone Quarry, consisted of a saw-mill and grist-mill. Forming a partnership January 8, 1855, and converting these mills into shops for the manufacture of wool machinery, they engaged in that industry. Mr. Sargent moved with his family to Graniteville in the spring of 1855. During the same year (1855) Mr. Sargent entered alone into partnership with the Abbots, retiring from the firm in 1857, when Mr. Cameron took his place.

These buildings (Calvert and Sargent's) were burned December 5, 1858, and then what is now Mill No. 1, a two-story building, 185 x 52 feet, with a connecting L, 32 x 40 feet, was erected. Meanwhile the business was pursued in a rented shop at Lowell. They moved into Mill No. 1 in the fall of 1859; two years later they built Mill No. 2, a two-and-one-half-story wooden building. Mr. Sargent bought his partner's interest January 1, 1863.

Between the years 1864 and 1865 he erected Mill No. 3, on the other side of the dam. This building was occupied at first by Frank Calvert, Jr., and F. G.

Sargent, for the manufacture of carded worsted waste, in which they continued for several years. This partnership being dissolved, Mr. F. G. Sargent entered into partnership with C. G. Sargent January 1, 1873, the firm's name being C. G. Sargent & Son. In the same year Mr. Sargent started the manufacture of hosiery in mill No. 3. In the year 1874 he took Mr. M. H. A. Evans into the firm, the name of the firm being Chauncy Hosiery Mills.

In 1877 Mr. Sargent commenced building the new machine-shop, which was completed in 1878. His death occurred July 16, 1878, a short time after. In March 1, 1880, A. C. Sargent became a partner with his brother, F. G. S., under the firm-name of C. G. Sargent's Sons. About April, 1884, Mr. Evans relinquished the hosiery business, and the building was taken by C. G. Sargent's Sons. Their business has been very prosperous, averaging about \$85,000 yearly sales of machinery.

These machines are the Wool-Duster, Washer, Dryer, Burr-Picker, Crabber and various others; also waste cards and all kinds of wire and steel cylinders.

They say in their catalogue concerning their Wool-Washers: "Through the several styles of machines now made by us, embodying our latest improvements, we think we can justly claim to have invented the best systems that have ever yet been devised for scouring the various kinds of wool. We believe that our machines will thoroughly scour more wool in a given time, at a less cost in material and power, and render the wool in better condition, than has ever before been attained. Our machines are built in a most substantial manner, with parts interchangeable, and duplicable, and are capable of enduring the strain of severe use, and even abuse, to which latter wool-washing machines are too often subjected." The dates of the patents on these machines are given, thirty-five in number, from 1873 to 1886. These machines have been purchased by 151 parties, who are using them in their mills for the cleansing of wool.

Their Automatic Wool-Dryer has been patented nine times, and there are twenty-seven parties using it in the preparation of wool for the loom.

Their Wool-Duster is used for opening and dusting wool before the process of washing and burr-picking, and for cleaning card-waste, noils, etc.

Their Burr-Picker is made in two styles, with slight modifications in details to suit the character of the stock operated upon. It is claimed to be "the leading machine for burring wool and for removing all dust, burrs and loose foreign matter from wool and other textile fiber. Many improvements have been recently made, and the machine differs from any other offered to manufacturers in many important particulars." It is used in 174 different manufactories.

An Improved Metallic Waste-Card is used for working or reducing worsted and woolen yarns, waste of flannel and knit goods to their original fiber state. It requires less than a two horse-power to run it.

Single and double Crabbing-Machines are made and sold. "They are used for scouring, rinsing or crabbing worsted cloth, also for bringing out and producing a finished face on the cloth as is produced on ordinary woolen goods by the fulling-mill."

An Atomizing Wool-Oiler is made, which oils at the feed-rolls on breaker cards and has many advantages. "By oiling at the feed the oil is completely broken into fine particles like mist, and precipitated with force into the evenly spread wool; and as the wool passes the feeding-rolls, the oil and wool are thoroughly mixed."

Sargent's Sons are prepared to furnish the Best Steel Burr and Licker-in Wire; they have now a "Patented wire which is made with parallel sides, sharpened the same as a steel ring cylinder and is made stronger than the beveled wire."

Improved Rotary Pumps are made for pumping scouring liquor from the howl up to the showering device. These are also made for general purposes, where the draught is not too high.

They make also an Improved Blower or Suction Fan; it is made to fit in the side of the automatic screen dryer, and the wall of dye-houses or other rooms, from which air is to be exhausted or into which air is to be driven. It would pay any one who is interested in machinery, and can do so, to visit the shop and see the machine and the machine that makes it!

Haywood & Burbeck's Grist-Mill.—It is not known just when this mill was first started, though it was the third one erected on Stony Brook. The first man who is now known to have owned it was John Cummings. Levi T. Fletcher owned it sixty-eight years ago. Then it was owned by Otheo Fletcher, a brother of John B. Fletcher. L. Haywood purchased it in 1842. It was then owned by T. H. Hamblet. S. P. & F. Wright owned it about 1846-47. George W. Heywood and Luke L. Fletcher bought it in 1862, and Mr. Heywood purchased Mr. Fletcher's interest in the mill in 1863. In 1864, Mr. Heywood sold a half interest to Charles H. Fletcher, who, in the spring of 1867, sold his half to W. H. H. Burbeck and Henry Chamberlain. In 1869, Mr. Heywood bought out Mr. Chamberlain, and the firm has been Heywood & Burbeck ever since.

The business of the mill has increased with the years. A comparison is here given of the amount of grain sold the first year Mr. Heywood became a share-owner of the mill, and the amount sold during the past year, 1889. In 1862, Mr. Heywood and his partner bought and sold but one car-load of corn, and this was the only kind of grain sold till 1869, when they began to sell oats. In 1889 they sold 14,059 bushels of corn, 7874 bushels of oats, 60,000 pounds of middlings, 81,000 pounds of shorts, 37,900 pounds of gluten, 38,500 pounds of cotton seed, 4 tons of hen feed, 12 tons of phosphates. About thirty-five car-loads of grain were bought and sold the past year.

Heywood & Burbeck trade chiefly with their townsmen and have given good satisfaction, as their amount of business clearly shows. Their mill is the only one of the kind in town and is well patronized. They use but one run of stone, but that is kept running much of the time. A new run of stone has recently been put in; the old one was put in by L. T. Fletcher fifty-eight years ago. The old stones were granite and were purchased in Peabody; they were drawn by four yoke of oxen and were only two days on the way. The new stone is also of granite, though burr-stone is generally used, imported from France—"French Burr."

Water-power is used for running the mill, as the little river, Stony Brook, furnishes all that is needful.

In 1874 the firm found that their business had increased to such proportions that elevating machinery was needed, and it was accordingly purchased. The grain is bought mostly from the West and of the commission dealers.

The Saw-Mill.—In connection with their water-power, Heywood & Burbeck run a saw-mill. It was erected about the time of the grist-mill, and is on the opposite side of the dam. The same parties have owned it that owned the grist-mill; the two mills have always been bought and sold together. At first, in common with all early saw-mills, the upright saw was used, but in 1875 it was exchanged for a circular one, which does more and better work. At the same time the firm put in Swain's improved turbine wheel, of twenty-five horse-power. Since these improvements, the amount of lumber sawed has averaged 300,000 feet each year. The logs drawn there are mostly pine, and the work is custom work.

Wheelwrights.—Westford has two wheelwright-shops,—one at the centre, and one in the eastern part of the town. The one at the centre is carried on by Mr. Nelson L. Tuttle, who came to town in December, 1872, and immediately began working at his trade in a shop put up for him, the autumn before, by his father, who died September 19, 1886. Mr. Tuttle began the manufacturing of express and farm wagons, also carts and sleds, and has kept to that line of work pretty much till the present time. He has made a few sleighs, but has done mostly heavy work. He has usually worked alone, and has had all he could do, some of the time being driven with work. He has used a horse-power in his shop for all his sawing, and connected with the power is a planing-machine, circular saw, gig-saw and turning-lathe. He has recently put in a six horse-power steam-engine, fully capable of running all the machinery and heating the shop as well. Most of his lumber is purchased in town, which is always of the best, and is kept seasoning for three years before it is used; and when shaped and strongly put together, in the form of wagons and sleds, lasts (hyperbolically) till the whole gives out, like the "One-Horse Shay." His work remains mostly in Westford, though some of it has gone into the surrounding

towns, and even to Pennsylvania. He does fully as much repairing as building.

Mr. James A. Walkden settled in the eastern part of the town in 1875, and immediately opened a wheelwright's shop; he still carries on the business, generally employing help. He not only repairs, but makes market and farm wagons, sleds and sleighs. He has a six horse-power engine, and with it runs a band-saw, planer, circular saw and boring-machine. He does good work, and has all he can do. He sells his work in the town as well as in the surrounding towns, and sends some of it quite a distance away. He is a pleasant man to deal with, and strives to please his customers. The writer saw him at work in his shop upon the frame of a market-wagon, which was strong and neatly put together, and he thought that any one ought to be perfectly satisfied with such work.

Westford supports the usual number of blacksmith-shops, and they are a credit to the place. Satisfactory work is done, and much of it.

Mr. John Feeney came here on February 12, 1887, and built a saddler's shop, and from the first has had all the business he could attend to. He sells all the harnesses he can make, and some of them go to the towns surrounding.

STORES.—In 1839 the present store of Wright & Fletcher was built and occupied by Sherman D. Fletcher and his father-in-law, Sherman, under the firm-name of S. & S. D. Fletcher. They continued to do business together till the death of Sherman, which occurred in the year 1860. Mr. S. D. Fletcher then carried on the business alone till 1873, when his son, Sherman H. Fletcher, and Nahum H. Wright bought out his interests and are occupying it at the present writing, under the name of Wright & Fletcher. They keep a general country store, which is supposed to contain nearly everything! Situated so near the cities, it could not be expected that they would keep all the finer goods found there; but all the essentials are here sold, such as groceries, dry-goods, boots and shoes, paints, oils, seeds, farming-tools, fertilizers, grain, some kinds of clothing, some hardware, patent medicines, candy-nuts, the inevitable tobacco, a few fancy articles, etc., etc. Their sales amount, upon the average, to about \$21,000 per year. They keep a good line of good goods, dealing only in first-class articles. The writer has been assured by them that they had rather their customers would find fault with the prices charged than with the goods themselves, while it is their endeavor to have no fault found with either. Their large trade, and the general confidence shown by the community in the firm, testify to their business integrity.

They are courteous and obliging to all, and, it is believed, conduct their business upon strictly honest principles. They evidently believe that "honesty is the best policy," and they seem to carry it

out in all their transactions. It is assuring to know that when one goes there to buy an article he can depend upon the statement made concerning it by either of the firm. Such dealing prospers in the long run, and this store has stood for this kind of dealing for fifty years. It is often said now that business cannot succeed that is carried on in a strictly honest way, but this store is a strong protest to all knavery and trickery. Next to the church and the school-house, an honest country store exercises a civilizing influence in the community.

Mr. H. B. Hall came to town in 1882, and opened a city grocery store, hiring the old store building that Miss Clara Wiley owns. He remained there about five years, when he moved his goods to the rooms he had fitted up out of a shed and the L part of his house. He uses a part of the barn and cellar of the house for storage. Mr. Hall was a successful business man in Boston, but was over-worked, and desired to move to some healthful country village where he could sell a city class of goods and educate his children. He "prospected" all through the western part of the State, as well as the eastern, and finally settled here; for he found on Westford Hill what he desired—good air, water and schools. He wished to settle in the most healthful village in New England, and now, after a residence here of eight years, is better pleased than ever with the place. He was very delicate in health when he came here, but now says he is perfectly well and works hard.

He has what is termed an "order trade," keeps two horses and has plenty of work for both of them to do. He carries goods to Parkerville, Graniteville, Forge Village, West Chelmsford, North Chelmsford and to farmers living between the different villages he visits. On Monday, Tuesday and Friday he receives orders for goods and delivers them the same day; on Wednesday he obtains orders and delivers on Thursday; on Saturday he goes to Boston, or draws goods from the depot, or puts up packages in the store.

Mr. Arthur Wright, having associated himself with Mr. N. Harwood Wright, commenced the general merchandise business in Graniteville February 1, 1868, under the firm-name of Wright & Co., and continued until 1875, when Arthur Wright bought his partner's interest and continued the business alone until February 1, 1882. He then formed a co-partnership with Mr. Henry S. Bemis, of Lawrence, Mass., under the name of Wright & Bemis, which has continued until the present time.

In 1883, owing to the steady increase in the business, the firm secured the Music Hall building, classified their business and opened a new store of dry-goods, fancy goods, boots, shoes, etc., etc. At the old stand they carry a full line of groceries, flour and general merchandise. They have a large trade, and

the firm is respected by all who know them. Mr. Wright holds an official position in the Methodist Church at Graniteville, and his business affairs are conducted in accordance therewith. In 1887 he represented the district in the Legislature of the State.

BOARD OF OVERSEERS.—With the exception of four years Mr. Edward Prescott has been overseer of the poor since 1862, and has striven to care alike for the interests of the town and the well-being of the unfortunate people committed to his charge. He has the first account-book ever kept by the board, and it is more interesting to look it over than to read many others which contain simple statements of business transactions; for here we find continual changes in the number and character of the inmates of the poor-house as well as the cost to the town of maintaining them.

On April 5, 1824, the town voted to purchase John Read's farm for the sum of \$2500; and in 1831 or 1832 the brick house known as the Alms-house was built. A committee had previously been appointed to devise the best means of maintaining the poor, and upon their recommendation the farm was purchased and stocked. Power was given them to receive proposals for a Master and Mistress to take charge of the farm, and the poor living upon it; and also, to devise the most proper regulations of caring for the inmates. It seems that formerly the unfortunate poor, in many places, were "farmed out" or "sold to the lowest bidder," i.e., they were taken in charge by men who were to receive the smallest amount from the town as payment for their support. Of course, such men would endeavor to make something from the transaction and would, therefore, keep the poor as cheaply as possible, often making them work beyond their strength; so that it came to be looked upon as a cruel way of caring for them. A growing spirit of humanity finally brought a change, and by-laws were enacted in Westford whereby the master of the alms-house must be "a man of temperance, prudence and good moral character." "The use of all spirituous liquors and any liquor, part of which is spirituous, is strictly prohibited, except when ordered by a physician, overseer or master." The overseers are required to look after the wants of the poor, and to see that the instructions of the town are all carried out by the master. Notice has come to the writer, recently, of several towns in New Hampshire, that have given up the farm system and have returned to the older way of caring for the paupers: letting them out to people who will keep them the cheapest. They are made to work and thus to pay for their keeping as far as possible. Some towns in Massachusetts do not have a town-farm, but hire other towns to care for their poor, finding the expense less than to have a farm-house of their own. And it is true, that it would be less expensive for Westford to "hire out" her poor; but the town had rather be at a little more cost in the matter, and have the satisfaction that everything possible has

been done for their comfort, health and happiness. The expense of the poor has varied with the years: in 1862 the Board of Overseers drew \$350 from the town treasury for their support; in 1863 only \$150; in 1864 the amount was \$350 again, while recently the board has drawn as high as \$3000.

In 1820 there were thirty paupers cared for by the town, while at the present writing there are only four at the alma-house, and only one of them is considered a pauper—the other three being indigent soldiers, who can live here easier than anywhere else, and who receive aid from the State. The number of insane has increased in the town—seven are reported now, though the town cares for only two of these. The poor at the alms-house are mostly aged people and seem to enjoy their town-home and the good care they receive; and their kind treatment by the overseer has not served to put a premium upon idleness nor increase the number of paupers; for even the unfortunate do not really care to go “Over the hill to the poor-house,” however well cared for they shall be while there. There are men in the cities who will sometimes in the autumn commit a petty crime, in order to be sentenced to prison, where they will have shelter and food for the winter, and but little work to do; but Westford is not troubled by men who allow themselves to become indigent for the sake of a winter at the poor-house!

Occasionally, people are aided by the town who are still living in their own homes, which makes the expense less for the town and it is also more pleasant for the families. There has not been a pauper at the farm for the past ten years who has been able to do much towards his own support. The farm is carried on quite like any other one, and its expense to the town has been lessened by connecting with it the repairing of the roads. The teams are owned by the town as the property of the alms-house; the master has charge of them and hires the help. Previous to the meeting of the last Legislature the repairing of the roads was under the control of the selectmen; but a bill was then enacted that every town should appoint a road commissioner, who should have this in charge. Mr. Prescott is that commissioner, and as he employs the teams and help of the “farm,” something is saved thereby, making the expense of the farm somewhat less to the town,—so that the support of the poor is made easier by this means. When there has been a prosperous year at the poor-house, the cost of maintaining it is not very much. The salary of the overseer is but \$10.00 per year, so that there is not much money connected with the office, nor “honor,” even, unless it be the honor the overseer has of trying to do as he would be done by. It has been found that the old saying “blood will tell,” is true sometimes respecting the paupers of our towns; for there comes to be, occasionally, a race of paupers—the children are taught to get much of their living from others, and are brought up to work as little as

possible, so that it happens the children of paupers are now and then found in the poor-house. In our Federal Republic each town is allowed to manage its own affairs—when nothing is done to conflict with the public interests of other towns, the county or the State—and this liberty has resulted in a careful guarding its financial concerns, and each one endeavors to keep its public expenses as low as possible. One of the means by which this is accomplished is in having but few paupers to support, and while each town by common consent and in the interests of humanity cares for its own poor, it does not wish to care for more than is necessary, nor to support any that have a “settlement” in other towns. Thus towns early watched each other and sought to prevent the gaining a settlement on the part of poor people, who came from other towns and cities surrounding. For it might happen that a poor family, living in a city and becoming dissatisfied with the life there, would remove to a neighboring town and soon call for aid in its own support. To prevent this extra expense, and to have the poor maintained where they had a settlement, the “Province” enacted a law, in 1692–93, whereby it was necessary to warn all strangers who came to town to leave it. They might return to the city or to whatever place they belonged; but must not be allowed to obtain a settlement in the town to which they had come. If a person was not “warned out” within three months, he was then regarded as an inhabitant of the town, and if he became poor and unable to support himself, the town was then obliged to help him. That the towns were careful to obey this law is clearly shown by the recorded names of people who had been duly warned. If, after fourteen days, a person had not complied with the warning, he was conducted by the constable or his deputy beyond the limits of the town, but what became of him afterwards is not stated. It would seem a hard lot for an indigent person to be driven from place to place and not be able to find a home anywhere, though it is probable that such people really had a settlement in some place where the authorities were obliged to aid them. A selectman’s report of the early times in Boston has recently been seen, in which occurs a sentence that explains their conduct, and gives a reason why even men of means were also warned out whenever they moved to another town. It stated that complaints had been made that even wealthy people, who wished to settle in the town, had been warned, and the selectmen, in justification of their conduct, replied in their “report:” “Whereas, some did put on the *appearance* of wealth that were really poor and eventually became town charges, the town voted to warn out all who came, without regard to appearance.” It is, however, recorded that—“In many cases the persons so warned remained and became useful citizens;” so that there was no real injustice done, for people who were really wealthy and were desirous of settling in a new place were able ere

long to prove their financial condition to the satisfaction of all, and were gladly allowed to remain.

DR. BENJAMIN OSGOOD.—No history of Westford can be complete without mention of the prominent men who lived and worked among her beautiful hills and valleys, and surely, for fifty years, no one knew better than this faithful and beloved physician the highways and by-ways, and no one was more intimately acquainted with the homes of the people, their joys and their sorrows.

Dr. Osgood was born April 25, 1781, in Westford. His early years were passed here. In 1804 he went into the family of Amos Bancroft, M.D., of Groton, to study medicine under his care. After finishing his studies with Dr. Bancroft he practiced for a time in Littleton, but at the earnest solicitation of friends finally returned to his native town, where he resided until his death, February 1, 1863. He was twice married, his first wife being Miss Nancy Cummings; the second, Miss Eliza Cummings, of Westford. Dr. Osgood was a very unassuming man; his opinions and convictions were strong, and he held them firmly, but did not obtrude them. He never sought publicity, but quietly pursued the even tenor of his way so acceptably to the people that, only when bowed with the weight of years and of sorrow he was glad to rest, could he, without remonstrance from old and young, resign to hands fresher from the schools the service he had so long performed. He was a member of the Massachusetts Medical Society, he was interested and active in works of reform and educational efforts, a trustee of Westford Academy, and for many years secretary of the board. He was a deacon of the Unitarian Church. He was a successful physician, a good citizen, a kind friend, affectionate and beloved in his own house. He was highly esteemed by his professional brethren, respected by his neighbors and beloved by his patients. His life was quiet and unostentatious, but many are those who hold him in grateful remembrance.

DR. EDWARD C. ATWOOD.—When the last history of Westford was written Drs. Edward C. Atwood and Joseph B. Heald were practicing medicine in town. Dr. Atwood was a Westford boy; he graduated at Dartmouth College in 1871, and at the Long Island College Hospital, Brooklyn, N. Y., in 1874, when, finding that there was an "opening" at his old home, he came here and settled down to the practice of his chosen profession. He soon had all the business he could do, but remained only ten years; for in 1884 he sold his practice to Dr. Walter J. Sleeper and removed to Daytona, Florida, on account of the health of his wife. There he built a drug-store, and, answering a few sick-calls, he soon had all the patients he cared to attend. One of his brothers accompanied him to Florida, and together they bought land, set out orange-trees and have now a large "grove," which furnishes oranges—he says—of the "Unequaled Halifax River variety."

DR. WALTER J. SLEEPER.—Just before Dr. Atwood went away Dr. Sleeper took his place and is a successful practitioner here now. He graduated at the Dartmouth Medical College in 1881. After graduation he took hospital work and courses in surgery, the skin, heart, lungs, eye and ear, in the hospitals of Boston, New York and Chicago. He then spent a year in traveling through the West, and finally returned to his home, in Manchester, New Hampshire, where he practiced till he came here, in 1884. Taking Dr. Atwood's place, he had much to do from the very first, and has proved himself to be a doctor worthy of the confidence of the public. He bought a "lot" in the centre of the village and built a fine residence, and is making his grounds attractive.

DR. JOSEPH B. HEALD.—The doctor graduated at the Long Island College Hospital, Brooklyn, New York. His first settlement was in Paris, Stark County, Ohio, where he remained about three years—removing to Westford in February, 1878. In 1887 he left a good practice to accept the offer of a partnership with his brother, Dr. W. F. Heald, in Pepperell, removing to that place in April of that year. He is still there, and reports reach us that he is well liked as a physician. Some of his old patients in town occasionally send for him now, when they require a doctor's services. Dr. Heald was our town clerk at the time of his removal to Pepperell, and his work in that office was satisfactory to all concerned. He was kind to the poor, occasionally helping one in need from his own purse and charging nothing for his attendance.

DR. JAMES F. SMITH.—Dr. Smith took the place of Dr. Heald when he went away in February, 1887. He graduated at the College of Physicians and Surgeons, New York, May 14, 1882. He took special courses in Orthopædic Surgery, in diseases of the throat and nose, of the eye, ear, skin and chest—besides general hospital practice. He received diplomas for several of these courses. He practiced medicine for two years, then in the State of Maine for the same time. He has a growing practice and is making a specialty of treating the eye, ear and nose.

OFFICIAL.—The census of 1885 gives 2193 as the population at that date. Comparing this number with that given in 1880, viz., 2148, there will be found a little gain. The number of persons assessed on property is 420, the number for poll tax only 250. Total number of polls assessed, 528. Tax on each poll, \$2.00. The value of the assessed personal estate, excluding bank stock, is \$209,660; value of assessed real estate, buildings, excluding land, \$490,689; value of assessed land, excluding buildings, \$374,401. Number of acres of land assessed, 18,000; assessed tax on property per \$1000, \$12.60, for the year 1889. The tax of State, county, city or town purposes, including overlayings—on personal estate, \$2676.62; on real estate, \$10,900.13; on polls, \$1056.

There have been but two changes in the Board of Selectmen since the former history; that history gives

for the year 1882 the following names: George T. Day, Arthur Wright, Albert P. Richardson. In 1886 Isaac W. Carkin took the place of Arthur Wright, and in 1890 William L. Kittredge took the place of Isaac W. Carkin. Gilman J. Wright is the present town clerk; he succeeded Dr. Joseph B. Heald in 1887. The representatives elected from our town or district since 1881 were as follows:

1882, Charles H. Miller, of Pepperell; 1883, Moses P. Palmer, of Groton; 1884, Noah Prescott, of Westford; 1885, Frank Leighton, of Pepperell; 1886, George S. Graves, of Groton; 1887, Arthur Wright, of Westford; 1888, John O. Bennett, of Pepperell; 1889, James M. Swallow, of Dunstable.

A few changes in the former history are here appended: In 1863 John W. P. Abbot, Edward Prescott and George W. Dupee were elected as the Board of Selectmen. In 1864 the same board was re-elected.

In 1857 Robert P. Woods and Eliel Shumway, both of Groton, were elected representatives; in 1861 David Porter, of Shirley, and John W. P. Abbot, of Westford; in 1862 Albert Leighton, of Pepperell, and Isaac O. Taylor, of Dunstable.

THE PEOPLE.—The writer has lived with the people of Westford for ten years and has found that, as a whole, they adhere to the principles bequeathed them by their fathers and are living examples of characters those principles can produce. Benjamin Franklin attributed all his success among men to the *character* he established for himself, and not to any brilliancy of intellect; and Westford has stood well among the surrounding towns for the characteristics it has possessed. Emerson said that the characters of men make the conscience of society in which they live, and on account of this fact Westford has long been known as a place where it is a pleasure to reside. "The virtue and intelligence of the people, their culture and social refinement, and their regard for education and all humanizing influences will insure for them the praise of every honorable mind and the esteem of the good. Rising every year to a higher grade of morality and piety, they will take the sure road to a genuine prosperity, and make the closing century a happy introduction to the achievements of the next." Many of the people are graduates of the academy, and are interested in every educational reform and in the progress of the sciences and arts. Strangers, occupying our pulpits, often speak of the average intelligence of the congregations. A painting-class, composed of quite a number of the young people of the place, has been a permanent institution for several years, and the paintings that adorn their homes attest the artistic taste that produced them. Courses of lectures have been maintained, and scarcely a winter passes without one or more of them. Quite a number have read through the four years' course of the Chautauqua Reading Circle and received their diplomas. Several other reading clubs or circles have been organized from time to time, and large numbers have attended some of them, for ex-

ample, the Unity Club, held one year ago. Miss Kate Hamlin is, at present, giving a course of parlor lectures upon the English language and literature. She writes in a very pleasing and attractive manner, and her lectures are filled with the results of careful study of the periods of English literature, as well as the philosophy of the history itself. She is away from Westford nearly all the time during the winter, reading her lectures to circles of cultivated ladies in the cities and towns about and in other States as well. Westford has also a Village Improvement Association, which shows a commendable public spirit on the part of the many who are members of it. Public spirit shows itself here in striving to make the place a thriving, energetic, healthful and attractive one. It introduces fine stock and improved methods. It has replaced "The old hut on a barren pasture corner, that served for a primitive school-house, with the modern structure, well-warmed and ventilated and with attractive surroundings." It maintains good walks and roads, and lights its streets. The public spirit of Westford makes the village, which it controls, as comfortable, healthful, moral and beautiful as possible. Our people are pleasant, neighborly and good-natured; they especially care for those who are ill or have misfortune; there is a peaceful atmosphere here of an unselfish, self-sacrificing community. Our people are readers, are refined and cultivated, and have that cheerfulness which is the aroma of life. They have "June natures—rare, sunshiny!" Such natures carry a pleasant wholesomeness with them all the time—a "well-spring of cheer that never seems to run low." The writer has been to places where the people looked as though they had never seen the sun, or had just passed through a hard winter; the past seemed gloomy, and the future a thing of dread and foreboding. It is not so here, but the nature of the people so harmonizes with the natural life about them in the spring or early summer that one thinks of the low-land meadows, the murmuring brooks, the singing of birds, the air blowing from the sweet South as though coming from a bank of roses, and the sun shining warm over all. Such natures, where ever existing, are cultured, refined, beautiful.

BIOGRAPHICAL.

CHARLES G. SARGENT.

Mr. Charles G. Sargent was born in Hillsborough, N. H., July 17, 1819, and died in Graniteville, July 16, 1878, aged 58 years and 364 days. At fourteen years of age he was apprenticed to a cabinet-maker, afterwards to a clock-maker and then entered the Lowell Machine-Shop, where he mastered the machinist's trade. While in the employ of the Lowell Manufacturing Co. he invented a valuable burring ma-

Chas. Garment

Wm. H. ...

J. Henry Read

chine and ever after continued to invent and manufacture machinery. He was a natural machinist, as his various inventions very clearly attest.

From 1850 to 1854 Mr. Sargent remained in Lowell in business for himself, then removed to Graniteville and built up the large industry which his sons are now carrying on. He was a public-spirited and benevolent man, giving largely toward the establishment and support of the Methodist Church in this place.

ALLEN CAMERON.

Mr. Allen Cameron was born on the 30th of August, 1823, at Allness, Rosshire, Scotland. He belongs to the Lundavra House of the Cameron Clan, and among his ancestry, traceable for over five hundred years, are many distinguished in military and political affairs. His father, Alexander Cameron, was an extensive sheep farmer, and Mr. Cameron's early life was passed upon the farm, which was managed by his mother after his father's death. He attended the public schools at Allness and also the higher grades at Dingwall. On the 12th of August, 1843, at the age of twenty, he sailed from Liverpool on a packet ship for New York, which place was reached after a voyage of thirty-two days. He immediately went to Boston, where he found employment in a cotton and wool commission-house, 28 Lewis Wharf,—Fairbanks & Cameron.

Mr. Cameron of the firm was an elder brother, located in this country for some time previous. He remained with the firm for two years, and then engaged as book-keeper for a wall-paper concern—Hurlburt & Gregory. After four years' service here he went to New York and entered the employment of Coates & Co., bankers. In about eighteen months the firm was dissolved, and for a while he acted as agent in this country for a carpet commission-house in Manchester, England, and also did business for the wool firm of Ripley & Co. In 1851 he went to Norwich, Conn., and for three years was agent for the Greenfield Worsted Co. For several years he was interested in various branches of worsted and carpet manufacturing and dyeing, until the year 1858, when he came to Westford and bought Mr. Sargent's interest in the Abbott Worsted Co., forming a partnership with John W. Abbott, which has continued to the present time. On the 12th of September, 1860, he married Eleanor Francis, daughter of Levi Flint, of Charlestown. Mr. Cameron is the financier of the firm and attends to the buying and selling.

The clan to which he belongs has always been an influential one. The present chief is a member of Parliament, and the representative of the clan in Westford clearly shows the influence a race of such men must have in their native land.

J. HENRY READ.¹

Joseph Henry Read, son of Zaccheus and Mary (Heywood) Reed, was born in Westfield, Middlesex County, Aug. 5, 1835. After securing a common-school education in the public schools of his native town he availed himself of a course of study in Springfield English and classical schools, and afterwards at Westford Academy. He chose farming for a calling, and has made no change since.

Mr. Read was married in Westford, Jan. 13, 1857, to Mary Eleanor, daughter of Daniel and Mary Ann (Beede) Falls. Of this union were six children—M. Alice, Carrie E., Nellie A., Abbie M., Henry B. and Florence H. Read. He has held the various town offices, such as selectman, overseer of the poor, School Committee, auditor, etc. He has been a director and secretary of the Westford Mutual Fire Insurance Company since 1876. Mr. Read was a representative to the General Court in 1872-73, and has been a commissioner of Middlesex County since January, 1876.

CHAPTER LIX.

WAKEFIELD.

BY CHESTER W. EATON.

THE town of Wakefield, with its fresh, cheery name, its elegant public buildings and modern dwelling-houses, its smiling lakes and well-kept parks, its hum of business and air of prosperity, might well seem to the casual visitor as a place of recent growth. One need not look far, however, to correct his first impressions. Once out of the immediate region of depots, stores and factories, a glance at the mossy slabs in the old burying-ground, or the glimpse of an ancient domicile sheltered by a venerable elm or buttonwood, will bring to the senses of the thoughtful observer the genuine flavor of antiquity.

Wakefield began to be settled by white men in 1639. Its territory was then claimed as part of the domain of the Saugus tribe of Indians, whose Sachem had his lodges by the sea, in what is now the city of Lynn, then called Saugus, the township of Lynn then including the present towns of Saugus and Lynnfield. Sundry inhabitants of Lynn petitioned the Colony Court for a place for an inland habitation at the head of their bounds, and in 1639 the Court granted the petition, and gave the town of Lynn "four miles square at the head of their bounds, or so much thereof as the place could afford, upon condition that the petitioners shall within two years make some good proceeding in planting, so as it may be a village, fit to contain a convenient number of inhabitants, which may in due time have a church there, and so as such

¹ From Rand's "One in One Thousand."

as shall remove to inhabit there, shall not withhold their accommodations in Lynn after their removal to the said village, upon pain to forfeit their interest in one of them at their election." Thereupon the settlement began in earnest, the region taking the name of Lynn Village, and in 1644 was duly incorporated as the town of "Redding." The locations of the early settlers were mostly on what is now the centre of Wakefield, between or near the lakes, and on the slopes of the adjacent highlands. The forefathers, having erected their humble dwellings and built a church and a mill, had laid in faith and works the foundation of a municipality which should grow better and handsomer with age, and last while towns endure.

The title to the lands within the townships of Reading and Lynn was confirmed to the inhabitants thereof by a deed from the Indian owners, dated September 4, 1686, in which the consideration named is £10 16s., the deed being recorded at Salem, and signed by David Kunkshamooshaw, grandson to old Sagamore George No-Nose, *alias* Wenepawweekin, sometime of Rumney Marsh, and sometime at or about Chelmsford, sometime here and sometime there, but deceased and Abigail Kunkshamooshaw, wife of David, and Cicely *alias* Su George, ye reputed daughter of said old Sagamore George, and James Quonophit, of Natick, *alias* Rumney Marsh, and Mary, his wife. It is a matter of congratulation among present residents of Wakefield, that a peaceable and record title to their territory can be pointed at.

While these sturdy Puritans, who, a few short years before, had forsaken their English homes for conscience' sake, were in these Indian solitudes humbly doing their part in working out some of the greatest problems of the human race, their kinsmen and brothers in the faith were on the home soil of England, under Oliver Cromwell and John Hampden, waging successful war against King, church and aristocracy, fighting and preaching for the same great principles of civil and religious liberty as their brothers in the American wilderness. The first settlers of this town were all Englishmen, and of the same stern stuff and stock that fought at Naseby and Marston Moor, made Cromwell Protector of England, and who later put away the sword for "the truer work of building up a kingdom of righteousness in the hearts and consciences of men."

The names of these first citizens of the old town reveal their English origin, and are still borne by many leading families of the region, and are as follows:

Nicholas Brown, Thomas Clark, John Damon, William Cowdrey, George Davis, Robert Dunton, Samuel Dunton, Josiah Dustin, Jonas Eaton, William Eaton, Zachary Fitch, Isaac Hart, Thomas Harts-horne, William Hooper, Thomas Kendall, John Lau-kin, Thomas Marshall, William Martin, John Pearson, John Poole, Thomas Parker, Francis Smith, John

Smith, Jeremy Swayne, Thomas Taylor, Edward Taylor, Richard Walker, Samuel Walker and John Wiley.

The town, as first incorporated, included what is now Wakefield and Reading. In 1651 a second grant of two miles square was made to the town of Reading, and included, substantially, what is now North Reading. In 1713 the inhabitants of the last-named territory, "having become of sufficient and competent numbers to call, settle and maintain a godly, learned, orthodox minister," were incorporated as a distinct parish by the name of the North Precinct of Reading, the remaining portion of the town being known as the First Parish. In 1769 the northwesterly part of the First Parish, the part then called Woodend, was incorporated by the name of the West Parish of Reading, forming the nucleus of the present town of Reading. In 1812 the old town was divided, and the First or South Parish, then commonly known as the Old Parish, including the present territory of Wakefield, was incorporated as a new town, with the name of South Reading. This separation, by which the Old Parish lost the birthright of its original name, was due to political causes. The North and West Parishes were strongly Federalists and opposed to the impending war with Great Britain, while the people of the Old Parish were nearly all Republicans and enthusiastic for the war. The Old Parish was the largest of the three in population and voters, but not equal to the two others. Party feeling ran high, and as a consequence the citizens of the South Parish found themselves without offices or influence in the administration of town affairs. This was not a pleasant state of affairs and induced hasty action, for, taking advantage of an opportunity when the Republicans were in power in the General Court, the Old Parish obtained a charter for a distinct town and South Reading was born. The new town began with 125 dwelling-houses, a population of 800, and a valuation of \$100,000.

From this point the town took a new departure in steady growth and prosperous development, until, in 1844, it had nearly doubled the number of its inhabitants and the value of its property. Dr. John Hart, the local magistrate, a physician of skill, and an extensive land-owner, was a leading man of the town during this last-named period.

On the 29th of May, 1844, occurred an historical episode worthy of notice. The people of the three towns included within the limits of ancient Reading, putting away all jealousies and heart-burnings, united in a grand celebration of the bi-centennial anniversary of the incorporation of the old town. The exercises were held in the village of the West Parish, and included a brilliant military and civic display, with an excellent address by Rev. Dr. James Flint, a gifted son of the North Parish, an appropriate poem by Hon. Lilley Eaton, of the South Parish, replete with sparkling humor, racy anecdote and his-

torical reminiscence, and concluding with a bountiful banquet in a spacious pavilion erected for the purpose. It was a day to be remembered for its cloudless beauty, the glad enthusiasm of the people, and the complete success of the celebration. This year (1844) was remarkable also for the location and construction of the Boston and Maine Railroad through the west centre of the town, displacing the old Boston stage that had for so many years supplied the wants of the "traveling public;" but now, after nearly half a century of rapid transit, it is likely that electric street cars will soon be running over the same route to Boaton formerly traversed by Flanders' tallyho.

Following the opening of the steam railroad, the town rapidly advanced in material prosperity. There came large additions of business, wealth and good citizens. Old industries, like the boot and shoe manufacture and others, felt a fresh impulse and expansion, while new business enterprises, notably the iron foundry and the rattan works, were soon launched, and under sagacious management steadily grew unto assured success. Gas for lighting streets and houses was introduced in town in 1860, by the Citizens' Gas-Light Company, and its pipes extended also to Stoneham and Reading; and this company, as also other corporations, are now asking for authority to locate poles and string wires for the supply of electricity for lighting and power purposes.

In 1861 this course of peaceful prosperity was interrupted by the great Rebellion, in which the sons and daughters of South Reading nobly bore their part in sacrifices of property, lacerated hearts, and the best blood of many of their number.

The years succeeding the war was a period of wonderful growth and progress. All the industries flourished, people flocked to the town, real estate advanced in price, graceful dwellings and business structures rose on every hand. The population in 1865 was 3245; in 1875, 5349. The valuation in 1865 was \$1,778,786; in 1875, \$4,706,056.

In 1868 the town changed its name. The inhabitants had long felt the desire for a name more simple and euphonious, an identity more clear and distinctive.

In 1846 a special and almost successful effort had been made in this direction. The subject was agitated in earnest, a town-meeting was called to consider and act on the proposition for a change of municipal name, and a clear majority voted in favor of a new departure. Favorite names, having a local or historical significance, were presented and advocated by different citizens, and the decisive ballot is given as follows:

Winthrop, 71	Shawmut, 5
Florence, 6	Lakeside, 4
Calais, 5	Greenville, 1
South Reading, 35	

Pursuant to this vote of the town, a municipal

petition was forwarded to the Legislature asking for the name of "Winthrop;" but for reasons best known to the legislative Solons of that day the petitioners were given leave to withdraw, and the people's interest in the matter subsided, to be revived with almost universal favor in 1868.

At this time the late Cyrus Wakefield, Sr., a liberal citizen of the town, descended from one of its older families, came forward and unconditionally offered the town the princely gift of a new and costly town hall. A town-meeting was called, and in accepting this opportune donation, the voters resolved that the time had come to change the name of the town, and with unanimity and acclamation, voted in so doing to honor the name of their friend and benefactor. The authority of the General Court was invoked, and by its aid, on the 1st of July, 1868, the town exchanged its endeared name of South Reading for the new and significant name of Wakefield. The inaugural exercises were held on the 4th of July, 1868. The day was an occasion of double celebration. Bells rang in the day, cannon awoke patriotic echoes, fluttering flags, wreathed mottoes and decorated arches appealed to eye and memory; band concerts tempered and refined enthusiasm with the rhythm and melody of music; a long procession gave nearly every one active participation in the celebration; an historical address eloquently blended the stirring memories of the past and present; a sparkling poem added the blossoms and fragrance of wit and fancy to the occasion:

" With joyful voices join, to greet
This birthday of the free;
Each glad return, more dear and sweet,—
The Nation's Jubilee.

" On all the winds her banner plays,
Star-gemmed with folds of light;
A nation's hopes are in its rays,
The red, the blue, the white.

" Here, on this bright, rejoicing day
Such hopeful omens crown,
We come, a pleasant word to say
For our dear, native town.

" Fair town, whose legends, strange and old,
Wrought from her bending bowers,
By nobler bard have been enrolled,
In fairer lines than ours.

" From out the shadowy haunts of eld,
From ancient roofs, moss-grown,
Arise the forms those years beheld,
And swell aerial tone;

" Forms, lost to sight, to memory dear,
Those mystic chambers fill,
Tones lost to earth, from purer sphere
Our waiting spirits thrill!

" As the fond lovers linger long,
Nor haste to say farewells,
As the swan's sad expiring song
In sweetest cadence swells,—

" So on memories fond, intent,
We linger with the past;

And the fair name, with childhood blent
Seems sweetest at the last!

"Dear name, farewell! Our task is o'er;
The coming glories see!
South Reading, henceforth, nevermore,—
And Wakefield let it be!"

The grand celebration dinner in the mammoth tent upon the Common, made brilliant by the flash of wit and sentiment, was a notable feature of the occasion. The excessive heat that prevailed was the only drawback to the full enjoyment of the festivities of the day. Races upon the lake afforded pleasurable excitement, and the day was closed by the roar of artillery and the explosion of fireworks.

The promised Town Hall was erected in due time, and, with a suitable lot of land, was presented to the town, with impressive dedicatory exercises, on the 22d of February, 1871, and is the same splendid edifice now used by the town for municipal purposes, and located at the corner of Main and Water Streets.

Until comparatively recent years the town was entirely without any adequate printed history of itself. In 1865 such a work was projected. By invitation of many prominent gentlemen, supplemented by a vote of the town, the late Hon. Lilley Eaton was induced to undertake the congenial service. This labor of love grew upon his hands, as his design for the book enlarged, to embrace in its scope the whole territory and people of ancient Reading. His sudden death in January, 1872, left the work nearly but not fully completed. A committee, of which John S. Eaton, Esq., was the efficient chairman, acting under authority of the town, carried forward the work to its proper end, and in 1874 was printed, at the town's expense, the "Genealogical History of the Town of Reading, Mass., including the Present Towns of Wakefield, Reading and North Reading, with Chronological and Historical Sketches from 1639 to 1874." This volume is octavo in size, contains 315 pages, embellished with fifty portraits and engravings.

The matter of a public water supply has greatly interested the people of Wakefield in recent years. On May 4, 1872, the Quannapowitt Water Company was incorporated for furnishing Wakefield and Stoneham with water for fire and domestic purposes, from Crystal and Quannapowitt Lakes. The name was subsequently changed to Wakefield Water Company. This corporation slumbered for about nine years, but in 1881 it made a proposition to the town of Wakefield to supply its inhabitants with water to be taken from Crystal Lake. After much discussion, some equity suits in the Supreme Court, and many town-meetings, the town and water company made a water contract, and before the close of the year 1883 an aqueduct system, having its source in the pure waters of Crystal Lake, was in successful operation in Wakefield and Stoneham.

In former years the boundary line between Wakefield and Stoneham was within a stone's throw of the

upper depot of the Boston and Maine Railroad; and on petition to the Legislature a considerable tract of the territory of Stoneham, in this region—including one hundred and ninety acres—was in 1856 set off and annexed to Wakefield, with general acquiescence. As years passed by, Wakefield grew largely toward the west, and quite a number of houses were found to be over the line, in Stoneham, but occupied by people whose interests and affiliations were mostly on the Wakefield side, their homes being much nearer the schools, churches, stores, post-office and depots of Wakefield than those of Stoneham. Therefore, on petition of these residents of the border land, the General Court, in 1889, set off to Wakefield another strip of land, containing 142 acres, from the easterly portion of Stoneham, not, however, without opposition from the last-named town. The territory thus annexed included sixty-two inhabitants and eighteen houses, with a real estate valuation of \$40,000.

TOPOGRAPHY AND SITUATION.—Wakefield possesses rare charms in natural scenery, and a location especially favorable and convenient. Her territory contains 4568 acres, with a surface romantically diversified by hill and valley, groves and lakes. The central village occupies a plain between two lakes, and running up the gentle slopes of Shingle Hill, on the east, and Cowdrey's Hill and Cedar Hill on the west. The larger lake—Quannapowitt—is a beautiful sheet of water, containing 264 acres, extending northerly to the borders of Reading, and much enjoyed for its yachting and fishing privileges. Its outlet is Saugus River, forming the boundary between Wakefield and Lynnfield, and flows southeasterly to the sea, emptying its waters into Lynn harbor. Crystal Lake, just south of the centre, contains, by estimation, sixty-four acres, but is remarkably deep, and its waters not excelled in purity by any lake-source of water supply in the State. The outlet is a small stream, flowing eastwardly to Saugus River, and in other years has been found sufficient to furnish water-power for grist-mills and saw-mills. On this little "Mill River" was built the first corn-mill of the town, at the very place now occupied by the Wakefield Rattan Works. Following along the valley of this stream, about a mile southeasterly from Wakefield, it expands into a fertile and peopled plain, forming the pleasant outlying village and school district of Woodville. The central valley of the town extends southerly below Crystal Lake, and there is discovered Wakefield's most flourishing suburb, the village of Greenwood, with depot, chapel and schools. The highlands to the west of the centre are very attractive for residences, furnishing many prospects of picturesque beauty. Along the easterly border of Lake Quannapowitt are home sites not less delightful, and there are to be seen many tasteful and elegant dwellings. On the eastern plains, toward Lynnfield, is the thriving village of Montrose, with a

school, chapel, engine-house and railroad station. Mention should not be omitted of the spacious and beautiful public park of the town, with its rows of noble elms, beginning at the frowning Rockery, where the dusty ways meet, and extending, in its verdant beauty, to the shores of Quannapowitt, and still northerly along the easterly margin of the lake. The park is indeed the pride of the town, and under fostering care grows more charming each year.

Johnson, the quaint Woburn historian, writing in 1651, remarked that "Reading hath her habitation in the very centre of the country," meaning, it is presumed, that its location was in the centre of that portion of New England which was then settled. Even now it may be truly said that Wakefield occupies a position remarkably central in respect to other important municipalities. Within a radius of fifteen miles of her central park are grouped about Wakefield, like mighty protectors, the cities of Boston, Chelsea, Malden, Lynn, Salem, Lawrence, Lowell, Woburn and Cambridge. These, with the towns that fill the spaces between, contain a population of 600,000 persons.

AROUND WAKEFIELD LAKES.

BY JOHN S. EATON.

Where ancient Reading's slopes of green
Ouspread her lovely lakes between,—
On level plain and hill's fresh crown
Stands Wakefield's fair, historic town.

Her shining lakes! calm, blue and clear,
As in that far, primeval year,
When, mirrored bright, they lay unmirred,
Save by the wing of woodland bird,
Or when, perchance, from shore to shore,
With floating plume and flashing oar,
Some Indian warrior's light canoe
Across their sunlit waters flew.

Her crystal lakes! sail-flecked and blue
And fair, as those the red men knew,
With added charms on emerald rim
Would make their ancient borders dim.
Now,—stately spire ornaute appears,—
And all the garnered wealth of years,
Touched by the sunset-spears of gold,
Shows Wakefield's treasures manifold.

Among the ancient towns of Middlesex, one, conspicuous for beauty of situation and for its romantic environment, nor lacking a record of historic achievement, will be found where, beside sparkling waters, the progressive municipality of Wakefield offers its pleasant homes to home-lovers.

The lakes, between which the town shows its central location, with their sloping, sandy shores and wealth of forest foliage, must have seemed admirable even in their original wildness and solitude; and it is worthy of remark that a world-wide traveler and poet, while viewing Crystal Lake, is said to have declared its accessories of beauty to be unsurpassed by any similar waters that he had seen shining below Swiss or Italian summits.

The unlearned and those whose vocations are of the most prosaic nature, seem, unconsciously, to become admirers of the beautiful and the picturesque,

and we may easily believe that the Indian chieftain (of whom this territory was originally purchased) and his tawny tribe found attractive charms, as well as abundant food, on the borders of these quiet lakes. On their fertile and now cultivated shores the plow occasionally turns up flinty arrow-head or spear-point—the only reminders of the rude, red warriors who, wrought and used them around these waters, where even their burial-places are unknown.

The native charms of these village lakes, scarcely diminished through the lapse of years, are still alluring, while their peopled shores are rich in the added beauties that situation, artistic adornment and centuries have given them. Encircled originally, we may suppose, by woodlands redolent with spicy odors of the pine, and by meadow-lands brilliant with flowers, its wooded shores undulating in curves and promontories, its waters gleaming in sunlight or rushing with the winds to break in miniature surf on the beach, Lake Quannapowitt still retains (on its northern border) characteristic features of those distant years. Leaving the town's business centre, and crossing its old-time training-field (remembered also as a youthful skating-field), now smooth, secure and shadowy, beneath elms massive with fifty years of growth, the visitor may reach a point from whence, o'er lawn and lake and waving woodlands, a landscape of remarkable extent and attractiveness stretches away to the distant purple hills.

Viewed from this position, soft, velvety and green, sweeps the Park's crescent curve around the lake's southern sands; then, clasping its winding eastern shore as with an emerald belt, with here a pebbly beach and there a fringe of ferns, it meets and joins the level, grassy meadows on the north.

But the lake's crowning embellishment and the day's supreme moment will be found at the summer sunset hour, when a flood of crimson splendor overspreads the unrippled surface; when all surrounding objects are mellowed by its glory and suffused with a warm, unwonted, golden glow; when sky and lake and lawn, forest and meadow, hill-slope and shelving shore, form a picture of vivid colors and enticing loveliness.

Who that has there witnessed such a sunset can forget its opulent beauty?

As faded the Indians' leafy trails along these wave-washed forest borders, the first white settlers opened broader and smoother thoroughfares on shore and summit (this pleasant region being one that early attracted the sturdy English emigrants); who brought hither and exemplified the simple and economic tastes, the quiet, temperate and virtuous lives, which were prominent characteristics of that period. We have abundant evidence that the original settlers in this territory were intelligent, industrious, patriotic and religious citizens; that the church and school-house arose almost simultaneously with the falling of the forest pines, and that the rugged inhabitants, strug-

gling with difficulties quite unknown to their descendants, here laid firm foundations for the nation's future growth and grandeur.

True it may be that the hardy, economic and successful pioneers in these New England settlements cared less for the artistic than for the useful, less for the picturesque than for the practical, sometimes regarding BEAUTY as undesirable (if not sinful), "not remembering that to some minds a relish for what is lovely in fancy and in art is as native as color to the violet, fragrance to the rose, or song to the bird; that God's own mind must eternally teem with beauty, since he lines with it the tiny sea-shell, and tints the fish and tones the hidden fibres of trees, and flashes it on breast and crest of flying birds, and breaks the tumbling avalanche into a myriad feathery crystals, and builds the skies in a splendor which no thought can match."

This ancient town, planted on historic soil and conspicuous in Revolutionary annals, has never lacked heroic defenders, from the distant year when from his lake-shore farm went forth the brave commander of the Colonial forces, until those recent and memorable years, when, on Southern fields, her sons gave their lives for the preservation of the Union.

As the years have passed (two and a half centuries from its settlement), and as the town has advanced to a prominent and prosperous position among other municipalities, generation after generation of its residents has vanished from the scene, and on the margin of the lake, beside which they had lived and loved and labored, on mossy and crumbling tombstones may be read the records of their departures. Beside gently-lapsing waters, where overarching, breeze-swept branches sound a perpetual requiem,—

"Each in his narrow cell forever laid,
The rude forefathers of the hamlet sleep,"

while on the lake's sunset-shore, in ground consecrated and flower-embellished, other and later generations have found and will find tender and tearful sepulture.

Beautiful Lakeside! sacred, shadowy, serene! Above its silent sleepers are the summer's garnered freshness and flowers; bee and butterfly, bringing the sweet splendors of the sunshine, wing their joyous flight over its grassy mounds; its bird-songs have never a note of sadness, and the waves that meet its shores bear the lilies' fragrant and stainless blossoms to these pleasant portals of the tomb.

PRE-HISTORIC SIGNS.—Though the axe and the ploughshare of the English settlers, pushing out from Lynn to "the head of their bounds," were first seen in the wilds of this town in 1639, evidences abound that for centuries before, the American red men of the Saugus tribe found in this region their favorite haunts. The water privileges of this region, in later times so highly prized,

were also irresistible attractions to the dusky men of the early days. The great ponds now known as Lake Quannapowitt and Crystal Lake, and the small streams, now dignified with the names of Saugus River and Mill River, were like magnets to draw the red men to their banks, where even now the intelligent searcher may any day find abundant traces of the aborigines only a few inches beneath the soil, in the shape of hatchets, arrow-heads, knives, pestles, hammers, remnants of pottery, and various implements of stone and bone, fashioned with the curious skill of a lost art.

Enthusiastic and patient explorers beneath the surface of things have been rewarded by the discovery of numerous specimens of the rude skill of a prehistoric race, and in Wakefield may be found many large and valuable collections of these durable memorials. A comparison of results from these investigations affords satisfactory proof that in what is now the centre of Wakefield were located, perhaps for centuries, the villages of Indians, who hunted deer and trapped rabbits in the adjacent forests, and in our brooks and lakes fished for trout, pickerel and bass without fear of fish committee or statute law. Evidences are conclusive that the wigwams of Indian homes were once thickly placed on the solid land between Quannapowitt and Crystal Lakes, and the plain westerly of the new upper station of the Boston & Maine Railroad, on the slope of Cowdrey's Hill, and near Barehill Brook at the northwest, on the banks of Saugus River on the east, and on the plains of Greenwood, near the Pitman estate at the south.

A Wakefield bard "to the manner born" has looked back through the centuries and given wings to his imagination in the following lines:

"The native Indian, dull and rude,
Threading the forest wild,
Beside our lakes enchanted stood,
Where the Great Spirit smiled.

"His wigwam's shield along these streams
In rustic beauty sprang;
Here in the twilight's shadowy gleams,
His dusky daughters sang.

"And, later, here our ancient sires,
By the same waters cheered,
Over the Indians' smouldering fires
Their scanty dwellings reared;

"Fought for their title to the soil
With hungry wolf and bear;
And where the savage sought his spoil,
Erected house of prayer.

"All honor to those rugged men,
The coming needs foresaw,
And laid foundations firmly then
Of liberty and law."

Our forefathers, erecting here their log cabins two and a half centuries ago, came not to unpeopled solitudes, but occupied the places and hunting-grounds of a race possessing many noble qualities and characteristics, but yet essentially a barbarous people, and

entirely wanting in the graces, the humanities and the culture of a Christian civilization. To the honor, however, of the early settlers of Lynn and Reading, be it said, that they obtained by peaceable negotiation from the former Indian possessors a good and regular deed of the land included within the grants of the two towns, duly signed and acknowledged by the chief men and women of the tribe. This deed was dated May 31, 1687, and is recorded with Essex So. Dist. Deeds, at Salem.

ECCLESIASTICAL.—A meeting-house of humble appearance and dimensions was among the first buildings erected by the settlers of Reading, and stood near where is now the Wakefield Post Office. This small house served the purposes of a church building until 1688, when it was sold for twenty-five shillings and a "watch-house frame," and the money obtained appropriated for the school. The second meeting-house was erected in 1688, a little north-westerly of the site of the stone structure now being erected in the easterly part of what is now known as "the old burial-ground." This edifice was enlarged in 1727, a steeple built upon it, and furnished with a bell. The third church edifice was erected in 1768, and for the times was a commodious and handsome structure. It was turned around and essentially remodeled in 1859, receiving a new steeple, new bell and tower-clock; but the frame remained unchanged until the edifice was finally demolished in June, 1890, to make way for the stately and graceful house of enduring granite, not yet completed, to be supplied with every modern appliance and convenience, its tower and turrets pointing toward heaven. The new stone church is being built of Monson granite in two colors of gray, and is in style a simple, harmonious development of the Byzantine-Romanesque, in which form and color, rather than elaborate detail, are relied upon for architectural effect. The auditorium has 650 sittings; but the number can be easily increased to 1000 by moving the sliding sashes which separate the audience-room from the Sunday-school apartment on the same floor. The cost of the edifice and furnishings will be about \$78,000. This church was organized in 1644 or 1645, was Congregational in its faith and government, and was the twenty-fourth church founded in the Massachusetts Colony.

The successive ministers of the church have been as follows: Rev. Henry Greeu, Rev. Samuel Haugh, Rev. John Brock, Rev. Jonathan Pierpont, Rev. Richard Brown, Rev. William Hobby, Rev. Caleb Prentice, Rev. Reuben Emerson, Rev. Alfred Emerson, Rev. Joseph D. Hull, Rev. Joseph B. Johnson, Rev. Charles R. Bliss, Rev. David N. Beach, Rev. William H. Brodhead and Rev. Robert W. Wallace.

This old church has been the mother of noble and vigorous daughters. In 1720 she sent forth colonies at North Reading and Lynnfield. In 1729 she helped form the church at Stoneham, in 1733, the church

in Wilmington, and in 1770 parted regretfully with some of her best blood in the incorporation of the Third or West Parish and the formation of the church at "Woodend," or what is now the town of Reading. The "old church" has ever contended with sturdy zeal for "the faith which was once for all delivered unto the saints," and is still strong, progressive and influential.

The Baptist Society was formed in 1797, its first meeting-house erected on Salem Street in 1800, and the church organized in 1804. In 1820 the church edifice was removed to a more central location at the corner of Main and Crescent Streets, and in 1835 it was destroyed by fire. A new house of worship was erected forthwith on the same site, and this was burned to the ground in 1871. In re-building, the society secured a larger lot at the corner of Main and Lafayette Streets, and erected thereon, in the Romanesque style, a commodious and splendid house of worship, which still stands with lofty spire and graceful proportions,—a beautiful temple of the Lord, and a worthy ornament of the town.

This strong and active church has been and is a power in the community, and has been served by a succession of earnest and devoted ministers, as follows:

Rev. Ebenezer Nelson in 1804, followed by Rev. Gustavus F. Davis, Rev. Joseph A. Warne, Rev. James Huckins, Rev. Isaac Sawyer, Rev. Charles Miller, Rev. Larkin B. Cole, Rev. Charles Evans, Rev. Paul S. Adams, Rev. Dr. Daniel W. Phillips, Rev. Dr. George Bullen, Rev. Dr. James W. Willmarth, Rev. Richard M. Nott, Rev. Dr. Charles Keyser, Rev. Dr. Rudolph R. Riddell, Rev. Roland D. Grant and Rev. Noah R. Everts.

The Universalist Church was organized in 1813, but its first settled pastor was not installed until 1833, and its first house of worship not erected until 1839. This edifice, finely located on the easterly side of Main Street, and originally simple and unpretending in architecture, was, in 1859, remodeled and enlarged, and received the addition of a steeple and tower clock, and is now one of the most graceful structures on the street. The society is active and prosperous, and furnishes a centre around which gathers and radiates the more liberal, religious sentiment of the community. Its ministers have been Rev. John C. Newell, Rev. H. W. Morse, Rev. Henry Jewell, Rev. Henry Lyon, Rev. Stillman Barden, Rev. John H. Willis, Rev. Alexander Hichborn, Rev. John H. Moore, Rev. Benton Smith, Rev. Edwin A. Eaton, Rev. William W. Hayward, Rev. William F. Potter, Rev. Quincy Whitney, Rev. William H. Morrison, Rev. William E. Gaskin, and Rev. L. L. Greene.

St. Joseph's Catholic Society is the largest in Wakefield. Their first church edifice was erected in 1854, though many Masses had been said in halls and private houses of the town in preceding years. To accommodate the growing needs of the society

a larger church was built in 1871, and this proving inadequate, an extensive addition was made in 1889, including a handsome spire. The church is situated on Albion Street, near the Upper Depot of the Boston and Maine Railroad, and is a prominent and pleasing feature of the region. Under the efficient and devoted spiritual guidance and ministrations of Rev. Father Millerick, assisted by his curate, the Rev. D. H. Reardon, an important work is being done in caring for the highest interests of the Catholic population of the town. The first regular officiating pastor was Rev. Thomas Shahan in 1854, followed by Rev. John Ryan, Rev. John McCarthy, Rev. Thomas Scully, Rev. John McShane, Rev. M. Z. Carroll, Rev. Thomas Gleason, Rev. William H. Fitzpatrick, Rev. M. F. Flatley, Rev. Patrick J. Hally and Rev. Jeremiah E. Millerick. The pastors have been resident in Wakefield since 1873.

The Methodist Episcopal Church was organized in 1865, and for several years worshiped in the vestry of the Universalist Church. In 1869 the society purchased the Albion Hall building, but after a few years' use it was deemed too small, and Feb. 24, 1874, a handsome new church on Albion Street, costing \$25,500, was dedicated with fitting ceremonies. The structure was Gothic in outline, with Swiss treatment of detail. It was a time of business depression, and a heavy debt hung like a leaden weight about the neck of the society, until in 1885 the terrible burden was entirely removed by contributions mostly obtained by the personal labors of the pastor, at that time the Rev. T. C. Martin, and now, in a church redeemed, the people of this society are earnest and successful workers in the vineyard of the Lord. The succession of pastors has been as follows: Rev. Thomas C. Potter, Rev. Andrew Gray, Rev. Daniel Atkins, Rev. Dr. M. B. Chapman, Rev. C. L. McCurdy, Rev. John Peterson, Rev. E. A. Howard, Rev. Gilbert C. Osgood, Rev. E. A. Manning, Rev. Daniel Richards, Rev. Thomas C. Martin, Rev. D. S. Coles and Rev. W. F. Cook.

The Emmanuel Society was organized in 1869, as a Mission of the Protestant Episcopal Church. This society was not large, but has had the encouragement of a gradual increase in numbers and in spiritual prosperity. Its first church edifice was erected in 1881, on the southerly side of Water Street nearly opposite Crescent Street. The rectors of this society have been Rev. Samuel R. Slack, Rev. George Walker, Rev. Samuel Hodgkiss, Rev. Frederiek Luson, Rev. William H. Williams and Rev. Irving Spencer.

The first Congregational Society of Greenwood was formed in 1873, and in 1884 a tasteful and convenient chapel was erected on Oak Street, near the Greenwood School-house, where regular services are held every Sunday, but no permanent pastor is ever engaged.

The Montrose Chapel Society was organized in 1877, and in 1886 dedicated an elegant little chapel to religious use, where Sunday-school and preaching

services are held every week, but, like Greenwood, the society is not able to support a regular pastor.

EDUCATIONAL.—The New England Puritans were not slow to appreciate the value of education, and, according to their means, provided ample opportunities for the acquisition of knowledge and the training of the mental powers. The early settlers of Wakefield were true scions of the stock, and good common schools have been found in town since the early years. The first known teacher of the free school was Nicholas Lynde, of Charlestown, a graduate of Harvard College in 1690. Several of the "old masters" of the town were men of thorough classical attainments. It is not known where the first school-house, as such, was erected, but it is recorded that in 1707 the selectmen were asked to consider whether the school-house should be removed. This building was a small affair, and stood upon what is now the public park, a little northeasterly of the Congregational Church. In 1693 and for some years succeeding, Master Lynde was the only teacher in the whole town, and taught in different parts of the town, as the selectmen directed. Three months were given to what is now Wakefield, two months to what is now Reading, and one month to what is now North Reading.

During the eighteenth century, before the Revolutionary War, the amount of money annually appropriated for schools averaged about £60. Following the Revolution the school appropriations gradually increased, educational privileges were expanded, until, in Wakefield alone, the annual appropriation for support of schools is \$20,000, which is distributed among twenty-four schools, in which instruction is given by thirty-one teachers to 1200 pupils, in ten large and well-appointed school edifices. The High School was established in 1845, and is now one of the most highly prized and cherished institutions of the town, occupying a handsome edifice at the corner of Main and Lafayette Streets, on the site of the old-time parsonage of the First Parish. Wakefield has obtained a worthy distinction among the people of the Commonwealth for the excellence of her public schools.

Long before the establishment of the High School, there was erected, in 1829, on the pleasant elevation easterly of Crescent Street, the South Reading Academy, under Baptist auspices. It was for many years a flourishing institution of learning and exerted a valuable and elevating influence on the rising generation of the town, and hastened the coming of the High School. The academy was discontinued about 1845, and the town, in 1847, purchased the building for the use of the High School. Another institution, the Greenwood Seminary, was established about the year 1855, in Greenwood Village, by Rev. Windsor B. Wait, under Universalist influences, and was for a decade a favorite resort for young ladies seeking a finished education.

LIBRARIES.—There have been in other days libra-

ries of note in the town, including the "Social," "Franklin," "Prescott" and "Agricultural" Libraries, but all have been overshadowed and practically superseded, except church and school libraries, by the Public Library, instituted in 1856, by the public-spirited efforts of leading citizens of the town, including Benjamin Franklin Tweed, Lilley Eaton, Paul H. Sweetser, Edward Mansfield, Franklin Poole, James M. Evans and John S. Eaton. A large number of books was collected by private enterprise and donation and presented to the town. This germ of the library was taken under the paternal wing of the town, and, receiving generous nourishment and kindly care, has grown and expanded into the present extensive collection of books, which includes about 10,000 volumes, and is regarded as a beneficent and almost indispensable institution of the town. Its name was changed in 1868 to "Beebe Town Library," in honor of the late Lucius Beebe, Esq., a liberal contributor to its funds. Other generous gifts have been made to the institution by Mrs. Harriet N. Flint, the late Dr. Fraucis P. Hurd and the late Cyrus Wakefield, the younger. A public reading-room contiguous to the library, well supplied with the best papers and magazines of the day, is much used and appreciated by the people of the town.

As a means of popular education, supplementary to the schools and public library, there should be mentioned the work of the Wakefield Lecture Association, which has for many years provided winter courses of excellent literary, scientific and musical entertainments in the town-hall to large audiences for a very reasonable price. There was also established in 1886 the "Sweetser Fund Lectures," and placed upon a secure financial foundation by the bequest in trust to the town of \$10,000, under the will of Cornelius Sweetser, a native of Wakefield, "for the improvement and elevation of the public mind." Under wise management the annual series of superior lectures provided from this fund have grown in popular favor and appreciation, and become a prized institution of the town. A small admission fee is charged, as required by the terms of the will, and the surplus of income distributed among the worthy poor of the town.

NEWSPAPERS.—The first attempt to furnish regular news in printed form to the inhabitants of this town was in 1854, through the medium of a *South Reading Department* in the *Middlesex Journal*, a weekly paper published in Woburn. Invited by a "combination of gentlemen," the editorial duties of the department soon devolved upon Edward Mansfield, Esq., who for many years continued to furnish items for the *South Reading* column, with generous public spirit and signal success.

In 1858 was begun the publication of the *South Reading Gazette*, by Mr. William H. Hutchinson, from Boston, which paper for about five years was a welcome visitor in home circles. In 1868 Mr. A.

Augustus Foster, established the *Wakefield Banner*, which, in 1872, was merged in the *Wakefield Citizen*. At this time Mr. William H. Twombly launched the *Wakefield Advocate*, but soon after picked up the discarded name of "*Banner*," and for nearly two years there was again published the *Wakefield Banner*. In 1874 Mr. Twombly purchased the *Citizen*, which he consolidated with the *Banner*, and then was begun the prosperous career of *The Wakefield Citizen and Banner*, which has become the leading journal of the community and found in nearly every home in Wakefield. Mr. Twombly, in 1880, sold his interest in the paper to Mr. Chester W. Eaton, who is still the publisher and editor of this progressive sheet. An extensive job printing department is successfully carried on in connection with the newspaper office.

The *Wakefield Bulletin* was established in 1881 by Mr. W. H. Twombly, then proprietor of the *Reading Chronicle*. The *Wakefield Record* was started in 1886 by Mr. Frederick W. Young, who, in 1887, purchased the *Bulletin*, and has since successfully conducted the *Wakefield Record and Bulletin*. Other ephemeral ventures in newspaperdom have been made in the town, but are hardly worthy of mention.

MILITARY.—The military record of the town is one of honor and renown. The first corps was organized in 1644, called the Reading Infantry Company, and commanded by Richard Walker, a noted Indian fighter. It is recorded of him:

"Of Reading train-band he was first
Who held the Captain's lofty trust;
A man of faith and courage great,
To fight the battles of the State,
And thus we find that with his men,
He went to Sangua, now called Lyno,
And fought the eastern Indians there,
Whose poisoned arrows filled the air,
And two of which these savage foes
Lodged safely in old Walker's clothes."

This famous company was cherished and sustained until its disbandment, in 1840. The Washington Rifle Greens were organized in 1812, became the renowned company of the region, and went out of existence in 1850.

The Richardson Light Guard, so named in honor of the late Dr. Solon O. Richardson, a generous friend of the company, as is also his son, the present Dr. S. O. Richardson, was organized in 1851. Thrice was this gallant corps called into the service of the Union during the recent Rebellion—as Company E, Fifth Regiment, as Company E, Fiftieth Regiment, and as Company E, Eighth Regiment Massachusetts Volunteers, and always acquitted itself with honor. It still enjoys high distinction under Capt. Clinton H. Stearns, as Company A, Sixth Regiment Massachusetts Volunteer Militia.

In the French and Indian Wars of last century the First Parish of the old town of Reading nobly bore her part, her sons sharing in the glory of the capture of Louisburg, and fought under Wolfe on the Plains

of Abraham. When the tocsin sounded for the opening of the Revolutionary War the whole town of Reading burned with patriotic ardor. Several companies of minute-men had been secretly organized for the anticipated crisis, and on the memorable 19th of April, 1775, the train-band, or "alarm-list" of the First Parish was, by express, ordered to Lexington, and they departed very early, accompanied by the minister, Rev. Caleb Prentiss, and met the British troops returning from Concord at Merriam's Corner, and, with the men of the Third Parish and others, were among the first to engage the enemy in what might be called the first battle of the Revolution, the Reading men being commanded in this encounter by Capt. John Brooks, afterward Governor of the Commonwealth. The British regulars in their retreat along the Boston turnpike were constantly and fatally harassed by the Provincials, and their retreat became a rout until they met Lord Percy, with reinforcements.

Among the First Parish men who joined in the exciting chase was Reuben Eaton, whose home was where the elegant mansion-house erected by the late Cyrus Wakefield now stands. Eaton was then young, a skillful hunter, and a sure marksman. He didn't start for Lexington with the body of the "alarm-list," but stopped to clean his gun, supply the lock with a new flint, and fill his powder-horn and bullet-pouch, as if to hunt ducks or deer, and, when fully equipped, followed with all speed. Having reached Merriam's Corner in season to take part in the bloody fight, he followed the retreating foe toward Lexington, popping off the red-coats from behind stone wall, fence or building, as occasion permitted, with great deliberation and success; but staying longer than he ought, to get another, *one more* shot, he was captured—almost—by the enemy's flanking guard. He then started to run for dear life.

"The British shot came whizzing on
To bring this saucy rebel down,
But he the flash perceives and falls,
And o'er him pass the harmless balls;
Then springing up he onward runs;
Again crack off the British guns,
Again he drops upon his face,
Unhurt amid the dangerous chase.
The foe, supposing they had slain
The man, marched on, and he again
Sprang to his feet, and thus got clear;
But not until he heard them swear
'That twice they'd pierced that Yankee's liver,
But still he'd run as fast as ever.'"

At Merriam's Corner, too, was Thomas Emerson, of the Old Parish, of honored memory, and grandfather of Thomas Emerson, Esq., and Capt. James F. Emerson, of the leading shoe manufacturing firm of Wakefield. Young Emerson, then eighteen years of age, was full of courage and enthusiasm, stood bravely in the ranks, and had here his first shot at a red-coat. He later obtained distinction in the war, and knew the horrors of Dartmoor Prison. Young Emerson

used to relate an incident of the memorable day enacted before his eyes, that was terribly impressive: A patriot, turning the corner of a house, suddenly met a regular. Both leveled their pieces and fired at the same moment, and both fell dead together.

The town of Reading sent into the army during the Revolutionary War over 400 men, not including minute-men and privateersmen, and there were constantly in the field an average of 100 men from the town. Perhaps the most noted of the fighting patriots of the Old Parish was General Benjamin Brown, whose homestead was on the easterly side of Lake Quannapowitt, where lately dwelt Lucius Beebe, Esq., deceased.

In the War of 1812, and the Mexican War, the sons of South Reading were not wanting to defend the nation's honor on land and sea.

Wakefield in the Rebellion.—Upon a country free, proud and prosperous, pressing with confident step to the van of the great nations of the world, there suddenly burst, in 1861, the black cloud of rebellion, in war and blood, and the souls of men and women were tried and stirred as never before since the days when the nation struggled into existence. An insulted flag, slavery's arrogant demands, and the foundations of our government undermined, aroused at last the slumbering patriotism of our people, and the old town that had sent her yeomen to Concord, Bunker Hill and Ticonderoga glowed with the fervor of patriotic indignation. The young men responded with ready courage and high enthusiasm, while the old men buckled on the armor of their sons with grave faces and tear-dimmed eyes, as they realized more truly than the young men what was the import of the terrible sounds in the air, in sacrifice and suffering to come.

On the doubly memorable 19th of April, 1861, the orders came from the commander-in-chief to the Richardson Light Guard, Wakefield's own gallant corps, to march at once to the defence of the government. At 12 o'clock, noon, the old town-bell, a century old, rang out such peals as had summoned the minute-men in 1775. All understood the clanging signal. The whole town was stirred with martial excitement, and thrilled with new and strange emotions, never to be forgotten by those who experienced them.

The soldiers of the Guard rallied to their armory, and, at two o'clock, led by Captain John W. Locke, were proudly marching down Main Street to the music of drum and fife, to take the train for Boston. At the depot was gathered the population of the town. Words of encouragement, hope and sympathy were publicly spoken by leading citizens of the town; fervent prayers were offered by the clergymen, while the assembly was freshly electrified by the news, just then flashed over the wires, that the blood of Massachusetts soldiers had that very day been shed in the streets of Baltimore by the enemies of

their country. And so, with tears and prayers, with indignation and huzza, with farewell and God-speed, the first volunteers of Wakefield left for the seat of war, and rendered valuable service in the defence of Washington, and fought with honor in the first battle of Bull Run, where some were wounded and three men taken prisoners: Sergeant George W. Aborn, James H. Griggs and Frank L. Tibbetts. These true patriots, after languishing many months in Southern dungeons and prison-pens, were released alive, and on the 14th of June, 1862, at South Reading, were accorded a public reception, with procession, feast and oration.

Meantime, as the carefully-matured and appalling scheme of secession was developed, and the determined purpose of the Southern leaders became understood, the people of the loyal North shuddered as they perceived that the Rebellion was not to be of weeks or months but of unknown years, and braced themselves for the terrible conflict.

The North thundered out with the indignant voice of outraged justice: "The Union must and shall be preserved, and traitors must lay down their arms or die. Freedom is national and of God; Slavery is sectional and wrong." The South shouted back: "Go we will, peaceably if we can, forcibly if we must, and any Yankees who interfere with us or our peculiar institutions will be welcomed with bloody hands to hospitable graves." With grim resolve and heroic spirit loyal men and women met the awful exigency, and, like the fathers of seventy-six, pledged "their lives, their fortunes and their sacred honor" for the principles of freedom and righteousness. The President's proclamation for "300,000 more" found an enthusiastic response from the people of the North, and the most gigantic war of modern times was rapidly mounting to its awful proportions.

In this crisis of the nation South Reading was true to her patriotic traditions and her ancient fame. Major John Wiley, (2d), a brave man of the town, with martial instincts, who had been an efficient officer in the State militia, was authorized to recruit a company of three-years men in South Reading and vicinity, which having done he was commissioned as captain of the company, with James R. Darracot, and James Oliver as lieutenants. It was attached to the Sixteenth Regiment of Massachusetts Volunteers, as Company E, and left for the seat of war, August 17, 1861. This company served in the Army of the Potomac, and participated in most of the bloody battles of that famous old army, and met with terrible losses. It ever sustained a high character for courage and heroic endurance, and is entitled to lasting gratitude and honor. In the summer of 1862 another company was recruited in the town, the Richardson Light Guard forming the nucleus for the same, and in September was enlisted for nine months' service as Company E, Fiftieth Regiment Massachusetts Volunteers, with Captain Samuel F. Littlefield commanding, and Hor-

ace M. Warren and James D. Draper as lieutenants. The former captain of the company, John W. Locke, was commissioned and served as lieutenant-colonel of the Fiftieth Regiment. This regiment left the State in October and was attached to Banks' expedition to Louisiana, and participated in the campaign that resulted in the fall of Port Hudson. This company lost many men, principally by disease, and were mustered out in August, 1863.

The Richardson Light Guard again responded in 1864 for a service of one hundred days, and as Company B, Eighth Regiment Massachusetts Volunteers, was stationed at Baltimore to protect that city from threatened raids of the enemy. Many other sons of the town enlisted in various companies and regiments of the Union Army in the different branches of the service, and in the navy of the United States, and patriotic ladies, too, were not wanting to perform woman's blessed work in the same sacred cause. During the progress of the struggle, as call after call issued from the President for more men, the town nobly and promptly responded, and well sustained her part in the time of the nation's exigency, and points with glowing pride to the record of 505 men sent into the military and naval service of the Republic, of whom more than sixty gave up their lives in the sacred cause. The deeds of these gallant soldiers cannot be described nor even mentioned. From Pennsylvania to Texas, from the Atlantic to the Rocky Mountains, they wet the soil with blood; on ocean, gulf and rivers they upheld with daring achievement the ancient renown of American seamen, they languished in hospitals, and, worst of all, were murdered in rebel prisons. Their names are all inscribed on Wakefield's Roll of Honor, and will ever be held by the people of the town in grateful and affectionate remembrance.

Without invidious discrimination, in addition to those already named, there may be mentioned a few heroes of this town who fought their way to distinction on many a bloody field. First in the list should be named Horace M. Warren, who had in him the true, undaunted spirit of the soldier. Barely twenty years old when the war broke out, he enlisted at once in the local corps, which became Company E of the Fifth Regiment of Massachusetts Volunteers. After his three months' service in this company he enlisted for three years in Company E, Twentieth Regiment Massachusetts Volunteers, and was made a sergeant. At the bloody and disastrous battle of Ball's Bluff, October 21, 1861, he was severely wounded in the arm, body and leg, and came home entirely disabled. After a few months, his wounds having nearly healed, he became impatient to be again in the field, and in August, 1862, re-enlisted in Company E, Fiftieth Regiment Massachusetts Volunteers, and was commissioned first lieutenant. After efficient service of about a year in the Department of the Gulf, this being a nine months' regiment, he came home

and was discharged by reason of expiration of service. Not content with inactivity at such a time, he soon after, in 1863, accepted a new commission as first lieutenant and adjutant of the Fifty-ninth Regiment Massachusetts Volunteers, and found active service in Virginia under General Grant. For efficiency and bravery he was promoted to be major, and was mortally wounded in the battle of Weldon Railroad, Virginia, August 19, 1864, and died a few days later, August 27th. Thus early perished a brave young spirit, who laughed at danger and hardship, the memory of whose gallant deeds is tenderly cherished in the town of his home, and when Post 12, G. A. R., was organized, no more fitting name could be thought of by which to designate a Post of veterans. Major Warren, was the son of Rev. Edwin R. and Mary H. Warren, and born in Topsham, Maine, July 8, 1841.

Another veteran of the war, well worthy of special mention, was James F. Mansfield. He joined Company E, Sixteenth Regiment, in July, 1861, and was appointed sergeant. He was promoted first lieutenant February 14, 1864, and transferred to the Eleventh Regiment; promoted to captain October 9, 1864, to be major June 16, 1865, and lieutenant-colonel July 11, 1865.

Colonel Mansfield served with faithfulness and bravery throughout the war, and earned his promotions by brave deeds and faithful service in those terrible Virginia campaigns where there was so much weary marching and so much hard fighting, and came out at the end without a serious wound. Colonel Mansfield was the eldest son of James J. and Martha B. Mansfield, and born in South Reading in 1836.

Another brave man from this town was Thomas M. McKay, son of John and Elizabeth M. McKay, born in Boston, December 5, 1836. He served three months in Company E, Fifth Regiment, re-enlisted for three years in Company G, Twentieth Regiment, was appointed sergeant, and was in the awful disaster at Ball's Bluff, where his brother was killed. For gallantry and efficiency he was promoted, September 5, 1862, to be second lieutenant, and July, 1863, to be captain. He was killed by a shot from a conscript October 5, 1863, while in camp at Culpeper, Virginia.

No braver man went into the war from South Reading than George W. Townsend, though he attained no high distinction in rank. He was the son of Jacob and Nancy Townsend, born in South Reading in 1829. He was among the first to volunteer, and served three months as sergeant in Company E, Fifth Regiment, and was at Bull Run. He re-enlisted December, 1861, for three years in Company E, Twenty-fourth Regiment, as corporal. He was in Burnside's expedition to North Carolina, and, in the hotly contested battle of Newberne, lost two fingers of his right hand, and was discharged on account of his serious wounds. He re-enlisted in Company C, of the Fifty-ninth Regiment, in December, 1863, and was made color ser-

geant, and bore himself with conspicuous courage in the carnage days of 1864, in the battles of the Wilderness, Spottsylvania, North Anna, Cold Harbor, Petersburg, Weldon Railroad and Fort Steadman. He was in for the war and saw the end of the Confederacy before he furled the tattered colors of his devotion that had often been carried in the thickest of the fight, and never yielded to a foe. A friend and townsman seeing Townsend with Warren, and the gallant Fifty-ninth marching through Baltimore, as they were hurrying to the front, was moved to heroic verse:

" Our Fifty-ninth, God shield them all,
As dauntless to the front they press
For conflict in the Wilderness,
Who holds their battle flag? Its stars of gold
Are borne by our own Townsend bold.
And who is worthier to bear than he,
With shattered hand, the banner of the free?
He followed it when rain of life blood wet
Old Roanoke and Newberne's parapet

Closing the shining rear brave Warren there,
On duty's pathway rode serene and fair,
Unbending life, on into war's red zone
To fiercer conflicts than he yet had known

William H. Walker is the name of another soldier-son who has conferred honor on the town by faithful service in camp and on the march, and bright deeds on the field of battle. His first service was as a private in Company E, Fifth Regiment, in which were trained so many martial and patriotic spirits, and he re-enlisted in Company G, Twentieth Regiment. He carried himself bravely on many a hard-fought battle-field from Ball's Bluff to Gettysburg, and was rapidly promoted to second lieutenant, first lieutenant and company commander, receiving his commission as Captain August 29, 1863. He was severely wounded in the thigh at the battle of Gettysburg, and was discharged by reason of his wounds April 26, 1864. Captain Walker was born in South Reading in 1837, son of Levi and Laura Walker, and grandson of Captain Noah Smith.

Space would fail to tell of all the heroic men who went out from this town into the Rebellion and deserved well of their country for gallant service with gun or sword. There were daughters, too, of the old town who went forth as ministering angels and rendered priceless and perilous service to the sick, wounded and dying, on bloody field and in fever-smitten hospital.

During the progress of the terrible struggle the soldiers' friends at home were watching and working with anxious sympathy for their sons, brothers and fathers in the field, and various agencies were employed through which to express their affectionate interest in tangible forms. One of these agencies was the South Reading Union Soldiers' Relief Association, organized in 1863 to obtain cash, clothing, food and medicine, and other necessaries, and distribute the same to the Union soldiers and their families, and especially to such as belonged to South Reading. Many

articles were contributed and much money raised by subscription, fairs, lectures and social gatherings, and devoted with blessed results pursuant to the object of the Association, the first officers of which were Charles R. Bliss, president; Samuel Kingman, vice-president; Edward Mansfield, treasurer, and C. W. Eaton, secretary.

The worthy dead are represented to the eyes of the present generation in the membership of the Grand Army of the Republic, of which a flourishing Post, known as H. M. Warren Post, No. 12, is located in Wakefield, and assists in keeping green the memory of their comrades-in-arms, and in relieving the necessities of their families and of disabled survivors. The ladies of the H. M. Warren Relief Corps are efficient auxiliaries in the work of humanity and love. A camp of Sons of Veterans has also been lately organized in the town.

A room in the Town-House has been tastefully and beautifully fitted up for a Memorial Hall, as a tribute of municipal remembrance of the living to the dead. This room is also devoted in part to the practical uses of a Public Reading-Room. The veterans of Post 12 have projected a fine, large edifice to be located on Albion Street, and to be known as "Memorial Hall," as a more worthy and enduring monument to departed comrades, the foundation walls for the contemplated structure being already laid.

BURIAL-GROUNDS.—The burial-places of a town are in a certain sense the most interesting and significant memorials of a vanished race. One of the greatest marvels and disappointments to the zealous explorer who seeks new lessons among the dead things of a by-gone age, is his failure to find in all this region any graves or sepulchral monuments of the red aborigine.

The characters, the habits and condition of the early fathers and mothers of a city or town can to some extent be truthfully inferred from a careful inspection and study of the inscriptions upon the grave-stones of the pioneers. Wakefield is rich in such mementos and helps to the antiquarian. For many years after the coming of the first settlers, the "Common," so called, extended northerly from its present southerly limits to the "Great Pond," and included all of that territory that lies west of Main Street and northerly of Church Street as far west as the homestead late of Colonel James Hartshorn, deceased. This tract included what the present generation, with admiring and artistic eyes, perceive to be the most lovely and picturesque portion of the town, or of many towns; but the forefathers had little leisure for the indulgence of a poetic taste or for admiring the softer beauties of nature. They had to face with grim courage and fortitude stern and practical duties, amid perils and hardships we know not of. They had an eye for the useful, and what seemed to them of immediate necessity or importance, and so, like the first inhabitants of Boston, they buried their dead near the

heart of the town. The earliest grave-yard of ancient Reading was in that portion of Wakefield's new park where formerly stood the old town hall and the brick engine-house of the Lucius Beebe Steamer, No. 1. Here for more than fifty years was the only place of interment for the first and second generations of settlers. Many of these first graves, it is presumed, were without alaba or monuments, and as the ground was for a long time unfenced, many of the oldest grave-stones were broken down and destroyed. The land around the graves was subsequently sold by the Parish, the purchaser being bounded by the graves. In process of time, therefore, the portion of land devoted to interments was reduced to quite contracted dimensions, and much of the soil occupied by the dust of ancestors was disturbed by the plough of the agriculturist. Upon the erection of a Town-House in 1834, the town purchased of the First Parish what was left of the old grave-yard, took up the old slabs of slate, many of which were broken and defaced, and placed them in a continuous row on the easterly side of the lot, and in the truthful language of our local historian, "If the particular *dust* which they memorialized did not *lie beneath* them, it is certainly true that the *stones* did *lie above* them."

When the new park was purchased by the town in 1871, and the old Town Hall was sold and removed to smooth the way for the systematic grading and improvement of the new acquisition, these sacred relics of departed worthies were again transplanted, and this time to the "Old Burial Ground," so called, being the second burial-yard of the town, and placed in a row near Powder House Point, with a front as erect and regular as a battalion on parade. When the ruthless hand of progress will next seize these stern-faced monitors of the past, and where it will finally deposit them, can only be sadly conjectured by the shocked and reverent antiquarian.

The inscriptions on these ancient stones have become nearly illegible, yet a kindly solicitude and vigilance have preserved most of them in private archives.

Following are some of them :

"Memento te esse mortalem.

Fugit hora. Vive memor læthi. Fugit hora.

C. ye 2d.

Here lies the body of Capt. Jonathan Poole, who deceased in the 44th year of his age. 1678.

Friends sure would prove too far unkind
If out of sight they leave him out of mind.
Aod now he lies transform'd to native dust
In earth's cold womb as other mortals must.
It's strange his matchless worth intomb'd should lye,
Or that his fame should in oblivion dye."

NOTE.—This stone contains the oldest date and the most artistic and elaborate work of any of the old monuments in this yard representing in relief swords, hour-glass, coffin, spade, pick-axe, cross-bones, etc.

"Memento Mori. Fugit hora.

Here lyeth within this arched place the body of Deacon Thomas Parker, who was w^{on} of the foundation of the church, who dyed the 12th of August 1683, aged about 74."

"Memento te esse mortalem.

Fugit hora. Vive memor læthi. Fugit hora. Here lyes the body of John Person Senior. Aged 64 years. Deceased April 17, 1679.

Soon after the erection of the second church edifice in Reading, the settlers began about 1690 to use their second burial-ground, on the territory contiguous to their church, and here for more than one hundred and fifty years was the principal place of sepulture for the inhabitants of the First Parish, and has long been known as the Old Burial-Ground of Wakefield. Here rest the ashes of the greater portion of her former inhabitants, and it consequently possesses a most lively and mournful interest to the descendants of the fathers. Its location is beautiful, on the southerly borders of Lake Quannapowitt, and, though several times enlarged, is now full of graves and tombs. The earliest date upon any stone in the yard is in memory of Lieut. Thomas Bancroft, who died Aug. 19, 1691, aged sixty-nine. The first three ministers of the town were buried away from Reading, probably among their relatives at Watertown and Boston. We transcribe some of the more notable of the inscriptions and epitaphs from stones in this yard:

"The Rev. Mr. Jonathan Pierpont, late pastor of the church of Christ in Redding for the space of twenty years. Aged 44 years, who departed this life June 2, 1709.

A fruitful Christian pastor, who
Did good to all, and lov'd all good to do,
A tender husband and a parent kind,
A faithful friend which who, oh who, can find.
Of rules he preached, the souls of men to save,
A Pierpont, all of this, here leaves his dust,
And waits the resurrection of the just."

"Here lies interr'd ye body of ye Rev. Richard Brown, ordained Pastor of ye lat church in Redding, June 25, 1712. His character bespeaks him faithful in his preaching, impartial in his discipline and exemplary in his conversation; a man greatly beloved in his life and much lamented at his death, which was Oct. 20, 1732. Aged 57 years."

"In this Sepulchre is repositd the mortal part of the Rev. Mr. William Hobby, A.M., late pastor (the sixth in the order of succession) of the first church in the town of Reading, learned, vigilant and faithful. He was a preacher of the word of God, deservedly commended for his pure evangelical doctrine, replenished with erudition and piety, together with solid judgment and eloquence, being at length worn out with studie and labors and most acute pains of long continuance, calmly resigning to the will of his Almighty Father, and earnestly aspiring after the Heavenly Habitation and Rest, he breathed out his soul into the hands of his Savior June 18, Anno Christi 1765. Etat 58 years. He left, to profit his bereaved flock, a written monument of sage advice, in which, though dead, he speaks in solemn strains."

"Sacred to the memory of Rev. Caleb Prentiss, late pastor of the first church in this town, who passed into the world of spirits Feb. 7, 1803, in the 57th year of his age, and 34th of his ministry. Faith, piety and benevolence, with a kindred assemblage of Christian graces and moral virtue adorned his public and private character, endeared his memory to a bereaved family, a mourning flock, his brethren in office, and all acquainted with his merits.

He tried each art, reprov'd each dull delay,
Allur'd to brighter worlds and led the way;
Though gone, he is not dead; no good man dies,
But, like the day-star, only sets to rise."

"Here lies ye body of Major Jeremiah Sweyen, Esq., who departed, this life Aug. 13, 1710, in ye 69th year of his age.

The memory of the just is blessed."

"Here rests what was mortal of Lieut. John Pool, who deceased Nov. 22, 1721. Aged 56.

An humble Christian, useful and sincere,
Much given to hospitality, lies here.
Rich in alms to the poor, and in distress
The widow's friend, father of the fatherless,
A loving husband and a parent kind,
A neighbor good and a most useful friend.
All this he was, and more but now at rest,
The memory of the righteous man is blest."

"Here lyes ye body of Mrs. Abigail Bancroft, wife of Mr. Raham Bancroft, who died Mar. 26, 1723. Aged 40.

A prudent, pleasant wife was she,
An helpmate like the laboring bee,
Kind parent; virtue's graces tell
That she in those did most excel;
Full ripe for heaven, assur'd of bliss,
Long'd to depart to happiness.
If men forget to speak her worth,
This stone to ages sets it forth."

"In memory of Joseph Walton, son of Lieut. Timothy Walton, who was drowned in Lynn, Sept. 17, 1792, in his 23rd year.

Death, thou hast conquered me,
I, by thy dart am slain,
But Christ has conquered thee,
I shall rise again."

"In memory of Sophia Prentiss, daughter of the late Rev. Caleb & Mrs. Pamela Prentiss, who died Oct. 12, 1807, Aet. 25.

"Taste, Fancy, Virtue, Piety combined,
Enlarg'd, improv'd her heaven-born mind.
To pale disease she gave her early breath,
But count'd more than fear'd the approach of death."

In 1846 the necessity for a new place of sepulture became urgent, to accommodate the increasing population. Public-spirited citizens of the town united to form a corporation called "the Proprietors of Lake-side Cemetery," and having purchased an extensive tract of land on the westerly shores of Lake Quannapowitt, proceeded to lay out the same with avenues, paths, lots and bowers, from well-considered designs. The original lots, about four hundred in number, were offered for sale October 15, 1846, and on the same day the grounds were consecrated, with public exercises at the cemetery, including an address by the Rev. Caleb Stetson, then of Medford, with hymns, prayers and remarks by the resident clergy and leading citizens. Following may be taken as a taste of the original hymns composed for and sung on the occasion.

"And here as oft in coming years
Our children's children tread,
Glad thoughts will rise to quell their fears,
Among the silent dead.
Oh! hallowed spot! A cherished grave,
Beneath the flowery sod!
The form shall rest by sparkling wave
The spirit with its God."

"When all life's cares with us are gone,
And we have reached our journey's bourne
With woes distressed, with age oppressed,
And longing for a place of rest,
How sweet 'twill be to find a home,
Where we can lay the weary frame,
'Mid fragrant flowers and vine-wrought bowers,
On this dear Lake Side seat of ours."

The original enclosure has been greatly enlarged by purchases of adjoining lands, and the hand of taste has transformed an unfertile plain, by the addition of graceful trees, blossoming shrubbery and

pleasant arbors, along well-kept paths and avenues, into one of the most romantic and beautiful cemeteries in the country. Added to these features, a multitude of marble shrines and costly monuments make the scene wonderfully and mournfully impressive to the appreciative visitor. On the annual recurrence of Decoration Day, the H. M. Warren Post, No. 12, G. A. R., with solemn strains of martial music, escorted by the Richardson Light Guard, and attended by a reverent throng of sympathizing spectators, fill this sacred enclosure, and lay fragrant tributes upon the graves of fallen heroes, and around the Soldiers' Lot, guarded by cannon, hold impressive memorial rites.

The Israelites of Boston have also sought the shores of this same lovely lake by which to locate a burial-ground, which is very near Lakeside Cemetery, though a much smaller enclosure. It is known as the Jewish Cemetery, and is attractive for its beauty of situation and the numerous splendid monuments and other costly memorials of the dead therein contained.

RAILROAD FACILITIES.—The first regular public conveyance between this town and Boston was established in 1817 in the shape of a lumbering stage, and such means of passenger transportation continued until steam-cars began to run about 1846. The extension of the Boston and Maine Railroad from Wilmington to Boston through South Reading, was opened 1845, and gave a fresh impulse to the growth and expansion of the town. As an inducement to lay out the railroad it was predicted by an enthusiastic promoter that South Reading would furnish thirty daily passengers to Boston by rail. This utopian prediction was more than realized, and now there are at least 1500 daily passengers on numerous trains between Wakefield and Boston. At a later date the Danvers Railroad was constructed through the town, effecting here a junction with the Boston and Maine Trunk Line. This road connected with the Newburyport Railroad, running from Danvers to Newburyport, both of which have long been leased and operated by the Boston and Maine Railroad. The South Reading Branch Railroad, to Salem, was also opened, and thus the advantages of three railroad lines running through the domain of Wakefield afford ample and unusual facilities for transportation and communication, with easy and direct access to the great centres of Boston, Salem, Newburyport, Lawrence, Haverhill and Lowell. There are six depots within the town, and about forty trains running daily to and from Boston.

A street railroad to Stoneham is soon to be constructed by a company already incorporated, and it is contemplated that electric cars will run ere long over a circuit road connecting the towns of Wakefield, Reading and Stoneham, and the tracks be extended through Greenwood to Melrose.

STREETS.—One hundred streets in Wakefield, covering about fifty miles in length, afford ample facilities for people to get out of town and return, and for

inter-communication. About \$10,000 are annually appropriated by the town for new and old highways, which are illumined at night by gas-lights and oil-lamps, and wisely cared for under modern systems and appliances. With such a pleasing variety of scenery in the region, of hill and vale, grove and lake, these ways of Wakefield furnish opportunities for delightful walks and drives, which inhabitants and visitors are not slow to improve.

PUBLIC AND PRIVATE BUILDINGS.—The most important public buildings of Wakefield are the town hall, churches, school-houses and depots. The town hall, with the lot of land on which it stands, was the munificent gift to the town of the late Cyrus Wakefield, and is an imposing and elegant structure of brick, metropolitan in style and finish. It was formally presented to the town and dedicated with fitting ceremonies on the 22d of February, 1871. On the lower floor are apartments for the various town officers, the Public Library, Memorial Hall, and Public Reading-Room. On the second floor is the spacious auditorium, with its 1200 sittings and convenient ante-rooms. The third floor, with its large accommodations, is waiting, as it were, in abeyance, for future uses.

The Baptist Church, beautiful and stately, already alluded to, and the new Congregational Church whose walls of granite, massive and symmetrical, are even now rising toward the sky, may be mentioned as conspicuous and significant adornments of the central landscape. The St. Joseph's Church, the Universalist Church, the Methodist Church and the modest Episcopal Chapel are also worthy and handsome specimens of church architecture.

Among the institutions of learning in Wakefield the High School crowns them all with its carefully chosen *curriculum* and fine equipment, and has a fitting home in the elegant temple of education fronting the old park, at the corner of Common and Lafayette Streets. In this edifice there is a blending at several points of various styles of architecture, the porticoes and their ornamentation being beautiful specimens of the Ionic order, while there are delightful croppings out here and there of the Gothic and other ancient divisions, with expressions of the modernized lines. Its construction is of wood, in burrowed sheathing, with granite base. It is a splendid specimen of exterior architecture, and its interior finish and appointments are in fitting correspondence, and well adapted to its uses, there being a commodious school-room and other apartments on each of its three floors. The High School building was erected in 1872, at an expense of about \$75,000, and was dedicated with appropriate ceremonies Oct. 10, 1872.

The Hamilton School building was erected in 1883, on the southerly side of Albion Street, near the crossing of the Boston and Maine Railroad to provide accommodation for the rapidly increasing rising generation west of the railroad, and received its name by vote

of the town in honor of S. K. Hamilton, Esq., then the efficient chairman of the School Committee, and always the zealous and liberal friend of education. It is a brick edifice with granite trimmings, of handsome architectural design, and has four commodious school-rooms. Its cost, including land, grading, furnishings and extraa, was nearly \$20,000, and promises to be a lasting and practical memorial of municipal liberality in the cause of education.

The grammar school-houses in the centre, the Franklin School building at the Junction village, and the school buildings of the outer districts are also structures of no mean appearance.

The Boston and Maine Railroad has just completed, at its upper station on the main line, an elegant and commodious structure of brick and granite, located on the westerly side of the tracks, between Albion and Chestnut Streets, to take the place of the old depot, that has stood nearly opposite on the easterly side of the railroad location for forty-four years. The company has recently obtained, by purchase, a large lot of land adjoining the new depot, affording ample opportunities for embellishment and public accommodation, to be used and appreciated by the present inhabitants, and adapted to the needs of the coming city of Wakefield. The railroad has other tasteful depots—on Water Street, called the Centre Depot, at the Junction, Greenwood, Montrose and Lowell Street.

The notable buildings for business erected by private enterprise are Wakefield's Block, Miller's Block, Gould Building, Kingman's Block, Perkins' Block, Connell & Curley's Block, the Bank building and the extensive factories of the Wakefield Rattan Company.

Wakefield contains numerous elegant and tasteful private residences that are homes of refinement and affluence. Many of these are on or near Main Street, by fair Lakeside, among which may be named the residence of the family of the late Lucius Beebe, and those of Albert J. Wright, John G. Aborn, Peter S. Roberts, George O. Carpenter, Frank A. Clapp, G. H. Maddock, E. C. Miller, Thomas Emerson and E. E. Emerson. Farther south may be mentioned (on Park Street) the house of R. P. Buzzell, on Crescent Street, that of Mrs. Nancy Taylor, erected by the late Daniel Allen, and of Mrs. Sarah Y. Morton; on Lafayette St. the homes of Mrs. E. Perkins, J. G. Morrill, E. Sawyer, J. W. Grace and W. V. Taylor; on Yale Avenue, the residences of C. H. Stearns, E. A. Rich, W. C. Jordan, C. O. Anderson, T. E. Balch, S. K. Hamilton and L. H. Day; on Avon Street, those of D. H. Darling, S. A. Clough and A. G. Walton; on Chestnut Street, the estates of Mrs. H. S. Brown, Ira Atkinson, B. A. Osgood, F. O. Clark and John A. Tompson; on the western highlands, the residences of Rufus Merrill, J. S. Merrill and Dr. Charles Jordan; and on Main Street, the palatial mansion erected by the late Cyrus Wakefield, Sr., and now owned by the children of his nephew.

There are in Wakefield many dwelling-houses historic in their age and associations, but their number is every year growing less. Among these ancient dwellings is one on Cowdrey's Hill, erected considerably over two centuries ago, and known to the present generation as the Leslie place. It was the homestead of the early settler, Sergt. John Parker, and of his son, Kendall Parker, Esq., whose daughter married Captain John Goodwin, whose daughter married James Nichols, and thus the estate passed into the hands of the Nichols family, the late Matthew F. Leslie marrying a daughter of the family and residing there until his recent death. Another old dwelling is the Hartshorne house, on Elm Street, where lived Thomas Hartshorne in the early days, and which remained in the Hartshorne family until purchased a few years since by D. G. Walton and G. W. Aborn.

Other ancient houses still standing are the Swain house, on Vernon Street, lately owned by David Batchelder, and the one near it now of M. P. Parker, formerly, in 1740, of Joseph Underwood. There may also be named the house on Elm Street, formerly of Deacon Francis Smith, and still earlier of Thomas Hay, now owned by W. A. Carlton; the Eustis place, corner of Elm and Prospect Streets, a portion of which house is very old, and formerly of Captain John Goodwin; the "Colonel Hartshorne" place, on Church Street, now owned by John Rayner; the "Leonard Wiley" house, at corner of Water and Crescent Streets, formerly the homestead of the Poole family; the remodeled house, now of Mr. Thomas Martin, on Main Street by the lake, formerly the homestead of John Brown, Esq., who was born in 1634; the spacious old domicile on Main Street, opposite the lake, now owned by Miss Nancy White and Mrs. Mary E. Aborn, formerly of Timothy Nichols, and later of Thomas Evans; and the house on Main Street, in Greenwood, late of P. H. Sweetser, formerly of the Green family, now owned by L. Perry. Many of these ancient mansions, and others that have departed have been sketched and painted in oil by Franklin Poole, Esq., a resident artist, now over four-score years of age. By the thoughtful generosity of Mr. Poole, in whose veins runs some of the best blood of the early settlers, most of these invaluable paintings now embellish the walls of the Historical Society's room in the town hall, Mr. Poole being in earnest sympathy with the objects of this society.

POPULATION.—The population and valuation of the town since its separation and incorporation as South Reading, in 1812, have steadily increased, starting out with about 800 inhabitants and \$100,000 worth of real and personal estate. Following are interesting statistics in this connection:

A. D.	POPULATION.	VALUATION.
1812	800 ¹	\$100,000 ¹
1820	1000 ¹	192,635 ¹
1830	1311	247,084

¹ Estimated.

1840	1517	279,409
1850	2407	755,019
1860	3207	1,861,319
1870	4135	2,544,523
1880	5547	3,435,205
1885	6060	3,726,800
1890	7000 ¹	4,700,000 ¹

INDUSTRIES.—The manufacture of boots and shoes has long been an important branch of industrial activity in Wakefield. As long ago as 1677 the town assigned to Jonas Eaton "the privilege of wood and herbage on a tract of land on condition that he remained in town and followed the trade of a shoemaker." He remained, and many of his descendants and successors, from that year to this, have exercised that honorable handicraft, but the manner of carrying on the business has greatly changed within the last few years. Formerly, nearly every shoemaker was his own "boss,"—that is, "he worked his own stock;" he cut, his wife and daughters bound, and his sons and apprentices, with sometimes a few journeymen, finished up the work. His principal market was Boston, to which place, sometimes in saddle-bags and on horseback, and sometimes in a shoe-cart, he transported and peddled from store to store his goods. But times are not as once they were, and the boot and shoe business has been revolutionized by the introduction of labor-saving machinery and the establishment of large manufactories. The leading firm in Wakefield is Thomas Emerson's Sons, and is one of the oldest in the shoe business in this country. It was established by Captain Thomas Emerson in 1805, when only twenty years of age, and at first in a very small way; but gradually increasing, it has been carried on by himself, his sons and grandson to the present time. The firm has now a very extensive business, and a reputation of the best kind, throughout the United States, fairly earned by first quality work and honorable dealing.

In 1837 a son of the original proprietor, Thomas Emerson, Jr., was admitted a partner, and the firm-name became Thomas Emerson & Son. In 1851 another son was admitted, and "Son" became "Sons" in firm-name. In 1854 the senior member retired, and the name was changed to Thomas Emerson's Sons, which has been ever since maintained, though a grandson, Edwin E. Emerson, was admitted in 1866. Before the war the firm sold principally at the South, and especially at Charleston and New Orleans, and sustained large losses by reason of the war. In later years the firm have sold more to the retail trade, and extended their sales to the Pacific coast, and now their goods are sold in a large majority of the States of the Union, and some are sent to foreign countries. It was in their establishment that the McKay sewer was first most successfully operated. They claim to be the leaders in gentlemen's fine shoes, and are originators and patentees of several unique and popular

designs, among which are the "Petiole" Congress, the "Leo" Congress, and the back buckle gaiter. All their work is of the finest quality, and finds a ready sale among the leading retail houses throughout the country. The Emersons' factory occupies a central site on Main Street, and is the same building, much enlarged, that was formerly Burrage Yale's famous tin-shop. The shoe business is also extensively and successfully carried on in town by Henry Haskell, successor of John G. Aborn & Co., by Harvey B. Evans, under name of "L. B. Evans' Son," Isaac F. Eaton, and E. H. Walton & Co., but the relative importance of the business in the town is much less than formerly.

The manufacture of cane or rattan into many forms of beauty, elegance and utility is now, and has been for many years, the chief industry of the town. Its factories are located on Water Street, by the small stream from Crystal Lake, called Mill River, at the same place where John Pool, in 1644, ran the first corn-mill of Reading. The late Cyrus Wakefield, Sr., originated this important industry in 1856. A small building on Water St. was the scene of his humble beginnings, his first venture being in the making of reeds for hoop-skirts, when rattan for that purpose was much in vogue. When these went out of fashion Mr. Wakefield turned his attention to the manufacture of chair-seatings, carpets and furniture. He imported the raw material from the East Indies in many ships, and became the leading dealer in rattans in America. Under the impulse of his intelligent energy and perseverance the business rapidly assumed proportions of magnitude and importance, and new factories were one after another erected. He discovered new ways of utilizing the whole of the rattan—outside, pith and shavings—and procured the invention of new machinery to serve his purposes. A demand for the tasteful and durable manufactured fabrics grew up all over the country, and Mr. Wakefield found himself a rich man. The scope and volume of the business were constantly expanding, until 1000 men and women found remunerative employment at the great factories, which contained many acres of flooring, and the monthly pay-roll exceeded \$25,000. Just before the sudden death of Mr. Wakefield, in 1873, with singular foresight he caused to be organized the Wakefield Rattan Company, to which corporation he transferred the whole of his vast rattan business and property, and of which he became the president and principal stockholder; and so, notwithstanding the death of Mr. Wakefield and the complications attending the settlement of his estate, the affairs of the Wakefield Rattan Company moved on with undisturbed regularity, while a second Cyrus Wakefield was called from the antipodes to take the place of his uncle at the head of the great corporation, and maintain the prestige of an honored name. A disastrous fire in 1881 destroyed some of the principal factory buildings, including the lofty brick ma-

¹ Estimated.

chine-shop, filled with costly machinery, difficult to replace. The energy and resources of the company were not, however, seriously impaired, and soon new and better buildings arose from the ashes of the old, and the company's prosperous career has continued, and its business still further expanded, to the present time. Though in Wakefield some departments of work have been contracted, by reason of other factories having been established by the company in Chicago and San Francisco, more work than ever is done in other departments, and there are now employed at the Wakefield works 900 hands, of whom about one-third are females. There are many buildings in the enclosed lot of the corporation, which contains eleven acres of land. The company owns a one-half interest in the American Rattan Company of Toronto, Ont. The beautiful and useful productions of the company include chair-cane, reeds, cocoa and rattan, mats and matting, rugs and carpets, umbrellaribs, tables, baskets and chairs in almost infinite variety, work-stands, car-seats, cradles, cribs, *tête-à-têtes*, sofas, children's carriages, carriage-mouldings, burial-caskets, flower-stands, window-shades, brooms, brushes, table-mats, wall-screens, fire-screens, wall-pockets, slipper-holders, clothes-beaters, wood-holders, etc., etc.

The headquarters of the company, with counting-rooms and store, are at 115 Washington Street, Boston, with branch stores in New York, Chicago and San Francisco. Captain Joseph B. Thomas is president, Mr. Charles H. Lang, Jr., treasurer, and Mr. John S. Murray, clerk of the corporation. The directors are J. B. Thomas, Aretas Blood, N. J. Rust, Temple R. Fay and C. H. Lang, Jr.

Mr. Amos W. Chapman is superintendent of the works at Wakefield, and Mr. Charles W. Trow the master mechanic. The capital of the company is \$1,000,000, and the value of goods annually manufactured at Wakefield is \$1,500,000. The weekly pay-roll in Wakefield is about \$5000, in Chicago about \$2000, and in San Francisco about \$500 per week.

The tasteful productions of the company may now be found in nearly every business resort, church and home of refinement from the Atlantic to the Pacific, and a growing trade exists with Mexico, the States of South America and other foreign countries.

The Wakefield Reed and Chair Company does a comparatively small business in the manufacture of rattan goods at the "Skating Rink" building, located between Main and Crescent Streets, in the centre of the town.

The extensive iron foundry by the side of the Boston and Maine Railroad, between Aibion Street and Crystal Lake, now successfully operated by the Smith and Anthony Stove Co., was started in 1854 by Blanchard, Tarbell & Co., who soon after organized as a stock company under the name of the Boston and Maine Foundry Company, which became one of the most important industrial institutions of the town. After

the lapse of years, disastrous fires and other losses crippled the resources of the company, and in 1871 it was obliged to stop business, and was succeeded by the "Franklin Foundry," which, however, was not notably flourishing, and in 1879 the foundry was purchased by the Smith and Anthony Stove Company, organized for the purpose, and under its wise and enterprising administration the business has successfully developed and been largely extended. The capital of the company is \$100,000, and its officers are Wm. E. Smith, president; E. W. Anthony, treasurer; J. R. Prescott, secretary. This industry has been of great advantage to the town, as the works have been run constantly for the past ten years, employing about two hundred men. The productions of the foundry have been cooking ranges, furnaces, heating-stoves, together with a full line of hotel cooking appliances. The company also has a fine brass plant, and foundry, and brass finishing rooms, where an extensive business is carried on in the manufacture of plumbers' brass goods and general brass castings. The company's offices and stores are at 48, 50, 52 and 54 Union Street, and 37, 39 and 41 Friend Street, Boston. The salesrooms and offices occupy two entire floors of this store, and the remaining floors are used for workshops, and for the storage of goods. The trade of the company extends throughout America and to some foreign countries. The company has jobbing agencies in New York City, Chicago and San Francisco, for the sale of their stoves and ranges, while on their plumbing goods the trade is equally extensive, and they have distinct branches in New York City and Chicago for the distribution of the Sanitas specialties manufactured and controlled by them, which have a large sale, and are the very highest grade of plumbing made. The policy of the Smith & Anthony Stove Company has always been to manufacture a high grade of goods, and thus attract the best trade of the country.

The lakes of Wakefield, located so conveniently near the centre of the town, and contiguous to the Boston and Maine Railroad, offer unusual facilities for the cutting, storage and transportation of ice, and these opportunities have been well improved during the last forty years. Not only have local consumers been amply supplied from these sources during the summer season, but immense quantities of the commodity have annually been shipped to the various cities of our Union, and have supplied cold comfort to multitudes of dwellers in torrid climes. This business is most extensively engaged in by the Boston Ice Company, whose store-houses by Lake Quannapowitt are generally filled every winter to the capacity of 75,000 tons. By the same lake are the ice-houses of the People's Ice Company, with a capacity of about 7000 tons, and the houses of the popular home-dealer, John G. Morrill, holding about 5000 tons. At Crystal Lake the only firm now doing business is that of Greenough & Harrington, from whose

houses, with a storage capacity of nearly 2000 tons, are supplied Wakefield consumers, dividing the local trade with Mr. Morrill:

The manufacturing establishment of the Henry F. Miller & Sons Piano Company is in Wakefield. This business was founded by Henry F. Miller in 1863, and upon his decease, in 1884, the present company was incorporated under Massachusetts laws with a paid-in capital of \$150,000. It gives employment to a large number of skillful mechanics, who reside in the town, and many of whom have built for themselves beautiful homes and are highly prized citizens. The business is now mostly managed by the sons of the founder, one of whom, Mr. Edwin C. Miller, is a public-spirited resident of the town, and is much interested in its affairs. At the present time the sales of the Henry F. Miller piano-fortes exceed one thousand per annum, and extend each year all over the United States, while some have been sent to Canada, London, Japan, Honolulu, British Columbia and other quarters of the world. This company manufactures all the various styles of piano-fortes, and is one of the few establishments which have succeeded in commanding a large trade in the style known as grand piano-fortes. The excellence of the Miller grand piano-fortes, often used in the leading orchestral concerts of the country, has made them among the most prominent, and many of the leading pianists give them their unqualified preference. The business is permanently established in Wakefield and is still growing. The company has its main business office in Boston, and also a branch office and warehouse at Philadelphia. Henry F. Miller, son of the founder, is president of the company, and James C. Miller, treasurer, assisted by a Board of Directors. The company removed its manufacturing business to Wakefield in 1882, and occupy the spacious six-story brick block on Water Street, near the Town Hall, erected for business purposes by the late Cyrus Wakefield, Sr.

The fame of Richardson's Sherry Wine Bitters first prepared by the late Dr. Nathan Richardson, was largely extended over the country with profitable returns, by the late liberal-minded and public-spirited Dr. Solon O. Richardson, and the manufacture of this valued medicine, which has stood the test of time, is still carried on by the worthy son of an honored father and grandfather, Dr. Solon O. Richardson, the second of that name.

The Wakefield Steam Laundry, Cox & Cheever, proprietors, is an industry which in recent years has attained no small dimensions. Started in 1885, in its present form in Wakefield's Block, it has rapidly expanded, and now employs twenty-five men and women, and disburses over \$1000 a month; 50,000 cuffs and collars and 8000 shirts being here treated in the best style of the art, every month, without use of chemicals, and customers come from Wakefield, Boston, Lynn, and most of the cities and towns within a radius of ten

miles of the laundry; and even from without the state. Other laundries of humbler pretensions, manipulated by "celestials" of dusky hue, may also be found in the town.

The printing business is carried on in all its branches by Mr. C. W. Eaton at the *Citizen and Banner* office, from which are constantly issuing abundant specimens of the "art preservative," from the small label to a large poster or book. Mr. A. W. Brownell has also a smaller but well-equipped job printing-office in Wakefield's Block.

An industry new to Wakefield is that of the Harvard Knitting-Mill, on the third floor of Wakefield's Block, owned by Miss Elizabeth E. Boit and Mr. Charles N. Winship, under the firm-name of Winship, Boit & Co. A very active business is done by this firm, which came to this place from Cambridge in 1890. They knit thirty dozen gents' half-hose per day, but ladies' Jersey underwear is their specialty, of which they produce forty dozen per day. The value of goods sold in a year is about \$20,000. Thirty-eight girls are employed at the factory, and about thirty girls outside at their homes.

At the old and reputable establishment of James F. Woodward & Son, on Albion Street, have been for many years, and still are, manufactured McKay sewing-machine needles, awls of all descriptions and shoe tools in great variety.

Mr. Joshua Whittemore manufactures and sells crutches that are in great favor all over the United States, especially with soldiers who have lost their limbs. Mr. Stillman J. Putney is doing an important and increasing business in his boot and shoe-heeling specialty.

The Citizens' Gas-Light Company, organized as a corporation in 1860, has long been a shining light among the institutions of the town, and from the extensive works on Railroad Street supplies with illuminating gas the towns of Wakefield, Stoneham and Reading. It has lately been granted additional powers in the privilege of furnishing electric lights, and proposes to cast into the shade all its previous efforts in the illuminating way. The People's Electric Light Company and the Wakefield Electric Light Company are also knocking at the municipal doors for privileges and franchises in supplying electric light and power in Wakefield and adjoining towns.

The Wakefield Real Estate and Building Association is a corporation that has since 1870 largely assisted in the development and business expansion of the town in the building of houses, and ailing, leasing and improving real estate.

The Wakefield Water Company, with its splendid plant of pumping machinery and collateral appliances at its works, on the northerly shores of Crystal Lake, and the annual extension of street pipes, furnishes employment to many men in the course of each year.

An extensive lumber business is carried on by S.

C. Hamilton, Jr., at his largely-stocked yard near the upper depot.

The leading carpenters of Wakefield are A. C. Perkins, I. A. Parsons, Moses Staples, G. H. Teague, E. I. Purington, J. M. Shaw, Roger Howard, Clark & Lee, F. M. Pendleton, W. and L. D. Darling and A. Turnbull.

The painters are Franklin Poole, Z. F. Fairbanks, J. M. Fairbanks, S. Merchant, D. P. Rolfe, J. Cavinaro and Seabury & Moran.

The masons are W. K. Perkins, C. A. Evans, W. J. Moulton, Dennis Greany, T. D. Locke, N. H. Dow, J. B. Wiley and Hugh Morgan.

The blacksmiths are G. M. Kelley, G. W. Kendall, Sederquest & Wanamake, G. K. Walton, J. and S. Winship and A. B. Woodman.

The principal hardware dealers and plumbers are S. F. Littlefield & Co. and George H. Taylor; the jewelry and watch repairing business by Lucas & Lee, D. N. Chadsey and E. S. Sweetser; livery stables, by G. H. Hathaway and A. Bessey; furniture business, by John Flanley.

The retail grocery trade is represented by N. E. Cutler, under name of Cutler Bros., by Everett W. Eaton, A. S. Atherton, W. A. Cutter, A. J. Hutchinson, I. Atkinson, Kelley Bros., George W. Eaton, Block & Cate, W. W. Chesley and M. E. Reid. Large dry-goods stores are carried on by E. G. Daland, C. O. Anderson, Bowser & Co., and J. W. Poland & Co.; tailoring establishments, by W. B. Jones and Mrs. J. M. Cate; clothing stores, by Mrs. Cate and by A. E. Cox at the People's Clothing Store.

Richard Britton leads in the retail boot and shoe trade, followed by Hugh Connell and Frank H. Emerson.

The apothecaries are Dr. J. D. Mansfield, Jordan & Oxley and S. E. Ryder.

Meat and provisions are sold by W. D. Deadman, J. W. Jenkins, W. V. Taylor, S. H. Gowing and A. Bush & Co.

Fish markets are kept by W. H. Godfrey and F. H. Sweetser.

The bakers are Mrs. H. L. Day and C. P. Curtis.

The coal and wood dealers are G. P. Haley, Wakefield Coal Co., A. L. Mansfield and Denis Greany.

The following industrial statistics respecting Wakefield are gleaned from the census reports of 1885:

Industrial corporations	5
Capital stock	\$1,360,300
Private firms	63
Total value of stock used annually	\$ 967,467
Total value of goods made annually	2,016,147

PERSONS EMPLOYED:

Males between 13 and 21 years	114
Males over 20 years of age	824
Females between 13 and 21 years	60
Females over 20 years of age	219
Aggregate number	1217
Number of industrial establishments	68
Salariated persons employed thereat	21
Wage earners employed thereat	1259

Amount paid in salaries, 1 year	\$ 32,128
Amount paid in wages	535,416

BANKING INSTITUTIONS.—The earliest savings bank in the town was incorporated in 1833, with a capital of \$10,000, and called the South Reading Mechanic and Agricultural Institution. The late Capt. Thomas Emerson and the late Hon. Lilley Eaton were active in its formation, and as president and treasurer, respectively, remained as such for nearly forty years, until their deaths. Hon. Thomas Winship succeeded Mr. Eaton as treasurer, having filled the office for nearly twenty years, and Mr. Thomas Emerson, the younger, is now the president of the institution, which is still flourishing and safe.

The South Reading Bank was incorporated as a State bank in 1854. Mr. George O. Carpenter was very active and efficient in its organization. Its first officers were Capt. Thomas Emerson, president, and Hon. Lilley Eaton, cashier, and Thomas Emerson, Lucius Beebe, George O. Carpenter, Samuel Gardner, E. Mansfield and C. Wakefield, directors. This bank was reorganized under United States laws as the National Bank of South Reading, in 1865, with the same officers as before. The president, cashier and most of the directors remained at their posts until death took them, Maj. Geo. O. Carpenter and Edward Mansfield being the only survivors.

The present officers of this staunch and important institution of Wakefield are Cyrus G. Beebe, president; Thomas Winship, cashier (succeeding Mr. Eaton); Frank A. Winship, assistant cashier, and C. G. Beebe, George O. Carpenter, Thomas Emerson, James F. Emerson and Daniel G. Walton, directors.

The Wakefield Savings Bank was incorporated by the Legislature in 1869, Cyrus Wakefield becoming the first president, and Daniel Allen the first treasurer. It has had a prosperous career until the present time, and is now one of the most solid and useful of Wakefield's institutions. It holds deposits of \$222,000. The principal officers are Solon O. Richardson, president; Jacob C. Hartshorne and Thomas J. Skinner, vice-presidents; Richard Britton, treasurer and clerk.

The Wakefield Co-operative Bank was organized as a corporation under the Public Statutes of the Commonwealth, January 19, 1887, and began business March 5, 1887, with an authorized capital of \$1,000,000. Its depositors became shareholders in the bank, the plan being to make small monthly payments on their shares, and are thoroughly protected by statute regulations and carefully-devised by-laws. Its loans are principally on real estate security. The bank has become quite popular in the town, its affairs having been intelligently and wisely administered by the managers, with the spirit of accommodation toward borrowers, and a constant regard for the safety of investments. Its principal officers, which have not been changed since the organization of the bank, are Thomas J. Skinner, president; Arlon

S. Atherton, vice-president, and Harry Foster, treasurer and secretary.

MUNICIPAL.—The town government has been administered by the operation of simple machinery and according to forms handed down from the days of the last war with Great Britain, with slight variations, and such administration has been attended by the prosperous development of the town, and should be spoken of with due respect and appreciation. Appropriations for necessary and worthy purposes have been liberal without extravagance, and expended with slight loss or waste. No treasurer, collector or trusted official has escaped to Canada or South America with pockets filled with the funds of the town. The general reputation of the town for soundness, public spirit and common sense is not surpassed among the municipalities of the Commonwealth.

There is, however, a growing feeling that the filly harness that held in order the frisky colt in 1812, though improved, added to and strengthened at various times, is yet all too small and old-fashioned to restrain and guide the strong-limbed steed of 1890. It is, indeed, freely whispered, one with another, that long ere the nineteenth century shall have been numbered with the dead, the Mayor, Aldermen and Commou Council of the *city* of Wakefield will direct its municipal affairs with true metropolitan style and expense. The principal executive officers of the town are now three selectmen, as in the early days of the seventeenth century. Other important departments of municipal affairs are managed respectively by three assessors, three overseers of the poor, six school committee, three road commissioners, three Board of Health, three park commissioners, three auditors, nine trustees of Public Library and Reading Room, beside town treasurer, town clerk and collector of taxes. The Police Department is efficiently organized, with a chief of police and subordinate officers, with constables and night-watchmen, well maintaining the peace of the community.

In former days, when the aid of the law was invoked to obtain justice or inflict penalties on wrongdoers, resort was had, ordinarily, through selectmen or constable, to the County Court at Charlestown or Cambridge; but, in later years, justices of the peace and trial justices held local courts in the town for the trial and disposition of small cases, both civil and criminal; and any causes and offences of magnitude were taken to the higher courts. This system seemed to satisfy the people's cravings for justice until quite recent times. In 1875 was established the First District Court of Eastern Middlesex, with sessions on Wednesdays and Thursdays at Wakefield, and on other days at Malden. Hon. John W. Pettengill, of Malden, has been justice of the Court since its establishment, and William N. Tyler, Esq., of Wakefield, clerk of the same nearly as long. Its jurisdiction for the consideration of all criminal complaints and the

trial of civil actions, where the alleged damages do not exceed \$300, includes the city of Malden and the towns of Wakefield, Reading, North Reading, Wilmington, Melrose, Everett and Medford. The quiet, but effectual administration of justice prevails in Wakefield under its local officers, and it must be a novelty and a marvel to the transatlantic visitor, or the adopted citizen, coming to us from some "paternal" government of Europe, to find in such a town as this, as in most of our large towns, the only representative of the central power to be the courteous postmaster, and the only insignia of government the loved flag of the Republic.

The principal post-office of Wakefield is in the immediate centre of the town, while the outlying districts at the south and east are accommodated by the smaller post-offices at Greenwood and Montrose.

The Fire Department of Wakefield has a very efficient organization and has been constantly supported with liberal outlay and pardonable pride by the citizens of the town. The first engine was purchased near the beginning of the present century, and called the "Republican Extinguisher." Its home was in the small engine-house that stood in the ancient burial-ground a little westerly of the present location of the brick engine-house of the Beebe steamer. It was a small but ambitious machine and faithfully served the community in its day and generation during about twenty-five years of usefulness.

"At length the town grown wiser, richer,
Procured a tub of fame;
A strong, dark, homely, savage creature—
'Black Hawk' its proper name."

This engine became noted in its day. It found congenial quarters in the dark basement of the old town hall, from which humid den it often issued forth for a practice squirt, or rushed out like a mad war-horse to some scene of fiery danger. By many deeds of usefulness and daring, in spite of its unlovely appearance, it pumped its way to fame and honor. Manned by a fearless and stalwart crew—

"This tub had many buildings washed,
Whene'er the fire had caught 'em;
And though its former glory's quashed,
It stands upon its bottom."

In 1852, by vote of the town, came a handsome, new, double-decker fire-engine, resplendent in finish of rosewood and trimmings of polished brass, and poor old "Black Hawk" went into a decline, and seldom came out of its hole again. The new machine was from Jeffers' works at Pawtucket, R. I., and was named "Yale Engine, No. 1," in grateful recognition of a large gift to the engine company from the famous tin manufacturer of South Reading, Burrage Yale, Esq., whose tin peddler's carts were, for many years, known all over New England. An observer of that day remarked in rhyme:

"A sunction-tub—four streams 'twill play
From orifices in it;

High in the air 'twill throw its spray,
Four hogheads in a minute.

"The rich are coming with their tin
To ornament the same,
And with their oases to help it win
A great and lasting fame."

The "Yale" distinguished herself in many fields, and saved much property from destruction. She is still retained by the town, though occupying a *second* place, and regarded with respect and appreciation. Occasionally even now the veteran fire-fighters of other days pull out the machine with strong and kindly hands, and bring home the "old Yale" decked with first prize from some firemen's muster. With this powerful machine, two lakes near the centre, reservoirs in all parts of the town, a well-equipped hook-and-ladder company, several volunteer organizations, and, later, the addition of a chemical extinguisher, with an enthusiastic body of firemen, the community seemed to be reasonably well protected against the devouring element. The town, however, was rapidly growing; houses of wood were rising on every hand; a large fire had occurred at the rattan works, and new and weightier means for controlling fire were being discovered and applied, and so it came to pass that in 1882 the town purchased a new steam fire-engine of the Silsby Manufacturing Company, of Seneca Falls, N. Y. In the same year the Wakefield Water Company laid its pipes through the streets of Wakefield, and a contract was made with the company to furnish for the town's use sixty fire-hydrants in desired locations, and this number has since been increased to eighty-five. In 1882 also was organized the Home Fire Protective Association, which advocated and put in practice the principle of "promptness with small appliances." This association, of whom the leading spirit was Mr. Rufus Kendrick, so demonstrated its value and usefulness that the town soon adopted its principles and methods, and purchased fifty Johnson pumps, which number was later increased to sixty-eight, which small machines, with rubber hose attached, and fire-buckets and cans, were located in houses all over the town, and now, when sounds the fire-alarm, the soldiers of the Johnson pump battalion, quicker than the minute-men of the Revolution, act upon the *second*, and, seizing pump and bucket, are generally first at the point of danger, and often subdue and extinguish the enemy before the heavy artillery of the department arrive upon the scene. Under recent statutes forest fire-wards are annually appointed, who render important service in the prevention and extinguishment of forest fires. Hose companies are organized, with headquarters at different points, for service on the fire-hydrants. The Fountain Company, with a hand-engine, and Hose Company No. 2 are volunteer organizations that render enthusiastic and valuable service against the common enemy. There is in successful operation in the town an electric fire-alarm telegraph, with ten miles of wire, an electric clock, five fire-alarm boxes and

fire gongs. The present appliances and forces of the Fire Department are the steamer Lucius Beebe, Yale Engine, Washington Hook-and-Ladder Company, C. Wakefield Chemical Engine, J. H. Carter Hose Company, and Greenwood Hose Company, and all under the general charge of three fire engineers. There have been very few serious conflagrations in the history of the town, the most disastrous of which occurred in 1880, when was destroyed a portion of the works of the Wakefield Rattan Company.

The town, since its incorporation as South Reading in 1812, has generally been represented by men of ability in the councils of the Commonwealth. Following are the names of those sent to both branches of the Legislature:

SENATORS.—John Hart, 1815-19; Lilley Eaton, 1838-39; Thomas Emerson, 1846-47; James Oliver, 1868; Richard Britton, 1875; Thomas Winship, 1881-82.

REPRESENTATIVES.—John Hart, 1812, '14, '20, '21, '23, '24; John Gould, 1816; Thomas Emerson, Jr., 1825, '30, '38, '39, '41; Lilley Eaton, 1831, '35, '45, '48; Lemuel Sweetser, 1832-33; James Butler, 1835-36; Noah Smith, 1836-37; Benjamin Emerson, 1837; Jonas Evans, 1839; Aaron Foster, Jr., 1840; Joseph W. Vinton, 1840; Jacob Tufts, 1843; Jonas Cowdrey, 1844; Robert H. Raddin, 1846; Franklin Poole, 1847; Samuel Kingman, 1850; Edward Mansfield, 1851; John B. Atwell, 1852; James M. Sweetser, 1855; James Oliver, 1856; Madison Sweetser, 1857; John S. Eaton, 1858; John Wiley (2d), 1860; William H. Atwell, 1862; Daniel Allen, 1864, '65; James F. Mansfield, 1867, '68; Benjamin F. Packard, 1870; Edward H. Walton, 1871; Richard Britton, 1872, '74; Thomas Winship, 1876, '77; Solon Walton, 1878; Azel Ames, Jr., 1879; Lucius Beebe, 1880; Solon O. Richardson, 1881, '82; Arlon S. Atherton, 1883, '85; Robert Blyth, 1884, '86; Charles F. Woodward, 1887-'89; William S. Greenough, 1890.

The town-farm and almshouse form an important municipal institution. It includes nearly one hundred acres of land, purchased of Capt. Thomas Emerson in 1826, and located in that section of the town at the southeast, formerly called Little World, but now known as Woodville. Here are convenient buildings and accommodations furnishing a comfortable home for those who, by sickness, age or misfortune, feel obliged to knock at the door of the town in the blessed name of charity. There are ordinarily six to ten inmates at the almshouse, though many poor and destitute persons are assisted at their homes or at hospitals, the town appropriating annually \$5000 or more for the support of the poor.

The Wakefield Historical Society was organized in February, 1890, and may be mentioned as a semi-municipal institution, inasmuch as it is granted a room in the town-hall, and its objects are not for any private advantage, but have in view the promotion of the best interests of the town in general. In the spirit of love and loyalty to and for the honor of the old town, the membership of this society seek to shed some light on the path of her progress through the trials and perils, the hopes and fears of two and a half centuries of existence, to the end that the present generation of citizens may more closely understand the sources and growth of their municipal life and institutions, and have their feet more surely guided by "the lamp of experience." The members are diligently collecting mementos, relics, pictures, books

and writings, and placing the same in their room for preservation, where they may always be available for examination and study, and represent for the instruction of a rushing and utilitarian age something of the character and work of the fathers. This society includes also in its scope a department of Natural History, specially for the investigation of the fauna, flora and geology of the region of Wakefield.

MEN OF NOTE.—Many distinguished citizens of the Republic, living and dead, have traced their lineage from worthy ancestors of this old town, whether known as Reading, South Reading or Wakefield. Among the brilliant names in American history, men that can fairly be called sons of the old town, may be mentioned Hon. George Bancroft, the eminent historian of his native land; Gov. John Brooks, who so gallantly led the minute-men of Reading at the Battle of Merriam's Corner, on the retreat of the British troops from Concord, April 19, 1775, and who, after serving with distinction through the war, removed to Medford and became Governor of Massachusetts; Capt. John Parker, who commanded the Lexington men on the same memorable day of April 19, 1775; Gen. John A. Dix, ex-Governor of New York, and United States Senator; Hon. George S. Boutwell, formerly Governor and Senator of Massachusetts, and Secretary of the Treasury under President Grant; Hon. Timothy Boutelle, famed as a lawyer; Rev. Theodore Parker, eminent as a scholar and Unitarian divine; Rev. John Pierpont, clergyman and poet, formerly of Medford; Rev. Dr. Samuel C. Damon, late of Honolulu, Hawaiian Islands; Rev. Dr. Brown Emerson, formerly of Salem; Dr. Willard Parker, of New York City; Dr. Samuel Hart, of Brooklyn, N. Y.; Gen. Joseph H. Eaton, of the United States Army; Rev. Dr. Phillips Brooks, of Boston, the illustrious divine; Prof. B. F. Tweed, who has had a just fame as an educator, and now, full of years, is enjoying a well-earned rest at his home in Cambridge; Dr. William Everett, of Quincy; Rev. Edwin C. Sweetser, of Philadelphia, an eloquent preacher of the Universalist faith, and Hon. George A. Walton, of Newton, author of Walton's Arithmetic, and now rendering conspicuous service on the Massachusetts Board of Education. Of other gentlemen who, after having chosen this town for a place of residence, have attained to worthy dignities in the councils of the nation, may be named Hon. Robert Rantoul, Jr., Representative in Congress, who died too soon for the maturity of his fame, and Hon. Frederick A. Sawyer, for many years the accomplished principal of South Reading High School, and later United States Senator from South Carolina, and Assistant Secretary of the United States Treasury. These are all honored names, and give a hint of the character of the original stock whence they sprung, and it were a proud privilege for any town to be able to claim them as its representatives upon the broad arena of national life, and yet there rests upon the

loyal historian of his native town a charge more sacred and emphatic, in which duty blends with gratitude, to render fitting tribute to those true and faithful citizens who have stood in their places at home, and, in their day and generation done so much to make Wakefield what it is. The early settlers of this fair domain were men and women of no ordinary calibre, and quick to respond to every call where courage, fortitude, perseverance or devotion to principle were required, and were own brothers to the Puritans of England, whom Macaulay describes as "the most remarkable body of men the world has ever produced." They had their own peculiar faults and weaknesses, which it were an ungracious task here to recapitulate, and their descendants may safely accept the summing-up of the great English historian just quoted: "But after all we do not hesitate to pronounce them a brave, a wise, an honest and a useful body." Space would surely fail to record even the names of the local heroes of the early days of the town who wielded pen and sword, axe and gun, with readiness and effect, or to mention all the noble men who in later days have moulded the institutions of the town, and guided it in the path to honor and prosperity. It must suffice briefly to mention a few representative citizens along the centuries of the town's existence, omitting clergymen and others that have already had notice in this sketch.

The first town clerk and conveyancer was Deacon William Cowdrey, to whose handsome penmanship and clerical skill many existing records and deeds bear convincing testimony. The commander of the first military company organized in 1645 was Capt. Richard Walker, and the first inn-keeper Francis Smith. Nicholas Brown and Peter Palfrey were appointed magistrates and were "much betruusted." Deacon Thomas Kendall was a man of note in the young settlement, and resided on what is known as the James Emerson estate, at the corner of Prospect and Cedar Streets. He had no sons, but eight daughters, who, having married into the prominent families of Boutwell, Eaton, Bryant, Parker, Dunton, Nichols, Goodwin and Pearson, gave him a progeny which is at the present day more numerous perhaps than that of any other of the early settlers; and there was good blood, too, in this strain, for there are among the descendants of Deacon Thomas Kendall names eminent in every walk of life.

Other influential citizens from 1644 to 1700 were Deacon Zachary Fitch, Deacon Thomas Parker, Robert Burnap, Deacon John Pearson, Jonas Eaton, Richard Nichols, Ralph Dix, Dr. James Stimpson, Lieut. Hananiah Parker, John Brown, Esq., Timothy Wiley, Lieutenant and Deacon Thomas Bancroft, Captain Ephraim Savage, Deacon Francis Smith, Major Jeremiah Swain, and Captain Jonathan Pool—the last two named men both brave Indian fighters.

During the century from 1700 to 1801 the leading spirits were Colonel Ebenezer Nichols, Deacon

Thomas Boutwell, Deacon Raham Bancroft, John Weston, Captain John Walton, William Bryant, Esq., Deacon Brown Emerson, Deacon John Goodwin, Captain John Goodwin, Dr. William Hay, Dr. John Hay, Captain Thomas Nichols, Deacon Thomas Nichols, Deacon John Damon, Kendall Parker, Esq., Jonathan Pool, Esq., Benjamin Pool, Dr. Thomas Stimpson, Dr. Thomas Stimpson, Jr., Dr. William Stimpson, Ebenezer Wiley, Noah Eaton, Captain Thomas Green, Captain Samuel Bancroft, Dr. Thomas Swain, Captain John Walton, Captain James Bancroft, General Benjamin Brown of Revolutionary fame, and Deacon Jacob Emerson.

Since the year 1800 the town has been assisted in its progressive career by men of strong character and loyal spirit, the most active and prominent of whom in the early years of the century were Dr. John Hart, Colonel Amos Boardman, Captain James Gould, Joseph Cordis, Captain Thomas Emerson, Sr., Lilley Eaton, Jr., Deacon Jacob Eaton, Paul Sweetser, Sr., John Sweetser, John Gould, Jeremiah Green, Adam Hawkes, Thomas Evans, Deacon David Smith, John Rayner, Burrage Yale, Colonel James Hartshorne, Major Suel Winn, Joshua Tweed, Jeremiah Bryant, Captain Noah Smith, Dr. Nathan Richardson, Timothy Poole, Deacon Aaron Bryant, Samuel Wiley, Colonel Lemuel Sweetser, Dr. Thaddeus Spaulding and Benjamin B. Wiley.

As the century approached and passed its central point these grand men went off the stage of life or grew feeble with age, and the dignities and burdens of the growing town were shifted to the heads and shoulders of other citizens who held the municipal standard "still full high advanced" and by the present generation are held in grateful remembrance.

The forms and semblance of these true-hearted workers seem to arise before the mind's eye and step forth in bodily presence as their names are called—these men who guided the affairs of the town and kept its honor bright during the stirring and eventful period between 1840 and 1870. Some, indeed, still tarry on this side of the river, though with whitened hair and faltering steps. Their names come sounding like a benediction to the busy workers who are now in the thickest of the fight: Captain Thomas Emerson, Dr. Solon O. Richardson, Lilley Eaton, Paul H. Sweetser, John White, Cyrus Wakefield, Lucius Beebe, Benjamin Franklin Tweed, Lemuel Sweetser, Daniel Allen, Samuel Kingman, James M. Evans, Franklin Poole, Samuel Gardner, Captain Aaron Foster, James Eustis, Edward Mansfield, Albert G. Sweetser, Dr. J. D. Mansfield, George O. Carpenter, Philip C. Wheeler, James Oliver.

Of the trusted officers and leading men of Wakefield since 1870, and those who have still their harness on, it is not easy to speak in discriminating language, but it seems fitting that some reference should be made to these true and earnest workers, among whom are well represented the old families of

the town, with a mingling of new and healthy blood of much the same kind as the old.

Following are names of some of the recent and present representatives of Wakefield, in its municipal affairs and general business: Thomas Emerson, Jr., John G. Aborn, Daniel G. Walton, James F. Emerson, Thomas Winship, John S. Eaton, Richard Britton, Cyrus Wakefield (2d), Everett Hart, Solon O. Richardson, Jr., William F. Young, James H. Carter, Hiram Eaton, John Winship, Dr. Samuel W. Abbott, William K. Perkins, Captain Samuel F. Littlefield, Edward A. Upton, Edward H. Walton, Cyrus N. White, Joseph Connell, Col. J. F. Mansfield, Samuel K. Hamilton, Maj. W. N. Tyler, Col. John W. Locke, Mason S. Southworth, George W. Aborn, Dr. Charles Jordan, David Perkins, Otis V. Waterman, A. W. Chapman, B. B. Burbank, Charles F. Hartshorne, David H. Darling, Charles H. Davis, Everett W. Eaton, Jacob C. Hartshorne, E. E. Emerson, Thomas J. Skinner, George H. Maddock, John W. White, Arlon S. Atherton, William S. Greenough, Alstead W. Brownell, Theodore E. Balch, Dr. E. P. Colby, Col. Charles F. Woodward, Cyrus G. Beebe, Maj. John M. Cate, William D. Deadman, Selim S. White, Freeman Emmons, Waldo E. Cowdrey, William E. Rogers, Henry H. Savage, James W. Grace, Robert Blyth, Edwin C. Miller, Albert J. Wright, Peter S. Roberts, William L. Coon, Dr. Preston Seldon, Dean Dudley, Harvey B. Evans, Rufus Kendrick, William G. Strong, Lyman H. Tasker, Ashton H. Thayer, Jacob S. Merrill, Henry Haskell, Nathaniel E. Cutler, Fred. B. Carpenter and Thomas Kernan.

Brief biographical sketches of a few of the representative men of the town since its incorporation in 1812, who gave much of themselves to the public service or for the public benefit, and having made their record, have passed away, may not be inappropriate in this connection.

DR. JOHN HART.—One of the most conspicuous and influential figures in all the various activities of municipal life from 1790 to 1830 was that of Dr. John Hart, sometimes by his fellow-citizens called "the king." Dr. Hart was a native of Ipswich, born in 1751, son of John Hart, Esq., a lawyer of Ipswich. He married Mary, daughter of Captain Abraham Gould, of Stoneham. He first practised his profession in Georgetown (now Bath), Maine, but on the breaking out of the War of the Revolution joined the army as a surgeon and served during the war. He was first assigned as surgeon to Colonel Prescott's regiment at Cambridge, before the battle of Bunker Hill, and later was surgeon of the Second Massachusetts Regiment, under Colonel John Bailey, and accompanied his regiment in every battle in which it was engaged. He was one of the forty-one officers detailed by General Washington to attend the execution of Major André, and described it as the most impressive and awful scene he ever witnessed. He enjoyed some intimacy with General Washington,

and was at one time deputed to make a perilous journey to Boston on horse-back and bring back \$3000 in gold, which commission he safely accomplished. After the war Dr. Hart settled in the First Parish of Reading (now Wakefield), purchasing a residence, formerly the homestead of the Smith family, on the easterly borders of Smith's Pond, now known as Crystal Lake, and here he spent the remainder of his long life. Dr. Hart was a skillful physician, giving conscientious attention to a large practice. He was an ardent patriot, a member of the Society of Cincinnati, constant in his attendance on its meetings, and for many years its vice-president. He was the firm friend and liberal supporter of religious, educational and benevolent institutions, and embraced the faith of the Puritans, but was not sectarian in his opinions. He became a large landed proprietor and was like an English squire to the community in which he lived. He was chosen selectman, school committee, representative and senator; was appointed justice of the peace and of the quorum and justice of the Court of Sessions. As a politician he was of the Jeffersonian school, ever earnest and decided. He was courageous and firm, punctual and honest in all his dealings, kind to the poor, somewhat arbitrary in his ways and impatient of contradiction, generally moderator at town-meetings, and exercised a controlling influence over his fellow-citizens. His personal appearance was striking and imposing—being of fair complexion, Roman nose, high forehead and middle stature, but of portly frame and stately mien. He was an accomplished horseman and always rode in the saddle, despising a sulky. Dr. Hart died in 1836, at the age of eighty-five years. His children were: Mary, who married Henry, son of Rev. Caleb Prentiss; Abraham, who died unmarried; John, educated as a physician, a young man of promise, who died at the age of twenty-four; Sarah and Lucinda, who became the first and second wives of Dr. Thaddeus Spaulding; Samuel, the youngest son, graduated at Harvard College in 1817, who became a physician highly esteemed in his life and profession, and settled in Brooklyn, N. Y.

BURRAGE YALE.—Mr. Yale was another prominent figure of the South Reading days, coming here to reside about 1810, but his first entry into the town, as he used to boast, was as a tin peddler, barefoot, walking by the side of his cart. He became an extensive manufacturer of tin-ware, and gradually enlarged his business until he was one of the heaviest tin-ware dealers in the State, employing a hundred peddlers and sending his wagons over New England. His tin-shop was at what is now the corner of Main Street and Yale Avenue, and was, on a smaller scale, what is now the shoe factory of Thomas Emerson's Sons. He was a man of shrewd business tact and habits, and amassed a large estate. He was honest, prompt and exact in all his dealings, and had no patience and little mercy with those who were other-

wise. He was unpopular with most of his townsmen by reason of his lofty demeanor, his unrelenting endeavors to collect his dues, and annoying idiosyncrasies, but was respected for his unbending integrity, his dignified bearing and his public gifts. He held no public offices except those of town treasurer and justice of the peace. Mr. Yale was born in Meriden, Connecticut, in 1781, and died in South Reading in 1860, aged seventy-nine years. He left three daughters, who married, and are all dead, and one son, Burrage Buchanan Yale, Esq., of Stamford, Connecticut. He made liberal gifts to the Yale Engine Company, named in his honor. Mr. Yale left to trustees under his will extensive lands and houses, Yale Avenue having been laid out through his homestead estate.

COLONEL LEMUEL SWEETSER.—Colonel Sweetser was a man of strong native qualities, an original thinker, an effective public speaker, possessing courage, probity and judgment, and exercised large influence in the councils of the town. He was colonel of cavalry, school committee, justice of the peace and representative, and his business was shoe manufacturing. He was very fond of the military organization, particularly the cavalry corps, and gloried in a noble steed. He was a valued member of the Baptist Society, of which he was a prominent founder and life-long supporter. He was not himself a scholar, but an active friend of the public schools and of education in general, and helped to found the South Reading Academy. Colonel Sweetser purchased the estate between Main Street and the Boston & Maine Railroad, and there located his home. The estate is now covered with handsome dwelling-houses, his heirs having laid out Avon Street through the same, and sold house-lots thereon. Colonel Sweetser was the son of Paul and Mary (Hart) Sweetser, and born in the town in 1779. He married Hannah, daughter of Lilley and Sarah Eaton, and died of consumption in 1835, leaving a worthy family of descendants.

DEA. AARON BRYANT.—The town has had many a representative more brilliant by far in mental endowments, and more ambitious for well-earned distinction, than good Deacon Bryant, but perhaps the town has never been blest with a man more saintly in character or more anxious to know and to do the Lord's will on earth. He was privileged in his humble station to do a good work for his fellow-men, and after a long life left a sweet and blessed memory. He was the son of Edmund Bryant, and born in New Ipswich, N. H., but was the grandson of Kendall Bryant, of the Old Parish of Reading, and when young came here for his life residence. He was chosen deacon of the Congregational Church in 1815, and served faithfully in that capacity until his death, in 1870, a period of fifty-five years. He was largely instrumental in organizing the Congregational Sunday-school in 1818. Though modest and unassuming, he possessed a well-stored mind, and was prized in the community as a wise counselor and one of the

best of citizens. Deacon Bryant married Rebecca Poole, the daughter of Benjamin and Elizabeth Emerson, and left no children. His homestead was at the corner of Main and Avon Streets, and his house the same, though enlarged and improved, owned by James Barrett in 1765, and later by Lieutenant Nathan Eaton, a soldier of the Revolution. Lieutenant Eaton was a man of great physical proportions, so that it became a proverbial comparison to say "as big as Nathan Eaton."

CAPTAIN THOMAS EMERSON.—Another life-long resident of the town, who, by force of character, great industry and wise application of his powers, won his way, without the help of the schools, to a foremost place among the honored citizens of the town, was Captain Thomas Emerson. Coming from an untainted Puritan ancestry, among whom were clergymen, soldiers and leading citizens, he was himself a notable illustration of the best qualities of his lineage. He was born in this town in 1785, and was the son of Captain Thomas Emerson, a soldier of the Revolution, and a man of signal bravery and resolution, who had experienced the miseries of Dartmoor prison. Captain Emerson, Jr., was brought up to habits of toil, and worked his way to being the leading and most successful shoe manufacturer of the town.

He was elected by the votes of his fellow-citizens to nearly every office in their gift. He was chosen as Representative in the General Court eight years, and Senator two years; was selectman, school committee, justice of the peace and captain of cavalry. He was prominent in the formation of the South Reading Mechanic and Agricultural Institution in 1833, which is still flourishing, and in the organization of the South Reading Bank (now the National Bank of South Reading) in 1854, becoming its first president, and holding the position until his death. Courteous and sympathetic in his personal demeanor, with heart and purse open to the cry of need, an oracle in finance, and ever guided by Christian principles, he was trusted and respected by all. In the Congregational Church he was truly a pillar by his generous contributions to the support of the ministry and charitable enterprises, his zealous interest in spiritual things, and his wise counsel in practical concerns. As an employer of many workmen he obtained their respect and confidence by fair dealing and prompt payments, and was the first in the region to abandon the old system of barter to make cash payments to his employees. As the disabilities of age came upon him he transferred his business to his sons, and died in 1871, at the good old age of eighty-six years. His wife was Betsy, daughter of Deacon James Harts-horne, who survived him two years. His sons are Thomas and James F. Emerson. His daughters were Mrs. Augusta Odiorne and Mrs. Sarah H. Barnard, both now deceased, and Mrs. Maria J., wife of Major George O. Carpenter. It was truly said of

Captain Emerson at his death: "He was faithful, earnest, liberal and devout."

LILLEY EATON.—In nearly every town of our Commonwealth there may be found some citizen who, more than any other, is concerned in the administration of its affairs, and familiar with its history and institutions. Such a man in respect to Wakefield was the late Lilley Eaton. Descended through an honorable ancestry from the first sturdy settlers of the town, he has himself recorded that he delighted "to inquire after the *old* paths and to walk therein."

Brought up in the village store of his father, who was active in municipal affairs, the observant son became early accustomed to the transaction of town business, and absorbed the best traditions of the elders. The house in which was this store was erected in 1804, and then the most imposing structure of the village, and is still standing at the corner of Main and Salem Streets. It became known as the "Pilgrim's Hotel," as being the general resort of transient clergymen and other brethren of the owner's faith, where they always found a cordial welcome. On the third floor of this mansion was the consecrated and spacious "meeting chamber" used by the earnest members of the young Baptist society, of which the senior Mr. Eaton was one of the founders, for their religious, social and conference meetings. In such an atmosphere did Lilley Eaton, Jr., pass his boyhood, and his soul grow strong. He fitted for college at Bradford Academy, but was called home by the sudden death of his father in 1822, to assume the large responsibilities which naturally devolved upon him as eldest son and successor in business. As years and experience developed his powers, by his tastes and abilities and the favor of his fellow-citizens, he filled nearly every official position of the municipality. It is probable there never was a citizen of the town who occupied so many local offices for so long periods as did Mr. Eaton, and he became perfectly familiar with every detail of town affairs, and the application of the law to the same. He was selectman twenty-five years, a member of the School Board nearly as long, and generally chairman of each. He was town clerk twenty years, Representative seven years, Senator two years, trustee of Public Library from its establishment, justice of peace thirty-eight years, and a member of the Constitutional Convention in 1853. He was for many years the principal writer of deeds and wills in the town, transacted considerable probate business, and attended, as administrator, executor and guardian, to the settlement of many estates, and his probity and faithfulness were never questioned. He was Treasurer of the South Reading Mechanic and Agricultural Institution and cashier of the South Reading Bank (afterward the National Bank of South Reading) from their organization, respectively, until his death. During his active business life of nearly half a century there was hardly a movement or enterprise for the honor or improvement of the town, but Mr. Eaton

had an influential part. In this connection might be named the South Reading Academy, the Town House of 1834, the South Reading Stage Company, the High School, the South Reading Mechanic and Agricultural Institution, the South Reading Lyceum, the South Reading Bank, the Citizens' Gas-Light Company, the Public Library and Reading-Room, the Lakeside Cemetery, and the change of the town's name.

Mr. Eaton had a genuine love for his native town, and was jealous for her just fame, and the crowning evidence of this love, and the best monument of his genius, may be found in the "History of Reading," including the present towns of Wakefield, Reading and North Reading. To this work he gave years of his best thought and labor. His lamp of life going out before the later chronicles were quite completed, the finishing touches and appropriate additions were given by the accomplished hands of his brother, John Sullivan Eaton, and the work printed in 1874. At the Reading Bi-centennial celebration, in 1844, Mr. Eaton was called to the honor of being poet of the day, and his production delivered on that occasion has become historic.

Mr. Eaton's personal traits were attractive, and his bearing marked by a natural urbanity, a true index to a kind heart. He was a constant attendant at the Congregational Church, and accepted the truths of the Gospel in their more direct and personal meaning. Mr. Eaton was the son of Lilley Eaton, the grandson of Lilley Eaton, and descended from the early settler, Jonas Eaton. He was born January 13, 1802, and died January 16, 1872. He married Eliza Nichols, of an old Reading family, and left four sons, still surviving.

DR. SOLON O. RICHARDSON.—One of the most treasured names in the recent history of the town is that of Dr. Solon Osmond Richardson, the generous and public-spirited citizen, who scattered his benefactions with discriminating hand and kindly heart. Dr. Richardson was born in North Reading, July 19, 1809, and was the son of Dr. Nathan Richardson, formerly of South Reading, the good physician of blessed memory. Dr. Nathan Richardson was skillful and eminent as a physician, his practice extending over New England, and his son, Solon O., was educated to follow the same profession, and he early gave evidence of possessing unusual skill and qualifications as a physician, and on his father's death, in 1837, there devolved upon him an extensive practice, to which he gave his enthusiasm and best energies, with strong hopes of usefulness and success in the active and absorbing duties of a chosen profession. Soon, however, his health gave way, and he was forced to the resolution of abandoning his practice, and to limit himself to the manufacture and sale of the "Sherry Wine Bitters," which had already been applied in his father's practice and his own, with remarkable remedial results. At this time proprietary

medicines, and especially medicated bitters, prepared for general sale, was a branch of trade unknown in New England, and many new appliances and methods had to be devised by a pioneer in the business, such as the shape and construction of bottles, designs for wrappers, best means for transportation and a proper system of advertising, involving many perplexities and large expense. All obstacles were, however, surmounted, and Richardson's Sherry Wine Bitters became a pronounced success, and brought fame and affluence to the persistent and enterprising proprietor. Great wealth was not, however, an object with Dr. Richardson, and finding himself possessed of an ample competence, with an increasing income, he yielded to the impulses of a generous nature and became as noted for his liberality as for his bitters, though most of his gifts were never made public. He declined the burdens of local office, but had always a lively interest in matters pertaining to the honor and improvement of the town and the benefit of her citizens. He was one of the original movers for the compiling and publication of the history of the town, and it was through his efforts and liberal contributions that the town became the owners of the valuable portraits of George Washington and Cyrus Wakefield that now adorn the walls of the town hall.

When the local military company, now in the front rank of the state militia in all soldierly qualities, was organized in 1851, it was named the Richardson Light Guard, in honor of Dr. Richardson, whose appreciation of the act was manifested throughout his life by a constant and ardent interest in the corps and by frequent and generous donations. He was through life a valued member and substantial supporter of the Universalist Society of South Reading and Wakefield. Dr. Richardson was fatally seized with apoplexy August 31, 1873, while making a social call on his neighbor, Mr. Wakefield, and died in a few hours, leaving a fragrant memory. His son and successor, the present Dr. S. O. Richardson, worthily wears the mantle of the father.

CYRUS WAKEFIELD.—The gentleman who gave his name to the town was cast in no ordinary mould. Born on a farm amid the rugged hills of New Hampshire, in boyhood inured to toil, with scanty privileges for obtaining an education, he yet had the mind and the will to struggle out of the limited conditions of his early life, and, by study, industry, perseverance and the exercise of a rare judgment, to win a high position among the merchant princes of the New England metropolis, and to become one of the foremost citizens in the town of his adoption. He had, however, the advantages of good parentage, fixed habits of temperance and economy, a stalwart frame, robust health and great powers of endurance, and these, united with large mental capacity and an indomitable will, brought him surely and in due time to the goal of worldly success.

Cyrus Wakefield was the son of James and Hannah

Heminway Wakefield, and was born in Roxbury, N. H., February 14, 1811. His ambition to get away from home and into the great world of trade was an impelling force when only a boy. After several futile attempts in that direction, he made the decisive step, with his father's consent, at the age of fifteen, and first found employment in the retail grocery store of Wheeler & Bassett, on Washington Street, Boston. His latent powers developed fast, and, having changed to a firm on India Street, he was permitted to do a small business outside his regular duties, and soon accumulated \$1000, all his own. In 1834 he was in the grocery business for himself. He made only ordinary progress until 1844, when one day, observing a quantity of rattan-cane thrown out of a vessel as almost worthless, he purchased the lot and sold it for chair-seatings. On his active mind there then dawned a glimpse of some of the possibilities of the future of rattan, from the merchant's standpoint. Not long after he changed his business to that of a jobbing trade in rattans, and employed an agent at Canton, China, and ere long his importations of Canton split rattan were known throughout the United States.

Mr. Wakefield adopted the spelling "rattan," instead of "ratan," the old way, for his specialty, and by his persistent use of that orthography brought at last the standard dictionaries to recognize it as the approved style.

In a few years Mr. Wakefield resolved to manufacture the cane himself, and utilize, as far as possible, the whole of the material—outside, pith and shavings. Starting, in a small way, at Boston, in 1856, he removed his works to South Reading, having purchased the mill-site on Water Street, improved for a century by Thomas Green and his descendants. His first factory was very soon too small for his expanding business, and building after building was erected, until at the time of his death the manufactories and store-houses of his successor—the Wakefield Rattan Company—covered an area of ten acres of flooring, and the variety of articles of beauty and utility made from rattan was amazing.

Mr. Wakefield married, in 1841, Eliza A., daughter of Captain Henry Bancroft, of Lynnfield, a retired sea-captain, and, in 1851, purchased an estate in South Reading, where he later erected his palatial residence and spent the balance of his days. Mr. Wakefield was greatly interested in the prosperity of the town, and expended much money in the improvement of the region near his residence and factories. He was earnest and liberal in the encouragement of all enterprises he thought were for the benefit of the town. He was the moving spirit in the incorporation of the Wakefield Savings Bank, the Wakefield Real Estate and Building Association, the Quannapowitt Water Company, the main supporter of a free course of lectures, and was an influential director and large stockholder in the National Bank, the Citizens' Gas-Light Company, the South Reading Ice Compa-

ny and the Boston and Maine Foundry Company. The munificent gift by Mr. Wakefield of a town hall has been mentioned in another portion of this sketch, with the circumstances attending the change of the town's name from South Reading to Wakefield. Following this notable event the interest and affection of Mr. Wakefield for the town that had honored his name was more than doubled, and he was constantly giving of his thought and wealth to promote its prosperity. He erected spacious brick blocks, near the splendid town hall he had given the town, for the accommodation of anticipated business; he sought to increase industrial activity not only at his own extensive works, but by the attraction of new manufacturing and business enterprises; he offered homes for the people on easy terms, he encouraged the addition of commodious and elegant public buildings, he favored park and street improvements, he lent a helping hand to worthy young students struggling for an education, he gave to the town an elegant diploma plate for High School graduates, he instituted free scientific lectures and projected the founding of a college in Wakefield, where the children of the poor might enjoy the privileges of superior training and a liberal education. Without children, his hopes for the future centred more and more on the town of his later affections, and he hoped to live to see it the city of Wakefield, famed for its institutions of education and charity, distinguished by the beauty of its scenery and its architectural adornments, and noted for the intelligence and enterprise of its people. Many things he began and accomplished, and many others had only taken shape in his own busy brain. Suddenly he died,—one Sunday morning in the autumn of 1873—sitting in his chair, and impressively reminded us "what shadows we are and what shadows we pursue." Taken in connection with the great financial depression then clouding the business world, this event was a serious blow to the material prosperity of the town. The important rattan business was, however, continued without interruption by the Wakefield Rattan Company, while the homestead estate passed to the widow of Mr. Wakefield, and at her death, a few years later, and by her will, descended in fitting sequence to Cyrus Wakefield (2d), a high-minded and liberal citizen, who died in his sleigh, as suddenly as his uncle, January, 1888.

LUCIUS BEEBE.—Mr. Beebe was a man whom any town might be proud to claim as a citizen. He was born in Hebron, Connecticut, March 2, 1810, and was the son of Stuart and Sophia Beebe. His father was a graduate of Williams College and a lawyer, but financial reverses coming to him, the son, Lucius, at the age of fifteen years, set out from home to seek his fortune, and having a strong foundation of good principles, sound health, a capacious mind and habits of industry, he was able at the age of twenty-four to go into business for himself, and, with his brothers, successfully prosecuted North and South the business

of wooden ware and cotton. Their store was in New Orleans and the principal northern office at Boston in the charge of Mr. Beebe. Extensive losses were sustained during the Civil War, but Mr. Beebe amassed a considerable fortune, which he disbursed with a liberal hand. Mr. Beebe came to Wakefield in 1862, purchasing the beautiful "Forrester estate" on the easterly shores of Lake Quannapowitt, which he occupied until his death.

Not by eloquence of speech nor by the graces of polished rhetoric did Mr. Beebe attain the high place he held in the esteem and affections of his fellow-townsmen, for his voice was seldom heard in the public assembly, and his pen was used only for business or correspondence. Of noble presence and dignified mien, he was as courteous and unobtrusive as one among a thousand. The qualities which commanded universal respect and confidence were his unswerving integrity, his sympathy with the unfortunate, his unostentatious benevolence, his wisdom as a counselor, and his readiness to assist any good enterprise. He was an earnest and consistent friend of temperance, education and religion, and cheerfully bore the burdens of municipal office with conscientious fidelity. He served his town many years on the Boards of School Committee and Selectmen, on important committees, and as a trustee of Beebe Town Library, which last-named institution was named in his honor, and received from him frequent and substantial tokens of remembrance. The National Bank owed much to him for his invaluable services and counsels as director and president. The Wakefield Savings Bank had also the benefit of his advice as one of its trustees. He was director and president of the Wakefield Real Estate and Building Association, while his interest in the Fire Department was recognized by the bestowal of his name on the fine Silsby steamer. He was a representative in the General Court, and faithful to every trust.

He died April 15, 1884, of heart disease, sitting at his desk, in his counting-room in Boston. The sorrowing citizens of Wakefield came together almost spontaneously on receipt of the news, adopted an appropriate testimonial, and asked of the family permission to award their deceased friend the honors of public obsequies. On the day of the funeral the remains lay in state in the Town Hall, while the citizens generally ceased for a time from labor and business, and, gathering at the Congregational Church, listened to the impressive services conducted by the Rev. Charles R. Bliss and Rev. David N. Beach.

Mr. Beebe had twelve children, of whom eight survive, the six sons filling responsible and honored places in the business world.

PAUL H. SWEETSER.—The name of Paul Hart Sweetser is an honored one in the annals of Wakefield. He was the eldest son of Paul and Sarah Sweetser, and came of the same blood as Dr. John Hart. He was born in this town September 23, 1807,

and, like most of the boys of South Reading, he learned the shoemaker's trade, at which he worked during his minority. He embraced an opportunity to enter the South Reading Academy, when that institution was opened in the town, proving himself an apt scholar with strong mental powers. For a number of years he divided his time between teaching district schools and attendance at the academy. He proved himself to be an accomplished and popular instructor, and easily secured an ushership in the public schools of Boston, from which, in 1838, he was promoted to be master of Harvard School, in Charlestown, where he remained until 1847. He was prominent in the formation of the Massachusetts Teachers' Association and the establishment of the *Massachusetts Teacher*, as its organ, and for several years was one of the editors of this journal.

The last twenty-five years of his life were worthily spent in his native town, on his Greenwood homestead and farm, in active participation in municipal affairs. He was ever the enthusiastic and influential friend of education, serving many years as school committee and trustee of Public Library, and often writing the annual reports with signal ability. He was often called to various town offices and especially as moderator of town-meeting, the arduous duties of which position he performed with remarkable efficiency and promptness.

Mr. Sweetser was in high repute as a public speaker in behalf of anti-slavery, temperance and other reforms, and much valued as a contributor to various newspapers and magazines, and also wrote many hymns and short poems of excellence. He was, for six years, a county commissioner for Middlesex County, a justice of the peace and a trusted adviser to his fellow-citizens. In politics he was an ardent Republican, in religion a staunch Universalist. His sympathies were intense in behalf of all efforts to benefit humanity. He was justly regarded as one of the first citizens of his town, and died June 11, 1872, greatly lamented.

Mr. Sweetser married Miss Louisa Foster, daughter of Capt. Aaron Foster, of Danvers, and has left a family of six children, who are doing good and strong work in the world.

The foregoing sketches include but a few of the choice men who have left upon Wakefield the impress of their love, their labors and their genius, and there are still living able men who are even now doing the same gracious work for the town of their love and their pride, but it is too early to render unto them the meed of praise they deserve. The people of Wakefield are grateful to them all, and will inscribe their names upon the public record, on the printed page, and cherish them in their heart of hearts. The children, too, are coming on—a great troop—to take the places of the fathers, and grasp the flag from nerveless hands, and the hope and the prophecy may be here recorded that never, in the old town with its

new name, shall there be found wanting true men and women, loyal in fibre and strong in soul, mind and spirit, to stand before this people and lead them to things better and grander than they have before attained.

In 1894 will occur the 250th anniversary of the incorporation of ancient Reading, and it is probable the three towns which now represent the original domain will again come together in cordial co-operation, and jointly celebrate the historic event with fitting observances. Wakefield certainly would not be backward in such a movement. Her inhabitants feel a pardonable pride in their beautiful town, favored by nature with fairest scenery, adorned with many graceful specimens of architecture and works of taste and art, and equipped with all the institutions and improvements that make suburban life desirable.

Wakefield is not exclusive nor inhospitable, and while to the glad reunions of her quarter-centennial day, she will, with peculiar tenderness and motherly pride, call her own sons from far and her daughters from the ends of the earth, she stands ready every day in the year to extend a cordial welcome and invitation to good men and women, of every name and race, to cast their lot within her borders, and help make her more and more a centre of intelligence, virtue and enterprise, a place of beauty, a city of homes.

CHAPTER LX.

WINCHESTER.

BY W. R. CUTLER.

I. CIVIL HISTORY PREVIOUS TO 1850.

THE town of Winchester was originally and principally a part of the town of Woburn. It was the southerly part of that town. After the Boston and Lowell Railroad was opened in 1835, a village grew up in that part, which was soon dignified by the name of South Woburn. Previously there had been in that quarter a number of scattered houses, such as were common to a farming community, and there were a few mills; but otherwise, there was little to distinguish it from other parts of the old town. In 1850 it was large enough to become a town of itself, and in that year it was incorporated as a town, by the name of Winchester. Its growth has been constant and rapid, favored by its railroad facilities and its superior natural attractions, and at the present time it is one of the best known and influential towns in the State, as a location for fine residences, and the abode of cultured and influential people, many of whom have business interests in Boston and elsewhere, and reside here simply for a home. Such, in brief, is its history.

The late Rev. and Prof. George Cooke, the histori-

ographer of the Winchester Historical and Genealogical Society, whose duty it should have been to have prepared this sketch, left a scheme for the history of Winchester which was published in the *Winchester Directory* for 1887. This the present writer will attempt to amplify in accordance with the idea that gentleman intended to carry out. The sources of Winchester history are, of course, to be obtained in the history of the older town of Woburn, in the sketch of which many matters relating to Winchester have already been treated, and do not need repetition here. One matter which has a particular relation to Winchester territory, and which has been reserved for especial mention in this place, is a description of lands in Winchester of the date of 1692-99. This is a particular description of the lands of the Converses, who lived at Winchester Centre, and which is to be found in the first volume, so called, of the Woburn town records, and was entered in a description of several Woburn estates to be found in the appendix to those ancient records, commencing with the last page of the volume and going backward, as written, towards the middle of the book.

WOBURN RECORDS.

VOL. I: APPENDIX.

[The so-called inverted pages of the records.]

"[ix.*] 1692. Records of lands in Woburn that belong to James Converse, Sen.

" *Imprima*. To his homestead, about twenty acres upland and meadow, bounded east by the [Aberjona] River and Josiah Converse's land, southwest by Wm. Symmes, northwest by Wedge Pond; together with thirty-four acres, more or less, on the east side of the River bounded by the River west, Wm. Symmes south, the 500 acres of woodland southeast, Sam'l. Converse, his land northeast; also twenty-two acres, more or less, at a place called the Indian Hills, bounded by land that was Wm. Green's southeast, Josiah Converse's land northwest, Wm. Johnson northeast, and the woodland southwest; [*] [year '66 granted, page 32, otherside the book.] also fifteen acres, more or less, that the town was indebted to him, and is laid out to him by the committee in two parts, viz., twelve acres, more or less, near Shawsbin, adjoining to the farm called the Church's Farm, bounded by Billerica line north and northwest, and by the lots, southwest and southeast, in form as upon the margin [fig.] and the other three acres, more or less, by his son James Converse's barn, bounded by Winter Pond south, the highway by the Mountain northwest, and said James Converse, his own land that he purchased of Wm. Johnson northeast, and by a little valley leading from the highway to Winter Pond southwest, it being James Converse's woodland on that side; and this last piece was laid out to James Converse, Jr., by order of the committee, viz., Capt. John Carter, Deacon Josiah Converse and Sergeant Thomas Pierce, with the help of Capt. Wm. Johnson, who was a surveyor to the committee; and all this fifteen acres was given in both pieces by James Converse, Sen., to his son, James Converse, Jr.

"Also thirty-four acres, more or less, upon the plain, called the Great Field, bounded by the land of Wm. Symmes southeast, Richard Gardner northwest, Josiah Converse northeast, John Carter and Wm. Johnson southwest; only four acres, part thereof lyeth at the west corner, out of the square of the other, but it just joins at the west corner, it being four acres of that which was called Davidson's.

"Also about eight acres of meadow in the Mill Pond Meadow; about five acres thereof above Blind Bridge, upon the two brooks that come out of Horn Pond and Wedge Pond; and the other three acres on the east side of the way adjoining to Mr. Hale's meadow.

"Also a skirt of upland on the northwest and southeast sides of Wedge Pond, undivided with Josiah Converse.

"[x*]. Records of land belonging to James Converse, Jr. (1699), in Woburn.

"*Imprimis*. To his homestead, twenty-five acres, more or less, that was Shepardson's lot, bounded by Josiah Converse southeast, that which was Henry Brooks's northwest, Richard Gardner's southwest, John Crowe's (that was) northeast.

"Also twenty eight acres, more or less, part of that which was John Crowe's bounded by James Converse, that was Daniel Shepardson's southwest, James Fowle, the other part of Crowe's lot, northeast, James and Josiah Converse's land southeast, and Thomas Belknap's land northwest.

"Also five acres of land, purchased of William Johnson, that was Henry Brooks, at the northwest end of Shepardson's lot, and adjoining thereto; and also four acres of land, more or less, that he had of the town, three acres thereof upon his father's account, and the other acre given by the town, and it lyeth between the highway and Winter Pond, adjoining to his own land.

"Also about fifty acres of upland and meadow land, purchased of Wm. Hamlet, bounded by Horn Pond northwest, Thos. Belknap southeast, Horn Pond Brook, northeast, and on the southwest side, partly by Sam'l. Pierce's and partly by the common.

"Also two acres, more or less, purchased of Wm. Hamlet, on the side of the Mountain by Samuel Pierce's field.

"Also ten acres and a half of upland, more or less, bought of Wm. Johnson, at a place called Powell's Lot, the southeast end thereof, bounded southeast by John Carter, northwest by the other part of the said lot, and by Richard Gardner's woodland elsewhere.

"Also fourteen acres of land in the thick woods, part of that which was Capt. Carter's great lot, and it joins to Wm. Johnson's land, that was John Seers.

"Also about one acre and half of land upon the plain, adjoining to Shepardson's lot, that he had of Josiah Converse, and it lyeth at the south corner of said lot.

"Also two tracts of woodland, one reaches from Sam'l. Pierce's orchard over the Mountain to Stony Lane; thirty acres, more or less, and about twenty acres more, adjoining to Stony Lane, on the southwest side thereof, and reaches home to Hutchinson's lot.

"There is also twenty-four acres of Hutchinson's lot, given to his children, per Capt. Carter, that is not sold nor divided, at the date thereof."

[EDITORIAL NOTE.—Consult map of the Waterfield lots in the *Winchester Record*, vol. 2, for location of Shepardson's, John Crowe's, Powell's and Hutchinson's lots in 1638. Also description accompanying for number of acres, etc. Davidson or Davison's lot is evidently an ownership later than 1638 of another of these lots.

N. B.—The descriptions of lands not located in the vicinity of Winchester are generally those omitted in the above extracts.

—*Woburn Journal*, March 15, 1889.

To the Converse description may be added others:

"[xiii*] Records of land belonging to Richard Gardner in the town of Woburn, entered in the year 1678.

"[The dwelling house.] One dwelling house and barn, with forty and seven acres of arable land adjoining to it, situate in Plain Street, near Winter Pond, part of it being formerly a lot that was Seth Sweetzer's, of Charlestown, and part of it being part of a lot that was formerly Edward Gibbons's, and part given by the town of Woburn, bounded by the land of James Converse on the east, and on the southeast by the land of Josiah Converse and the land of James Converse, Sen., and on the south by the land of the said James Converse, and west by the land of Matthew Johnson, and northerly by Winter Pond and the highway to the meeting-house, and a lius from the said highway to Winter Pond.

"[Swamp at Simple Bridge. 6 [acres.] One parcel of land situate near Matthew Johnson's and Simple Bridge, by estimation six acres, be it more or less, bounded by the meadow land of William Johnson east, and the highway leading to the west end south, Horn Pond Hill lying north of it, and northwest by a line between the said land and the woodland of James Converse, part of it being swamp and all granted by the town of Woburn.

"[Round Meadow, 10 acres.] One parcel of meadow land, being at a place commonly called Round Meadow, containing all the said meadow, by estimation ten acres, be it more or less, bounded by the land of Robert Pierce north, and a highway southeast, and the woodland of the sixth division elsewhere."

[N. B.—The above piece of meadow is supposed to be also in Winchester.]

"[xv*]. Records of lands belonging to Richard Nevers lying in the bounds of Woburn, entered in the year 1674.

"[18. Lawrence's lot in Waterfield.] *Imprimis*, one lot that was formerly John Lawrence's, of Charlestown, but now in the possession of Richard Nevers, it lying in Waterfield, and is bounded by William Johnson's land east, and the land of Capt. Edward Johnson south, and the woodland of the eighth division west, and the woodland of the seventh division north, it being eighteen acres, more or less."

[EDITORIAL NOTE.—Seth Sweetzer's lot, near Winter Pond; Edward Gibbon's lot; John Lawrence's lot in Waterfield, are shown on the map of the Waterfield lots of 1638, in *Winchester Record*, vol. 2. John Lawrence's lot was then his father's, Henry Lawrence's. The ranges or divisions beyond the seventh appear to be based on the original survey, as in the map of Waterfield, where seven divisions are shown.]

—*Woburn Journal*, March 22, 1889.

"[xviii*]. Records of lands belonging to William Johnson entered, lying in the bounds of Woburn, 1673.

"[Acres 50. Plain Street.] *Imprimis*: One dwelling-house, barn, stables and out-houses, with fifty acres adjoining therunto, of arable land and meadow, situate or being in a place commonly called Plain Street, bounded by the land of John Green south, and the land of Matthew Johnson and John Carter east, and the land of Josiah and James Converse west, and the town Common north.

"[27. This was Hutchinson's lot.] One parcel of upland, by estimation twenty and seven acres, more or less, situate in Waterfield, being the better half of a lot that was formerly George Hutchinson's, bounded by the land of John Carter west, and the land of Edward Johnson north, and the town Common east, and the land of Josiah Converse south.

"[30. This was Hubbard's lot.] One parcel of land, by estimation, fifty acres, more or less, situate in Waterfield, bounded by the land of John Johnson north and east, and by the land of John Carter south, and by the land of Mr. Wade west.

"[25. This was Isaac Cole's lot.] One parcel of land, by estimation, twenty and five acres, more or less, situate in Waterfield, bounded by the lands of William Bachelder east, and Abraham Pratt west.

"[45. Abraham Pratt's lot.] One parcel of land, by estimation, forty-five acres, more or less, bounded by William Locke's and John Carter's woodland west, by the land that was Isaac Cole's east, but now in the possession of William Johnson, and to the land of Mr. Wade north, and the land of William Johnson south.

"[45. Bachelder's lot.] One parcel of land, by estimation, forty and five acres, more or less, situate in Waterfield, bounded by the land of John Carter east, and by the land that was formerly Isaac Cole's west, and by the woodland of William Johnson south, and by the land of William Johnson north.

"[15. Powell's lot.] One parcel of land, situate in Waterfield, by estimation, fifteen acres, more or less, bounded by the land of James Converse south, by the woodland of Richard Gardner east, and by the woodland of the said Gardner west."

[EDITORIAL NOTE.—William Johnson's lands, here described, were in the vicinity of "Plain Street," or the present Cambridge Street, in the westerly part of the present town of Winchester, where his dwelling-house, with other buildings, stood, "situate or being in a place commonly called Plain Street." George Hutchinson's lot, Hubbard's lot, Isaac Cole's lot, Abraham Pratt's lot, Bachelder's lot and Powell's lot, all in Waterfield, are shown on the celebrated map of the "first possessions of civilized man" in the past and present limits of Woburn. We state here, with confidence, that we consider the homestead of William Johnson to have been the estate latterly known as the Luke Reed place, in Winchester, in former times occupied by the second Thomas Belknap, and by Daniel Reed and others, and at present by Edward Russell.]

Woburn Journal, March 29, 1889.

Thus we have in the above a description of lands from the period of 1673 to 1699, in the limits or on the borders of the present town of Winchester, and all originally in the bounds of Woburn. The familiar names of localities, such as the Plain, where William Johnson and Richard Gardner lived, and the names of such objects as Horn Pond Hill, Horn Pond itself, and Winter Pond, the Aberjona River and Wedge

Pond, Blind Bridge, etc., are readily recognized by all who read those pages to-day, and thus a clue is given to the locality of the various lots described 200 years ago.

The Indian Hill referred to is in Winchester. On July 30, 1850, there was a conveyance from Ruth Wyman to Gardner Symmes of 18½ acres of the "Indian Hill pasture" in Winchester. This plot was bounded north by land of Captain Edmund Parker, called the Great Pasture, west by land of heirs of Josiah Locke, south by land of heirs of Elijah Pierce, and east by land of heirs of Daniel Wyman. (*Midd. Reg.* 588 : 306-7.) The height is evidently that to the west of Cambridge Street, in rear of the estates of Ammi C. Winn, or in rear of what was formerly known as the Daniel Wyman estate, on Cambridge Street, later owned by Daniel W. Locke. The use of the word Indian Hill for this same height is found in Edward Converse's Inventory, 1663.—*Winchester Record*, ii. 61.¹

Winchester as a territory exhibits a number of local features, still more ancient than those just mentioned, which have been already noticed under the history of Woburn. It was the greater part of the tract known by the name of Waterfield (1638), at a period when the area of Woburn was included within that of the town of Charlestown. Here a large portion of the lots laid out and granted to the inhabitants of Charlestown, before the incorporation of Woburn, were located. Here was the ancient Rockfield of 1638, named in those grants. Here were, at least, the first to the fifth ranges of these Charlestown lots. Here were the farms of Symmes and Nowell, the first named the minister and the second named the magistrate of Charlestown, and a part of the reservation for the Indians near the Mistick Pond. Here also were a part of the farms of John Harvard, the minister from whom Harvard College was named, and of Thomas Graves, the admiral, the original lots of the Richardsons and of Edward Converse (1638) and others, afterward connected with the settlement of

Woburn (1642). Here was the "River" (1638), later called the Aberjona River (1641). Here was built the first house in the town of Woburn and the first mill, both by Edward Converse, and the first bridge (1641). Here, it may reasonably be supposed, was the site of the second bridge (1641), called in the early records of Woburn the Long Bridge—from its length—and whose construction was a work of difficulty. Here was the scene of an early and lamentable accident, the killing of Samuel Converse, son of Edward, by the water-wheel of the mill, in February, 1669-70, and here was the scene or locality of an Indian massacre during Philip's War—when a woman and two children, members of the Richardson family, were killed by a prowling band of hostile Indians, on April 10, 1676. This hostile party was pursued by the enraged townspeople, and one of them was killed, in retaliation for the mischief they had done. Other incidents, now unknown, may have occurred in the district now called Winchester, before the beginning of the eighteenth century, but these few are cited, as showing that this part of old Woburn has had a history peculiar to itself and its own quarter, on which we are here but able briefly to touch. In the matter of neighborhood divisions in the older town, this part of Woburn was designated, before 1700, as the "South End." *Richardsons' Row* was, in part, in the "East End" of the town, in these early designations. "The Town" signified, in accordance with the customs of all towns at that date, the "Centre," or the centre village of the community, set off as a separate town. For 150 years these distinctions existed in Woburn with little change, and in 1792 the districts of "Richardsons' Row" and the "West Side" are recognized in the public records, and remained much in their original condition till 1831, and also with little change, till 1845. In 1729 Mr. Thomas Belknap's house, known to be in the limits of Winchester, was a place for the movable grammar school to be kept. In 1738 the same school was to be kept in (2) the Richardsons' and the Carters' "at the southerly part of the town," and at the same period a station for the school was established at the southerly part of *Richardsons' Row*, "for them, the Richardsons and the Carters." In 1742 the sixth and last quarter for the school was the "Carters' quarter" in this section of Woburn, in the "house of Mr. Ebenezer Converse," at present Winchester Centre, where the school was to remain two months. These distinctions are very patent to any one at all acquainted with the early history of the section now known as Winchester.

Some interesting recollections of the Black Horse Village in South Woburn, 1822-25, etc., are given by Colonel William T. Grammer, of Woburn, in the *Winchester Record*, ii. 81-83. In 1822 his father, William Grammer, and his father's brother, Seth Grammer, moved from Boston to that place, and lived on the Swan farm, so called, opposite to the farm of one Caleb French, whose wife was a Swan. The

¹ Mrs. Martha (Cutter) Gardner, who died in Winchester, May 9, 1862, in the ninety-eighth year of her age, was a widow for sixty years, and was daughter of John Cutter, who owned the estate of his father, John Cutter, Sr., later known as the Sheriff Charles Kimball place, at the west side of Winchester, on the corner of present Cambridge and Church Street. When she was eleven years old she viewed the conflagration of Charlestown on the day of Bunker Hill battle, "from the top of Indian Hill, near her residence." For an obituary, containing an account of her antecedents, her family, herself, and her funeral, by Dr. Benjamin Cutter, see *Woburn Evangelist* for May 16, 1862. "Her grandfather, John C., was esteemed one of the most upright men of his day, and living to the time of Whitefield, and partaking in the reformation of the times in 1740, was called a New Light. Old people within the memory of those now living have mentioned the interest they felt when young, in listening to his holy conversations in the interval of divine worship, when, from the distance travelled, they were obliged to spend the Sabbath noon at or near the house of worship in Woburn." This good man died in 1788, and some of his descendants were among the early settlers of Cincinnati, Ohio. There one of the family was killed by the Indians, two others died of the small-pox, another was buried alive in a well, and one of the principal streets is named Cutter Street.

brothers Grammer sold out soon to the Hon. William C. Jarvis, whose successor was Isaac Shattuck on the same premises. In 1825 the Grammers built a store near the junction of Main and Washington Streets, which, though not the first, was one of the early stores at that place. It was on the west side of Main Street, or the "Great Road," and opposite to the neighboring blacksmith-shop of F. and N. B. Johnson, well remembered by the older citizens. The store was called in high phrase an "English and West India Goods Store," and liquor, as was common in the stores of that time, was one of its staple commodities. During the stay of the Grammer family on the Swan farm, a house opposite was burned on the French estate, before mentioned. About the same period William Grammer, the father, erected a liberty-pole, or flag-pole, as the younger generation of this day would term it. These staffs were very popular in the country at large at that time. The pole stood at the junction of the two streets near the store, and its raiser owned the flag which was displayed upon it.

Some idea of the importance and ancient character of the hostelry known as the Black Horse Tavern, in Winchester, may be gained by the following allusions to its former history. In 1761 Giles Alexander sold this house to Noah Wyman, the house having formerly been licensed for an inn or tavern, and Noah Wyman immediately petitioned the General Court for an inn-holder's license on the estate. In 1775 the tavern was on the upper stage route, so called, from Boston to Portsmouth in New Hampshire. Its keeper, according to the almanac for that year, was Wyman, evidently the Noah Wyman above-mentioned. In 1792 the same road was called the upper road to Casco Bay, eastward, or to the present city of Portland, Maine. The traveler from Boston came by way of Medford, distant four miles from the starting-point, and thence to Woburn, and afterwards to Wilmington, when on this route. In 1813 a still higher aspiration was given to the traveler on the Casco Bay route, by calling his pathway through this section "the road from Boston to Montreal," and in the year following "the road to Montreal and Quebec!" At this period one Hill appears to be the keeper of the Black Horse Tavern.

Some interesting items regarding Winchester history are presented in some extracts from the diary of John Swan (born 1776, died 1864) and published in the *Winchester Record*, ii. 457-459. A brief reference to some of these items, of general interest, is here made. Mr. Swan mowed and raked Blind Bridge meadow, 1811, whence he brought two loads of hay. He was at Blind Bridge meadow haying in 1814, and again in 1815. He was engaged to teach school in 1811 and in 1817. He bought the Edward Gardner estate in 1818. On October 30, 1814, being a Sunday evening, his brother, Stephen Swan, returned home from Dorchester Heights, and all the company of

light infantry, of which he was a member. The company had been gone on that service seven weeks. In 1815 the "great and important news of peace" arrived at Boston from New York, in 32 hours,—243 miles! "It is said the man had \$225 for bringing the news." In 1828 this same Stephen Swan "raised his barn," 40x60, and "had 45 men to supper and 11 boys." In 1841 the barn of Mr. Collins was burned, 6.30 evening. There were fires at Baconville, in Winchester, in 1855 and 1858—the latter a destructive one, cotton-battening factory burned. In 1858 Luke Wyman's Pond Plain lot was sold to ex-Governor Edward Everett, for \$5000, and in 1859 the same purchaser bought fifty-three acres of land north of Stephen Swan's farm, from Dea. Luke Wyman, for \$8000. The late Samuel Gardner's farm was sold in 1858 for \$6500 or \$7000.

The *Winchester Record*, published by the Winchester Historical and Genealogical Society, contains an abundance of facts regarding the earlier events connected with the civil history and institutions of South Woburn and Winchester, which we cannot reproduce here. To that publication the historical student is therefore directed for an account of many things which do not find mention here.

A valuable original paper is a list of the children attending a school in Richardsons' Row in the year 1786, a description of which is given in the *Winchester Record*, i. 164-165. It was dated Woburn, March 2, 1786, and signed by Michael McDonnell, teacher. The family names represented are Richardson, Evans, Parker, Eaton, Whittmore, Hadley, Watts, Miller, Skinner, Wyman, Jaquith, Mead, Symmes and Converse. Total number of scholars forty-six,—all children belonging to families living in that quarter of Woburn. A new school-house, so called, for Richardsons' Row was dedicated November 1, 1818.

The act to incorporate the town of Winchester in the year 1850 is photographed, and a copy is presented in the *Winchester Record*, vol. i. p. 41. By its terms all the territory within the towns of Woburn, Medford and West Cambridge, comprised within the limits stated, was thereby incorporated into a town, by the name of Winchester. For bounds, see copy of the above act in the publication referred to. The line stated between Woburn and Winchester to be was half-way between the south side of Woburn Common and the depot at South Woburn, as it was then situated, and as Main Street then and now runs. Other provisions were imposed upon the town of Winchester, as was common in such cases. It was passed April 30, 1850. The separation of this town from the older towns was not accomplished without very vigorous remonstrances on the part of those towns whose territory was affected, and a lively contest in the Legislature. An account of the whole matter is to be found in the *Winchester Record* in an article in vol. i. pp. 312-332. Measures for a separation were first taken by inhabitants of the section to be set off in December, 1849. The first meeting of

these persons was held on December 17th. Benjamin F. Thompson and John A. Bolles and other well-known citizens were prominent in the project. A second meeting was held on December 24th, when the well-known name of Frederick O. Prince was added to the others. At this meeting the following names for the new town were proposed: Appleton, Avon, Channing, Waterville, Winchester and Winthrop. The name of Winchester was the one decided upon, for the reason that a person of that name had proffered aid in a financial way to the enterprise. The petition for the incorporation of Winchester was presented to the Legislature on January 19, 1850, and the request was granted on its first application. Hon. Albert H. Nelson, of Woburn, was engaged as counsel for the petitioners, and his services and influence were very valuable in their behalf. "No money was used by either side to gain influence, not a dollar for lobby or a supper;" and when the legislative committee visited Winchester to examine the ground, they were given a very plain collation, not in a spirit of parsimony, but in accordance with the requirements of the occasion; indeed, had a more expensive entertainment been presented, the cause would undoubtedly have received injury. The citizens paid their counsel two hundred and fifty dollars, and Mr. Bolles, for his legal work, fifty dollars, also all the necessary expenses, the town committee making no charge for their services. Thus was the town of Winchester started clear of debt. Her motto was, "Economy and prompt payment." Her leading town officers for the first year made no charge for their services. "The service was itself of the best," says one who well knew.¹

Much the larger part of the territory was taken from that of Woburn. (Cf. map, *Winchester Record*, ii. 417.) Thus, as has been already shown, the early history of this town is chiefly to be found in that, although the south part involves the history of the Indian reservation near Mistick Pond, and that of the Symmes farm, originally the grant to Zachariah Symmes, the minister of Charlestown, as early as 1638, when the section about Winchester was a wilderness and Woburn as a town had no existence. (Cf. *Winchester Record*, i. 20, 123.)

The choice of the name of Winchester, from Colonel William P. Winchester, was fortunate in one respect, that it brought with its choice a welcome pecuniary gift, in the form of the sum of \$3000, to be used in the erection of a town-hall, or any other proper object of municipal expenditure. Colonel Winchester was informed that the name was given to the town, at the request of its inhabitants, out of compliment to him, and he, not being content with a mere verbal expression of his high appreciation of the honor conferred on his name, begged leave to present to the new town the sum of \$3000 for the purposes

before mentioned. The letter sent was dated at Boston, May 25, 1850. (Cf. *Winch. Record*, ii. 488-489.)

The death of Colonel Winchester occurred August 6, 1850, and the new town adopted resolutions of respect and sympathy, which were communicated to his family. Colonel Winchester died at the early age of forty-nine years, at his residence in Watertown, leaving a property estimated at \$650,000.² He was an accomplished scholar, it is said, in the French, Spanish and Italian languages. The money presented by Colonel Winchester was first expended on a new town cemetery. This fund was returned to the town treasury in 1885. Recently it has been transferred to the town-hall account for a clock and bell, and other matters connected with that building. On the bell in the tower an inscription is cast, to the effect that this clock and bell commemorate the gift of William P. Winchester to the town which bears his name. The lyceum hall was built by a company as a private enterprise. Colonel Winchester was long a provision dealer in Boston, and inherited a large fortune from his father.³

Some of the most valuable reminiscences of the village of South Woburn, 1834-36, are those of Oliver R. Clark, published in the first volume of the *Winchester Record*. The portion of the village near the crossing of the Boston and Lowell Railroad by that great artery of travel, Main Street—ancient as the first settlement of the region—was called the "Woburn Gates," because gates were closed at the railroad crossing, when trains were passing the point. The original scheme of the railway connecting Boston and Lowell did not appear to contemplate any provision for business at this point, so the building first used as a station was a small shoemaker's shop, about 10x15, which answered every purpose till the increasing size of the village rendered a larger building necessary. This building or depot was opposite the original town-hall, or lyceum-hall, and it remained at this point with changes of buildings only, till about 1872. For two years after the opening of the railroad, says Mr. Clark, but few changes were observed. But there was a man whose eagle eye saw the advantages of that spot as a good locality for business and the founding of a new town.

This was Mr. S. S. Richardson, so called, or Samuel Steele Richardson, a large manufacturer of shoes in Woburn, and then considered a rich man. He got possession of the ancient Converse Mill site, now the Whitney Mill site, at Winchester Centre, and of a large tract of land adjoining it, and repaired or entirely rebuilt the old mill, and commenced and finished several houses, and among others a shoe-shop, where the lyceum hall afterwards stood. He soon afterwards purchased the Black Horse Farm, where the old tavern of that name stood, and the land on

³ "Rich Men of Massachusetts," (Bost. 1852), p. 132.

which most of the houses are built on that extensive hill-side. In 1837, however, having speculated in eastern lands too extensively, he became financially embarrassed, and the interests of the new village suffered. His place, however, was taken by a man of still greater financial ability, and one of the most efficient agencies in forming the future prosperity and distinctive character of Winchester. This was Benjamin F. Thompson, brother of the well-known General Abijah Thompson, of Woburn, who had lived at the Centre, and built a tannery there, and the house occupied by the children of the late Walter Frost, on Pleasant Street, corner of Lexington Street. Like his brother Abijah, he had begun business in a small way, which he had increased, removing to the South Village in 1837 or 1838. Here he purchased the land and built a tannery, lately Mr. Waldmeyer's. His advent was a promise of the future respectability and morality of the town to be. In the older village at the Centre he had been a well-established influence for good. His garden in Woburn was beautiful, and a special attraction of the town. His person and surroundings were distinguished by a refined and cultivated taste, denoting attention to the proprieties of a thoughtful and discriminating habit of life, and in all his business relations and transactions there was a corresponding completeness of propriety and indisputable correctness. His word was considered by all who knew him or dealt with him as good as his bond. Such was the man who now joined his fortunes with the village of South Woburn, and latterly of the town of Winchester.

Samuel S. Richardson was born in Woburn, July 19, 1806, son of Calvin and Sarah. His father was a well-known citizen. The family were residents of Richardsons' Row, in the locality now embraced in the limits of Winchester. He entered upon a business life at an early age, and was at one time the largest and most influential shoe manufacturer in Woburn, giving employment to one hundred and fifty persons at a time. He was active and smart in whatever he undertook. His manner was inspiring, and he gave life and vigor to all his undertakings. His wife was Abigail Mead, of Bedford, Massachusetts, and by her he had two children—a son and a daughter. After her death he married a second wife, Sophia Stanton, of Winchester. He died, aged sixty-two, January 20, 1869. He possessed some peculiarities. For instance: "From Portland to New Orleans he would travel often in advance of railroads and steamboats, with his coat under his arm, a shoe in his hand and a change of linen in his pocket, never waiting for any one, yet always behind in starting. Once on the Mississippi River he was left at Memphis, but before the boat got to the next landing he was there, ready to spring aboard on its arrival." "He was a man," writes one who well knew him, "propelled by a mind intensely nervous and surpassingly active." When he went to South Wo-

burn, in 1836, says the same writer, it was "a small place with a blacksmith and wheelwright shop, and a little grocery store; Cutters' mill was grinding corn and beginning to saw mahogany. The old Abel Richardson mill was toppling over with age, the roof fallen in, and the millstones sunk in the stream below. The cars had been running two years." (Cf. sketch of S. S. Richardson, by Nathaniel A. Richardson, in *Woburn Journal*, December 17, 1886.) Benjamin F. Thompson is the subject of an extended notice in another place in this sketch.

Mr. Oliver R. Clark says of the period of 1836-1838, that there was but little business at that time in Winchester. The streets were likewise few. Main Street, or the great road from Woburn to Medford, was then very much as it now is. The houses also were not numerous, and in his article he attempts a description of them and of the establishments for business. One of the principal business establishments was the old mahogany mill of the Messrs. Cutter, one of the wonders of the boyhood of the present writer. The original mill was burned in 1841, and immediately rebuilt, and an important business begun. The "Gates" made a strong impression on the youthful mind. They were ponderous affairs to protect parties from danger at the railroad crossing on Main Street, and were awung open and closed by the bystanders. At that time it was not uncommon for persons to travel miles to see the steam motor, then used as a locomotive. The trains, however, were few and far between, the engines small, and the cars much like the old-fashioned stage-coaches, with the doors on the sides. The engineer was not protected, as now, by a cab, and the conductor and brakeman rode on the top of the cars. The speed of these trains, according to the statement of Mr. Eli Cooper, one of the earliest locomotive engineers on this road, was considerable, perhaps as great as many of the trains now. The proceedings on stopping at stations were those of the most approved English fashion of that date. They are described quite minutely in the *Winchester Record*, i. 57, by Mr. Abijah Thompson. The early depot-masters were John Robinson, shoe maker; John Donahoe, the first to make the position a regular business; and Captain Nathan Jaquith, the successor of Donahoe. Captain Jaquith combined the duties of depot-master, baggage-master and gate-tender in one office. He was active and energetic, and besides this started the livery business in the village. He died February 16, 1875, at the advanced age of ninety-three years, ten months and sixteen days. A very interesting picture of the centre of South Woburn Village is given in a view from a painting by Dr. R. U. Piper, of date 1840, a copy of which is presented in the *Winchester Record*, i. 59.

The village which had thus sprung up "just eight miles from Boston," by railroad, was given a still more positive character as an independent community by the formation of a church parish in 1840.

The history of this enterprise belongs to the *ecclesiastical history* in another part of this sketch. A house of worship was dedicated December 30, 1840, and was altered and enlarged in 1852, and destroyed by fire on March 20, 1853; and its successor was dedicated October 11, 1854, being erected near the same site as the former. Behind this edifice, in 1844, the parish established a small burying-ground. This was afterwards given up, and on April 7, 1851, the town voted to choose a committee to purchase a lot for a cemetery, which was named the Wildwood Cemetery.

On the site of the ancient mill purchased by S. S. Richardson, a new one was built, in 1838-39. In this later structure quite a variety of business was carried on—sash and blind-making, by Leonard Gilson and others; veneer sawing, by Harrison Parker, in 1843, Mr. Parker inventing a machine for cutting veneers, which was used in this building. This building was burned January 18, 1845, and soon rebuilt. In the building burned Amos Whittemore put in one of the first machines invented for pegging shoes. It was his invention, and attracted much attention when new. Further along, on the same street, near the junction of Washington and Main Streets, was the blacksmith shop of Major Francis Johnson and Nathan B. Johnson, its owners at that period. It was one of the most famous shops of the region, and much work was done in it at this time for the Boston and Lowell Railroad. In the evenings in winter the glowing fires were seen in full blast, and the air of enterprise about the place was inspiring and invigorating. The antiquity of this stand can be traced into the former century, when horses were formerly shod here, belonging to the ancient stage-coaches of the earlier date. Further on was the old Black Horse tavern, with its ample stables and pleasant grounds. At Symmes' Corner was another blacksmith shop, where considerable business was also done. (Cf. article in *Winchester Record*, by O. R. Clark, i. 125-29.)

II. CIVIL HISTORY AFTER INCORPORATION, OR FROM 1850 TO THE PRESENT TIME.

Winchester had one advantage when incorporated as a town. It was a new town, and could avail itself of the experience of many generations. It could avoid the errors of other and older municipalities, and shape the institutions of the place after a more perfect pattern.¹ That the younger generation might have a worthy inheritance, great attention was paid to schools, and hence many of the early reports were practically school reports. The town expenditure was largely for this object. The town was obliged from necessity to make a large outlay for bridges, but her expenses, as a whole, were not extraordinary. At the outset she had no expensive hall to erect, and

the "Winchester fund" aided in the purchase of land for a cemetery, and her school-houses were not expensive affairs. In 1855 the number of schools in Winchester was nine; school-houses, seven. The town had never been divided into school districts and had no district or prudential committees. The School Committee of the town had charge of all the schools and school-houses, and one common and uniform system of administration had been applied to every school and school division.² This arrangement would seem to be an improvement on the methods then in vogue in other towns, though common enough now. From the first year of its incorporation the town had a High School in which it took a commendable pride, and its schools have always been the subject of an unusual interest. In 1859 the number of school-houses was eight, and a private school was taught in the lower hall of the Lyceum Building. The half-day session was at that time a feature of the High School, and Thomas Emerson, a native of the town, and eminent latterly as a school superintendent and instructor, was its principal. The number of families in the town did not then require the legal maintenance of such a school, and it was, in fact, the smallest town in the State that then sustained a High School.

Seven new school-houses had been built between 1850 and 1860. Its whole taxable property at that period was but little more than half a million dollars, and its population numbered but eighteen hundred and one. Among the towns and cities of Massachusetts its standing in the comparative amount of money expended for education, was at that time the fifth, and again the second. In the published financial report of the town for 1860, an appropriation for the town library is first mentioned, and disbursements on its account are given. The first published report of the trustees of that institution appeared in 1861. In November, 1861, the teachers of the High School generously relinquished a part of their salaries, of their own accord, in consideration of the pressure of the times, occasioned by the Civil War and the embarrassed state of the treasury of the town. Disbursements on account of the families of volunteers enlisted in the service of the United States from Winchester in the prevailing war were first published in the financial report for 1862, and the first printed report of the selectmen was made in that year. The list of military expenses was very much increased in the financial report for 1863, an appropriation having been made of \$13,300 for that purpose. Its quota in July, 1862, was twenty-five men for three years, which was promptly raised and mustered into the service of the United States. The next call was for nine-months' men, and the quota fixed was forty-three. That number was furnished. A new apportionment under this call increased the number to

¹ See the enlargement of this idea in the School Report of Winchester for 1860.

² See *Report of School Committee for 1854-55*.

sixty, and twenty-two men were, by authority, obtained from the town of Reading, by transfer to the credit of Winchester. One hundred and eight of the town's citizens left their homes at this time to join the nation's defenders. Fifty-three families of these men were aided by the town at this period. Carefully prepared lists of the Winchester volunteers are given in the published annual reports for 1863 and 1866. Later calls for men are mentioned in the annual reports for 1864 and 1865. From October 17, 1863, to December 15, 1864, the town was called upon to furnish, in all, one hundred and sixteen men as its quota: having to their credit on the books of the State one hundred and nineteen men. A short history of what the town did during the Civil War is given in the annual report for the year 1866. In this it is said that the town under the calls of 1861 and 1862, furnished for three years 62 men, at an average cost of \$43 per man, town bounty. In 1862, 60 men for 9 months were furnished, at an average cost of \$82 per man, as town bounty, and an average subscription bounty of \$12 per man. In 1863, 1864 and 1865 the town furnished 110 men for those years, and 12 men for one year, at an average town bounty of \$115.70, and an average subscription bounty of \$58 per man, otherwise 244 men, at a cost of \$29,497.40. To meet this expense, money was hired for a term of years: by taxation, and by subscription, town officers and others giving their services and expenses in the business. Biographical notices of those who died in the service are given in the same report. Their names are the following:

1. George W. L. Sanborn, died at Fortress Monroe, April 1, 1862, aged 24.
2. Aaron D. Weld, paymaster in the navy, ranking as captain. Died on board the steamer "Ocean Queen," bound for home, June 11, 1862, aged 42.
3. Josiah Stratton, sergeant, killed in battle before Richmond, June 27, 1862, aged 45.
4. Francis A. Hatch, killed in the battle near Culpepper, Va., Aug. 1, 1862, aged 24.
5. John Fitzgerald, died in Washington, D. C., Aug. 2, 1862, on his way to the front.
6. Joshua T. Lawrence, killed in battle at Antietam, Sept. 17, 1862, aged 21.
7. Francis B. Bedell, killed in battle at Chancellorsville, Va., May 3, 1863, aged 21.
8. John Gordon, died in hospital at Washington, D. C., —, 1864.
9. Jefferson Ford, captain, with rank as acting master and executive officer. Died at Beaufort, N. C., June 17, 1864, aged 61.
10. Ira Johnson, died October 29, 1865, of disease contracted in the service, aged 30.

The list of volunteers shows one major on staff; one major, commissary; one major, surgeon; one major; four captains; one captain, commissary; one captain in navy; one captain, paymaster in navy; one captain, acting master in navy; two lieutenants; four hospital stewards; one medical cadet; one acting assistant paymaster in navy; three sergeants, and two corporals.

The names of the above, in order of mention, are as follows:

John A. Bolles, on staff of Gen. Dix; Alfred Nor-

ton, William Ingalls, William E. Prince, Alonzo F. Bacon, Jesse Richardson, Moses P. Richardson, J. Otis Williams, Nathaniel Richardson, William F. Spicer, Aaron D. Weld, Jefferson Ford, D. C. B. Abrahams, Henry L. Hartshorn, commissioned officers.

The non-commissioned officers were George H. Burnham, R. H. Fletcher, Charles H. Hazelton, Franklin S. Pierce, Charles E. Sanborn, Benjamin Abrahams, Benjamin T. Livingstone, Josiah Stratton, James W. Abrahams, N. D. Jaquith.

In the year 1865, the closing year of the war, the town voted and appropriated \$25,000 for erecting two new school-houses. This was a fitting memorial of the year which brought peace to the country. In the following year a new high school house and a new grammar school house were finished, the old high school house sold, and another school house removed and placed on another lot. On Aug. 6, 1867, the Common was purchased of Stephen Cutter and S. S. Richardson. A large stone bridge over the stream near the house of Mr. Sullivan Cutter was recommended in the report of 1869, and the bridge near the blacksmith shop in the same vicinity was recommended to be discontinued. The location of these bridges as they formerly appeared is shown in a plan of the Abel Richardson farm at Winchester Centre, of date 1835, noticed under the sketch of Woburn in this work.

Again, in 1870, the School Committee in their report take "a glance at the past." Twenty years had then elapsed since Winchester was organized into a town. When started it had only about 1300 population, 250 voters and 202 children of legal school age. A high school was at once established, a school system similar to those in the cities and larger towns of the State was adopted, and five school-houses were immediately erected. In twenty years there had been a considerable increase. The number of children had increased from 202 to 556, and the appropriations from \$1500 to \$7411. The school-houses for the primary schools were quite uniform in construction, about thirty by forty feet, with a cupola and neat exterior. In 1872 the small-pox appeared in the town, the number of cases being ten, deaths two. At this time the disease was quite general in the vicinity. A report of a committee to investigate the subject of a water supply was made and published in April, 1873. This committee recommended the gravity plan from the easterly source, or what was known as the Turkey Swamp plan, a dam being constructed at the outlet of the swamp for a store reservoir, an engine-house, pumping engines, and dwelling-house and three high reservoirs being furnished also. A supplementary report on the same subject was issued by the committee in June, 1873, in defence of the former plan, and an act in addition to a previous act to supply the town with pure water was passed to enable the town of Winchester to collect the water from the

area lying along the easterly side of Winchester, being in the towns of Winchester, Medford and Stoneham, etc. The first annual report of the water commissioners appeared in 1874. This report was mainly an account of the progress of construction, and to March 1, 1874, the sum of \$26,917.24 had been expended on the work. The second annual report of the water commissioners, in 1875, contains a history of the introduction of water into the town, and a further account of the progress of the work. The dam and the laying of the pipes were substantially finished and the water from the reservoir was first introduced into the principal main on Sept. 20, 1874. The working of the system and its features are explained by the commissioners in the same report. There is also accompanying it a full report of the engineer and tables illustrating different details of the subject. The report of a town committee to draft a code of rules and regulations for the administration of the water works was published in the annual report for 1876. In the water commissioners' report for that year is a detailed account of the expenses of introducing the water, making an expenditure for that object of \$162,326.13. A plan for a high service is also mentioned in the same report. In 1876 is a report of the committee on the Common. The said committee having caused that plot to be graded and surrounded with a substantial curb of hammered granite, causing it to become a great ornament and advantage to the town.

In 1878 the Mystic Valley sewer, built by the city of Boston through the town, is mentioned. In connection with this work the city of Boston built two new spans, or openings, at the bridge on Main Street. Concrete crossings and sidewalks are specially mentioned in this year, and so is that abortive enterprise, the "Mystic Valley Railroad." In the same report is introduced a brief history of the town, also a list of the selectmen from the first, representatives to the Legislature, a consolidated list of expenditures, a statement of the town debt, and assessors' statistics. The town clerk's report is made more full by the publication of names, etc. A committee on the necessity of building an additional school-house submit a report in print. In the report for 1880, p. 126, is a letter from the Hon. O. R. Clark in relation to the gift of a town clock by Ebenezer Smith, who made a secret gift of a \$500 bill for that purpose, in 1855. A brief history of the town is again presented in the report for 1881, and a list of the selectmen and representatives, also statistics, and some facts about municipal indebtedness. In the School Committee's report for 1882, a sketch of the town in relation to its educational institutions is given, from which a few facts might be stated:—

There appears to have been no school-house in the limits of the present town before 1790, and though a public school was kept, it could be kept only in some private house, and then only for a few weeks in the

year. Children sometimes were provided for then at a private school at the cost of the parents, or by travel to Woburn or Medford Centre, a distance of two miles. At the incorporation of the town, in 1850, there were only two school-houses in its limits, one at the centre, or South Woburn, and the other on the Medford Road, near Symmes Corner, formerly in Medford. The town at its first meeting, May 7, 1850, chose a committee of three citizens to build five school-houses in different sections of the town, which were built during the ensuing year. One school was called the Gifford, for the Hon. S. N. Gifford, who, as a member of the Legislature, was active in securing the incorporation of the town. The Rumford was named for Count Rumford, the most eminent native of the old town of Woburn; the Washington, from the name of the street; the Mystic, from the Mistick Pond, near by; the Wyman, from the family of that name; the Hill, from its location. The High School was established at the outset in the old school-house at the Centre. The number of the inhabitants did not then require it, but it was established, notwithstanding. The school system was thus inaugurated on a very liberal plan, and was managed by the whole town, and not by districts or by district committees, but by a School Committee in general charge of the whole. The high school was kept ten months and the other schools nine months of the year. In 1853 the Mystic school-house was built, to take the place of the old one on Medford road. In 1854 a primary school-room was fitted up in the Gifford School-house. In 1857 a school-house was erected on Washington Street, and named the Adams, in honor of John Quincy Adams. This building was enlarged in 1863. In 1865 a new high school house was built, and a new grammar school house was erected on Washington Street. The Gifford School-house was moved. In 1875 the Adams School-house was sold and a new school-house was erected on Swanton Street, and named the Chapin School, in honor of Alonzo Chapin, M.D., long a member of the School Board. In 1878, a new school-house was built on town land on Highland Avenue, and called the Highland School, because of its location. Thus, in 1882, the town had ten school-houses, valued at \$57,500. The sketch includes the names of the members of the School Committee from 1850, and the names of many of the teachers of the schools.

The annual report of the Water Board for 1882 describes the construction of the South Meadow Reservoir as a part of their system. The description is also accompanied by a plan. While excavating for this reservoir a deposit of mud from twelve to thirteen feet in depth was found. It was an accumulation of a vegetable nature and possibly of geological antiquity. It was yellow in color when first excavated, but became black on exposure to air. Remains of beaver-dams were found at a depth of six or seven feet from the surface, the ends of the sticks showing

the marks of the beavers' teeth distinctly, as well as the grain of the wood, which was of ash, oak and pine, etc., any sticks found being readily crushed in the hand. We state this fact as an interesting archaeological feature of this particular locality. All of the reports of the Winchester Water Board are interesting reading, and the town itself has reason to be proud of its water-works and the ability displayed in the management and construction of them; the original Board of Commissioners who constructed the works accepting nothing for their services of supervision, only the desire of being beneficial to their fellow-townsmen of the present and future generations. It is this public spirit which has made the good town of Winchester what she is to-day. In few places have greater pains been taken to get always the best of anything that can be procured for the interests of the town. This careful policy and public spirit has attracted many people to her precincts, to locate their homes in a place where they believe that the best policy without stint will always prevail. Many towns might copy after Winchester to advantage in this respect alone. An impartial examination of her annual reports from her separation as a town shows this on every page. Each report is practically the history of the town itself, and so fully expressed that there is little need of going to the original written records for information.

The school report for 1883 mentions the employment of a school superintendent, and his first report is given in that year; also the report of a committee charged with the duty of altering and enlarging the grammar school house. In the report of the Water Board for 1883 plans for a high service are given. In 1884 the report of a committee on the Common is presented, in which it is said the surface was re-graded and the curbstone re-set, the paths improved, also a water-basin placed upon it, and trees and shrubbery set out, a considerable sum being acquired by subscription for the purpose. In 1885 the Historical and Genealogical Society is first mentioned. Mial Cushman, collector of taxes for twenty-four years, died on November 27, 1884. A fountain and lamp-post in the square in front of the Baptist Church was contributed by citizens, and presented to the town through a committee, July 4, 1884. The annual report for 1885 contains a history of Wildwood Cemetery, which is closely connected with the early history of the town of Winchester. Allusion is made in the sketch to the original land grant to Charlestown in 1640,—to the town of Woburn, incorporated 1642,—to Medford, whose history begins in 1630,—to West Cambridge, (now Arlington), incorporated 1807,—to the Boston and Lowell Railroad, incorporated 1830, and opened for travel in 1835,—to South Woburn Village, well advanced in prosperity by 1840,—to its church parish, the nucleus of the future town,—to the incorporation of Winchester, 1850,—and the gift of Col. William P. Winchester,—to the appropriation of that

gift to the cemetery,—to a statement of the "Winchester Fund" to April 19, 1884,—to the exercises at the consecration of the cemetery on September 15, 1852, when Rev. R. T. Robinson delivered the invocation, and an original hymn was written for the occasion by Francis A. Durivage, a well-known writer of the period; prayer by Rev. N. A. Reed; original hymn by Mrs. H. J. Lewis; address by Rev. Rollin H. Neale, D.D.; hymn, "Montgomery;" prayer by Dr. Neale, and the benediction. A plan was made of the grounds by Amasa Farrier. A list of the permanent funds for the care of lots is given, and also the names of the persons who have served on the Cemetery Committee,—another example of the manner in which Winchester keeps abreast of the times in matters of history.

A freshet on February 13 and 14, 1886, did considerable damage during its continuance. Bridges were seriously injured. The stone bridge on Pleasant Street was injured by the force of the water and floating ice, and nearly a third of it was broken away. At Main Street a portion of one side of the bridge was carried away. The Lake Street bridge floated off its foundation, and was secured with difficulty. The Cross Street bridge was under water for a day and a night, but did not move from its position. The Washington Street bridge was not injured. Culverts were undermined and fell in. Streets were gullied badly in places. A particular account of the "Flood of February, 1886," is given in the *Winchester Record*, vol. ii. pp. 387-391. The water in the streets, however, was not so high as in the flood of February 16, 1855. Cellars were flooded over quite an area in the centre village. Foundation walls were injured, houses were partially submerged and access to some was only by means of boats. Injury to the basement portions of some manufactories was reported; but the losses, after all, were not so great as was at first feared.

In 1886 a new school-house was erected on Church Street, and called the new Wyman School-house. The report of the Water Board for 1886 contains an account of the completion of a high service for the benefit of the system of water-works already established. This includes a reservoir and wind-mill for pumping purposes. In September, 1886, cars commenced running over the street horse-railroad of the Woburn Street Railway Company through Winchester. In November, 1886, a petition for the further extension of this road was presented, and, on December 4th, the location was granted, and the extension was soon completed. In 1886 a large and ornamental iron fountain was placed in the basin on the Common, being a gift to the town from many of her liberal citizens, more than three hundred in number. On June 28, 1887, the corner-stone was laid for a new town-hall with Masonic ceremonies. The Winchester Electric Light Company commenced to light the streets of Winchester by electricity July 1, 1888. The

plant of this company was transferred to Woburn. A special report on the cost of the town-hall is given in the annual report of the town for 1889.

In 1888 the town library was transferred to the library wing of the new town-hall. The date of its reopening in that place was September 8, 1888. The Winchester Historical and Genealogical Society jointly occupied a historical room in the same quarters. In this room is an elegantly-carved oak cabinet, with table and chairs to match, given in commemoration of Edward Converse, the first settler, by his descendant, Hon. E. S. Converse, of Malden. Edward Converse built the first house in the territory now represented by Winchester in the year 1640, near this hall, on the present site of the Thompson place, and the memorial furniture above mentioned was manufactured and finished in Winchester on the same site and by the same water-power that was used by Edward Converse for his mill before 1649.

In the annual report for 1889 is a historical sketch of the Winchester public library. The nucleus of this library was a village library, founded in 1848. About 1856 an agricultural library was started, which was soon merged into that of the village association. In 1859 the association library was presented to the town under certain conditions, which were accepted by the town, and it at once became a public town library. In 1885 the trustees granted the use of a part of their rooms to the historical society, and that organization has been an honored guest of the library department since.

In the report for 1889 the Water Board mention the addition of a permanent steam-pump to their high service system. This was placed in position for use on August 20, 1888. In the annual report for 1890 there is a view of the town-hall and library. In their report for the year the selectmen say that there had been an unusual amount of public business during the year past, occasioned by the location and adjustment of the electric light and telephone lines, the numerous changes, improvements and repairs upon the town-hall property, the introduction of the Australian ballot system and other various special matter. The year 1890 is also the two hundred and fiftieth since the building of the first house within the limits of what is now Winchester, and action is recommended by the selectmen toward an appropriate and fitting celebration of that event. A history of the cemetery is repeated in the report for 1890. The new Gifford School-house was occupied for use December 2, 1889, and was formally accepted February 10, 1890. A report of the building committee of this school-house is also presented in the town report for 1890. It is a four-room building, two rooms only being at present finished.

Such is the civil history of Winchester as outlined in her annual reports from 1850 to the present time. It is true she carries a large amount of municipal indebtedness, and some of the enterprises on which she

has entered in her public capacity may have cost a larger sum than some communities would be willing to expend in a like manner. But, at the same time, she has something handsome to show for it, with prospects of a large future increase in population and wealth. Our hearty wishes are extended to the good town of Winchester for an era of prosperity and happiness in the years to come, greater by far even than that she has enjoyed in her now glorious past.

NOTE.—Some particulars regarding the Winchester water-works are here presented from the *Manual of American Water-Works*, 1888. Water supply.—Surface water, by gravity from impounding reservoir; also high service for about 45 takers, by pumping with windmill to reservoir. Reservoirs.—An earthen dam, with stone masonry heart-wall, 30 ft. high, and 600 ft. long is built across stream and forms impounding reservoir of 63 acres area, and 260,000,000 gallons capacity, 121 ft. above town. The high service reservoir is of stone and cement, with brick lining; is 40 ft. in diameter, 10 ft. deep, and has capacity of about 100,000 gallons. An additional reservoir will cover 144 acres and have a depth of 37 ft. Wind-mill and pump.—Former is 75 ft. high, with 30-foot wheel driving a 5-inch pump and lifting water 87 ft. through 6-inch wrought-iron and cement pipe. This is a more precise and scientific statement of the technical character of Winchester's water-works than some of the statements that have preceded.

Since the above was written, Winchester has celebrated, on July 1, 1890, the 250th anniversary of the first settlement in her borders, or the erection of the house of Edward Converse, 1640,—the first house built in the limits of Woburn or Winchester. The celebration comprised a procession, oration, dinner with speeches, historical sketch, decorations, fire-works, etc. There were a number of invited guests. The oration and historical sketch have since been separately published.

CHAPTER LXI.

WINCHESTER—(Continued).

ECCLESIASTICAL HISTORY.

BY REV. L. THOMPSON.

THE FIRST CONGREGATIONAL CHURCH in Winchester, originally the South Congregational Church in Woburn, was organized Nov. 19, 1840. For some time previous to that date the population of the South Village of the old town had rapidly increased as a consequence of the construction through the heart of the settlement of the Boston & Lowell Railroad. Early in 1839, it having been ascertained that about one-fourth of the members, including three of the deacons of the First Church in Woburn, were residents in this rising community, a petition of these members was presented to the church for dismission, with the organization of a new church as the specified object in view. The petition was not then granted. The agitation of the subject, however, continued. Many meetings were held, and there was much earnest discussion. A second petition was unsuccessful, though with diminished opposition to its object. Meanwhile, at a meeting held by prominent citizens in the South Village May 12, 1840, it was decided to organize the South Woburn Congregational Society, and, on the 1st day of June following, the organization

was effected, and a Building Committee was appointed to purchase a site and erect upon it a house of worship. The corner-stone of this edifice, which stood near where the present church edifice stands, was laid July 27, 1840.

At a meeting of the members of the church, held in the vestry of this unfinished building Oct. 11, 1840, Rev. Reuben Emerson, of South Reading, was invited to preside, Sumner Richardson, one of the petitioners, being secretary. Deacons Nathan B. Johnson, Benjamin F. Thompson and Marshall Wyman were appointed to prepare another letter requesting dismissal from the First Church. This letter, dated Nov. 2, 1840, and signed by one hundred, or, as one record has it, "one hundred and two persons," was duly presented, and at once received a favorable answer. The signers were dismissed on the same day and recommended as in good and regular standing, for the specified purpose of being organized into a distinct church.

On the 19th of the same month a council was convened. The letters of dismissal and recommendation, together with a proposed Confession of Faith and Covenant, were presented, duly considered and declared so far satisfactory that the council proceeded, in the usual way, to organize and recognize the church, which was designated as the South Woburn Congregational Church. Eighty-six of the one hundred persons who signed the petition for a dismissal were present and signified their assent to the Articles of Faith and the Covenant, and "the moderator declared them a regular established Church of our Lord and Saviour, Jesus Christ."

The public services of this interesting occasion were held in the vestry of the yet unfinished house of worship, and were as follows :

Introductory Prayer Rev. Mr. Dennis.
 Consecrating Prayer Rev. Jacob Coggin, of Tewksbury.
 Charge to the Church, Rev. Reuben Emerson, of South Reading.
 Right Hand of Fellowship, Rev. Abijah R. Baker, of Medford.
 Concluding Prayer Rev. Joseph Bennett, of Woburn.

The Sacrament of the Lord's Supper was then administered by the moderator, Rev. Reuben Emerson, assisted by the Rev. E. Cleveland and Rev. J. Bennett.

On the 30th of December following the organization of the church, the new sanctuary was dedicated to the worship of God, Rev. Daniel Crosby, of Charlestown, preaching the sermon.

The church, yet without a pastor, made an effort to obtain the services, in that office, of Rev. James Boutwell, but he declined the invitation. In the spring of 1841 Mr. George P. Smith, of Salem, was called to the pastoral office, and, having signified his acceptance, was ordained June 17th, following. The public exercises on the occasion were as follows :

Anthem "How Sweetly Flowed the Gospel's Sound"
 Invocation and Scripture selections, Rev. T. P. Field, of Danvers
 Introductory Prayer, Rev. Reuben Emerson, of South Reading.
 Original Hymn By Mrs. Mary L. Bennett.

Sermon Rev. Nehemiah Adams, of Boston.
 Ordaining Prayer Rev. J. Maou, of Salem.
 Original Hymn By Mrs. Mary L. Bennett.
 Charge to the Pastor Rev. J. Towne, of Boston.
 Fellowship of the Churches Rev. A. R. Baker, of Medford.
 Address to the People Rev. Joseph Benoett, of Woburn.
 Concluding Prayer Rev. W. I. Budington, of Charlestown.

In the mean time, Deacons Johnson, Thompson and Wyman, who had been office-bearers in the First Church, and prominent in the effort to secure the organization of a new church, were chosen the first deacons of the South Church, and Dea. B. F. Thompson, who had been the superintendent of the Sabbath-school of the First, was elected to the same office in the new Sabbath-school.

The ministry of Mr. Smith was brief, but vigorous, happy and useful. The church was active and prosperous with him as their pastor. It was, therefore, only with great sorrow that they consented to yield to his repeated request for a release from his position. Worn with care and heart-stricken by domestic bereavement, the young pastor felt under the sad necessity of a change, and he was accordingly dismissed March 11, 1845, and, during the same year, was installed pastor of the First Church in Worcester.

Rev. George Phillips Smith, son of George H. and Mary (Prime) Smith, was born in Salem Feb. 11, 1814. At the early age of sixteen he entered Amherst College, from which he graduated in 1835. After spending some time in teaching, he studied theology at the Theological Seminary in Andover, and was ordained, as before stated, June 17, 1841, as the first pastor of the South Congregational Church in Woburn. He married, first, Octavia A. Yale, daughter of Burrage Yale, of South Reading, June 22, 1842. She died March 21, 1844, leaving one daughter, who, in 1863, married Rev. L. R. Eastman, now of Framingham. Mr. Smith married, second, Margarette Elizabeth, daughter of John B. Osgood, of Salem, May 6, 1851. Their son, Osgood Phillips, died in his early manhood.

Mr. Smith died Sept. 3, 1852, from brain and typhoid fever, brought upon him, it is believed, by overwork. His funeral sermon was preached by Rev. E. Smalley, of the Union Church in Worcester.

Mr. Smith was succeeded in the pastoral office at Winchester by Rev. William Tappan Eustis, Jr., of Boston, who was ordained and installed April 8, 1846. Rev. R. S. Storrs, D.D., preached the ordination discourse. Mr. Eustis' pastorate continued less than two years, being hardly long enough for any strong attachments. Yet it was not without a fair measure of prosperity and pleasant relations.

Mr. Eustis was born in Boston July 6, 1821, graduated from Yale College in 1841, and studied theology in New Haven and Andover, leaving the last-named place in 1845. After his dismissal from the pastorate at Winchester, Jan. 27, 1848, he was pastor of the Chapel Street Church, New Haven, Conn., from 1848 to 1869. In 1869 he became pastor of the Memorial

Church, in Springfield, Mass, where he died in office March 30, 1888.

In 1880 Mr. Eustis received the honorary degree of Doctor of Divinity from Amherst College, and, during the same year, he was chosen a member of the Board of Visitors of Andover Theological Seminary, an office which he retained till his death.

Mr. Eustis was succeeded in the pastoral office at Winchester by Rev. John McClary Steele, who was ordained August 10, 1848. Rev. Nathan Lord, D.D., president of Dartmouth College, preached the ordination sermon.

For a considerable time after the settlement of the new pastor the church enjoyed a good degree of prosperity. Mr. Steele was a man of acknowledged ability and engaged in his work with a commendable degree of zeal. In addition to his ordinary duties as a pastor and preacher, he served for a considerable time as a member of the School Committee, of which he was chairman and in which he exhibited a rare tact. Meanwhile, the place grew rapidly in population and importance. In the summer of 1849, in order to meet the growing need, the meeting-house was enlarged and thoroughly repaired. On the 3d of April, 1850, the part of Woburn, which embraced the South Parish, was incorporated as a separate municipality, bearing its present name of Winchester, and later on, during the year, there were various other tokens of external prosperity.

But amid all indications of outward life, there was a painful sense of disquiet within. A strictly impartial fidelity to the historical facts makes it sadly necessary to say that between the pastor and a majority of the people there was a growing lack of harmony. On the one hand, Mr. Steele had warm friends who believed in him and were ready to cooperate with him. On the other, a much larger number, including the officers of the church, felt that he was not adapted to his position, and that certain imprudent financial enterprises rendered it better both for the church and for himself that he should retire from the field. So, at length, at a meeting of the parish, held December 22, 1851, they resolved, by twenty-five votes in the affirmative to four in the negative.

Mr. Steele, feeling that he could no longer be either useful or happy amid such general disquiet, at length resigned his pastoral office. A council was called, and he was dismissed February 11, 1852. Meanwhile Deacons Johnson, Thompson and Wyman, who were understood to favor his dismissal, thought it best to resign their office also. Though from the first day of the existence of the church they had been the acknowledged standard-bearers of the enterprise, they preferred to vacate their places for other and younger men, and on March 17, 1853, they all laid down their office together.

It is pleasant to add to this episode in the general prosperity and harmony of the church, that its effects

were transient, and that, for many later years, hardly a trace of it has remained. It is believed that kindly feelings, on the part of the people, followed the departing minister and that general gratification was felt in view of his subsequent usefulness in other fields.

Rev. John McClary Steele, the son of Jonathan and Elizabeth (McClary) Steele, was born in Epsom, N. H., September 3, 1823. In both the paternal and maternal lines of his ancestry he descended from men distinguished by the intellectual and sturdy traits of character which contributed largely to Scotland's greatness.

In September, 1840, Mr. Steele entered Dartmouth College, from which he graduated in 1844, with a high reputation for scholarship. He pursued his theological studies at Andover, where he held a high rank as a student, and graduated in 1847.

Mr. Steele married Annie E. Burnham, of Winchester, in August, 1852. Of his three children, two died in infancy; the third, Frederick Lincoln Steele, now resides in Cincinnati, Ohio.

After leaving Winchester, Mr. Steele was settled in Stratham, New Hampshire, where he remained about three years. In the autumn of 1856 he became the pastor of the First Congregational Society in Columbus, Ohio, but died April 5, 1857, while on a visit to the city of New York.

The successor of Mr. Steele in Winchester was Rev. Reuben T. Robinson, who was ordained October 27, 1852, the ordination sermon being preached by Rev. E. N. Kirk, D.D., of Boston. His pastorate was much longer than that of either of his predecessors and was signally happy and useful. In less than six months after the new relation was consummated the house of worship, which had not long before been enlarged and repaired, was entirely consumed by fire. This disaster occurred March 20, 1853. In the *Woburn Journal* of the subsequent week was given the following account of it:

"On Sunday morning, the 20th inst., at a little before eight o'clock, smoke was discovered issuing from the unfinished basement of the Congregational Church. It seemed to proceed either from the furnace in the vestry, or from the smoke-pipe passing through the partition. The bell-rope was in the loft above the organ, and was reached with great difficulty on account of the dense smoke that filled the house; consequently the usual alarm was not given for some time. Many citizens, however, were speedily on the spot, and exerted themselves to the utmost; but their efforts were unavailing, for, before the fire was extinguished in the basement, it was discovered to be burning in every direction between the partition; the cushions, most of the hymn and singing-books, the Sunday-School libraries, the movable settees, the pulpit furniture, and one of the clocks were saved. The house was entirely consumed; it cost about \$12,000, and was insured for \$5,000.

"A new organ, built by Simmons & McIntire, some four months ago, at a cost of \$1,800, was entirely consumed, on which there was no insurance. On the church was a clock, purchased about three years ago by the ladies of Winchester for \$400, which, with the bell, was also entirely destroyed."

This unexpected calamity added not a little to the cares of the young pastor. But, blessed with the cordial sympathies of the people who "had a mind to work," he was equal to the demand, and every good enterprise was steadily prosecuted. The congregation having meanwhile accepted the invitation of the Baptist Society to worship in Lyceum Hall, then occupied by them, the corner-stone of a new edifice was laid September 5, 1853, and its dedication occurred October 11, 1854.

Mr. Robinson was a man of rare culture and rarer wisdom. While he was able to labor, there was an almost unbroken prosperity. In the single year of 1858 more than 130 persons were admitted members of the church. But his health was frail and he was compelled at length to cease from active labor. After a long season of gradual decline, he died August 24, 1871, having had a pastorate of nearly nineteen years.

The pastor of so many years and so eminently successful, deserves a special notice in a sketch of the church he served.

Rev. Reuben Totman Robinson, the son of Henry and Sarah (Nye) Robinson, was born in Exeter, Otsego County, New York, October 27, 1825. His parents came to Massachusetts when he was between two and three years old, living for six years in Boston and then removing to Barre, Worcester County. Here he attended the district school and became greatly attached to books, caring but little for the usual outdoor sports of children. During the second year of his residence in Barre, and when he was ten years of age, he became deeply interested in personal religion and united with the church in whose meetings, young as he was, he often took part. After fitting for college in Monson Academy, he entered Harvard University in 1843, from which he graduated in 1847 with the honors of being class poet. Even in those student days his health was poor. Owing partly to his close application to study and partly to the frugal style of living which he felt to be necessary, but more probably to his natural aversion to active out-door exercise, he was not able, after his graduation, to pursue, as he had hoped, his professional studies. Hence, instead of entering a theological school, he studied, as he could, at home, taking, meanwhile, lessons in Hebrew from Rev. Mr. Woodbridge, of Auburndale. In a little more than four years he had thus completed the course of theological study and occasionally preached. After supplying, for a few months, a pulpit in St. Louis, Missouri, where he was urgently requested to remain, he returned to Massachusetts and received calls to settle from both Framingham

and Winchester. Preferring Winchester, he accepted the call from that place, and was, as already stated, ordained October 27, 1852. One week previous to this event he was married to Miss Clara Caldwell, of Ipswich. In December, 1869, the wife who had been spared to him seventeen years and been a constant helper, died after an illness from pneumonia of only a week. This great bereavement bore heavily upon his already enfeebled health, and, though he lived between one and two years after it, he never really rallied, and died August 24, 1871. Of his nine children, seven were living at the time of his death, though the oldest daughter soon followed him. His bereaved people, to whom he had been greatly endeared, erected to his memory and that of his wife, a beautiful monument,—a white marble shaft standing on a granite base and surmounted by a veiled urn. The expense of this token of affection, \$400, was chiefly defrayed by the Sabbath-School.

Rev. Edwin Cone Bissell was installed November 1, 1871, as Mr. Robinson's successor, Rev. Z. Eddy, D.D. preaching the sermon. His pastorate of less than two years was attended by a good measure of prosperity. In the one complete year that it embraced, he admitted about forty persons as members of the church, and he was personally highly respected for his scholarly ability and uniformly consistent Christian character. But the time of his service was too short to admit of such deeply-rooted mutual attachments as characterized the long ministry of his immediate predecessor. The people, however, have ever cherished for him a sincere esteem since he ceased to be their pastor and are happy to know that he has, for many years, filled a position of eminent usefulness as a professor in an important theological seminary.

In the biographical record of graduates from Amherst College is found the following notice of Dr. Bissell, in an account of the class of 1855:

"Edwin Cone Bissell, A.M., D.D., son of George C. and Elizabeth (White) Bissell, was born at Schoharie, N. Y., March 2, 1832; fitted for college at Monson Academy; teacher Williston Seminary, Easthampton, '55-66; Union Theo. Sem., '56-59; ordained at Weathampton, Sept. 21, 1859, and pastor, '59-64; pastor San Francisco, Cal., '64-69; stated supply, Honolulu, S. I., '69-70; pastor Winchester, '71-73; missionary of A. B. C. F. M., Gratz, Austria, '73-78; without charge, Boston, '78-80; student at Leipzig, Ger., '80-81; professor of the Hebrew language and literature, Hartford, Ct., since '81; captain of Co. K., 52d Mass. Vols., '62-63; associate editor of *Pacific* (Cal.), two and a half years, author of 'The Historic Origin of the Bible,' 'The Apocrypha of the Old Testament,' *Inaugural Address*, 'Proposed Reconstruction of the Pentateuch'; D. D., Amherst, 1874; married, Sept. 6, 1859, Emily, daughter of Gran Pomeroy, of Somers, Ct.; one child."

Rev. Alfred Brooks Dascomb succeeded Dr. Bissell. He was installed March 4, 1874; Rev. Dr. J. M. Manning, of Boston, preached the sermon. Mr. Dascomb, like his predecessor, was respected and beloved as an able preacher and a faithful pastor. During the year following his installation more than sixty persons were admitted to membership in the church, and each subsequent year had more or less distinctly the seal of

God's approval of his work. His health, however, was not robust, and during the year 1878 he was so seriously disabled that he felt under the necessity of resigning his office as pastor. His connection with the church was not, however, regularly dissolved till October 30th of the next year. His many friends in Winchester have ever held him and his wife in most affectionate esteem, and in his subsequent bereavement, by the death of Mrs. Dascomb, they felt the tenderest sympathy with him and his six motherless children.

Mr. Dascomb graduated from Dartmouth College in 1858, and studied theology, in connection with teaching in private. Some time after leaving Winchester he was installed pastor of the Congregational Church at Bellows Falls, Vt., where he still remains greatly respected as a man and a minister of Christ.

Rev. Charles Rollin Seymour was installed October 30, 1879, as Mr. Dascomb's successor in Winchester, by the same council that dismissed his predecessor. Rev. Joseph J. Duryea, D.D., of Boston, preached the sermon, and the exercises generally were of rare interest. During his pastorate of nine years the church enjoyed great prosperity, and he commanded the sincere respect of the great mass of the people without as well as within his own parish. The church, in various ways, increased in benevolent effort and usefulness. In March, 1886, they adopted the method of putting into permanent form in type the annual statistics embracing additions, dismissions, deaths, total membership, baptisms, benevolent contributions, etc., copies at the close of the year to be distributed.

In April of the same year the church voted to give a copy of the Bible to each baptized child of the Church, on attaining the age of seven years, the presentation to occur on the second Monday in June.

In October following, a Young People's Society of Christian Endeavor was formed.

In February, 1887, the "pledge card and envelope" system of giving to benevolent objects was so far adopted as greatly to increase the amount of offerings.

In May, 1887, a series of special Union Evangelistic services was held under the supervision of Rev. B. Fay Mills, resulting in a positive expression of faith on the part of many youth and the confirmation in the truth of some adults.

In the midst of manifold tokens of divine acceptance, it was with great regret on the part of not a few that Mr. Seymour felt constrained, April 15, 1888, to resign his office as pastor, the resignation to take effect on the 6th of May.

An Ecclesiastical Council, convened October 9th following, regularly dissolved the connection, with the sincerest respect for the retiring pastor and his family, and the most cordial sympathy with the destitute church.

Rev. Charles Rollins Seymour was born at Rootstown, Ohio, July 22, 1845; graduated from Western

Reserve College in 1870, and from Andover Theological Seminary in 1874. He was ordained and installed pastor of the North Church, Newburyport, October 8, 1874, where he remained till 1879, when he accepted a call to settle as pastor at Winchester. Since leaving Winchester, he has been happily settled as pastor in Bennington, Vermont.

The Board of Officers in the church at Winchester for 1889 were Robert Cowdrey, Charles E. Conant, Harrison Parker, (2d), Alfred C. Vinton, E. Lawrence Barnard, and Frederic H. Page, deacons; Rev. Edwin B. Palmer, Sylvester G. Pierce, and the deacons, standing committee.

Postscript.—Rev. Darius Augustine Newton was happily settled as Mr. Seymour's successor in the pastoral office, December 19, 1889, and, at the present date (April, 1890) has the promise of a very useful ministry. The church and society seem to be very pleasantly united in him, and ready to co-operate with him in the increasingly interesting work to which they called him.

Mr. Newton graduated from Amherst College in 1879, and from Andover Theological Seminary in 1882. Before coming to Winchester he had been twice settled as pastor: at Lancaster, Massachusetts, 1882-85, and at Stoneham, Massachusetts, 1885-89.

FIRST BAPTIST CHURCH.—The First Baptist Church in Winchester was organized August 18, 1852, by the following-named constituent members:

Benjamin Abrahams, Miss Mercy Abrahams, Mrs. Almira Andrews, Mrs. Ann S. Chaloner, Miss Eliza Chaloner, Olin W. Gardner, Samuel G. Grafton, Nathan Jaquith, Jr., Mrs. Nathan Jaquith, John Hopley, D. Wyman Locke, Mrs. Adaline Locke, Mrs. Mary McIntire, Rev. Nathan A. Reed, Mrs. Sarah B. G. Reed, Nathan A. Reed, Jr., Hatesil K. Stanton, Aaron D. Weld.

At the same meeting Rev. N. A. Reed was elected pastor, and, two weeks later, A. D. Weld was elected clerk.

The church was publicly recognized as a regular Baptist Church by an ecclesiastical council, of which Rev. J. W. Parker, of Cambridge, was moderator, and Rev. E. K. Fuller, of Medford, was clerk, on the afternoon of Sept. 2, 1852. The Baptist Churches in Malden, Woburn, Medford, Cambridge, West Cambridge, Charlestown, Lexington, together with the First Baldwin Place and Bowdoin Square Baptist Churches, of Boston, were represented in the council. The sermon was preached by Rev. Dr. Caldicott, and the prayer of recognition was offered by Rev. Ira Leland, the hand of fellowship being given by the moderator.

The first deacon, John Hopley, was elected November 3d of the same year; but he served alone in the office for nearly two years, until, in August, 1854, A. J. Bellows was elected to serve with him.

Mr. Reed's pastorate came to a close August 1, 1854, twenty-three persons having been added to the church during his brief ministry, nineteen of whom came by letter from other churches.

An interval of fifteen months elapsed before the

church was again favored with pastoral care. December 1, 1855, Rev. Edwin B. Eddy commenced his labors, although he did not unite with the church by letter until June 14, 1857. During his vigorous and successful ministry there occurred the well-remembered, wide-spread revival of '57 and '58, when the entire country, and especially the Northern States, were blessed by very extensive spiritual refreshings.

Before the pastorate of Mr. Eddy closed, upon the last Sunday in May, 1860, ninety-five members had been added to the church, of whom sixty-one united by baptism and twenty-five by letter from other churches.

The next pastor was Rev. Henry Hinckley, whose ministry commenced with his ordination to the work by an ecclesiastical council, called by the church, September 4, 1862; the sermon on this occasion being preached by Rev. D. C. Eddy, D.D., and the ordaining prayer offered by Rev. George M. Preston.

Up to this time the church had suffered the disadvantages incident to worshiping in Lyceum Hall. Mr. Hinckley immediately set about raising money to build a meeting-house, and so successful was he that June 9, 1864, witnessed the dedication of a neat and convenient edifice, upon the corner of Washington and Mt. Vernon Streets.

Upon this interesting occasion the sermon was preached by Rev. P. B. Haughwort, of Fall River; the dedicatory prayer was offered by the former pastor, Rev. E. B. Eddy.

Mr. Hinckley's pastorate was also successful in increasing the membership of the church by the addition of fifty-one new members, twenty-seven of whom were received by baptism, twenty-one by letter and three by experience.

Mr. Hinckley finished his work in Winchester November 2, 1866, and was succeeded the following spring, March 1, 1867, by Rev. S. J. Bronson, under whose ministry of a little more than two years fourteen united with the church, five by baptism.

Rev. L. G. Barrett became pastor February 4, 1870, and during a term of four years' service he was permitted to welcome to church membership thirty-eight by letter, twenty-eight by baptism and three by experience. Mr. Barrett closed his labors here with the month of January, 1874, and in March following the church called to the pastorate Rev. Horace F. Barnes, who commenced his ministry during the same month, and continued it seven fruitful years, thereby more than doubling in length of pastoral service the average of his predecessors.

During these seven years, sixty-six persons were received into the fellowship of the church, of which number forty-three were baptized and twenty-three were admitted by letter.

Mr. Barnes' pastorate closed March 1, 1881, and in August following Joseph F. Fielden became his successor. During the eight years which have elapsed since that date, one hundred and thirty-six members

have been received into membership, of whom eighty-four have united by baptism, forty-six by letter, four by experience and two by restoration. The present membership is two hundred and twenty-one.

The following are the names of those who have served as deacons during the thirty-seven years:

John Hopley,	Elected November 3, 1852
A. J. Bellows,	" August 2, 1854
Jas. M. Sandford,	" December 2, 1857
H. K. Stanton,	" January 11, 1861
Wm. H. Carleton,	" January 14, 1867

[The foregoing historical sketch of the Baptist Church was kindly furnished by the pastor, Rev. J. F. Fielden.]

UNITARIAN SOCIETY!—The first movement in regard to a Unitarian Society in Winchester was in the year 1855, when a Sunday-school was organized by the author of this sketch, and continued nearly four years under his superintendence. Its meetings were held, a portion of the time, in the Mystic School-house, and at other times in what is now Livingston Hall, and the house of Mrs. Mary Sharon, who cheerfully gave the use of her rooms, and was herself untiring in her efforts to make the school a success. This good lady died on Sunday, January 6, 1889, at the age of eighty-eight years, ten months, retaining her interest in the society to the last.

Funds for the support of the school were contributed by friends in this town, and by others in Medford, Cambridgeport and Boston. The Rev. Charles Brooks, of Medford, was very much interested in the school, and donated to it some books for a library. The Hon. Albert Fearing gave a large pulpit Bible. The average attendance at first was about thirty scholars, but toward the end it numbered fifty or sixty, about one-half of whom were brought by Mrs. Sharon from the Industrial School for Girls, which was then located in this town, and of which she was the matron. During that period evening meetings were held in the Mystic School-house, at which the Rev. John F. W. Ware came up from Cambridgeport, Charles Brooks and Theo. Tebbetts from Medford, B. Frost from Concord, all of whom have passed from earth, John M. Masters from Woburn, and others of the clergy who joined in this mission work and preached before interested audiences. The Sunday-school and church services, however, were discontinued in the spring of 1858.

Several years elapsed after that disbanding, when

¹ By Edwin A. Wadleigh. This history was completed only a few weeks before the very sudden and lamented death of the writer, in Boston. While walking from the Causeway Street Station of the B. & L. Railroad to the Court-House, about half-past eight, on Friday morning, January 10, 1890, and when near the Merrimac House on Merrimac Street, he was instantly prostrated by an apoplectic stroke. He was carried into the hotel and physicians were called, but he died in about an hour.—L. T.

the Rev. S. R. Calthrop came to spend a Sunday with his Winchester friends. About twenty-five persons who heard of his coming met in the parlor of Dr. Winsor's house, and there, on Sunday, November 19, 1865, listened to a sermon on "Inspiration," which inspired them with a determination to hear more of the same gospel. Another service was accordingly held in the lower Lyceum Hall on the following Sunday, at which more than eighty persons were assembled.

As the interest increased, on November 29, 1865, the following act of association was drawn up and signed :

"We, the subscribers, citizens of the town of Winchester and Commonwealth of Massachusetts, for the purpose of forming a corporation in accordance with the provisions of the thirty-second chapter of the Revised Statutes of Massachusetts, hereby associate ourselves together as a religious society for religious purposes, in the town of Winchester aforesaid, under the corporate name of 'The Winchester Unitarian Society.'"

The first meeting of the corporation was held on Wednesday evening, December 5, 1865, at which meeting C. J. Bishop was chosen moderator ; Charles P. Curtis, clerk ; F. Windsor, treasurer ; C. J. Bishop, T. P. Ayer, E. A. Wadleigh, F. O. Prince and Edward Shattuck, standing committee, in connection with the clerk and treasurer. A code of by-laws was adopted, and the third religious society in Winchester entered upon its corporate existence.

Lyceum Hall was engaged, and the Winchester Unitarian Society held its first religious service on Sunday, December 3, 1865, one hundred persons being present. A Sunday-school was formed in the afternoon, with Charles J. Bishop as its superintendent, and fifty scholars came together as the nucleus of the present school.

The pulpit, for the first six months, was occupied by different clergymen. At a special meeting of the society, May 18, 1866, it was voted to invite the Rev. Richard Metcalf, of Providence, R. I., to become the pastor. The call was accepted, and, on June 14, 1866, he was duly installed. The order of services was as follows :

Introductory prayer by the Rev. Eli Fay, of Woburn ; reading from the Scriptures by the Rev. John M. Masters, of North Cambridge ; original hymn by the Rev. S. G. Bulfinch, D.D., of Cambridge ; sermon by the Rev. James Freeman Clark, D.D., of Boston ; installment prayer by the Rev. S. J. Livermore, of Lexington ; charge by the Rev. Rufus Ellis, D.D., of Boston ; right hand of fellowship by the Rev. H. C. Badger, of Cambridgeport ; address to the people by the Rev. S. R. Calthrop, of Roxbury ; concluding prayer by the Rev. Thomas J. Mumford, of Dorchester ; benediction by the pastor.

The anniversary of this occasion was observed every year for fifteen years by a social gathering in the vestries of the church, where pastor and people came together and rejoiced in the bond of union which had been formed.

On June 26, 1866, William Everett, a son of Edward Everett, then a resident of the town and a worshiper in the church, presented the society with a set

of communion vessels, consisting of four goblets, two plates and a tankard.

After occupying Lyceum Hall for several years, it was found to be insufficient for the purposes of the society, and, in 1869, the incipient steps were taken toward the purchase of land and the erection of a house of worship.

In furtherance of this purpose it was deemed necessary to newly organize the society. After important preliminary steps, the associates for the building of a house of worship in Winchester and for organizing an incorporated religious society met, in pursuance of a warrant, at the time and place appointed. The meeting was called to order by George P. Brown, Esq., and Charles P. Curtis was elected and sworn as clerk. Thomas P. Ayer was chosen moderator. A new code of by-laws was adopted. Edward Shattuck was chosen treasurer and John B. Winslow, F. W. Perry, Frederick Winsor, S. W. Twombly and S. R. Symmes, standing committee in connection with the clerk and treasurer.

"Voted :—That all the doings of the society, acting under the name of the Winchester Unitarian Society be, and the same are hereby ratified, confirmed and adopted by the society as now organized.

"Voted :—That this Society, in accordance with the terms of the 28th Section of the 30th Chapter of the General Statutes, fix upon the sum of fifty thousand dollars as the value of the real and personal estate which it may hold in addition to its meeting-house."

Thomas P. Ayer and Franklin W. Perry were the building committee. A lot of land, pleasantly located on Main Street, near the centre of the town, was purchased of Francis Johnson and others in May, 1869. The corner-stone of the present church edifice was laid August 25, 1869, with appropriate ceremonies, in the presence of a large gathering.

Thursday evening, March 17, 1870, the meeting-house was dedicated to its sacred uses. The services were of a simple character and were begun by the Sunday-school children singing a hymn, after which the chairman of the building committee made an address and delivered the key of the house to the chairman of the standing committee, who made a proper response. Next followed an appropriate sermon by the pastor, after which select passages from Scripture were read by the minister and congregation alternately, and the services were concluded by singing a doxology. The architect of the building was Thomas W. Silloway, of Boston. The house is forty-six feet wide in front and forty-two in the rear, the extreme length being eighty-one feet. A tower on the front right-hand corner is one hundred and ten feet high. The auditorium contains seventy-two pews with seats for three hundred and eighty persons, and room in the gallery for fourteen pews. The cost of the land, building and furniture was about \$23,000, most of which was met by the generous contributions of members and friends of the society here and elsewhere. Among the subscriptions outside of the limits of the town were one of \$1000 from Alexander Moseley, and another of like amount from J. B. Winn, of Woburn.

In 1873 the late Emmons Hamlin, a member of the society, placed in the church a large chapel organ in an alcove which had been left for that purpose. This organ, since the decease of Mr. Hamlin, has been donated to the society by his widow and daughter.

The year 1881 was made tenderly memorable by the death of the beloved pastor,

REV. RICHARD METCALF. The son of Joel and Susannah (Houghton) Metcalf, of Providence, R. I., he was born in that city August 19, 1829. He received his early education in the public schools and had the reputation of great studiousness and fidelity. In 1843, on the establishment of the Providence High School, he became one of its first members, and, during his course there, decided to enter college and prepare himself for a professional career. Passing at length the examinations with the highest honors, he entered Brown University in 1847. There he took the highest rank among unusually able competitors from the very beginning. He was not only first in his class throughout, but was first in each separate study. At his graduation, in 1851, he delivered the valedictory address with an oration on "The True Fruits of Scholarship." Declining an offer of an important place among the offices of instruction in the university, he immediately entered the Cambridge Divinity School, from which he graduated in 1854, and at once took charge of a young and struggling society in Bath, Maine. Though very successful there, ill health obliged him to relinquish his pulpit in 1857 and return to Providence for rest. He was not, however, idle, but, so far as his strength allowed, he still preached from time to time, and for a year took charge of the Unitarian pulpit in Detroit, Michigan, very happily. A year later he was called to Meadville, Pennsylvania, where he was settled January 30, 1860. While at Meadville he was married, August 19, 1861, to Miss Sarah Perley Loring, of Concord, Massachusetts, a happy connection broken only by her death in October, 1867.

Obliged by renewed illness to resign again, in 1865, the pastoral office, Mr. Metcalf took refuge once more in Providence. Meanwhile, with partially restored health, he was induced to accept a very pleasing invitation to resume the pastoral office in Winchester. A happier union between pastor and people was rarely formed. Though with still enfeebled health, he compelled the bodily infirmities which hampered his activity to augment and intensify his spiritual life.

Mr. Metcalf was married, September 20, 1870, to Miss Ellen Eugenia Morse, of Winchester, from whom, during the remainder of his life, he received unflinching sympathy in his professional interests and valuable help in his parish work.

In the spring of 1881 he was attacked while preaching by a sudden spasmodic cough, which never afterward left him. His society at once offered him a vacation, and he spent the month of April at the South, but with only slight benefit. He preached a

few times after his return, but the fatal symptoms of his disease showed themselves more and more unmistakably day by day. By Tuesday, June 28th, it was plain that the end was near. Through Wednesday night life was slowly ebbing, and on Thursday morning, June 30, 1881, at daybreak, he passed quietly away.

The funeral services were held on Saturday, July 2, 1881. A private service at the house was conducted by the Rev. Dr. Briggs, of Cambridge, with singing by the members of the Sunday-school. Public services were held in the church at one o'clock. The bearers were the standing committee of the society, and as they entered the church, carrying the coffin, the whole congregation rose, while the Rev. C. A. Staples, standing in the pulpit, recited some passages from Scripture, and the organ played a soft undertone accompaniment. The exercises were as follows:

Chant, "The Lord's Prayer," sung by four gentlemen of the parish; Scripture reading by the Rev. C. A. Staples; hymn, "He Leadeth Me," sung by the Sunday-school; address by the Rev. Dr. Briggs; hymn, "Father, Whate'er of Earthly Bliss," sung to the tune of "Naomi," by the same male quartette; reading of a poem by Dr. Windsor, written on the death of Lady Augusta Stanley by Mrs. Charles, the author of the "Schonberg-Cotta Family:"

"O blessed life of service and of love!" etc.

After the reading of the poem, at the special request of Mrs. Metcalf, the hymn, "Holy Spirit, Source of Gladness," was read by the Rev. Mr. Barber, of Somerville, and sung by the congregation. Benediction by the Rev. Dr. Briggs.

The final offices were performed at Wildwood Cemetery, where a lot had been selected on the slope of the hill just southeast of the soldiers' monument.

The society erected a granite monument, in the shape of a pulpit or reading-desk, bearing this inscription on the front:

In memory of Rev. Richard Metcalf, for fifteen years the devoted and beloved pastor of the Winchester Unitarian Society, this monument is erected by his people.

"When the eye saw him, then it blessed him,
When the ear heard him it rejoiced in him."

Born in Providence August 19, 1829.

Settled in Winchester June 14, 1866.

Died in Winchester June 30, 1881.

On the top of the monument, which resembled an open book, was an extract from an Easter sermon by the deceased during the previous year.

The Ladies' Friendly Society also placed a bronze tablet on the church wall on the left of the pulpit, bearing this inscription:

1866.

1881.

In Memory of Richard Metcalf, the first pastor of this society, and in grateful remembrance of his happy and devoted ministry of fifteen years, this tablet is placed in the church which he dedicated "to the glad worship of God."

During the year following the decease of Mr. Metcalf the pulpit of the society was supplied by different clergymen. On July 10, 1882, a call was unanimously extended to Theodore Chickering Williams, of Roxbury, a graduate of Harvard, who had

preached to the great acceptance of the society several times. Mr. Williams, in reply, expressed his willingness to accept until the society was better acquainted with him, and he with them, but was willing to come and preach to them and perform all other pastoral duties for three months from September 1, 1882. This offer was accepted, and Mr. Williams commenced his labors here September 1, 1882. At the annual meeting of the society, November 9, 1882, the invitation to Mr. Williams was renewed and accepted by him, and he was ordained and installed on Friday evening, November 24, 1882. The sermon was preached by the Rev. Edward Everett Hale, D.D., of Boston, and the Revs. Henry H. Barber, Francis G. Peabody, William I. Nichols and Edward H. Hall were the other participants in the service.

The pastorate of Mr. Williams, so happily formed, was of short duration. After a single year of service he received a call to the Church of All Souls, in New York. This call, after mature reflection, and with expressions of kindness and consent from his Winchester society, he accepted, and closed his labors with the parish July 31, 1883.

On Dec. 3, 1882, Mr. Charles Albert Prince, son of Hon. F. O. Prince, generously offered to present to the society a clock, to be placed on the gallery front inside of the church edifice, as a memorial of his deep interest in the society and regard for its late pastor. The offer was accepted, and a handsome marble clock put up in the place selected for it, with the name of the donor inscribed thereon.

The pulpit was again supplied by various clergymen until April 24, 1884, when an invitation was extended to the Rev. John Lewis Marsh, of Northfield, Mass. The invitation having been accepted, Mr. Marsh began his ministry June 1, 1884, in a very simple manner. The minister and the congregation united in responsive services, consisting of selections from the Scriptures, singing and prayer. Dr. F. Winsor, the chairman of the standing committee of the society, gave a welcome to the new pastor, to which he responded in fitting words. An original hymn by the Rev. George W. Cooke was sung, followed by a sermon by the pastor, and the fellowship of the churches by the Rev. H. C. DeLong, of Medford, and other exercises.

On May 27, 1888, Rev. J. L. Marsh sent in his resignation as pastor of the society, which was accepted at a parish meeting June 21, 1888, with the following expression of opinion, unanimously adopted:

Resolved, That in accepting the resignation of our pastor, Rev. J. L. Marsh, we assure him of our hearty good wishes for the future welfare and happiness of himself and his family, which can never be a matter of indifference to us, who have known and experienced his kindness, manliness and sincerity for four years past."

After having the pulpit supplied for several months by candidates, it was voted at a parish meeting, Feb. 27, 1889, to invite Rev. Herbert Mott, of Wayland, to

become the pastor, and March 14, 1889, a letter of acceptance was received from him, and his installation took place on Wednesday evening, May 29, 1889. The order of services was as follows, viz.:

Organ Voluntary . . . Invocation by Rev. J. B. Mott, of Salem.
Introductory Service By Rev. H. C. Parker, of Woburn.
Anthem.
Reading of Scriptures Rev. H. C. DeLong, of Medford.
The Installation By H. A. Emerson
(Chairman of Standing Committee).
Installing Prayer Rev. C. C. Everett, D.D., of Cambridge.
Anthem.
Charge to the Minister Rev. Brook Herford, of Boston.
Anthem.
Address to the People Rev. T. C. Williams, of New York.
Original Hymn.
Benediction By the Pastor.

The present officers of the society (November, 1889) are as follows:

Clerk, Samuel S. Symmes; Treasurer, Marshall H. Dutch; Standing Committee in connection with the Clerk and Treasurer, Henry A. Emerson, George H. Eustis, Lewis Parkhurst, B. S. Briggs, F. W. Daniels. There are also Committees on Social Meetings, Hospitality, Home Charities, Church Edifice and Grounds and Music appointed at the annual meeting of the society, who serve one year and report at that time on their doings. The communion service is administered at stated times during the year.

The operations of the society outside of the church services are carried on through the instrumentality of the Sunday-School, the Ladies' Friendly Society, the Good-Will Club and the Women's Auxiliary.

The Sunday-School meets immediately after the morning church service, excepting during the months of July and August. At the present time (1889) it numbers 139 and is officered as follows: Superintendent, Samuel S. Symmes; Assistant Superintendent, Joseph J. Todd; Librarian, Miss Alice F. Symmes; Secretary, Herbert W. Dutch; Teachers, Rev. Mr. Mott, J. H. Dwinell, Mrs. H. Mott, S. F. Cushing, J. T. Wilson, S. C. Bailey, L. A. Bradbury and Misses E. A. Stevens, A. F. Symmes, Anna Folsom, M. E. Moseley, R. A. Holbrook and Delia Whitney. It has its penny contributions every Sunday to the support of the Children's Mission to the Children of the Destitute and for other purposes. The collections for the year (1889) amounted to \$44.17.

The Ladies' Friendly Society was organized February 14, 1866, to excite and foster a kindly interest among its members and to raise funds for the church and parish. "Not to be ministered unto, but to minister," is the motto upon which the society has acted since its formation nearly twenty-four years ago. Its members have worked harmoniously together, and from their annual sales and in other ways have contributed largely towards the current expenses of the society, to the extinguishment of the church debt, and the providing of the church edifice with many things useful and necessary to make it pleasant and attractive to the worshippers therein.

Its meetings are held on the second and fourth Thursdays of each month in the church parlor and the society usually holds a sale of useful and fancy articles made by the members yearly in the month of December. Its officers for the year 1889 are: President, Mrs. Henry A. Emerson; Vice-President, Mrs. George H. Eustis; Treasurer, Mrs. B. S. Briggs; Directors, Mrs. Joel H. Brown, Mrs. E. E. Metcalf, Mrs. Thomas S. Spurr, Mrs. F. C. Manchester, Mrs. H. D. Nash.

The Good-Will Club was organized March 17, 1871, and meets on the third Tuesday of each month, from October to April. Its object is "to do good and get good." Its exercises are of a literary, musical, dramatic and social character. Any person attending the church and Sunday-school may become a member by signing the constitution of the club.

The club has, for several seasons, supported a sewing-school for poor children and others: has been well patronized, and in many other ways has done good work.

A Flower Committee from this club keeps the pulpit of the church supplied with flowers for the Sunday services during the year. Its present officers are: President, Rev. Herbert Mott; Vice-President, Louis F. Cutter; Treasurer, Mr. Edgar W. Metcalf; Secretary, Miss Grace Brown.

The Women's Auxiliary is composed of ladies of the society interested in the promotion of Unitarian Christianity, and is intended to aid the American Unitarian Association in its objects and aims.

DR. FREDERICK WINSOR.—The history of this society would be incomplete without a sketch of one who was so intimately identified with it from its formation, and who deceased early in the year 1889.

Frederick Winsor was born in Boston October 2, 1829, and was the son of Thomas Winsor. He graduated from the Boston Latin School in 1847, and from Harvard University in 1851, with honorable distinction. Subsequently he took a course in the Harvard Medical School, and graduated therefrom in 1855. He first practiced at Salem, in this State; was in charge of the State Hospital on Rainsford Island, in Boston Harbor, under Governor Andrew, in 1859; was surgeon of the Forty-ninth Massachusetts Regiment, under Colonel (afterwards General) Bartlett, in 1862 and 1863, and had two special assignments to the front from State headquarters. He took up his residence in Winchester in 1864. During his residence here of a quarter of a century, Dr. Winsor occupied numerous town offices of honor and trust, in which he faithfully and acceptably served, among which may be mentioned that upon the School Board for four years, 1864-67; a trustee of the Public Library for many years; a member of the Board of Health for several years; medical examiner for this part of Middlesex County for several years prior to his last sickness.

In the various societies organized to advance Christianity, elevate the morals, promote the welfare and prosperity of the town, the deceased, notwithstanding his extensive practice, was actively interested, and found time to give to them his earnest sympathies and hearty support. He was one of the vice-presidents and trustees of the Winchester Savings Bank from its organization, in 1871, to the time of his death; was one of the early members of the Winchester Historical and Genealogical Society; a member of the Village Improvement Association; a member of the Calumet Club, and surgeon of the D. Weld Post, G. A. R.

Since the formation of this society the deceased was its steadfast friend and supporter, having served as chairman of its Standing Committee from its organization until within a few years past. He has been a superintendent or teacher in the Sunday-school from its beginning up to the time of his last sickness; was president of the Good-Will Club in its earliest years, and was one of the two who administered the communion service since its establishment, and whatever movements were made in the church and society, he was ready to do his part in their advancement.

He became a member of Wm. Parkner Lodge, F. & A. M., July 11, 1865. He fully exemplified in his life his Masonic obligations, and his presence was always welcomed among the brethren.

As a physician Dr. Winsor was well and widely known, and commanded the respect and confidence of his brethren, who thought highly of his opinions, and relied upon his clear medical statements. His medical practice of late years, during which he had only rare opportunities for rest or recreation, had weakened and sown the seeds of disease in his system, and he was stricken down with a severe attack of sickness. He recovered somewhat from the attack, and it was thought that a sojourn of a few months in the balmy air of the Bermudas would restore him to comparative health. But these expectations were not realized. After his arrival there he was again attacked by the disease, and a slight chill on going out brought on pneumonia, from which he died on February 25, 1889. He was buried in the cemetery at Bermuda; the funeral services were conducted by Rev. Howard N. Brown, of Brookline.

Dr. Winsor married a daughter of Rev. Henry Ware, Jr., a minister of the Second Church in Boston and a professor at Harvard, who survives him with her seven children.

Memorial services were held at the Unitarian Church here, March 10, 1889, and were conducted by Rev. E. H. Hall, of Cambridge, assisted by Rev. C. F. Russell, of Weston, Rev. J. H. Allen, D.D., of Cambridge, and Rev. J. L. Marsh, of Biddeford, Maine, a former pastor of the society. A letter was read from Rev. T. C. Williams, of New York, also a former pastor of the society. The church was densely

crowded with the friends of the deceased from this and other towns, and the services were deeply interesting.

The Ladies' Friendly Society will soon place on the walls of the church a memorial tablet to the memory of the late Dr. Winsor.

METHODIST EPISCOPAL CHURCH.¹—The first public meeting of the Methodists was held Thursday evening, April 20, 1871, in Union Hall.

Rev. C. L. Eastman, of the Woburn Methodist Episcopal Church, preached to an audience of sixty, and after the sermon conducted a general service of prayer. At this time there were only four known families of this denomination in the town, but believing that there was opportunity for their particular work, and desiring to propagate the Kingdom of God by the establishment of their own society, they arranged for other services, and with the exception of a few summer months in the first year of their history, they continued in regular worship.

From the first the movement was successful, other families soon joining, and the nucleus of a new church appeared in the formation of a class, January 12, 1872.

So rapidly did the interest develop, that on February 21, 1872, a preliminary meeting was held at the house of Mr. John C. Mason, at which officers of the society were informally nominated, and other steps taken for perfecting the organization.

The first Quarterly Conference was held at the house of Mr. Ferdinand Scudder, April 25, 1872, by Rev. David Sherman, D.D., the presiding elder, and the following-named persons were formally elected stewards, viz.: Messrs. John C. Mason, George E. Cobb, Ferdinand Scudder, Robert M. Armstrong, James S. Owen and Lewis Erskine; Ferdinand Scudder was appointed class leader, and Robert Armstrong was confirmed superintendent of the Sabbath-School, which had already been instituted, beginning with forty members.

Rev. Charles W. Drees, who had been sent to the field March 3, 1872, was now made preacher in charge of the Winchester Methodist Episcopal Church.

The society worshipped at times in the several halls of the town, and a few Sabbaths in the Unitarian Church, the use of which was kindly offered. But after four years it was apparent that the continued growth of the society demanded a house of worship. The necessity was urgent, but the way did not at once open for the erection of a church edifice. Some steps were taken, however, with this object in view, and Mr. John C. Mason purchased a lot of land on Pleasant Street (where the church now stands), which he designed for this purpose. In the summer of 1875 Miss Butman, a member of the Bromfield Street Methodist Episcopal Church, Boston, made the first donation to the building enterprise. To this other funds

were added, and the work commenced early in the autumn of 1875. The house was completed in the following spring, and dedicated June 1, 1876. The dedicatory sermon was preached by Rev. R. R. Meredith, of Boston.

The building committee were John C. Mason, James S. Owen and George Gurnsey. In this work the society was aided substantially by friends of other local denominations, among whom was the late D. N. Skillings, now held by this people in most respectful memory for his large generosity.

The growth of the church has not been large in the recent years, but hopeful and healthful. It has a membership of 120, a Sunday-School of 123.

During the first years the pulpit was supplied by pastors of neighboring Methodist Churches and students from the School of Theology of Boston University. Since April, 1874, the following members of the Annual Conference have served as pastors: Rev. D. S. Coles, during whose ministry the church edifice was built; Rev. Geo. H. Cheney, Rev. W. H. Meredith, Rev. J. M. Leonard, Rev. J. H. Mansfield and Rev. George H. Perkins.

The first thirteen names recorded were Cyrus Houghton, Leonora Houghton, James S. Owen, Robert M. Armstrong, Samuel Armstrong, Elizabeth L. Mason, Ferdinand Scudder, Jennie Scudder, Mary A. Locke, Maud Sanborn, Jennie M. Brown, Nancy Robinson and Elizabeth A. Oliver. They were earnest and devoted people, believing in the possibility of actual and present salvation of all mankind through faith in Jesus Christ.

They knew the power of the Gospel by personal experience, and told the story of repentance and the new birth so positively that they commanded attention, and persuaded many to join them in their distinctive faith.

While the society owes much to all these original members, and to many others who united with them, yet there are some whom we should remember with more than passing mention.

Cyrus Houghton was the oldest member when the church was organized, and with his noble wife took a deep interest in the new enterprise. His death, April, 1884, was a great loss to the people. Mrs. Houghton still remains (July, 1889), strong in the faith, and with the golden sunset of a ripe old age crowning her life, she looks forward confidently to a glorious immortality. Robert M. Armstrong, the first superintendent, Ferdinand Scudder, the first class-leader, and his devoted companion, were untiring workers, and with great zeal helped on the cause.

Among those who will long be remembered as holding a prominent place in the early history of the church, is William F. Fitch, for eleven years filling, with rare talents for the office, the superintendency of the Sunday-School, and resigning, to the regret of all, only when necessary absence from home compelled it.

¹ By Rev. George H. Perkins.

Mr. Isaac N. Pierce, the present superintendent, has won the highest confidence and respect of all by his faithful and efficient service. He may be recorded as one providentially sent to the school when a wise leader and helper was greatly needed.

The names of Mr. and Mrs. John C. Mason are inseparably connected with the history of this society. Beginning, they continued with it in unceasing activity for more than fifteen years. Planning its most liberal prosperity, bearing the heaviest burdens, and caring for it as guardians of a sacred trust, they have made themselves honor which all delight to recognize.

Although Mr. Mason's failing health now incapacitates him for further service, and Mrs. Mason's increasing care prevents to a degree her former prominence in the life of the church, yet their work remains, and coming generations will walk in their light and share the results of their labors, thanking God for all the faithful men and women who laid the foundations of the Winchester Methodist Episcopal Church.

ORGANIZATION MAY 1, 1889

Pastor.—Rev. George Henry Perkins.

Trustees.—Hiram Newton Turner, president; William Spooner Walbridge, treasurer; Warren Lord Knox, clerk; William Augustus Stevens, John Clark Mason, William Farrington Fitch, John North Mason, Frank Lyman Ripley.

Stewards.—Frank Lyman Ripley, chairman; William Augustus Stevens, treasurer; William Farrington Fitch, secretary; Warren Lord Knox, district; Isaac Newton Pierce, Robert Mitchell Armstrong, Frederick Orrin Snow, William Spooner Walbridge, George Bartol Turner, John North Mason.

Superintendent of Sunday-School.—Isaac Newton Pierce.

ST. MARY'S CHURCH (Roman Catholic).—This church, organized in 1873, is on Washington Street. Rev. William M. O'Brien, pastor; Rev. Dennis Lee, assistant. Services every Sunday, first Mass at 8 A.M., second High Mass at 10.30 A.M., Sunday-school at 2.30 P.M., vespers, 3.30 P.M.

CHURCH OF THE EPIPHANY.¹—Early in the year 1882, through the interest and zealous labors of several ladies, the services of the Protestant Episcopal Church were started in Winchester.

The first service was held in Harmony Hall, on the last Sunday in February (February 26, 1882), the Rev. Charles P. Parker, of Cambridge, officiating. Mr. Parker, although residing in Cambridge, and unable to do any pastoral work, continued in charge of the mission services until October, 1882, during that time having the assistance of several other clergymen.

The work having been accepted by the Diocesan Board of Missions, the Rev. Charles Morris Addison, rector of Saint John's Church, Arlington, was appointed missionary in charge, officiating for the first time October 1, 1882. The attendance having increased by November, the services were held in the Methodist Church, which was hired for Sunday afternoons.

¹ By the Rev. Meers, Charles M. Addison and John W. Suter.

A Sunday-school was organized in December, and early in 1883 the Ladies' Guild was formed. About this time the congregation was organized into a mission with the following committee:

The Rev. Charles Morris Addison, missionary; Mr. Irving S. Palmer, warden; Mr. Samuel W. McCall, vestryman; Mr. Frank J. Willa, clerk; Mr. Charles Gratiot Thompson, treasurer. Previous to this Mr. George B. Shepley was treasurer.

It was soon decided by the congregation that the proper conduct of the services and the future growth of the Episcopal Church in the town, called for a church building.

By the beginning of the year 1884, subscriptions were received for a small Episcopal Church; the land on which to place it having been generously offered by Mr. D. Nelson Skillings. Plans were kindly made by Mr. George D. Rand, and the prospect was so encouraging that work was begun in August, 1884.

The church was completed in January, 1885, and the first service was held in it on January 25th.

The church having been fully paid for, it was consecrated by the Right Reverend Benjamin H. Paddock, Bishop of the diocese, assisted by a large number of the clergy, on Friday, May 29, 1885.

In the spring of 1885 the Rev. C. M. Addison resigned, and the Rev. John Wallace Suter, who was ordained in June of the same year, was appointed minister of the mission, taking charge the 1st of July. At Easter, 1887, the aid heretofore given by the Board of Missions was relinquished, and, April 10, 1888, an independent parish was organized and incorporated, with the Rev. J. W. Suter as rector; Messrs. C. Gratiot Thompson and Samuel Walker McCall were chosen wardens; Mr. F. J. Wills, clerk; Mr. C. G. Thompson, treasurer; and Messrs. C. W. Bradstreet, F. W. Jenkins, J. Lynam, J. E. Lyon and G. H. Richards, Jr., vestrymen.

An organ was procured for the church in the fall of 1886, and was dedicated at a special service on December 1st of that year.

At the time of writing, the church numbers 125 communicants and eighty children in the Sunday-school. The receipts for parish expenses for the year past were \$1951.92, and the offerings for charitable, missionary and other purposes \$749.93. The ladies of the church are organized in a Guild which is full of good works, and the girls of the congregation also have their working Guild.

During the few years of its existence, the church has grown rapidly with the growth of the town, and thankfully welcome the prospect of being obliged, in the near future, to enlarge its accommodations for work and worship.

HIGHLAND BETHANY SOCIETY.²—The Highland Bethany Society, of Winchester, was organized June 6, 1886, with twenty-nine members. Its object was

² By an officer of the Bethany Society.

to provide a Union Chapel for the purpose of maintaining evangelical preaching, prayer meetings, Sunday-school and such other meetings as should subserve the religious interests of the community.

Through the earnest efforts and generous co-operation of the Highland people, the chapel was completed and dedicated, free of debt, Sept. 5, 1887. The total expenditures were \$2700. Of this sum, the largest subscription, \$500, or nearly twenty per cent., was from Mrs. M. E. Bodge, whose money laid the foundation of the enterprise; sixteen per cent. from the Ladies' Society; fifteen per cent. from friends in Boston; ten per cent. from Woburn, and the balance from Winchester. A week after the dedication a Sunday-school of one hundred members was organized.

The running expenses of the chapel are met by the weekly pledge system; and all the children's collections in the Sunday-school go to benevolence.

The present officers (1889) of the Highland Bethany Society are: J. Winslow Richardson, clerk; Henry Smalley, treasurer. Standing Committee: E. Lawrence Barnard, Luther Richardson and wife, J. E. Rice and wife, Miss Grace Lawrence, A. C. Bell.

The officers of the Sunday-school are: E. Lawrence Barnard, superintendent; Walter Rice, secretary; George W. Richardson, treasurer.

The officers of the Ladies' Bethany Society are: Mrs. J. S. Richardson, president; Mrs. Henry Smalley, treasurer.

BIOGRAPHICAL.

HENRY CUTTER.¹

Henry Cutter was a descendant of Richard Cutter, who emigrated from England, and settled in Cambridge, Massachusetts, about 1640. The ancestors of Henry Cutter resided principally in Cambridge and Medford. From Richard Cutter the line was through *Gershom*², *Gershom*³, *Gershom*⁴, *John*⁵, *John*⁶, to *Henry*⁷. He was born at Medford, May 27, 1805, where his parents then resided. His father, John⁶ Cutter (1770-1825), removed to Woburn in 1810, having purchased the mill property at Cutters Village (Winchester) after-

¹ By W. B. Cutter.

wards occupied by his sons; the latter occupied a tide-mill in North Chelsea, built by their father in 1817, till 1830, when they sold the estate and removed to Winchester. Here, in 1830, the brothers, Stephen and Henry, and uncles Samuel and Amos Cutter, commenced the mahogany business under the firm of S. Cutter & Co. Their mill was destroyed by fire, March 20, 1840, and a new establishment was erected on its site. The brother Stephen Cutter, born at Medford, October 22, 1797, is yet living, greatly respected, in his old home at Winchester, at the age of ninety-two. Henry Cutter was engaged in the mahogany business with his brother Stephen until about the year 1848, when he sold out and started anew under the firm of H. Cutter & Co. He retired in 1864. Afterwards he was treasurer of the old Middleboro' Marble Company. He had been also a director of the Blackstone National Bank in Boston since its founding.

At a special meeting of the directors of the Blackstone National Bank of Boston the following resolutions were passed:

"WHEREAS, An all-wise Providence has removed from us one of our number, who has, since the organization of the bank, occupied a seat at this board—

"Resolved, That we realize that by the death of Henry Cutter we are separated from one whose genial presence was ever a delight to us, and whose faithful and conscientious service was always at our command.

"Resolved, That the example of his life, marked as it was with kindness, honesty and integrity in all its relations, will ever be worthy of imitation, and a precious legacy to those who are left behind him."

Mr. Cutter was a man of sound business principles, and after retiring from active participation in the mahogany concern, interested himself in banking and in the care of his own estate. He died suddenly of heart-disease, in Winchester, August 4, 1879, aged seventy-four.¹ Mr. Cutter married, in 1827, Mrs. Nancy (Wyman) Cutter, the widow of his brother William. She was the daughter of Jesse and Susanna (Richardson) Wyman, of Woburn. She is still living. The children of Henry Cutter were two daughters: (1) Nancy W., the wife of Rev. Stephen A. Holt, now a resident of Winchester; and (2) Ellen, the wife of Thomas S. Holtou, died 1858, aged nineteen.²

CHAPTER LXII.

BOXBOROUGH.

BY LUCIE C. HAGER.

SOME one has said, "Time, like distance, lends enchantment to the view, and the pictures of the past, seen through the mellow light of centuries, become soft and beautiful to the sight, like the shadowy outlines of far-off mountain peaks, whose purple heads half hide themselves behind a screen of clouds." The men and women who lived, and loved, and labored, and reared their homes among these hills and in these valleys, a hundred years ago and more, had they been interrogated, would doubtless have replied, as did one of the present citizens when questioned with regard to his ancestry, "Oh, no, we never did anything remarkable, nothing worthy of notice." And yet to us of the present day, as we gaze down the vista of the departed years, their words and acts are of very great interest and importance, and the labors and toils which to them may have seemed to bear such meagre fruitage are to us, after the lapse of more than a century, invested, as it were, with a halo of glory.

We look back still farther into the past, through another century or more, and lo! the red man is lord of all these sunny slopes and vales; and here, wild and free as his own native hills, he made the forest his hunting-ground. We are informed by early historians that the Rev. John Eliot, of Roxbury, visited this region some time in the seventeenth century. He was a philanthropic man and an earnest Christian. With him came General Daniel Gookin, the historian, who had in charge at that time, as an agent of the Government, all the Indian tribes in Massachusetts. Here they found the chief of the Nashoba Indians, John Tokatawan, and the venerable Eliot preached and prayed in the open air, and James Speen and his Indian choir sang a psalm. But early in the eighteenth century the white men sought a place in this region where they might build their log huts, found their homes, and rear their families. We of to-day can scarcely realize through what difficulties and dangers the first permanent settlements were made.

Boxborough was formed by taking a portion from three adjoining towns—the largest part from Stow, a smaller portion from Littleton, and a piece of Harvard making up the town, whose outline is nearly a square. Previous to 1750 the boundary line between Stow and Littleton was near where the present town-house stands, running in a southeasterly direction past the house now owned and occupied by Mr. E. B. Cobleigh, which was then in Stow, and onward to a heap of stones in a field in front of Mr. Furbush's dwelling, thence in the direction of Mr. Herbert Blanchard's residence.

Boxborough, though the smallest town in Middle-

sex County, is yet "beautiful for situation." From her lofty hill-tops the true lover of nature is never weary of gazing on the panorama of beauty which is everywhere spread out before him. Whichever way he turns—north, east, south or west—pictures of rare rural loveliness greet his eye and delight his soul. No wonder that her sons and daughters love and are proud of their birth-place. Said one of her former residents, as he came up to an annual gathering "in the old meeting-house on the hill" (now the town hall): "I always feel as if I was nearer heaven when I come up to this hill,"—words lightly spoken, doubtless, and yet they should be true, for surely when one long since gone forth from his early home to active, earnest life among men, returns again and feels his feet pressing once more the soil of his own native hills, hallowed by so many happy and sacred associations; when his eyes behold again, as in his youthful days, the delightful scenery, so familiar grown; when his hand clasps the hand of neighbor and friend as in early youth and his ears hear as of old the loved voices of his childhood—he may feel more nearly akin to the early days of free-hearted innocence and happiness, and therefore "nearer Heaven."

The residents on the outskirts of the towns mentioned,—Stow, Littleton and Harvard,—drawn there probably by the fertility of the soil, tilled their farms and raised their crops, but found themselves subjected to much inconvenience through their remoteness from any place of public worship. So they formed a society among themselves, purchased the old meeting-house in Harvard in 1775, and then petitioned the General Court to be set off as a separate town.

The town is situated in the west central part of Middlesex County, and is bounded north by Harvard and Littleton, east by Littleton and Acton, south by Stow and west by Harvard. From the assessors' report of the present year (1889) we have the following: 6428 acres of land; total valuation of assessed estate, \$246,705; polls, 108; number of scholars in the public schools, 63. According to the census of 1885 the population was 348; in 1850 it numbered 395; and in 1837 the number was 433. The number of voters in 1889 was 76; in 1834 the number was 99. In 1847 the whole valuation was \$268,913. The amount of taxes for 1889 was \$2840.71; in 1847 the amount was \$1299.08. In the town safe, in very good condition, there is an outline map on parchment by Silas Holman—scale, two hundred rods to an inch. His survey was made in 1794, and the area given is 7036 acres and one hundred rods. By a comparison of some of the foregoing figures, it would seem that the town had been slowly losing ground for at least a half-century. There seems to be good reasons for this. It has been a farming community from the first, but although smallest in population of any town in Middlesex County, it yet ranks second only in agriculture. The value of its agricultural products in 1885 was \$92,349. But it is situated at a

distance from market towns and main thoroughfares; though two busy streams, Stony Brook and the Assabet River, have their source here, it has no water-power of its own by which the many industries of the present age are carried forward to so great extent in other places; it has not the advantage of being a railroad centre. The Fitchburg Railroad skirts its eastern border, with stations at both Littleton and Acton—none in Boxborough—and that is all; it was of later incorporation than any of the other towns about us. As a farming town it began its existence over a century ago, and as such it is destined to remain. There is no employment other than farming to call in those from without, and her own sons and daughters are drawn away to other towns and cities in the hope of enjoying their greater advantage. A good town for one's birth-place; a good place to begin the culture of those sterling qualities which shall grow and increase and actuate in all the affairs of after-life.

As I look at the materials before me for the making of this history of Boxborough, gathered in many different ways and brought together under various heads and dates, I feel as though it would be, at least, a saving of thought and labor, could one do, what the "projector" in Gulliver's Travels was trying to accomplish, viz., the writing of books in philosophy, poetry, politics, laws, mathematics, theology and history (?) without any assistance whatever from study or genius, by simply throwing upon a frame all the words in his vocabulary,—in the "ordinary proportion of verbs, participles, nouns," etc., and then setting his pupils at the work of grinding out the various tomes. But upon second thought it would be better, doubtless, to classify and bring under the correct dates and headings these facts and incidents of early times.

As we have already remarked, it was for convenience of public worship, not the desire for a new town, that first led the residents of these remote portions of three other towns to band themselves together. The purchase of a church building has also been alluded to. In an ancient record purporting to be "The Town Book for Births and Deaths and Strays and Poor Persons for Boxborough," we find the following:

"At a meeting Held on the 31 Day of January, 1775. By a Certain Society part Belonging to Stow and part of Littleton and part of Harvard, at the house of En^d Abel Fletcher, In order to Erect a meeting-house for the publick worship of God—lly. chose Mr. Coolidge Moderator, 2ly. Chose Mr. Bennet Wood, of Littleton, and Mr. Joseph Stone, of Stow, a Committee for purchasing Harvard Old meeting-House.

"A Covenant to indemnify s^d Committee:

"This may certify that we the subscribers Do Covenant and engage with Each other that we will pay our subscriptions as is hereafter set Down towards purchasog the Old meeting hous of Harvard, for which purpose we have chosen Mr. Bennet Wood of Littleton and Mr. Joseph Stone of Stow to Represent and act for us at a vandue in order for Sail of s^d House on the Second Day of February next and Do engage hereby to fulfill according as they the s^d Bennett Wood and Joseph Stone Shall bid or otherways agre at s^d vandue, in testimony thereof we Do hereunto set our hands this 31 Day of January, 1775.

"Silas Wetherbee, one-quarter part.
Edward Brown, one-sixteenth part.

Edward Wetherbee, 2000 of shingles. 3ly. Voted to adjourn to meeting hous Spot."

Then the society met and voted to accept the Committee's report, and farther "voted to take down s^d Old Meeting house and move it to the spot agreed upon By s^d Society and Raise the Same." Mr. Silas Wetherbee is recorded as making a present to the society of three acres of land "for the use of a meeting hous Lot." Record is also made of the pecuniary aid rendered by each member of the new society, and of the work performed upon the newly purchased house of worship. November 25, 1776, the society

"voted to Except of the Report of the Committee Chosen to Examine accounts for work done which is as followeth:

old ten.

"We the subscribers Being appointed a Committee to Examine the accounts of the Society of Stow, Littleton, and Harvard have accordingly Examined the Same and we find Due for Each man above Named to pay the sum as set against his Name in the List above written."

In 1777, November 24th, the society again met and "voted to chuse a Committee to Petition the General Cort to Sett of s^d Society," and they accordingly chose Mr. Silas Taylor, Mr. James Whitcomb and Mr. Bennet Wood a committee for this purpose. The new society seems to have been unsuccessful in their efforts in this direction at the first, but committees were repeatedly chosen from among her citizens to present the petition to the General Court, and June 14, 1779, they voted to apply to Mr. Francis Dana, attorney, of whom Hon. Richard H. Dana was a grandson, "to Carry on our Memorialist Petition and Present it to the General Court, and voted \$100 for that purpose." But the attorney's efforts, even, must have failed, or the \$100 was too small a sum to

attract him to the cause for a sufficient length of time, for during the next four years the names of committees from among the citizens are often recorded. In 1780, when a committee was again chosen to apply to the General Court to be set off, they also voted "to chuse a committee to treat with the obstinate part of Our Society in Littleton." The "obstinate party" is referred to again a little later. It is not strange that the towns called upon to yield up a part of their own territory to form a new town should make objection, but there is no record of any demur on the part of either Stow or Harvard. Littleton seems to have been opposed to the transaction from the beginning. Three times more—December, 1780, January, 1782, and January 21, 1783—the same petition is presented to the General Court, and at last, after a six years' struggle, on the 24th of February, 1783, the petition is granted. The following is a copy of the Act of Incorporation :

"Commonwealth of Massachusetts, In the year of our Lord One thousand Seven hundred and Eighty-three. An act for Erecting a District in the County of Middlesex by the name of Boxborough. Whereas a number of Inhabitants living in the Extreme Parts of the Towns of Stow, Harvard and Littleton, Labour under many Inconveniences by Reason of their grate distance from any Place of Publick Worship, and have Requested this Court that they May be Incorporated into a District with all the Privileges of a town, that of sending a Representative to the General Court Excepted—Be it therefore Enacted by the Senate and House of Representatives in General Court Asssembled, and by the authority of the Same, That a Part of Stow, a Part of Harvard and a Part of Littleton, all which are Included within the Boundaries following, viz.: Beginning at the Road Southerly of John Robins' Buildings, and Running Southerly in a straight line to a Place called Flag hill, being two miles, three Quarters and ten rods to a heap of Stones; from thence Westerly in Stow, Two miles and a quarter to a stake and Pillar of Stones in the Harvard Line, then turning Northerly through part of Harvard to a white oak tree by a Causeway; from thence to the Place first set out from, be and hereby is incorporated into a District by the Name of Boxborough. And all the Polls and Estates that are Included within the said Boundaries shall belong to the said District, Except those of such of the Inhabitants of that Part Set off from Littleton as Shall not, within the Term of twelve months from the Passing of this act Return their Names into the office of the Secretary of this Commonwealth, Signifying their Desire to become Inhabitants of the said District. And be it further Enacted by the authority aforesaid that the said District be and hereby is invested with all the Powers, Privileges and Immunities that Towns in this Commonwealth do or may Enjoy, Except the Privilege of Sending a Representative to the General Court, and the Inhabitants of the said District Shall have leave, from time to time, to join with the Town of Stow in Choosing a Representative, and shall be notified of the Time and Place of Election in Like manner with the Inhabitants of the said Town of Stow by a Warrant from the Selectmen of the said Town to a Constable or Constables of the said District, Requiring him or them to warn the Inhabitants to attend the meeting at the time and Place appointed, which warrant shall be Seasonably Returned by the said Constable or Constables of the said District, and the Representative may be Chosen Indifferently from the said Town or District, the Pay or allowance to be borne by the town and District in proportion as they shall, from time to time, Pay to the State Tax; and be it further Enacted that Jonathan Wood, Esq., of Stow, be and hereby is empowered to Issue this Warrant, directed to some Principal Inhabitant within the said District, Requiring him to warn the Inhabitants of the said District, qualified to vote in Town affairs, to assemble at some Suitable time and Place in the said District to Chuse Such officers as Towns and Districts are required to Chuse in the month of March annually, Provided, Nevertheless, that the Inhabitants of the said District Shall Pay their Proportionable Part of all Such Town, County and State Taxes as are already assessed by the said Respective Towns from which they are taken, and their proportionable part of all Publick Debts Due from the said Towns, and also Provide for

the Support of all the Poor who were Inhabitants within the said District before the passing of this Act, and Shall be Brought back for maintenance Hereafter. And whereas it is fit and Necessary that the whole of the said District should belong to one and the same County, be it therefore further Enacted, by the authority aforesaid, that that Part of the said District which is set off from the Town of Harvard, in the County of Worcester, shall be and hereby is annexed and set to the County of Middlesex, and the line established by this act as the Boundaries betwixt the said Town of Harvard and the said District, shall hereafter be the boundary Line betwixt the said County of Middlesex and the said County of Worcester."

This instrument bears the signatures of Samuel Adams, president of the Senate, and John Hancock, Governor.

Accordingly, Jonathan Wood, justice of the peace, of Stow, issued the warrant—notifying and warning all voters to assemble at the meeting-house that they might perfect their organization by the election of the customary officers,—to Bennet Wood, one of the principal inhabitants of the new District of Boxborough. To the people of to-day the officers chosen and the offices filled, on that 10th of March, 1783, may not be without interest, and we give them entire. Jonathan Wood, Esq., presided as moderator.

Capt. Silas Taylor was chosen clerk of district; Capt. Silas Taylor, Mr. Silas Wetherbee, Ens. Abel Fletcher, Lieut. James Whitcomb, Lieut. Ephraim Whitcomb, selectmen; Capt. Phinebas Taylor, treasurer; Capt. Silas Taylor, Mr. Abel Whitcomb, Lieut. Ephraim Whitcomb, assessors; Mr. Joseph Howe, Lieut. James Whitcomb, Mr. Bennet Wood, constables; Mr. Bennet Wood, Mr. Paul Hayward, wardens; Mr. Judah Wetherbee, Capt. Eleazer Fletcher, tithingmen; Mr. Oliver Mead, Mr. Ephraim Taylor, Mr. Bennet Wood, Mr. Oliver Taylor, highway surveyors and collectors; Mr. Oliver Wood, sealer of leather; Mr. Edward Brown, Mr. Thomas Lawrence, fish-reeves; Capt. Phinebas Taylor, Lieut. Nehemiah Batchellor, deer-reeves; Mr. Joseph Raymond, Mr. Boston Draper, hog-reeves; Mr. Richard Wetherbee, Mr. Ebenezer Phillips, fence-viewers; Mr. Phinebas Wetherbee, Mr. Ephraim Wetherbee, fire wards; Mr. Jonathan Wetherbee, Mr. Joseph Sawyer, field-drivers; Mr. Edward Brown, Mr. Solomon Taylor, surveyor of boards and shingles; Mr. Jonathan Wood, justice of the peace.

From time to time other officers were chosen, as pound-keeper, surveyor of lumber, hoops and staves, vendue master, sexton, etc.

The disinclination, on the part of Littleton, towards the new district, was a difficulty which did not seem to adjust itself in later years, and down through the century, even to the present time, the disagreement may be traced. There was a great deal of trouble about the boundaries, although they were described and established by the letter of the act of incorporation already given. All the polls and estates within the given limits were to belong to the new district except those of such of the inhabitants set off from Littleton as should not return their names to the office of the secretary of the Commonwealth within a year from the passing of the act. So, although the boundary was designated between Littleton and Boxborough, the people of the Littleton part were left to go or come—as they chose—to pay their taxes to the mother town as before, although residents of the new district. The towns were continually in trouble over the boundary line. It was at last referred to the General Court, and an act fixing the boundary was passed February 20, 1794. This act also gave per-

mission to those of Littleton who had not returned their names, "their polls and their estates," who still voted and were assessed in Littleton, "to belong to said Littleton" so long as this state of things continued; that such persons might at any time apply to said Boxborough to become members thereof, and, upon vote of her inhabitants, be accepted as citizens of Boxborough, with their polls and estates.

In 1791 the district voted to invite all within the bounds of Boxborough who had not joined with the said town to become members of the same. And they have come from time to time until there are only two farms—those of H. T. Taylor and David Hall—which are still assessed in Littleton. Edmund Lawrence's estate was accepted April 6, 1807. Widow Rachel Cobleigh's property, May 27, 1818, and George Jefferson's estate, April 2, 1821. In 1827 the town voted to choose a committee to converse with all those who still paid their taxes in Littleton, though within the bounds of Boxborough, to see if they would not in future attach themselves to their own town, and April 24th of that year, five (the largest number at any one time) signified their desire to become inhabitants of Boxborough, and were transferred to the said town, viz: John Hoar, John Blanchard, Simon Blanchard, Mrs. Abigail Blanchard and Moses Whitcomb. Two more, Carshena Wood and Mrs. Lucy Wood, came May 23, 1831, and one more, Isaac Patch, April 2, 1838. Measures are being taken at the present time to see if the taxes of the remaining two farms may not be required to revert to the town to which the estates belong.

The boundaries on the Harvard and Stow sides are probably somewhat changed; that toward Acton seems to be the same, and the southeast corner, on Flag's Hill, appears to be unaltered. The boundary on the Littleton side, as we have said, although the source of much dispute and threatened prosecution, was finally fixed by act of the Legislature, in 1794. No definite descriptions of the corner bounds and boundary lines are recorded whereby we can mark the exact changes; the bounds themselves—heaps of stones, stakes, trees—are objects which the vicissitudes of a hundred years might well render uncertain, and now they cannot be determined with any degree of accuracy.

It is interesting to follow the working of the newly-organized district and to note that which seemed most to occupy their hands and hearts. So far as we can judge from the records left us, after having thrown in their lot together, each one worked for the common good. Destined never to become a large town, its citizens gave to it, and found in it, whatever of active, energetic enterprise it possessed. The warrants for the early town-meetings are full of articles for action, touching the church, the school and the highway,—three of the most important factors in the common town or State life; for without religion at the outset, the foundation must have been unstable; without

education the future processes of self-government, personal and general development in intelligence and strength, must have halted; and without communication with the outside world, common interchange of ideas and methods, and also transportation, would have been at a standstill. The citizens of the district seem to have been much interested in these things at the very first. The meeting-house was the place not only for holding the religious gatherings of the people, but also for all town-meetings until 1835, and in April of that year they assembled at Bigelow's Hall, situated directly opposite. Early this year they "voted to build Town Hall under the contemplated New meeting-house on the Common, and voted to raise \$250 to build the same," and then a reaction came and they "voted to reconsider" their vote. In March of the same year they voted to build a town-house on the old Common and voted to raise \$400 for the same, and again the reaction came and they reconsidered the vote, but later in the season a town hall was built near the southern end of the Common and opened for use in October, 1835. This remained until 1874. Early in 1870 they voted to "examine Town Hall," and also chose a committee to see if the Universalist meeting-house "on the hill" could be procured for a town hall. This was found by the committee to be impracticable at that time, and the town voted to enlarge and thoroughly repair the old hall. But in November of that year a committee was again chosen to confer with regard to obtaining the old church for town use and in December, 1870, the town "voted to accept the Report of Committee," and "voted to accept the meeting-house as a gift from a majority of the pew owners." They immediately went to work to make the needed alterations and repairs and to furnish in a neat and comfortable manner for the transaction of town business. When the old Puritan Church of one hundred years ago was divided in 1829, the Universalist Society, as it was thereafter called, retained possession of the old church. This society after a time discontinued their meetings, the house was closed, and in 1874, as before stated, was presented to the town for a town-house. The old hall was sold at auction in 1874 to H. E. Felch, and was subsequently torn down.

In the early part of Boxborough's history, there seem to have been a great many extra meetings for town, or district purposes rather,—the words town and district being used interchangeably all through the records—questions with regard to the church and church property, schools, roads, disposition of poor, boundaries, town buildings, town prosecutions and the like. They discussed the questions and voted *pro* and *con*, and considered and reconsidered these local items as only men interested in the true welfare of the town would have done. But they seem at times to have arisen to that pitch of earnestness and enthusiasm where their "No," was no; and their "Yes," yes, irrevocably.

A perusal of old writings brings some minor items to light, like the following, which may interest the rising generation if no other:—In 1789, "Wm. McKay, convicted of swearing one (or more) profane oaths," paid a fine of six shillings, and such fines were not infrequent. They were careful to guard the morals of the young. An incident is told of an old resident which illustrates this. He had been trying to impress upon his son the importance of temperance in speech, and at the close of the lesson,—*"I swear if you swear, I'll whip you,"* said the old man emphatically. Unique auctioneer's licenses are recorded:—"We the Subscribers, Selectmen of the Town of Boxborough, at a meeting holden for the purpose, have licensed and do hereby Licence Major Eph^m Taylor of s^d Boxborough, to sell at public Vendue or Outcry any Goods or Chattles whatsoever, pursuant to a law of the Commonwealth, passed June the 16, 1795." Boys were often bound out to service by vote of the town, for example:—In 1807 they "voted to bind David Green to Christopher Page to learn the carpenter's trade upon the same terms respecting clothing and schooling as though he staid with his old master."

In 1837 the town "voted to allow a bounty of twenty cents each on Crows young and old taken in the limits of Boxborough between April and November," and granted one hundred dollars for the purpose. It was voted in 1838 "to have the Bell rung at nine o'clock in the evenings each day in the year (Sundays excepted) five minutes at a time." Doubtless in our forefathers' time this was a reminder to have "all the children in." Nowadays such a note pealing out over these hills and valleys would perhaps be more likely to find the people of all ages just gathering together.

The old town folk evinced a good deal of interest in the highways, and roads were laid out here and there and accepted from time to time; but the vague descriptions, vivid as they may have seemed then, leave us in obscurity as to their exact trend. The next year after the incorporation of the district, in 1784, several highways were laid out; in 1785 the town voted fifty pounds to repair highways, and the following year an appropriation was also made. And so on, down through her history, such items as the laying out of roads, acceptance or rejection of them as the case might demand, appropriations, setting up guide posts or building walls, are frequent. In the early days each poll worked out his highway tax; in 1791 it was voted "that Every Ratiabie Pole shall work on the County Road one Day this year." Record is made showing that some of the roads were mere bridle-paths at the first; in 1790 the town "voted to accept the Bridle road," and in 1819 "Gave an order to Prince J. Chester, it being in full for a road or Bridle way through his land." Some were private or half-private ways, as we find such entries as these; 1814. "Voted to shut up the road through D^o Jacob

Fairbanks' land for one year if D^o Jacob Fairbanks will cause a road to be opened that will comode the town as well." In 1815 "Committee report they are dissatisfied with a road fenced out as it cuts them off from water, but are willing that Mr. Sargent should have a road with two gates, which they will agree to support one." In 1814 a vote was passed "to keep the Turnpike road in repair as far as it lies in Boxborough for one year, provided the Corporation will admit the inhabitants of said Boxborough passing the gates toll free." This same "Boston Road," or "the old turnpike," as it is now called, was laid out through the southerly part of the town from Harvard to Acton, and is the main thoroughfare. We find what answers to the same road on Silas Holman's map of 1794. It was accepted in 1806 as the "Union Turnpike," by the Court of General Sessions of the Peace, at its September term. In 1830 a petition was sent in to the county commissioners, and April 7th of that year the Union Turnpike, so far as it lies in the county of Middlesex, was declared a public highway, the town granting \$300 for repairs. The road over the hill, east of Guggins Brook, was discontinued in 1868.

The Fitchburg Railroad, which was opened in 1845, skirts along the level northeastern border of the town for quite a distance. Whether or no this new invention was hailed by the farmers with delight, or whether they considered it an intrusion on their sacred solitudes, and a trespass on their farming rights, history tells us not. At any rate, no mention is made of a desire for a station until a special town-meeting in June, 1849, when they "voted to choose a committee to petition the President and Directors of the Fitchburg Railroad for a depot or stopping-place in the town of Boxborough, near the house of Mr. John Hoar." The petition was not granted. During the years of which we have been speaking, West Acton had been growing up and had become a thriving village. November 30, 1868, record is made of the adoption of the following resolution: "*Resolved* that the town of Boxborough unite with that part of Acton called West Acton in the formation of a new town." The votes upon the resolution stood 49 to 11, in favor of the new town, and a committee was chosen and instructed to use every effort in the annexation of Boxborough and West Acton, but the scheme planned to benefit both town and village for some reason failed. In 1873 another petition was sent to the Fitchburg Railroad Co. for a station, but this also failed. The station for Boxborough is one with that of West Acton, "West Acton and Boxborough" being the name given to it. West Acton is also the post-office, and the nearest business point for Boxborough, although for a small part of the town West Littleton is more convenient.

The record of Presidential votes shows that, for many years, the town was pretty evenly divided as to

its political sympathies, with a slight leaning to the Democratic side. In more recent years the lines dividing politics and religion have grown less marked, until they have somewhat nearly coincided. The records speak of Boxborough as both town and district throughout the early years, and we have done the same in order better to represent them; but strictly speaking, Boxborough was a district until May 1, 1836, when it became a town, not by any special act of the Legislature, but under a clause of the Revised Statutes of that year. But in the November following it still voted with Stow for representative to the General Court, so that, if this date be the correct one, it did not at once enter into its full privilege as a town. In the more recent years of the representative union, when sending two representatives, it was customary to choose one from Stow and one from Boxborough. Record of the votes was always made at Stow only.

Boxborough's military history must necessarily be somewhat brief, as, not having been incorporated until 1783, she has no Colonial or Revolutionary record of her own. But, like some other towns not having a record of their *own* because not incorporated at the time, and therefore swelling the record of some neighboring town or towns, so Boxborough has a *real* though not a *separate* record of the Revolution with Acton and the neighboring towns. In this connection we would pay a passing tribute to the memory of Luther Blanchard, who, together with his brother Calvin, joined the Acton company, and was the first man to shed his blood at the fight at Concord Bridge. The old homestead and the family estates were within the limits of what is now Boxborough, and the descendants still own and occupy them. I quote from the centennial speech of a grandson of Calvin Blanchard,—the late Joseph K. Blanchard, of this town:

"The neighboring town of Acton had formed a company of Minute-men, to be ready at a minute's notice to meet the British soldiers; Calvin and Luther Blanchard, of Boxborough, were members of this company. These brothers inherited the spirit of patriotism from their father, who was killed at the Heights of Quebec. This company of men had pledged themselves to stand by each other in resisting the British foe. On the morning of the Nineteenth of April, seventeen hundred and seventy-five, word came to Acton that the British soldiers were *en route* for Concord. This company of minute-men were quickly assembled on the Acton Common, with Calvin Blanchard for orderly sergeant, and Luther Blanchard as fifer. As there was a little delay here, and the soldiers were anxious to meet the enemy, Luther Blanchard struck up 'The White Cockade,' and then Capt. Davis started off, saying to his men that if any of them were afraid to follow him they might go home. When they reached the old north bridge, at Concord, the British were already on the point of coming over to this side to destroy stores of the Colonists on this side the river.

"The officer in command asked for volunteers to meet the foe. Capt. Davis, knowing his men, said, 'I have not a man who is afraid to go.' As they advance to meet the British, they receive their fire, and Luther Blanchard is the first man wounded. The Captain then asked if they fired balls. 'Yes,' was the reply, 'for Luther Blanchard is wounded.'" He went into the house of Mrs. Barrett, close by, to have the wound dressed. "A little more and you'd have been killed," said Mrs. Barrett mournfully. "Yes, and a little more and it would not have touched me," replied Blanchard brightly, and hastened to join his comrades. The wound appeared slight, but he died three days later in consequence of it. His body was brought to Littleton and laid in the old cemetery there.

In 1787 the town voted to "Provide Stock of Powder and Leds, also flint," which were kept in a magazine, provided for the purpose, under the stairs in the meeting-house; and record is also made of muster-days and the ordinary military organizations, but nothing more of importance until Aug. 18, 1794, when they called a special town-meeting, "to see what the town will do about raising the eight men, in compliance with the request of Congress, and give any instructions to Capt. Whitcomb about the same." They voted "to give some encouragement to the men that shall list as soldiers, and voted that each man that lists as a soldier agreeable to Resolves of Congress shall have the publick pay as wages made up by the Town; to each man the sum of Two pounds, Eight shillings pr. month for the time they serve in the army; and that they shall have six shillings in part of their pay paid them when they do List and engage if they do not march out of Town, and the sum of eighteen shillings more when they march in order to join the army." Three years later, in October, 1797, at another special meeting they "Voted to give the Soldiers one Dollar each to engage, to give the men ten dollars each at marching, and to make their wages equal to laboring men the time they are in the service, including the ten dollars above mentioned and Government pay." In 1800 they voted "that Each soldier who goes to the review at Concord and does his duty shall have one dollar for the two days' service and $\frac{1}{2}$ lb. of powder for each soldier." The town was again called on for men in 1812 and 1814, and bounties were offered, viz.: In 1812, "Voted to make up the Soldiers \$10 per month when they are called into actual service, and two dollars a day when called out of Town, and to receive it before they march into actual Service or when dismissed." In 1814, "Voted to make up the soldiers \$18 per month with the national pay and five dollars bounty if they volunteer their services." The town abated the taxes of her soldiers while in the service. In 1832 it is recorded that the town "voted to authorize the Treasurer to pay the amount of their Poll Taxes to each of the training Soldiers who kept themselves uniformed and equipped and performed all Mil-

itary duty required of them." With the exception of muster-days and militia-rolls, nothing further is recorded until the late War of the Rebellion.

There were no town-meetings held until July 23, 1862, when they "voted to pay bounty to five persons that will volunteer to go to war, voted \$100 to each of the five, and immediately voted \$5 each to those who will enlist within three days and be accepted." Aug. 23d, "Voted town pay bounty of \$100 to those who will volunteer to fill town's quota of nine months' men, to six or seven, whichever it may be." In October of the same year the town voted \$150 to each drafted man, and also to each volunteer, "enough to fill our call," to be paid after they were mustered into service. A month later the same bounty was extended to the substitutes of drafted men.

The highest bounty offered was Sept. 19, 1864, when the town "Voted to pay \$125 in Gold to each recruit to fill the town's quota." The advance of gold was from 85 to 165 during that month, so that, even at the average, the bounty was a large one. The young men of Boxborough responded willingly to their country's call, and "five persons came forward and enlisted" at one time. Of the fifty-one men—seven more than required—furnished by the town, none were commissioned officers. We quote the following from Schouler's "Massachusetts in the Civil War:" "The whole amount of the money appropriated and expended by the town for war purposes, exclusive of State aid, was \$7046.87. The amount of money raised and expended by the town during the war for State aid to soldiers' families, and which was repaid by the Commonwealth, was \$1347.53. About \$200 was raised by the ladies of the town for the Christian Commission."

We give below names of the soldiers who went from Boxborough to take part in the War of the Rebellion, so far as we are able to give them:

Messrs. Samuel Burroughs, E. L. Battles, James Bryant, E. D. Battles, Monroe Clement, George Draper, Wm. Edwards, Luther H. Ewings, Lucius Holden, Chas. Jenkins, A. A. Richardson, S. E. Smiley, Paul Hayward, George Sargent, Waldo Littlefield, John Fletcher, Peter W. H. Perry, F. H. Stevens, Tim. L. Wood, Abraham Rodgers, A. W. Wetherbee, James H. Whitcomb, John Griffin, Joseph Muren, Wm. F. Stevens, A. G. Whitcomb, Alonzo M. Woodward.

Of these, George Sargent was wounded; Alonzo M. Woodward died Oct. 6, 1862, at Suffolk, Va., of fever; John Fletcher was killed at the battle of Winchester, Va., Sept. 19, 1864; and James H. Whitcomb died at Cottou Wood Springs, Neb., of typhoid fever, Aug. 31, 1865.

We come now to the history of our public schools. Boxborough has never enjoyed the advantages of either an academy or high school within her own boundaries, although her sons and daughters have reaped the benefits of the higher institutions of learning of other towns or cities near or far. The town fathers evidently had the cause of education at heart, for in the town warrant, Sept. 22, 1783—the same year of her incorporation—we find this article: "To see what the town will do about Providing School

this Present Year and act anything they Shall Think Proper when met;" and when legally met they "voted to have four months' schooling this year and voted that the Selectmen provide and proportion the same." The "proportion" seems to refer not to different sections of the town, but to the boys and girls who appear to have been educated separately for some time, as in 1787 money was appropriated for "four months of man's school and four months of Woman's School."

At the 30th of August meeting, 1784, it was decided not only to have "four months of Woman's School," but also "to have a school-master six months," the town thus charging themselves with deciding as to whether a gentleman or lady should be the instructor of their youth. But in 1794 they transferred the grave responsibility to the shoulders of a committee, who should "provide & hire a school-master or masters and mistress or mistresses as shall be most convenient for the town's good." Also, this year, the boys and girls shared equally in the ten months' schooling, as appears from the vote for "five months of man's school and five months of women's school." From 1783 to 1794 the selectmen seem to have had charge of the schools. In that year a special committee was appointed, but it was not until a number of years later, in 1820, that the School Committee's office became an established fact. In the mean time the schools were often in charge of the selectmen, as at the first.

Work in school, in the days of "auld lang syne," in Boxborough, was evidently not as popular as in many schools to-day, for, in 1794, action was taken to the effect that "no work should be done in or at the woman's school, as there usually hath bin; but the time to be spent in instructing the children to Read and wright." No special record is made of teachers' wages in those early days. In 1783 there was "voted and granted the Sum of 24 lbs. to pay town debts and schooling;" and in 1787 the sum of fifteen pounds was granted for "schooling" alone. A few entries such as these would seem to indicate such wages as would be no great temptation to the teacher of the present day.

No doubt the pay of the Boxborough teachers compared favorably with that of surrounding towns, and in some of these, one hundred years ago, the school-master received \$2 per week, where now he requires \$10 or \$20 for the same service. We do not know if there was even a school-house in the new district at the time of its incorporation, in 1783, although rumor says there was such a building many years ago situated upon "Liberty Square," the common in front of Mr. Henry T. Taylor's present residence. This same Liberty Square is said to have been noted as a gathering-place for amusement on the Fourth of July and election days. Some seventy years ago the people celebrated the national independence by raising a liberty pole 100 feet high and providing a dinner free

for all. The voice of the cannon spoke of freedom and independence to all around, and various amusements rendered the day pleasurable. But to return, it is suggested that the children may have all come together to one school until 1786, when it was voted "to choose a committee to divide the town into quarters, that each may build them a school-house if they please." But the committee for some reason failed in the performance of this duty, for in the latter part of 1790 a new committee was invested with power for the work and instructed to "accomplish the business," which was done and the report made in March, 1791. The division of the town into quarters, as then made, with slight variations, has always remained. The number of districts has always remained the same, although efforts were made in 1816, and again in 1842, to reduce it to three. Convenience of families and equalization of district taxes have caused some slight changes in the boundaries. Unsuccessful efforts have also been made, from time to time, as they have grown smaller, to reduce the number of schools to one or two.

No great difference is observable in the location of school-buildings. The greatest change seems to be in the Northeast or No. 3 District, whose building is now more centrally situated at the intersection of several roads. The Southeast or No. 4 house, has also undergone a slight change in location. A vote was passed in 1790 to build a school-house or houses, and again in 1791 to build three houses, and the sum of forty-five pounds was granted for the purpose. It seems probable that the Southwest District, No. 1, had already reared their educational structure, as only three houses are spoken of at this juncture, for which the sum of forty-five pounds was to be equally divided, and as special provision was made that the First District should receive their part of the money. Reference is continually made to items of business in connection with the building of these school-houses until toward the close of the century, and it is probable that they were not all fully completed before that time.

In 1807, an appropriation was made by the town to build a school-house in the Northwest Quarter, No. 2, in room of one burnt, and the next year the district itself voted a sum of money for the same purpose. There is no further record until 1843, when a house was built in No. 3 District. Separate schools for boys and girls are last mentioned in 1797. Beyond a few items, such as the condition of the schools, money appropriated each year, committees chosen, questions concerning re-districting the town, or settlement of bounds requiring the occasional transfer of an estate, there is nothing more of interest until 1840. In 1813, '14, '16, '25, '29, '42, '66 and '77 various appropriations are made for singing-schools.

A hundred years ago \$60 was the amount paid for building a school-house; now, twenty-five times that sum would, perhaps, be deemed no more than sufficient. The methods of teaching have greatly

changed, also, since those early days. The essential elements have always been the "three R's—Reading, 'Riting and 'Rithmetic,"—but the methods of instruction in these branches have widely changed. We quote from the Centennial speech of Mr. George F. Conant, a former superintendent of our public schools, upon this subject: "Reading then meant a drawling drill in the alphabet and its combinations, a-b, ab; e-b, eb; o-b, ob, etc.; our children are now inducted at once into the reading of words, and led on, by easy gradations, through selections from the best masters of English prose and verse. Writing then involved a long preliminary struggle with pot-hooks and tram-mels; now the child is taught to read and write script from the outset. Arithmetic was then a sealed science beyond the Rule of Three—even the master was not required to have explored farther; now a child of ten or twelve years is expected to have reached that ultimatum. Mental arithmetic was a thing unknown. Grammar was then a tedious task, encumbered with the six Latin cases, and numberless unintelligible rules. Our boys and girls, with their 'Language Lessons,' half work, half play, little know what their forefathers endured. Perhaps none of our text-books have changed more than the geographies. This is strikingly apparent in a comparison of maps of the different dates. Central Asia was *terra incognita*. Africa consisted of a narrow strip along the shores surrounding the great unknown; as for Australia and the isles of the sea, they were not; our own country west of the Ohio was an impenetrable forest and howling wilderness." Modes of discipline have also changed, and the famous "birchen-rod" is a thing of the past.

The first report of schools is recorded in 1840. Number of scholars, 92 in summer, 143 in winter. Length of schools: in summer, 11 months; in winter, 10½. "Number of teachers: in summer, 4 females; in winter, 4 males." Average wages per month, including board: females, \$9.50; males, \$24. The school year was divided into two terms at this time, but later, as the terms were lengthened, it became the custom to have three, which is the present arrangement. The schools have now grown considerably smaller. The district system, which had prevailed so long, was abolished Feb. 28, 1867, by vote of the town. The superintending School Committee first received pay for their services in 1842. Their recorded reports at this time are full of interest. We give a sentence from the report of 1842, earnest and to the point: "Young men can parse or analyze sentences with a great deal of skill when they leave school, but it is very rare that you can find one that has confidence enough in his own abilities to compose a piece of reasoning and recite it before an audience." One report, in 1846, so brief we beg leave to give it entire, is as follows: "Your committee would report that in their opinion the schools, with one or two exceptions, have been wisely and ju-

ditionally managed the past year." The annual report was first printed in 1853. In 1843 two school libraries were established, and the following year a sum of money was appropriated to carry on the good work. In 1842 the work of erecting school-buildings was again entered upon by the Northeast District, which event called forth the following from the School Committee: "Your committee hail with joy the erection of a new school-house in town, after a lapse of about half a century, a period when a school-house might have some good claims to exemption from further service." Some time later the other districts followed suit, and from that time forward the houses have been rebuilt—Nos. 1 and 2 some time from 1852 to 1857, No. 4 in 1868, and No. 3 in 1870—or repaired as was thought necessary, until at the present time there is a comfortable school-building in each of the four quarters of the town. Only four of Boxborough's young men have received a college education. Two sons of Rev. Joseph Willard, the first pastor, graduated at Harvard in 1793 and 1809, Mr. J. Quincy Hayward at Amherst in 1882, and Mr. Charles H. Conant, Dartmouth, 1871, and in 1873. Mr. Conant has been a lawyer in Lowell for quite a number of years.

As stated in our opening paragraph, the old Harvard meeting-house was purchased in 1775. The old volume, which contains all the account that is left to us of these early days, bears on the fly-leaf this inscription: "Record Book. The Gift of Bennet Wood to the Society Building a Meeting-House in North-westerly part of Stow. Littleton, August 31, 1776." Religion was the primary cause of the union of the people on the outskirts of these three towns. They banded themselves together for convenience in public worship, and thus the "New Society" was formed which afterwards became, first, the district, and then the town. The religious phase of her history is the essential element of *all* her history; for religion was the fundamental principle—the foundation—on which the town was built. For almost half a century the town and the parish were identical, and her history in this connection is not only valuable to us who now study it, but it is full of interest also. Our Puritan ancestors recognized then, as we do now, in what the true public good consisted, and they sought to place on their hill, as their initial act, that in which all their thoughts and deeds should centre—the church of the living God. The town-meeting and the parish-meeting were one for a long time, and for a still longer period, more than half a century, even, after the separation of town and parish business, the town-meetings were held in the meeting-house. Questions concerning the church and church affairs were made the annual business of the town.

In the warrant for the second meeting, held in April, 1783, was this article: "To see if the Town will grant money to hire Preaching, or act anything Relating the same they shall think Proper or choose a com-

mittee to do so;" and they voted to hire preaching, agreed upon the sum of forty pounds for that purpose, and chose a committee of three to hire it, viz., Bennet Wood, Oliver Taylor and Moses Whitcomb. September 22, 1783, we read this unique article in town warrant: "To see if the Town will Take any measures for to Regulate Singing on the Lord's Day or apoint Quiristers for the same." And they "voted to choose four Quiristers as followeth:" And even seven years before, in 1776, the good people were not unmindful of this phase of public worship, for they "voted and chose Abel Fletcher, Abel Whitcomb and Jonathan Patch to tune the Psalms." In 1796 the town "voted that Dr. Belknap's Books should be used in the Congregation of Boxborough in the Room of Dr. Watt's Books." It seems the town voted also where a person should sit in church, for, the same year, it "voted and seated Ens. Samuel Wetherbee in the fore-seat below, and Samuel Draper in the fore-seat of the side gallery;" in 1792 "Voted that the Dr. sit in the fore-seat of the front;" apparently as a mark of respect to those gentlemen. Deacon's seats were also provided. In 1798 the same authority "Voted that the Methodist preacher may preach in the meeting-house in said Boxborough on the week-days, during the town's pleasure, but not to molest or interrupt the Rev. Mr. Joseph Willard when he shall apoint any lecture or time to preach in said meeting-house at his pleasure." The town-meeting voted the taxes for the payment of the minister, for, a month later, that body "voted not to have the persons that have dogs taxed for their dog's polls, and voted to tax all persons to the minister's Rate agreeable to the Constitution." Sometimes a person wished to attend church out of town, and then he was released from his minister's rate in town upon bringing certificate from the clerk of the neighboring town, stating that he worshiped with some other church, and paid his dues there. The town corporate evidenced in all her proceedings her desire to do everything according to righteousness and justice, and she was no less careful to bring her citizens up to the same standard.

It appears that the church was in an unfinished state at the time of the incorporation of the district, for, October 27, 1783, it was voted "to sell the Pue ground in the meeting-house below, and take the money to finish the house." It took several town-meetings to settle the business, but it was finally decided that "the persons that purchase the Pue ground build the pews on their own cost, and take them for their Seats for themselves and families in the Meeting-house until they Sell or Dispose of the same." The ground-plan was for twenty-two pews, and when they were sold it was "voted that the first twenty-two highest payers have the first offer of the Pews as is Dignified and Prized according to their pay, and voted that the highest pew be offered unto the Highest Payer, giving him or them the choice of that or

any other Pew they or he Likes Better at the Same Price, and if the first twenty-two highest Refuse to take the Pews, then they are to be offered to the next twenty-two highest payers, and so on in proportion till all have had the offer if Need be." Again, in 1786 and 1795, votes were passed "to seat meeting-house according to age and pay." These items would seem to show that deference to property is not confined to our own time, but was also a characteristic of bygone days.

The church was organized the 29th of April, 1784, and it was voted to have the house finished the following November. The 18th of that month the town "voted to concur with the church of Boxborough in giving Mr. Joseph Willard a call to settle with them as a Gospel Minister in s^d town." They also discussed the subject of salary as to "what they should give the Rev. Mr. Willard for encouragement;" voted "to think about it," and, finally, after various meetings to settle the business, December 27th, they voted "not to give Rev. Mr. Willard half-pay so long as he endureth his natural life, but to pay the Rev. Mr. Joseph Willard £75 of money annually, in silver money, at six shillings, eight pence per ounce, and find twenty cords of wood for his fire annually, so long as the Rev. Mr. Willard shall supply the Pulpit in said town of Boxborough and no longer." The furnishing of the wood was let out to the lowest bidder annually. Another quaintly-worded article in warrant this year read as follows: "To see if the Town will Sell the two hind Seats Below on the men's and women's Side and Let them be cut up for Pews, and get the outside of the meeting-house Painted with the money."

They voted to install Mr. Willard, November 2, 1785. Mr. Willard was born in Grafton, Massachusetts, and graduated at Harvard College in 1765. He was called to Bedford, April 19, 1769, where he served as pastor for nearly fourteen years. Dec. 4, 1782, his connection with the society was dissolved at his own request, by the unanimous advice of a council, on account of the broken state of the society. He then received his call and was installed over the District of Boxborough. The following eight churches were invited to join in the installation services: Grafton, Harvard, first and second churches Reading, Stow, Northboro', Littleton and Acton. Rev. Jonathan Newell, of Stow, offered the opening prayer; Rev. Caleb Prentiss, of the first church in Reading, preached the sermon from 2 Cor., 1st chapter, and 24th verse; Rev. Eben Grosvenor offered prayer; Rev. Eliab Stone, of the second church in Reading, gave the charge to the pastor; Rev. Peter Whitney, of Northboro', gave the charge to the people, and Rev. Moses Adams, of Acton, offered the closing prayer. The whole number of persons belonging to the church at its organization, and admitted afterward during Mr. Willard's pastorate, was 144; number of persons baptized, 265; number of marriages, 109; number of deaths, 188. After a pastorate of nearly forty years,

by request of the people, in December, 1823, Mr. Willard resigned his position as pastor of the church, when just at the close of his eighty-second year. He resided at the parsonage, the house now owned and occupied by Mr. Jerome Priest, until his death, in September, 1828.

We know but little of him who closed his earthly career here more than sixty years ago. We judge that he was a man of education and culture,—a graduate of Harvard,—a faithful worker, leading and directing the newly-organized church, revered, loved and trusted by them for upwards of half a century, and that his labors, though expended among these country hills, were not in vain.

In 1815 the question of building a new meeting-house or of repairing the old, began to agitate the people. During the next three years many meetings were held, at which various measures were suggested, voted upon and then reconsidered. At length, in May, 1816, a vote was passed "to leave it to a committee to determine whether the town shall repair old meeting-house or build a new one, and if in the opinion of said committee the Town shall build a new Meeting-house, they shall appoint the place where to set it." And they chose Augustus Tower, Esq., of Stow, John Robins, Esq., of Acton, and Jonathan Sawyer, a committee for that purpose. The hill on which the old church stood was quite a little distance west of the centre, and so the people of the east part of the town wished not only to build a new house, but to have it placed nearer the actual centre. According to the records the controversy grew stronger, for the said committee, having performed their duty and brought in the report "that in their opinion it would not be for the interest of the town to repair the old, but to build new, and on spot southerly of Mr. Phineas Wetherbee's dwelling-house"—a site quite near to the actual centre,—it was voted "not to accept the report," and "not to reconsider the last vote to repair." At a November meeting a petition was presented, signed by twenty-three residents of the east part of the town, asking, "First, for a new meeting-house; second, that it be placed on or near site appointed by the committee of reference; and if not, third, to see if the town will vote that the subscribers be discharged from Boxborough that they may go to the original Towns from which they were taken." The town was not ready as a whole to yield the ground on the question of a new meeting-house, nor did they wish to lose any of their citizens, so they voted "to pass over the article." Efforts were made from time to time to bring about a better state of feeling between the parties, but the new house was not built until years after, neither were there repairs made to any extent.

After Mr. Willard's resignation, when the Rev. Aaron Picket came to be their next minister, the manner of procedure was changed. The amendment to the Constitution disconnecting Church and State

was not passed until November, 1833, but the town-meeting no longer granted the minister's salary, or auctioned off his twenty cords of wood to the lowest bidder. Mr. Picket came in 1826, upon a vote of the town "to hire him for one year after the money that is already raised is expended to preach for them in Boxborough, provided he will stay and they can get money enough to pay him." A division similar to that which occurred in so many churches at about this time was imminent now. In 1828 they "voted to let each denomination have the meeting-house their proportionable part of the time according to the valuation," and they chose a committee, in which each denomination was represented, "to lay out the money." But from later records it seems probable that the money was raised not by assessment, but by subscription.

The separation came at last in 1829, when the church desired to call the Rev. James R. Cushing, of the Theological Seminary, Bangor, Me., to the pastorate, to which action the parish raised opposition. The ground of difference was in religious belief. And so, May 20th, the church met and voted, "That having failed to secure the concurrence of the 1st Parish in inviting Mr. Cushing to become our Religious Teacher we proceed to take the steps prescribed by law to form a New Society whose members will concur with us in taking the necessary measures to secure to this church the pastoral labors of Mr. Cushing." Immediately the society called the "Evangelical Congregational Society in the District of Boxborough" was legally formed, and having "concurred" with the church, a call was at once extended to Mr. Cushing; and the "solemnities" of ordination were performed under an ancient elm near the old meeting-house, August 12, 1829. They built their church on its present site, at the junction of the highways, where the Stow road crosses the old turnpike, a little southeast of the centre, near which a comfortable parsonage now stands, a point convenient of access from all parts of the town. It was "dedicated to the worship of God" February 6, 1833. A sketch of those who have been connected with this church as pastors may not be uninteresting. Mr. Cushing was dismissed at his own request, to become agent for the American Bible and Tract Society, June 12, 1833. He was one of the Superintending School Committee for three years.

January 13, 1834, the church and society voted unanimously to give Rev. Joseph Warren Cross a call to the pastorate. Mr. Cross accepted the call and was ordained the 1st day of the following October. This connection of pastor and people was dissolved November 13, 1839, by his own request. He served on the School Board in 1838. He is still living—at the advanced age of eighty—in West Boylston, Mass. He retired from the ministry a number of years ago. During his stay in Boxborough he taught a private school in a building erected for the

purpose, nearly opposite the new church, and which was also used as a vestry. The building is now a part of Mr. Hayden's barn.

Rev. James D. Farnsworth accepted the pastoral care of the church November 28, 1841, and was installed January 6, 1842. This connection was severed in 1847. He was a member of the Superintending School Committee in 1842 and 1844, served as one of the assessors for two consecutive years, and was active in all that pertained to the well-being of the town. A part of the time from 1847 to 1851 the church was supplied by Rev. Mr. Crossman, a young Wesleyan divine, who, in connection with his pulpit duties, performed those of teacher in No. 4 District for two consecutive winters. Rev. Mr. Gannett preached in 1851-52, and Rev. Leonard Luce became the acting pastor from 1853 to 1858. During his ministrations the greatest revival the church has ever known was enjoyed. He died in Westford a number of years ago at the ripe age of eighty-five years.

Rev. James H. Fitts, a young man and a native of New Hampshire, commenced his labors as acting pastor of the church September 5, 1858, and continued his connection with it for nearly four years; then, having received a call to the church in West Boylston, Mass., he preached his farewell sermon July 27, 1862.

Rev. George N. Marden was ordained to the pastoral office October 2, 1862, and dissolved his relationship with the church in April, 1865. He was a fine scholar, as his sermons testified. He is now connected with a college at Colorado Springs, Col.

The following November Rev. Amos Holbrook, of Milford, Mass., commenced his labors as acting pastor and closed them September 1, 1868. He had neither seminary education nor theological training, but he was a well-educated man, having held the position of principal of a school in Milford previous to his pastorate in Boxborough. It was during his stay, and owing partly to his influence, that the present parsonage was built.

February 11, 1869, Rev. Daniel McClenning came, but removed to Hanover, N. H., April 30, 1873. Socially he was a perfect gentleman and very agreeable in manner, but his style of preaching was censorious and severe. He was of Scotch ancestry and his birthplace was in Littleton. He died three or four years ago.

Rev. John Wood supplied the pulpit from October 26, 1873, until February 28, 1875. He was possessed of good preaching ability and quite a number of persons were brought into the church in connection with his labors. He was a resident of Wellesley, Mass., at this time, and came to his charge each week. He is more than eighty years of age and is living in Fitchburg, Mass., at the present time.

After the close of Mr. Wood's pastorate the church was supplied by Reva. Wood, Robie, Wells and others until the 1st of April, 1876, when Rev. Nathan

Thompson began his labors in Boxborough, continuing them until August, 1881. During his pastorate, in 1880, the church was thoroughly repaired, a vestry placed beneath audience-room, and the whole fitted up neatly and conveniently, so that, at the present time, it is well adapted to the wants of the people. Mr. Thompson took an active interest in town affairs—the Lyceum, the Farmers' Club, the schools, of which he was superintendent. He was a man of lovely character and very popular as a townsman. Previous to coming to Boxborough he had been a home missionary in Colorado for ten years, and he left the church here to become principal of Lawrence Academy, Groton, Mass. He is now principal of an academy in Elgin, Illinois.

November 6, 1881, a call was extended to Rev. William Leonard, who labored with the church until April, 1884, when he removed to Barnstable, Mass. He was of English parentage. I quote a sentence from his centennial speech which seems to be characteristic of the man: "I preach what I believe and believe what I preach, and no man shall deprive me of this liberty."

Rev. George Dustan, of Peterboro', N. H., came to the church December 1, 1884, and severed his connection with it the last of February, 1887, to take charge of the Orphan Asylum, Hartford, Conn. He had been pastor of the church in Peterboro' for a period of twenty-five years. He was interested in town affairs, superintendent of schools, a member of the Grange and a very good preacher.

Rev. George A. Perkins, the present pastor, began his labors with the church in Boxborough April 1, 1887. Mr. Perkins was a missionary in Turkey for a number of years. He is a faithful pastor and preacher.

The First Parish continued their Sabbath services a part of the time for several years after the division of 1829, and then they were discontinued, and the organization finally became extinct. Other things of public interest, as the store, post-office, blacksmith and wagon-shop, etc., have disappeared from their wonted places on the hill, but the church, though in a different location,—through the earnest, continued efforts of her members,—still lives. Orthodox and Universalist meet and part and take each other by the hand, yet the old differences seem not wholly forgotten, the old scars not entirely obliterated. Time may accomplish what willing hearts cannot, and in the not far distant future the Universal Church, within whose fold all may work together in the service of our common Lord, may spread its wings joyfully over all these peaceful hills and valleys. "May the Lord hasten it in His time."

In passing, we would make mention of the Methodist Church, which was situated in the southwest part of the town something like eighty years ago, and which existed until 1843. I say in southwest part of town, but the building—although the intention was to build on Harvard ground—was really erected on

the boundary line between Boxborough and Harvard, owing to uncertainty with regard to the exact location of said boundary. It was a small building, painted red, and contiguous to it was a noble, spreading oak. An amusing anecdote of this old house of worship is related by one of the older residents, who remembers the building well. A wayfarer passing along the Boxborough highway one afternoon, inquired of a citizen whom he met, the way to the old meeting-house. "Oh, go right along until you come to a little red house tied to an oak tree; that's the Methodist Church," replied the person accosted, with more celerity than reverence. Although there was more or less Wesleyan preaching for several years, there was no preaching by appointment of the Conference after 1843. Some of the members transferred their church relationship to Harvard, others to the Congregational Church in Boxborough, and others to surrounding towns; and finally, some years later, the church building was burned. The old oak still stands to mark the spot.

While the surface of the town is hilly and rocky, and the soil not deep, yet her sunny slopes are very productive. The hills are crowned with luxuriant orchards, and the pastures and road-sides abound in grapes and berries. Apples, pears, peaches, grapes, berries and vegetables are extensively and successfully cultivated for the Boston markets. Being only about twenty-seven miles distant from that city, these products can be shipped there, fresh, daily. Most of the farmers are engaged in the production of milk for the Boston market. Limestone is found in quite large quantities in the northeast part of the town, toward Littleton, and some years ago the business of lime-burning was made quite prominent. There are two organizations in which the farmers are banded together for improvement and discussion of matters of interest—the Farmers' Club and the Grange. The Farmers' Club has had its existence for something less than twenty years; the Grange has been organized only four years, yet it seems to be in successful operation and doing a good work.

We quote a few items, interesting by comparison with the present time, from "Statistical Information relating to certain Branches of Industry in Massachusetts for 1855," by the Secretary of the Commonwealth, Francis De Witt: "Boxborough—Value of railroad cars, etc., m'd., \$500; cap., \$1000. Boots of all kinds m'd., 250 pairs; shoes of all kinds m'd., 4,600 pairs; value of boots and shoes, \$4000. Charcoal m'd., 3,500 bush.; val. of same, \$525. Butter, 13,640 lbs.; val. of butter, \$3,410. Hops, 14½ acres; hops per acre, 700 lbs.; val., \$2556. Cranberries, 21 acres; val., \$512." A report of this kind of the present date would probably contain few or none of these items. No business except that of ordinary farming has obtained a foot-hold for a number of years. A city gentleman was recently excusing himself to one of our citizens on whom he made a business call, for his lack

of the knowledge of grammar. "I have a good, business education, but I do not know much about grammar," said he. "The people of Boxborough might just as well study grammar as not; there is nothing else to do," replied the host. Perhaps this anecdote somewhat exaggerates the situation, but we can gain an idea from it.

Boxborough celebrated her centennial anniversary February 24, 1883, "in the old meeting-house on the hill." The exercises throughout day and evening were interesting and enjoyable. Mr. F. P. Knowlton, of Littleton, gave an address, "Reminiscences," Rev. Nathan Thompson a former pastor in the town, delivered the "Historical Address," and Mrs. G. F. Conant, the "Centennial Poem," Mrs. M. E. Burroughs contributed the "Closing Hymn." After-dinner speeches, full of the "early days," by present and former townsmen, with readings by Mr. F. H. Pope, of Leominster, and music, made up the programme. An account of the proceedings of this "day of ennobling retrospection and glad reunion," was afterwards published in pamphlet form, by the town.

The following are the town officers for the present year, 1883:

Mr. E. B. Cobleigh, A. Littlefield, C. H. Vease, selectmen; D. W. Cobleigh, treasurer; George F. Keyes, town clerk; E. B. Cobleigh, J. W. Hayward, C. H. Vease, assessors; J. H. Ordorff, auditor; W. H. Furlush, N. E. Whitcomb, Ephraim Cobleigh, road commissioners; C. H. Blanchard, Lewis Richardson, J. Branman, S. F. Dodge, A. W. Wetherbee, S. B. Hager, School Committee; A. W. Wetherbee, supt. of schools; W. H. Furlush, constable and collector.

In this age, when not only the history of towns, but family history, is of such wide-spread and enduring interest, a short sketch of some of the older residents may not be out of place. We notice, in the early records of the town, the names of Cobleigh, Wetherbee, Taylor, Mead, Whitcomb, Hayward, Blanchard, Hager, Stevens, Chester, Wood, Patch and Hoar, whose descendants are still with us; while others, as Bigelow, Hazzard, Stone and Conant, although none of these now remain, are of equal interest.

The name of Mr. Bennet Wood is intimately associated with the early history of the town. He was the second son of Jeremiah and Dorathy (Bennet) Wood, the fifth of a family of ten children. Henry Champion, the grandfather of his mother, Dorathy, was born in England in 1611, and came to New England as one of the first settlers of Lyme and Saybrook, Connecticut. His father, Jeremiah Wood, was a weaver, a yeoman, gentleman, as shown by account-books and papers. He was constable and collector, later selectman, and for some years treasurer of Littleton and a member and supporter of the church. He purchased his estate there January 13, 1717, a part of which is still in possession of his descendants. He received the deed from the town of Littleton, as explained by the deed itself, which is still in possession of Isaac Wood, Boston, Massachusetts. Several generations of the Wood family have been born there. "In uprightness of character, sta-

bility of purpose, sound judgment, and high regard for family and personal honor, the family of Jeremiah and Dorathy Wood was no ordinary family. Jeremiah Wood died July 15, 1730; Dorathy, his wife, died July 17, 1752. Their graves are side by side in Littleton, and near them are grouped the graves of some of their children, grandchildren, great-grandchildren and great-great-grandchildren."

On an old weather-beaten slab of granite, in the hill burying-ground in Boxborough, we may read this inscription:

"In Memory of
Mr. Bennet Wood
who departed this life
Apr. 28th 1797
In the 81st year of
his age."

Beside it is erected another stone to the memory of his second wife, Mrs. Isabel Wood, who died December 14, 1797, in the 84th year of her age (the first wife, Lydia Law, of Acton, died February 27, 1765, aged fifty-four years, one month, thirteen days, and is buried among the Wood families in Littleton), and near these lies a granddaughter, Lois Wood, who died February 1, 1782, aged fifteen years, two months and twenty-two days. Bennet Wood was a prominent and enterprising man, as all his transactions and business connections with his fellow-townsmen plainly testify. He did very much for the formation of the church and afterward the town, in the early days, and his energy and perseverance helped greatly to pave the way to success.

Mr. Jonathan Wood, the ninth child of Jeremiah and Dorathy, is mentioned as issuing the first town warrant in Boxborough. He is spoken of as an honored citizen, and prominent in both civil and military affairs. Mr. John Wood, the sixth child of Jeremiah and Dorathy, has descendants still living in this town. He was twelve years old when his father died. A large part of the real estate was apportioned to him. He married Lydia Davis, of Harvard, Massachusetts, October 19, 1743. He was constable and collector at the age of twenty-four, a prominent and successful man, had pleasant surroundings for those times, and had a promising young family; but death called him away April 8, 1758, at the early age of forty. Lydia Wood remained a widow for several years, and then married David Goodridge, of Fitchburg. John and Lydia Wood are both buried with the Wood families, in Littleton. Deacon John Wood, son of John and Lydia, the third of a family of seven, was born in Littleton, September 3, 1747. He married Lucy Martin in 1769, and settled upon the home place, where, in 1790, he built himself a fine residence.

The old homestead, recently in possession of George F. Conant, and now owned and occupied by Mr. Campbell, is still in an excellent state of preservation. Deacon Wood was one of Littleton's trusted townsmen; held various responsible public positions,

and was deacon of the church for nearly thirty years. He died May 4, 1826, in his seventy-ninth year. Upon his gravestone, in Littleton, is the following :

"Farewell, dear friend and childreo too,
God has called me home ;
In a short time he'll call for you,
Prepare yourselves to come."

Lucy (Martin) Wood was born in Old Ipswich, Massachusetts, and died in Littleton, February 20, 1836. The following is upon her gravestone :

"Farewell, my friends, my children dear
My Savior calls me home.
My Savior calls my children too,
Prepare yourselves to come."

Captain Amariah Wood, sixth son of Deacon John and Lucy Wood, says "My mother's name was Lucy Martin. Her father, George Martin, lived in Old Ipswich; moved from there to Lunenburg, Mass. Her ancestor, Martin, was a weaver in England; his wife was one of the higher classes; her parents were opposed to her marrying a weaver, and they came to America. My mother's great-grandfather's name was Dergy; he was the King of England's cup-bearer."

Amariah Wood "thoroughly learned the trades of tanner and carrier, and carried on that business about a quarter of a century, in Bolton, Massachusetts. He married and had a large family of children by his first wife; he had no children by his second wife. He was an honored citizen, having held civil offices of trust. He held a commission as lieutenant, given him by Governor Caleb Strong, of Massachusetts, and a commission as captain. To the former office he was elected November 27, 1812, and the latter May 3, 1814, and was captain of an independent company later. He was a conscientious and upright man, of marked ability and scholarly attainments; was a persistent student all his life, and was always ready for research in science and metaphysics; was a close student of the Bible, and was guided by it. He was skilled in musical composition, and took much pleasure in it. Selections from his manuscripts were published long after his decease. He often had original music to use at the meetings of the family. His conversations in later years were masterly, having accurate knowledge and a clear, logical mind thoroughly disciplined. In his last days he purchased a home near Worcester, Mass., where some of his children had settled. Here he and the able and estimable wife of his early and maturer years, and the mother of all his children, rested from their labors. He was born in Littleton, Mass., September 9, 1785."

Martin Wood, the oldest son of Dea. John Wood and Lucy Martin Wood, was born Feb. 15, 1774, and died Dec. 27, 1853. He was twice married.

"Martin Wood was well posted in common historical subjects, and had a very complete knowledge of the Bible. He was a deacon in the church, and a teacher of the Bible-class for men and women in the

Sunday-school for many years. He was a man of sterling integrity, thoroughly honest and earnest in whatever engaged. He had quite a mechanical talent; was ingenious in making various implements and instruments, was a good carpenter, blacksmith and cooper. He built several of the school-houses in Littleton. Several pieces of public roads were contracted for and built by him. He was a skillful surveyor, and was often called upon to settle disputed boundary lines, where other good surveyors could not agree. He held at different times all the important places of trust in his town, as committeeman, assessor, selectman."

Carshena Wood, son of Dea. John Wood and Lucy Martin Wood, the fourth child of a family of eleven, was born Nov. 19, 1776. He married Betsey Lawrence for his first wife, and, after her death, Tryphena Lawrence. He died July 13, 1854.

"Carshena Wood was a man of ability, but had no ambition for public display so far as he was concerned, but avoided, if possible, every public office. He was an ingenious man, learned the cooper's trade, but was always a farmer. He first settled in Ashby, Mass., but upon the death of his brother, John, he sold his estate there, and was settled upon the homestead of his father, grandfather and great-grandfather, and resided in the house built for his brother John, near the house of his father, the remainder of his life. He never occupied the fine residence of his father, although it was long in his possession after his parents' decease. He was a man of strict integrity; was punctiliously exact in all his engagements, and dealt honestly with every one; was a good neighbor and townsman, an early member and regular attendant of his church." Eunice Martin, daughter of Carshena and Tryphena Lawrence Wood, was born in Littleton, January 4, 1819, married Benj. W. Priest, and resides in Littleton, not far from the Wood homestead. They had three children. The youngest child and only daughter, Arabella Wood, was born June 30, 1841; married Mr. George F. Keyes, and, with her husband, son and daughter, occupies at the present time the house where Mr. Carshena Wood, grandfather of Mrs. Keyes, formerly dwelt.

These estates are those recorded as having been transferred from Littleton to Boxborough, May 23, 1831.

Mr. Walter Abbott Wood, of Wood's Mowing-Machine fame, belongs to one branch of the Wood family.¹

The first of the Whitcombs came from England sometime previous to 1633, and settled in Dorchester, Mass. There seems to be a number of branches, so far as we have been able to trace them. Ephraim Whitcomb, Jr., was born in Littleton about 1700, married Parthias Wheeler, of Stow, in 1731, and settled

¹ The quotations in the previous sketch are from Wm. S. Wood's "Genealogy of the Wood Family."

in Nashoba—a part of Littleton. Ephraim Whitcomb, Sr., and Hannah, his wife, settled on the farm of his brother Daniel—where Mr. Ephraim Cobleigh now lives—and were the parents of nine children: Moses, Reuben, Lucy, Ephraim, Hannah, Samuel, Peter, Martha and Joel. Of these, Reuben married and settled in Harvard; Hannah married and went to Gardner to reside; Samuel lived in Boxborough for a number of years after his marriage and three of his children were born here; he then moved to Littleton. Lucy married Mr. Paul Hayward, Jr., and settled on the place where Mr. N. E. Whitcomb now lives. They had twelve children.

Ephraim—Captain or Lieutenant Ephraim Whitcomb, both titles having been given to him—married Katherine, daughter of Boaz Brown, and settled on the farm where his father-in-law, Boaz Brown, resided, and afterwards built the brick house which stands there at the present time. Mr. Benjamin S. Hager now owns and occupies this estate. Of their eight children, three—Ephraim, Joel and Joab—were unmarried; Betsey married Mr. Benjamin Houghton, and settled in Harvard. They were the parents of three children—Heury, who died in early manhood; John, a provision dealer in West Acton; and Ephraim, a farmer in Harvard formerly, but now working at the carpenter's trade. Hannah married Daniel Cobleigh and settled on the old Cobleigh place, opposite Mr. Wright's present residence. The old homestead has long since gone to decay. Three sons—Ruel T., Daniel W. and Ephraim B.—are living in town at the present time. Katherine married Oliver Russell and went to Harvard. Edward married the daughter of Jeremiah Tuttle Sr., of Littleton. Martha married Mr. Daniel Witcomb and settled in Boxborough, on the place now occupied by Mr. J. A. Walker, who married one of the daughters. There were six children—James Heury, who lost his life in the late war; John, who married Maria Wetherbee and settled on one of the old Wetherbee places in Boxborough; Betsey, (Mrs. Walker); Sarah, who married Jacob Priest and is now living in Harvard; Anna Luella, who married Marshall Wilder and resides in Clinton, and Martha Jane, who died when quite young.

Martha or Patty Whitcomb, daughter of Ephraim Whitcomb, Jr., married Ephraim Taylor and lived on the Burroughs place. After the death of her husband, she, with her four children,—Ephraim, Joel, Reuben and Isaac,—went to New York to live.

Joel Whitcomb, son of Ephraim Whitcomb, Jr., married, and resided on Burroughs' place after Ephraim Taylor. They buried several children. Joel Whitcomb, Jr., is living at West Acton.

Moses Whitcomb, son of Ephraim Whitcomb, Jr., married Anna Hayward, of Boxborough. Of their twelve children, several died in infancy. Of nine who lived to mature years, Sally married and went to Ashby; Betsey married a Tenny and went away from town; Daniel, to whom we have before alluded,

married Martha Whitcomb and settled on the present Walker place; Mary married Oliver Wetherbee and settled on the old Wetherbee place, now W. H. Furbush's; Lydia married Mr. Peters, father of George L. Peters, of Stow, and lived in Littleton; they had three children. Moses Jr., married Martha Cotton, of Boxborough, and settled on the old Whitcomb homestead, where Ephraim Cobleigh now resides. They buried several children. There are five remaining—Edwin Whitcomb, Mrs. Hannah Conant, Mrs. Caroline Hosmer and Mrs. Maria Hendley, of Littleton, and Frank Whitcomb, of West Acton. Annie married Mr. Harry Hoar, of Littleton. Paul married Hannah Bent, of Stow, and went away from town; they had two sons. John—Col. John Whitcomb—married Maria Goodwin for his first wife; they had no children. He married Sarah Emory for his second wife, and of their five children, one died in infancy. Nathaniel Emory married Abbie Blanchard and lives on the old Paul Hayward place in Boxborough; John married Nellie Rand and went to Fitchburg; Maria married Charles E. Smith and resides in Holden; and James married Edna, daughter of Mr. Granville Whitcomb, and resides in Fitchburg. Col. John Whitcomb married Mrs. Eliza A. Hayward for his third wife.

Peter, son of Ephraim Whitcomb, Jr., married Sally Bachellor, and they were the parents of seven children. Myra married a Raymond, and went to Harvard; Peter died in early childhood; Stillman married Adeline Priest, and their two children, a son and daughter, went to the Sandwich Islands to live; Sally married Samuel Hosmer, and went to Acton first, afterward settled in Harvard; Peter, Jr., married Betsey Mead, Jan. 2, 1839, and settled in Boxborough. They buried their only child, Augustine A., about a year ago. His wife, a daughter of Mr. William Moore, died some years before. Granville married Caroline Hoar March 4, 1841, and settled in Boxborough. They have nine children—A. Granville, Elwyn, Edna, Carrie, Myra, Clarence, Frank, Eva and Austin. They are all married but two, and one, Frank, is settled on the old Nathaniel Mead place, in Boxborough. All of the children except two, are musicians, and one daughter, Edna, has been a salaried singer in the city of Fitchburg, where she resides. Austin teaches music in the same place. Merrill married in Boxborough, went to Bedford, and afterwards settled in Charlestown. One of his four children, George, married May Wetherbee, of Boxborough, and lives in Charlestown.

Peter and Granville are the only representatives of their family now living. Ephraim Whitcomb, the grandfather of these two, served in town in various positions of trust and responsibility. He was one of the selectmen when the district was incorporated in 1788, and held that position, at different times, for many years. He also held the offices of town clerk, treasurer, assessor, and he was a prominent worker in

the church and society when they were in their infancy. Moses, Ephraim and Joel, sons of Ephraim Whitcomb, Jr., also held office as selectmen for many years. Moses Whitcomb, Jr., also his son Moses, held this office; the father was also superintending school committee at one time. Peter Whitcomb, the father of Granville and Peter, was town treasurer for nine years, for which service he would take no compensation. He also served the town in the capacity of selectman. Mr. Granville Whitcomb has served the town as superintending school committee, town clerk, selectman, assessor, constable and collector, and auditor. He also had the honor of being sent representative at one time, and his father and two of his father's brothers, Captain Ephraim and Joel, also held this position for more than one year.

The ancestors of the first Mead families connected with Boxborough settled in Harvard. Dea. Oliver Mead, who was living here in 1783, and Anna, his wife, were the parents of ten children—Sarah, Lucy, Anna, Oliver, Jr., Abraham, Elizabeth, Nabby W., Samuel, Hannah (who died when eight years old) and Nathaniel. Sarah, born Dec. 19, 1778, married Levi Houghton, of Harvard. Lucy was unmarried. Anna married William Stevens, father of Oliver Stevens, of Boxborough. Oliver, Jr., married Betsey Taylor, who was an aunt of the late Capt. Varnum Taylor, and was born and brought up on the Taylor place. Abraham married a Kimball, from Littleton. Elizabeth married Reuben Houghton, of Harvard, brother of Levi, and after her death her husband married the next younger daughter of the family, Nabby W. Samuel married three times—Betsey Stevens and Mary Stevens, of Boxborough, and Lucinda Conant, of Harvard. Nathaniel married Lucy Taylor.

Oliver, Jr., and Betsey, his wife, buried several children. There are seven living: Betsey, Sally, Oliver, Lyman, Emory, Walter and Anna. Betsey, born November 10, 1815, married Peter Whitcomb and settled in town. Sally married George Hager, settled in Boxborough, and afterwards removed to West Acton, where they still reside; they have no children. Oliver married Caroline Wetherbee, and is settled in town; their only living child, Sadie A. B., married Alfred Brown and resides at home. Lyman married Melissa Willis, of Harvard, and they have two children, Lyman Willis and Emma; Willis married Julia Littlefield, of Boxborough; Emma married Frank Priest, of Harvard, and they are both living at West Acton. Emory married Eliza Clement, of Vermont, and settled in town; their only living child, Frances Annie, married Philip Cunningham, and they are settled on the old Stone place; they have four children. Walter married Eliza Jane Chandler, of Maine, and is living on the Mead estate, where his father and grandfather lived before him; they have three children: two sons,—the firm of Charles H. Mead & Co.—are engaged in business in

West Acton; and the only daughter, Blanche, is attending school at Lawrence Academy, Groton. Anna married William Moore, and they reside at the centre of the town.

Samuel, who married Betsey Stevens, settled on the estate now owned by Mr. Charles Brown. They had three children: Mrs. Elizabeth Ives, of Natick; Franklin, who married Miss Nancy Morse, of Mason; and died in Lunenburg; and Benjamin Stevens, who married Rebecca Louisa Burgess, of Harvard, and settled in town; they have two children: Edgar C., who married Lucy H. Hayward, and is living in Boxborough, and Minnie L., who married George F. Kingsbury and resides at Ayer.

Samuel and Mary (Stevens), his second wife, had only one child, Samuel, who died at the West.

Samuel and Lucinda (Conant) Mead were the parents of six children: Lucinda, who married David Howe, of Maine; Albert, who married Alwilda B. Crocker, of Maine; Alfred, who married Hannah Maria Miles, of Stow; Abby, who is unmarried; Anna, who married Charles Harding, and lived only a few years after her marriage; and Mary, who died young. Lucinda, Albert, Alfred and Abby all reside in Natick. Albert Mead has been an extensive shoe manufacturer, and has acquired a large property, but has now retired from the business and is living upon a farm. He went as representative from Natick last year.

Nathaniel and Lucy (Taylor), his wife, settled on the estate now owned by Mr. Frank Whitcomb. They had eight children: Nathaniel (who had his name changed to Adelbert), Oliver W., Sarah, Maria, Mary, Anna, Varnum and Frances Adelaide. Adelbert married Almira Hoar, of Littleton, and resides at West Acton. Oliver W. married three times; his first wife was Mary Hartwell, of Harvard; he is also living at West Acton; Sarah married Mr. Low, of Fitchburg, and they had twelve children. After her death her husband married again, and they were the parents of five more, making a family of seventeen children. Maria married Andrew Patch, of Littleton, and went to Harvard; of their four children only two are living. Mr. Patch died about ten years ago, and about a year ago his widow went to Charlestown to live with her son. Mary married a Lothrop, and lived in California until the death of her husband, a period of over thirty years; they had no children. Mrs. Lothrop is now living at West Acton. Anna married Mr. Charles Twitchell, of Fitchburg, and they are now living at West Acton; they have one son. Varnum married Miss Keyes for his first wife, and he, also, resides in the village of West Acton. Frances Adelaide married Frank Stevens, of Stow, and they have one son.

Deacon Oliver Mead was highway surveyor and collector in 1783, and held at different times for several years the positions of selectman, treasurer and town clerk. Oliver Jr., was selectman and assessor.

Samuel Mead served the town as school committee, overseer of poor and selectman for several years. Benjamin S. Mead held the office of assessor, and was selectman for twelve years, and Walter Mead, also, has served the town in this capacity. Adelbert, Oliver W. and Varnum Mead carry on a large business at 35 North Market, and 35 Clinton Streets, Boston, under the firm-name of A. & O. W. Mead & Co. I quote the following from "Our Grange Homes:" "The location is considered one of the best in the city. They have cold storage capacity of 1000 tons at West Acton, and they built the first large cold storage house in Massachusetts for holding commission goods. On the Boston premises is every necessary appliance for the expeditious and efficient handling of all goods included in the commission trade, the utmost efficiency thus being secured.

"The ample opportunities given by the long period this house has been established have been well improved; a steady reputation has thus been acquired. The specialties are butter, poultry, eggs, cheese, fruits, etc., selling to all classes of customers. Two-thirds of the business comes from the West and provinces.

"The business was established in 1844, known as A. & O. W. Mead, taking its present title in September, 1866, by which date it will be seen that this is, with a few exceptions, the oldest produce commission house in Boston.

"The early life of Adelbert was passed in agricultural pursuits. Young Mead was apprenticed to a shoemaker, and learned the trade. In 1841 he began to sell shoes in Boston, and it became convenient to his neighbors and those along the route from Boxborough to entrust goods to him for sale on commission, and thus the present business was eventually established, he taking as his partner his brother, Oliver W. Mead. They at first had a large wagon, with a stand outside Quincy Markets, and the business was conducted at the Market for nine years. It was then removed to 50 North Market Street, and to the present site in 1866. Mr. Mead is well known to our merchants as a man of unimpeachable character and high aims, and he owes his success in life to his pluck, push and ability. He has done his part by liberal and honorable methods to place the house in its present position in the trade. He is a member of the Chamber of Commerce, and, with Mr. O. W. Mead, also is a member of the Fruit Exchange. He is interested with his brothers in railroads, and also in live stock in Wyoming Territory.

"Mr. O. W. Mead conducted the farm until twenty-one years of age, and at an early age he evinced pleasure in intellectual pursuits, and on reaching his majority taught school until twenty-three years of age in Lunenburg and Littleton. He then connected himself with his brother in the present business. He is a first-class business man in every sense of the word, and has always manifested marked financial

ability. As an executive he possesses great power, and has carried system as near perfection as can be obtainable. He has been called upon to fill positions of trust, and is director in the First National Bank of Ayer, and trustee in the North Middlesex Savings Bank of the same town. He was also a director in the Chamber of Commerce, and was one of the charter members of the Produce Exchange.

"Mr. Varnum B. Mead was born on the farm; his life has been varied. When nineteen years old he went to the Sandwich Islands, where he remained five years; he then had a valuable business experience in Fitchburg, Montreal and Acton, shipping from Montreal and Acton to Boston, and mainly to his brothers. He came to this city in 1866, and was one year on salary in his brother's firm, and in 1867 was admitted to partnership. He has a large circle of warm personal friends. Among other positions of trust, he is president of the Franklin and Megantic Railroad of Maine."

John Cobleigh came from Scotland at an early period, and purchased land here about 1707. He was the ancestor of a large family, whose descendants are still with us in the persons of Ruel T., Daniel W. and Ephraim B. Cobleigh, sons of Daniel and Hannah (Whitcomb) Cobleigh, and Ephraim, son of John and Caroline (Hayward) Cobleigh. The grandparents of these were John and Rachel Cobleigh. From the first Cobleigh who came from Scotland down to Ephraim Cobleigh, one son has always borne the name of John. The little trunk covered with hair and studded with brass nails, in which the first John Cobleigh kept his money and his sword, belonging to the uniform which he wore on state occasions, are in possession of a cousin of Ephraim B. Cobleigh, who received them from his mother at her death, about a year ago. They had been handed down from one generation to another until she obtained possession of them. Daniel Cobleigh married Ann Perkins, of Biddeford, Me., for his second wife, and she is now living in the family of Mr. Ruel T. Cobleigh. The old Cobleigh homestead formerly stood opposite Mr. Wright's present residence.

Ruel T. Cobleigh married Lizzie Perkins. They had three children,—Frank, who died young; John R., who married Sarah Withington, of Princeton, and lives on the home-place, and Mida E., who married Willard Burns, and resides in Fitchburg.

Daniel W. Cobleigh married Caroline Smith, of Charlestown, for his first wife, and they had two daughters, Hannah Maria and Carrie Etta. Hannah Maria Cobleigh married Mr. Charles Veasie and settled in Boxborough; Carrie Etta Cobleigh is teaching in Harvard. She is a fine musician. Daniel W. Cobleigh married Mrs. Antoinette Barnard, daughter of Mr. Varnum Taylor, for his second wife.

Ephraim B. Cobleigh married Rosella Wetherbee for his first wife, and for his second wife, Salinda Holden, of Shirley. He has no children.

John and Caroline (Hayward) Cobleigh had two sons, Ephraim and Howard. Ephraim married Harriet Whitney, and they have eight children: Charles, Fred, Nelson, Melvin, Ora, Hattie, Alfred and Herbert. Howard Cobleigh married Lucy Ann Johnson, and resides in Fitchburg. They have two daughters.

Ruel T. Cobleigh has been active in town affairs, having been selectman, assessor, constable and collector, auditor, highway surveyor, etc., for a number of years. Daniel W. Cobleigh has held the position of town treasurer for the past twenty-six years, was town clerk for six years, selectman for seven years continuously—eleven years in all—and has held various other town offices. Ephraim B. Cobleigh served as town clerk for twelve years continuously, thirteen years as selectman, and has held various positions of trust and responsibility. He has been connected with town business for twenty-seven years.

In a volume entitled "Genealogies of the Families and Descendants of the Early Settlers of Watertown, Mass., including Waltham and Weston," is found the following: "Hagar:—In the church records Rev. Mr. Angier wrote the name Agar. Perhaps it will be ascertained that William Hagar, of Watertown, was a son of that William Hagar that was admitted freeman May 18, 1631. Both names are found in England and their arms may indicate some early affinity, a lion being their chief characteristic." Mr. Daniel B. Hagar, of the Salem Normal School, who is a great-grandson of Isaac Hagar, of Weston, says: "The two names are probably the same, as they are in the Bible. As the family was among the very earliest settlers of Watertown, it is undoubtedly of English origin. I noticed in London a street named 'Agar.' I do not understand why the different branches of the family should spell the name differently. As a scripture name it is always spelled in one way so far as the last syllable is concerned." The genealogy in the volume referred to runs thus: William Hagar (Hager), married Mar. 20, 1644-45; died Jan. 10, 1683-84. He had ten children. The third one, Samuel, was born Nov. 20, 1647; died Febr. 13, 1703-04. His fourth and last child was Isaac, of Weston, who was born Apr. 24, 1701. He married Prudence Allen, July 16, 1724. He had twelve children, the first of whom was Isaac, who was born May 5, 1725. This Isaac had four children,—Phinehas, Elizabeth, Abigail and Zilpah. Phinehas—the ancestor of the Hagers of Boxborough—married Susanna Leadbetter. He died in Weston in Aug., 1817. He had nine children,—Daniel, Nabby, Phinehas (born July 21, 1788), Charles, Helena, Darius, Maria, George (who died in infancy) and George Otis. Daniel died when about seventeen years of age. Charles lived to manhood and died at the West, Helena married a Hersey, and Darius married Lucy Wright and had eight children, of whom four died young, and the youngest daughter, Esther, married a Burn-

ham and died several years ago. Of three who are living, George is married and resides in California, and Augustus P. and Baron Stowe are both married and settled in Littleton, Mass.

Maria Hagar married William Nottage, of Boston. George Otis married Sarah Day, of the same city, and they had five children, of whom only one lived to mature years. He—George Otis—was killed in one of the last battles of the War of the Rebellion.

Phinehas Hager and Ruth Stowe, daughter of Manasseh and Mary (Whitcomb) Stowe, of Hillsborough, N. H., were married November, 1811, in Harvard, by Rev. Isaac Bonney, Methodist minister. Ruth Stowe was born in Hillsborough, December 8, 1788, and died at West Acton, May 9, 1880, aged ninety-one years and five months. *Zion's Herald*, date November 4, 1880, gives the following:

"Sister Hagar, when 16 years of age, upon the death of her parents, came to Harvard, Mass., to reside with relatives. Here she became acquainted with the Methodists, and united with the church, to whose doctrines and usages she became strongly attached. At the age of 23 she married Phinehas Hagar, of Weston, a man of deep and ardent piety. Her husband died when she was but 41, leaving her with seven children, the oldest being but 16 years old. She was a woman of strong character, never yielding a point where she considered herself morally right. Her cheerfulness throughout her entire life was very marked. About five years previous to her death she resided with a son in West Acton; here she was near the church and was a constant attendant, being present morning and afternoon in all weather. The last five months of her life she was partially paralyzed, but so kindly cured for by her daughter and son, that she was never known to make a complaint; all her wants were anticipated, and she had only to answer with a smile. Thus ended the long life of this Christian woman and affectionate mother."

Phinehas Hager died January 11, 1830, at the early age of forty-one. He was a member of the Methodist Church referred to in the history of the town, and was a class-leader many years. He owned a small farm in the southwest part of Boxborough, but worked at the business of a shoemaker, having learned that trade of Nathan Hagar, of Lincoln. The homestead was burned some years ago, but the estate is still in the hands of George Hager, of West Acton, one of the sons. Phinehas Hager and his wife, Ruth (Stowe) Hager, are buried in the old hill burying-ground. They were the parents of seven children,—Solomon, born March 28, 1813, George, Sarah, Phinehas, Mary, Benjamin Stowe and Daniel.

Solomon Hager married Lucy Ann Fuller, of Vermont, and they had three daughters, of whom one died young. Helen R. married George W. Kimball and went to St. Louis, where he was connected with Simmons Hardware Company. Mr. Kimball died very suddenly in 1889 while boarding in Swampscott, Mass. Lucy Ann married John H. White, of Chicago.

George Hager married Sally Mead, of Boxborough. Sarah is unmarried and lives in town. Phinehas, who took the name of Phinehas A., went to Oberlin, Ohio, to attend school. He, with a number of others, went out from Oberlin to found Olivet College, Michigan. He married Polly J. Edsell, of Olivet, for his first

wife, and they had five children, all of whom died in childhood. His second wife was Mrs. Sabra White, of Otsego, Michigan. He enlisted from Otsego, and entered Company B, Nineteenth Regiment Michigan Infantry, in August, 1862. He was first sergeant of his company and acted as captain for quite a long time. He was in Libby Prison at one time, but was released on parole. He was killed August 7, 1864, near Atlanta, in Sherman's March from Atlanta to the Sea.

Mary Hager married Benjamin K. Barnard and settled in Harvard. They had five children, of whom three, John, Sarah and Mary, are now living. John married Nellie Green, and lives in Worcester; Sarah married William Puffer, buried her husband, and resides at home; Mary married W. J. D. Ewart, and also lives in Worcester. The oldest son, Charles, died when about a year old, and the youngest, Charles Wesley, a student at Lawrence Academy, Groton, died when a little more than seventeen.

Benjamin Stowe Hager married Elizabeth Blanchard, of Boxborough, and resides on the Captain Ephraim Whitcomb place. They had seven children: Phinehas, who died when eight years of age; Mary E., who resides at home; Simon B., George H., Benjamin O., John M. and Sarah C., who died when a year and a half old. Simon B. Hager married Lucie C. Gilson, of Littleton, and is settled on the Whitman Wetherbee place. George H. Hager married Florence E. Albee, of Clinton, and with his brother, Benjamin O. Hager, is engaged in the grocery business in Clinton; and John M. Hager married Mattie L. Coan, of Somerville, and resides in that place.

Daniel Hager married Maria H. Nottage, of Stark, Maine, and went to Kansas, where they remained eight years. They were the parents of five children, of whom four are living. They are now settled in Wendell, Massachusetts.

The first Phinehas Hager served throughout the Revolutionary War. He, with others, came up from Weston, crossed the Concord River in a boat, and joined in the fight at Concord Bridge; and he was present at the surrender of Cornwallis, at Yorktown. Mr. Solomon Hager served as Superintending School Committee in 1839, and was chosen representative from Boxborough in 1840 and 1841. Mr. George Hager was selectman for a number of years, and Benjamin S. has held that position, also that of town treasurer for four years. Mr. Benjamin S. Hager is deeply interested in the prosperity of the Congregational Church, and for years has labored earnestly and faithfully for its advancement. His oldest son is a deacon of that church.

I am indebted to Mr. Herbert Nelson Hayward, of Watertown, Massachusetts, formerly of Boxborough, for information regarding the Hayward family, nearly all of which has been selected from the "Genealogy of the Hayward Family," which he is preparing at the present time.

"George Heaward," or Hayward, and his wife

Mary (American ancestors of the Boxborough Haywards), were one of the "about twelve families" that Rev. Peter Bulkeley, of Odell, England, and Simon Willard, a merchant of Horamonden, County of Kent, brought with them, embarking from London May 9, 1635, in the ship "Susan and Ellen" (Captain Edward Paine, of Wapping, England), and settled at Musketaguid (Concord, Massachusetts) in the fall of 1635. He was one of the first settlers of Concord, and had an allotment of land from the first division of lands of the original grant, by the General Court, of six miles of land square, where he built a house and barn. In 1664 he built a saw-mill, afterward a corn-mill, at what is still known as Hayward's Mills. His full name has appeared in ancient records, in addition to that above, as Gog Heaward, Georg Heaward, George Heyward, Georg Heyward, George Heiward, George Heywood and Geo. Howard, but Savage in his "Genealogical Dictionary" says, "he wrote his name Heaward." Georg Heaward and wife are quite likely a branch of the Hayward, *alias* Haward, or Howard family, that early settled on the Isle of Hartrey, in the northeast part of Kent County, England. *This* Hayward family were a branch of the very ancient and original family of Havard or Hayward, *alias* Havert, Heyward, Haward, Howard, of Wales, where the earliest records of the Norman ancestor, who, it is said, came in the eleventh century from Havre de Grace, the sea-port town of Normandy in the northern part of France, are found to be.

"Joseph; heaward," or hayward, as he signed his name to his will, was the second son of Georg Heaward, of Concord, Massachusetts. He was born in 1643, and married for his first wife, Hannah Hosmer, of Concord, and for the second, Elizabeth Treadway, of Watertown; Simeon hayward, of Concord, sixth son of Joseph and Elizabeth hayward, born in 1683, married Rebecca Hartwell, of Concord, in 1705. Deacon Samuel Hayward, of Acton, second son of Simeon-hayward, or Hayward, and Rebecca (Hartwell) Hayward, of Concord, born in 1713, married, in 1739, Mary Stevens. Paul Hayward, of Boxborough, Massachusetts, second son of Deacon Samuel and Mary (Stevens) Hayward, of Acton, born 1745, married Anna White, of Acton, in 1768, and settled on the farm now owned by Mrs. Eliza A. Hayward. He died May 16, 1825, aged seventy-nine. They had a family of ten children: Anna, Deacon Paul, Sarah, Mather, Elizabeth, James, Susanna, Ebenezer, Mary and Esquire Samuel Hayward. Anna married Moses Whitcomb; Deacon Paul married Lucy Whitcomb; Sarah married Reuben Graham; Mather married Lucy Page, of Bedford; Elizabeth married (1) Gates, (2) Whitcomb, of Littleton; James married Eunice Wood, of Boxborough; Susanna married Moses Hartwell, of Littleton; Ebenezer married Polly Wetherbee; Mary married (1) John Wood, (2) Jonathan Nource, of Boxborough; Esq. Samuel married Sophia Stevens, of Marlborough.

Deacon Paul and Lucy (Whitcomb) Hayward had fourteen children: Paul, Lucy, Ephraim, Joel, James, John, Stevens, Samuel, Hannah, Eliza Ann, Joseph, and three who died young. Paul, Ephraim, Joel, James, John, and Samuel all settled in Ashby, Mass.; Lucy married John Kimball, of Littleton; Stevens married Harriet Johnson; Hannah died at the age of 24; Eliza A., married (1) Ebenezer W. Hayward, (2) Col. John Whitcomb, both of Boxborough; and Deacon Joseph married (1) Catherine W. Wellington, (2) Mrs. Ellen A. Bezanson, of Chelsea.

James Hayward, who married Harriet Foster and settled in Ashby, had one son, Joel Foster, who married Sarah E. Webber, of Ashby, by whom he had eight children: Cornelia A., who married Granville Veasie, of Boxborough; Cordelia E., who died young; James P. Stevens, Joel Foster, Minnie, Martha J., and Roland. Joel Foster Hayward, Sr., was born in Ashby, and previous to coming to Boxborough lived in Acton, where for ten years he was deacon of the Congregational Church. He has served the town as superintendent of schools, also as selectman.

Deacon Joseph and Catherine (Wellington) Hayward had two children, Joseph Warren and Lucie Helena. J. Warren married Margaret A. V. Hutchins, of Carlisle, and Lucie H. married Edgar C. Mead, of Boxborough. J. Warren Hayward has served the town as selectman and assessor for several years. His father, Joseph Hayward, was deacon of the Congregational Church in Boxborough for twenty-six years. He died June 22, 1888.

James and Eunice (Wood) Hayward were the parents of nine children: Eunice, Susannah, James Wood, John (who died when twenty-six years of age), Stevens, Lucy Anna, Paul (who died at the age of twenty), and two who died in childhood. Eunice married Emery Fairbanks; Susannah married Sewell Fairbanks; James Wood married Hannah E. Conant, of Acton, Mass.; Stevens married Charlotte Conant, of Acton, who was eighth in descent from Roger Conant, who was first Colonial Governor of the Massachusetts Bay Colony at Cape Ann, in 1624; Lucy Anna married Thomas Burbeck, of Acton, buried her husband in 1870, and is now living with her brother, Stevens Hayward, in Boxborough. "James Hayward," says William S. Wood in his "Wood Genealogy," "was named for his uncle, James Hayward, of Acton, Massachusetts, who fell at Lexington, April 19, 1775, the day of the Concord fight." He was said to have been an excellent man and universally esteemed by those who knew him. He was for a number of years selectman, assessor and highway surveyor of Boxborough. Capt. James Wood Hayward, his son, resides in West Acton, Massachusetts. He has been active and enterprising, and is a prominent man in his town.

Stevens and Charlotte (Conant) Hayward were the parents of five children: Charles H., who died in

infancy; Herbert N., J. Quincy, Clara S. and Lottie M. Herbert married Sarah P. Baldwin, of Waltham, and resides in Watertown, Massachusetts. J. Quincy, a graduate of Amherst, class of 1882, is unmarried, and is at present engaged on the staff of the *Bunker Hill Times*, Boston. Clara S. married Charles L. Woodward, of Landgrove, Vermont, and resides in Boxborough, and Lottie M. married Charles V. McClenathan, of West Rindge, New Hampshire. Stevens Hayward received an academic education, taught school in Boxborough and Acton, and finally settled on his father's farm, where he has lived most of his life. He was a member of the Boxborough Light Infantry Company when it existed, and has been school committee and highway surveyor of Boxborough.

Ebenezer and Polly (Wetherbee) Hayward had seven children: Ebenezer W., Dea. Albert, Mary, Franklin, Susanna, Anna and Paul. Hon. Paul Hayward married Alice M. Balcom, of Sudbury, Massachusetts, and they were the parents of four children: Alice P. who died in infancy; Florence M., Albert H., and Cally H. Florence M. married Maurice G. Cochrane, of Melrose, Massachusetts. Albert A. is master mechanic of the Thomson-Houston Electric Company, of all work on the West End Street Railway System, Boston, and he is also purchasing agent for the same company. Hon. Paul Hayward resided on his father's homestead for many years. He was school committee and deacon of the Congregational Church for a long time. He had the honor of being sent representative from Boxborough in 1871, and he served in the late Civil War for nearly two years. On account of the sickness and suffering he experienced while in his country's service, he was granted in 1885 an invalid pension. He removed from Boxborough to Reading, Massachusetts, in 1864, thence to Melrose Highlands in 1879. In 1887 he went to Los Angeles, California, and entered the employ of the Los Angeles Electric Street Railway as a conductor. He is now temporarily residing there.

Esquire Samuel Hayward and Sophia, his wife, were the parents of five children. He lies in the lower burying-ground in Boxborough, and his only son, Samuel Henry, is also buried there.

Deacon M. E. Wood, in his centennial speech, said of the six Hayward sons who removed to Ashby: "They and their descendants exert a large influence in all that pertains to the welfare of the town, both agricultural and educational. In all the work of the church they are generous supporters; one of them at his death left a generous bequest, that these blessings might be perpetuated." The obituary notice of their mother is worthy of note: "This aged Christian was a pattern of industry, kindness, meekness, patience and piety. For three-score and six years she was a consistent member of the Congregational Church in Boxborough; her eleven children joined the church of their mother and two of them became deacons in it after their father."

Thomas Blanchard and his son George, born 1616, came from near Andover, England, in the year 1639, on the ship "Jonathan," and settled in Charlestown (now Malden), Mass. Joseph, son of George Blanchard, born 1654, married Hannah Shepard. Joseph, son of Joseph and Hannah (Shepard) Blanchard, born May 7, 1686, married Elizabeth Whittemore, and in 1717 or 1718 moved from Charlestown, "through the Indian paths," to Littleton,—that part of Littleton which is now Boxborough,—and settled on the John Blanchard farm. They had two children, Jemima, born Dec. 21, 1721, and Simon, born Oct. 6, 1728. Jemima was unmarried and died in 1790, aged sixty-nine years. Simon married Sarah ———, and they were the parents of four children, among whom were Calvin, born February 27, 1754, and Luther, born June 4, 1756, the brothers whose names have become familiar to us through their participation in the fight at the old North Bridge, Concord, in 1775. Calvin married Abigail Reed, of Westford. The foregoing information with regard to this branch of the early Blanchards was obtained from Mr. George D. Blanchard, of Malden, Mass., who has been engaged for several years in collecting genealogical records of the Blanchard family.

Calvin and Abigail (Reed) Blanchard were the parents of nine children,—Abigail, Calvin, Luther, Simon, Jemima, who died in infancy, Joseph, Lucy, John and Susannah. Abigail married Reuben Hartwell, of Shirley; Calvin married (1) Hannah Hoar, (2) Nancy Warren, both of Littleton. Calvin and Hannah (Hoar) Blanchard, had five children of whom two died in infancy. Jemima, their oldest child, married Mr. Parker, the father of James A. Parker, formerly of Littleton. Luther Blanchard was unmarried and resided with his brother John, at the old homestead, until his death, at the age of seventy. Simon married for his first wife Martha Shattuck, of Littleton; for his second, Mary Keyes, of Westford, and for the third Mrs. Hannah Preston, of Boxborough; Joseph married Louisa Marshall, of Tewksbury; Lucy married Amos Day, of Shirley; John married Margaret Burbeck, of Westford, and Susannah married Abner Wheeler, of Acton; they had eight children. Mr. Wheeler died young, and his widow afterward married Pelatiah Brooks, of Acton. They had one child. Mrs. Brooks died in Shirley.

Simon Blanchard (1784–1867) and Martha Shattuck, his wife, settled on the estate where Mr. Herbert Blanchard now lives, and were the parents of two children, Simon and Martha. Simon married Elizabeth Dix Fletcher for his first wife, and they had three children—William, Ellen Ann and Elizabeth Fletcher. William married Nettie M. Stacy, of Stoddard, and after his death, she, with her two children, Arthur W. and Gracie M., returned to her former home. Ellen Ann married Calvin N. Holbrook, and they, with their three boys, reside in Littleton. They buried one little girl in childhood. Elizabeth

Fletcher married Amasa Knowlton, of Acton, and, with their three children, reside in that place. Simon Blanchard married Susan Wheeler, daughter of Abner Wheeler, for his second wife.

Martha Blanchard married Samuel Sawin, of Stow, and of their five children, one died in infancy; Samuel Dexter¹ married Caroline Elizabeth Simonds, and their only child, Charles Dexter, is a physician in Charlestown; John Travis married Sarah Whitney Sawyer, of Bolton, and they had four children, of whom two are living; Martha Maria married Marcus Morton Raymond, of Boxborough, and of their three daughters, one, Nellie Morton, died young, and the other two, Carrie² and Ella, reside in Somerville, the present residence of their father, and the place where their mother died. Simon Blanchard Sawin died at the age of twenty-seven.

Simon Blanchard and Mary (Keyes), his second wife, were the parents of nine children: Joseph K., Sarah, Mary Ann, Luke, Elizabeth, Caroline, John, and two who died in early childhood. Joseph K. married Mary Culver, of Boston, and they had eight children: Mary Eliza, Phœbe Ann, and Joseph Hermon, who died in childhood, Emily Frances, Caroline Augusta, Calvin Herbert and Willard and Warren, twins. Emily Frances married Ephraim Raymond, and resides in Somerville. They have buried one child and have six living. The two oldest children are married. Augusta Raymond married Mr. William H. Forbush, and they, with their four children, are settled on one of the old Wetherbee places in Boxborough. The next daughter, Hattie, married Ernest Bezanson, and resides in Charlestown. Caroline Augusta Blanchard married Richard Y. Nelson, and resides in town. They have buried one little daughter, and have three children living. Calvin Herbert married Sarah Lauder, and is settled on the old place where his father and grandfather lived before him. They have buried one child, and have four living. Willard Blanchard married Jennie Furbush, of Maine, and they had three children, of whom one died in infancy. Willard Blanchard has been dead about eight years, and Jennie (Forbush) Blanchard died about two years ago. Warren Blanchard married Nellie Webber, and of their five children, only three are living. They reside in Southboro'.

Sarah Blanchard married Leonard Chandler, of Princeton, and of their six children, two died young. The oldest daughter, Sarah Frances, married Henry Hobbs, of Princeton; Ella Jane is unmarried, and resides in Cambridge; Leonard married Hattie Stewart, and they, with their three children, reside in Somerville; John is unmarried, and remains at home.

Mary Ann Blanchard married James Fisher Sawin, and lives in Natick. Only four of their eight chil-

¹ Samuel Dexter Sawin has died since the writing of this history.

² Carrie married Mr. Alonzo B. Cushing, June 18, 1890.

dren are living: Simon Blanchard, Phares N., Martha and Lizzie Ida. Simon Blanchard Sawin married Alice Leland, of Sherburne, and they have four children. Phares N., Martha and Lizzie Ida remain at home.

Luke Blanchard married Jernsha Vose, of Princeton. They buried two children in early childhood, and their youngest daughter, Mary Alice, when twenty-one years of age. Annie and Arthur reside at home with their parents, in West Acton.

Caroline Blanchard married Simeon Wetherbee, of Boxborough, and they have eight children: M. Llewellyn, Allie V., Ellis, Burt L., Mary K., Arthur H., Ella F. and Carrie B. Llewellyn is married and living in Boston; Allie married Morton Raymond, of Somerville, and they have one son, John Raymond; Ella married Annie R. Cowdrie, of Boxborough, and they, with their three children, reside in Harvard; Burt L. is in business in Boston; Mary K. married George M. Whitcomb, of Charlestown, and resides in that place; Arthur H. remains at home; Ella F. is teaching in Harvard, and Carrie B. is attending school at Ashburnham.

John Blanchard married Anna M. Snow, and they are settled in Lawrence. They have buried one child, and the remaining daughter, Lillian, is at home preparing herself for a teacher.

Joseph and Louisa (Marshall) Blanchard settled on the Reed farm, and were the parents of seven children: Joseph, Marshall, Henderson, Solon, Abby Ann, Mary Louisa and Calvin. Joseph, Henderson and Mary Louisa are all married and living in the West. Joseph is a physician. Marshall married Charlotte Reed, of West Acton, and died in California. He left one child. Solon is married, and living in Weymouth. Abby Ann married Eliab Reed, and died on the Reed farm, leaving one child. Calvin is unmarried, and lives near Weymouth.

John and Margaret (Burbeck) Blanchard had eight children: Myron, Abbie, Charles, Clara, Etta, Lucy A., George and Louisa M. Myron died in childhood; Abbie married Mr. N. E. Whitcomb, of Boxborough, and they have two sons, Arthur M. and Waldo E.; Clara is living with an uncle in Salem; Etta is engaged in book-keeping in Charlestown; Lucy A. married Mr. George H. Decosta, and they, with their two children, reside at West Acton; Charles is married, and settled in Eden, Dakota; George remains at home, and Louisa M. is in Boston. Mr. John Blanchard died at the old homestead about a year ago, at the advanced age of ninety-five years.

The first Calvin Blanchard was in the whole Revolutionary War. He was at the battle of Bunker Hill on the 17th of June, 1775, and was in some other engagements during the war. He was one of those who helped to build the forts on Dorchester Heights, the

building of which caused the British troops to leave Boston. He lived to return home and settle on a farm, that is at the present time, and has always been, in the possession of the Blanchards. He was killed by the fall of a tree, January 2, 1800.

Joseph K. Blanchard has been interested in the welfare of both the church and the town. He served as Superintending School Committee, selectman, assessor and auditor for several years, and was an earnest and efficient member of the Congregational Church for over fifty years. He died in 1888, aged seventy-three. His wife, Mary (Culver) Blanchard died about eight years ago.

Luke Blanchard was constable for a good many years. He settled in West Acton, but does business in Boston as a commission merchant. He is also largely interested in real estate in different places. His son, Arthur Blanchard, is a butcher and cattle-trader at West Acton.

So far back as we can trace them, there seems to have been three Wetherbee families settled in town, though perhaps could we trace the line a little farther, we should find,—what is supposed to be the case,—that there were only two families originally, and that the heads of these were brothers. Phineas Wetherbee, whose father, John Wetherbee, was here as early as 1717 or 1727, settled on the farm where Silas Hoar now lives, and was ancestor of the line of Silas, Simeon, Norman and probably Charles Wetherbee. This farm has been in possession of the Wetherbee family from very early times, and descendants of the eighth, ninth and tenth generations, in the persons of Mrs. Lucy (Wetherbee) Hoar, her daughter, Mrs. Mercy (Hoar) Wetherbee, and the children of Mr. Charles T. Wetherbee and Mercy (Hoar) Wetherbee, are now occupying the old homestead. The house now standing was built more than 150 years ago. There are old deeds and wills of the time of Queen Anne in possession of the present family. A remote ancestor of the family, becoming alarmed lest he should in some way lose his wealth, is said to have hidden a large sum of money upon the estate. The story has been handed down from one to another and later generations have sought for the rumored wealth, but, although at one time the sum of \$30 or \$40 was found in a drill-hole in a rock, with a bullet placed over it, nothing more has ever been discovered.

Silas and Betty Wetherbee were the great-grandparents of Mrs. Lucy (Wetherbee) Hoar—wife of Silas Hoar—who is the oldest living representative of this branch of the Wetherbee family now living in town. Her grandparents were Simeon and Mary (Robbins) Wetherbee, and her parents Silas and Mary Wetherbee. The first Silas Wetherbee gave the meeting-house lot in 1775; he was much interested in both church and district, when they were in their infancy. He was selectman in 1783. Silas and Mary were the parents of fourteen children: Simeon, born November 4, 1800; Stillman, Andrew, Silas

¹ Arthur H. married Miss Nellie Mentzer, of Harvard, September 24, 1890, and is settled on the home farm in Boxborough.

Whitman, born February 16, 1806; Daniel, Emory, Mary Ann, Susannah Lowell, Solomon Taylor, who died young; John Robbins, Lucy, born June 21, 1820, and Clarissa, her twin, who died in infancy. Eliza Jane Brewer, and Mercy Randall. Simeon married Persis Whitney; Stillman married Elizabeth Sargent, of Stow, and their only daughter married Simeon Green, of Harvard; Andrew married Mary Sargent and settled in town. Of their eight children only four are now living. Augustine resides in Acton, and his widowed mother, Mrs. Mary (Sargent) Wetherbee, is living in Hubbardston, Massachusetts. Silas Whitman married Mary Sargent, sister of Elizabeth, and went to Stow, afterwards settled in Boxborough. He died about six years ago; his wife died several years before, and of their eight children only two are now living, Mrs. Jane E. Tuttle and Stillman Wetherbee, of Acton. Daniel married Nancy Bulkley and had no children; Emory married Hannah Dyer, of Lowell. He died young, leaving no children. She lived to the age of eighty years, and died in the autumn of 1889. Mary Ann married George Dolby and went away from town; Susannah Lowell married Thomas Johnston, of Boston, and they had one child. Mr. Johnston died a few months ago.¹ John Robbins Wetherbee married Nancy Goodwin, of Buxborough, and settled in Bolton. They have eight children. Lucy married Mr. Silas Hoar and settled on the old homestead place where seven generations of the Wetherbee family had lived before her. They have an only daughter, Mercy, who married Charles T. Wetherbee—of another branch of the Wetherbee family—and they have three children. Eliza Jane Brewer married William Eaton, of Clinton, and they have three children. Mercy Randall married Stillman Houghton, of Worcester. They have one son.

Simeon and Persis (Whitney) Wetherbee were the parents of seven children: Andrew, Simeon, Caroline, Samuel Norman, Silas, Edward, who died in infancy, and Edward. Andrew married Nancy Wheeler, of Littleton, settled in town, and removed to Stowe; Simeon married Caroline Blanchard and settled in town; Caroline married Mr. Oliver Mead, of this town; Samuel Norman married Caroline Wheeler, of Stow, and settled on the farm where his father had lived before him. They have two children living. Silas married Mary Parmenter, of Marlborough, and resides in that place; Edward married Susan Withington, and they with their children, Persis and Alfred, are living in this town.

The ancestor of another branch of the Wetherbee family settled on the farm where Mr. John H. Whitcomb now lives, and one of the family, for at least four generations, has borne the name of Samuel. Samuel, who was the son of Samuel and Sarah Wetherbee, and Betsy, his wife, were the parents of seven chil-

dren: Charles, Betsey, Sally, Lucinda and Lucy, Dolly, and Samuel (1807-72). Charles, Lucinda and Lucy died young. Betsey married Daniel Houghton, of Harvard; Sally married Ephraim Whitcomb, of Littleton; Dolly married Joel Hayward, of Ashby; and Samuel married Maria Fletcher, for his first wife, and for the second, Naomi Chandler, of Maine. Samuel and Naomi (Chandler) Wetherbee were the parents of two children—Maria, who married John H. Whitcomb and is settled on the old Wetherbee place (their children are the sixth generation that have occupied it) and Charles T., who married Mercy Hoar.

Phineas Wetherbee, the ancestor of a third branch of the Wetherbee family, was quite an old man in 1770, and owned the farm where W. H. Furbush now lives. His son Phineas owned the place in 1783. The first house, of logs, was built in the second field north of Mr. Parker's, the original grant of land containing something more than 200 acres. Old deeds show that they were in quite good circumstances for those times, owning not only this land, but making quite large money transactions. As an illustration may be mentioned the fact that the first Phineas Wetherbee paid \$1000 to a man in Littleton as a substitute in the army, 1775-1778. They were active and interested in town and public affairs. The first deed describes the land as being in Littleton, in the Province of Massachusetts Bay, in the tenth year of the reign of George the Third. Mr. Augustus W. Wetherbee, the last and only representative of this branch in town, says, "I have heard my grandfather speak of the first of the family, and how they often saw the Indians looking into their windows at night." I quote also from his Centennial speech: "It is something more than a hundred and sixty years since my ancestors broke the soil and built their cabin in the field just back of the house now owned by Mr. Parker, and for one hundred and fifty-five years they lived there and at the old homestead where Mr. Furbush now lives, and tilled those same acres; and there was I born and here have I lived the most of my life. In yonder graveyard one of the first stones erected is to the memory of one of my ancestors. Well do I remember the stories of my grandmother, of the early settlers' struggles with the Indian and wild beast, of how they used to go to the market on horse-back, with their saddle-bags on before and a carcass or two of veal or mutton strapped on behind, the roads mere cart paths then; of how they used to come up to worship God on this very spot on which we now stand, on horseback, the husband riding before and the wife and two or three children on a pillion behind."

Phineas Wetherbee had seven children: John, Daniel, Phineas, Betty, Caty, Dolly and Hannah. John Wetherbee, born April 19, 1783, married Linda Wood, born May 17, 1784, and they had three children: Oliver, John and Lucinda. John Wetherbee, Sr., was very energetic and enterprising, but at the age of twenty-three, after over-exertion in fighting a

¹ Mrs. Johnston has died since the writing of this history.

fire in the woods, took a severe cold, which resulted in paralysis of his right side, so that for twenty-eight years he could not walk a step, and for fifty-eight years he was able to do but very little. He acquired, however, quite a property, owning half of the original farm. He was town treasurer for quite a number of years, and was especially interested in church affairs. He died May 18, 1864; his wife, Linda, died March 2, 1863.

Oliver Wetherbee (1805-75) married Mary Whitcomb, and they had three children: Jonathan Kimball Wood, Martha M. and Marietta C. Mrs. Mary (Whitcomb) Wetherbee is still living at the age of eighty-two years, with her son Kimball, who married Jane Tuttle, and resides at South Acton. Kimball Wetherbee commenced work with the Tutties at South Acton as a clerk, and worked his way up to his present position, one of the firm of Tutties, Jones & Wetherbee. He has been much in town office and has been several times a candidate for the General Court. Martha M. Wetherbee (1839-65) is said to have been "one of the best of women, active everywhere, a splendid teacher and musician." Marietta C. (1850-80), married Charles B. Stone, and they have one daughter, who lives with her father at West Acton.¹

John Wetherbee (1807-74) married Louisa S. Brown. They were the parents of two children; Francis Wood, who died in infancy, and Augustus Winslow, who married Hattie Lane (1844-84), and settled in his native town. Mr. A. W. Wetherbee is interested in all that pertains to the town, and has held various positions of usefulness therein. He was sent Representative in 1861. He is especially interested in church affairs and has held the positions of chorister and clerk for many years. Mrs. Louisa S. Wetherbee died several years ago.

Oliver Wetherbee commenced teaching when about twenty years of age and became quite a noted teacher. He was elected to town office soon after he was twenty-one, and nearly all his life held office, either as selectman, assessor, town clerk or treasurer, often more than once, and for many years was school superintendent. He and his brother John were early interested in military affairs, both belonging to the company in town as long as it existed, John holding the rank of first lieutenant. They were both much interested in music, playing together in church and in private for nearly forty years, more than thirty years in church. Oliver Wetherbee was chorister forty-four years and church clerk eighteen years. Both were active in political and public affairs.

Lucinda Wetherbee (1821-82) married John W. Phillips, a noted architect. He superintended the erection of several fine buildings in Lowell, among them the new jail. He was an Englishman by birth. They are both dead, also John H., their second child;

¹ The daughter, Elma Stone, has recently died.

the others, William W., Josie and Charles, are living in Jonesville, Wisconsin.

Phineas Wetherbee, of West Acton, is the son of Daniel Wetherbee, brother of the first John Wetherbee.

Miss Sarah Hager, who was an inmate of the Stone families for a period of thirty-five years, furnishes most of the information with regard to this family. Silas Stone built the house that Mr. Cunningham now occupies, about the close of the last century. He had four sons and several daughters. One of the daughters married Capt. Oliver Taylor, Jr., of Boxborough. His son Phineas went to New Hampshire and married Miss Hannah Jones, of Ware, by whom he had one daughter and seven sons, four of whom are now living—Phineas J. Stone, president of the Charlestown Five Cent Savings Bank; Amos Stone, treasurer of the said bank; Jasper Stone, jeweler, 45 Main Street, Charlestown, Mass.; and Jonathan Stone, landholder Revere, Mass. While Phineas Stone was residing in New Hampshire he was appointed colonel in the army of the War of 1812. He was on duty several months. He moved his family to Charlestown about the year 1825. Phineas J. Stone has held the position of mayor of Charlestown and Amos Stone was county treasurer for a number of years.

Jasper Stone, son of Silas and Eunice Stone, resided in Boston a few years. He married Mary Babcock, of Weston, Mass. Joseph Stone, son of Silas and Eunice Stone, married Sarah W. Stowe, of Hillsborough, N. H., and they resided with his parents, expecting to see them through life, but he died when thirty-seven years of age, in consequence of which his brother Jasper returned to the homestead and cared for his parents the remainder of their lives. They lived to be more than eighty years of age. Jasper Stone died when about seventy-six and his widow lived to the age of ninety-three years. Both Jasper and Joseph Stone have been sent as representative from Boxborough.

A granddaughter of Silas Stone, Sally Mallory, who was brought up from childhood in Boxborough, married Mr. Aaron Fiske, of Needham, March 29, 1831.

Time and space forbid a farther extension of these family sketches, which are of so great interest, but I cannot refrain a brief mention of a few names alike worthy of record with those already given.

Christopher Page, a son of the Captain Christopher Page of early times, still visits his native town and early home (where Mr. Jerome Priest now resides) in summer, making his stay with Mr. and Mrs. Priest, both of whom are descendants of old residents. Mrs. Priest's maiden-name was Louisa Hoar, a daughter of Mr. John Hoar. Mr. Jerome Priest is a son of Benjamin Priest, who, in his time, was actively engaged in town affairs, having been selectman for several years.

Tower Hazzard, whose father was a slave, was a

good man and much respected. His son, Tower, is living in Harvard at the present time.

The Silas Taylor family of one hundred years ago have descendants living in Acton. This family were very active in all that pertained to the interest of the town in early years, having served the town in many positions of public trust. Several of the slabs in the lower "burying-ground" bear the names of members of this family.

The late Varnum Taylor was a grandson of Capt. Oliver Taylor, who was highway surveyor and collector when the district was incorporated, in 1783. Capt. Oliver Taylor set out the elm tree in front of the Taylor residence, bringing it from "Wolf Swamp" on his shoulder when but a sapling. A few years ago the Taylor family and their friends held a picnic beneath its wide-spreading shade. Capt. Oliver Taylor took part in some of the battles of the Revolutionary War. Both Capt. Oliver Taylor, Jr., and Varnum Taylor, his son, have held various positions of trust and usefulness in their native town. Mary Taylor, a daughter of Capt. Oliver Taylor, was a teacher in town for many years, and is now living in West Acton. Mrs. Varnum Taylor is living with her daughter, Mrs. D. W. Cobleigh; but the Taylor estate is still in the hands of the family.

Miss Josie M. Fletcher, of West Acton, is a daughter of Mr. John Fletcher, who was at one time selectman of Boxborough for a number of years.

Mr. Oliver Stevens, who is the son of William Stevens, is still living on the old Stevens estate, in the southwest part of the town. William Stevens was School Committee and selectman quite a long time.

Lyman Bigelow, the proprietor of the store "on the hill," was town clerk for fourteen years; selectman, assessor and overseer of the poor for several years, and Superintending School Committee for several years. He was universally respected. His son, Lyman Waldo, also served the town as treasurer and town clerk. Mr. and Mrs. Bigelow were very much interested in the Universalist Church and its welfare.

The Draper family dates back more than a hundred years. Their ancestor, Boston Draper, helped to pay for the "old Harvard meeting-house," in 1775, and from time to time the Draper name appears on record in various responsible positions. Reuben Draper built the house where B. S. Mead now lives. He was a very ingenious man. Simon Whitney Draper built the house which J. F. Hayward now occupies.

Mr. Francis Conant, who for some years held important town office, has seven sons and three daughters, most of whom are settled near their native town. Charles H. Conant is a lawyer, in Lowell; Albert F. and Nelson B. are in business in Littleton, under the firm-name of Conant & Co. John G. and Edwin H. Conant—the firm of Conant Bros. & Co.—are in business in Shirley; George F. Conant is following the occupation of a civil engineer in Decatur, Alabama; Waldo E. Conant, of the firm of Conant, Houghton

& Co., is engaged in a suspender manufactory at Littleton Common; Julia Conant is assistant matron at Bradford Seminary; Adelia M., who married Geo. A. Parker, and buried her husband, is teaching in a training-school at Bridgeport, Conn.; and Lizzie S. married Eugene B. Parker, of Littleton, and resides in that place. All are honored and respected members of society.

Mr. Frank A. Patch, son of Jonathan, who was the son of Isaac and Rachel (Cobleigh) Patch, has recently erected a beautiful residence on the Ewings place, the home of his mother and step-father, and has made other improvements. Mr. Patch, who a short time ago was doing business in Winchester, is now proprietor of a furniture store on Washington Street, Boston. He resides in Boxborough. O. K. and B. Henry Patch, of South Acton, sons of Nathan Patch, who was selectman, assessor and overseer of poor for several years, are grandsons of Mr. Isaac Patch, formerly of this town.

The name of Dr. D. Robins will doubtless arouse pleasant memories in the hearts of many of the older residents of the town. Here among these quiet hills he followed the calling of a country doctor for many years, and made his home upon the place now owned and occupied by Mr. J. H. Orndorff. Dr. Robins was he of whom, in 1792, the records said, "Voted that the Dr. sit in the fore-seat of the front." He was selectman and town clerk for several years. Descendants of this worthy man are about us still.

CHAPTER LXIII.

READING.

BY HORACE G. WADLIN.

READING, one of the oldest towns in the Commonwealth, was settled in 1639 upon "an inland plantation at the head of the bounds" of the township of Lynn. Out of its ancient territory three towns have been formed, the two other than itself being North Reading and Wakefield, formerly called South Reading, within whose precincts the foundation of the old town was laid. The early history of Reading, therefore, is identical with that of the other towns mentioned.

The settlement of Reading followed close upon the first migration to the Colonies. In December, 1620, the "Mayflower" reached Plymouth, bringing her little company of families. Eight years were spent in unremitting toil, in unceasing warfare with a rugged wilderness and unpropitious climate; then a company of Puritans, led by Endicott, settled at Salem. At about this time William Blackstone, an Episcopalian, moved by a desire to withdraw from association with the Puritans of the settlements, came

to the peninsula which is now called Boston. In 1639, under a charter granted by Charles I., a settlement was made at Lynn. From Lynn a few families pushed on into the interior, and after a day's journey came to a little lake surrounded by the primeval forest. To the south and west were low hills, and another lake, whose bosom had, till then, borne only the cance of the savage.

The country presented then, and presents now, no marked features, but its situation was favorable. It was well-watered and the soil was good. The hillsides sloping to the south were well adapted to the cultivation of small crops. To the northward the forest promised an abundant supply of timber for their dwellings. From the lakes, well stocked with fish, the Saugus River flowed down to the parent settlement at Lynn, while on the other side the Ipswich ran to the ocean, and around its mouth the plantations at Ipswich had already been established. Not too far away were the growing settlements at Salem and Boston.

It is probable that some of these families came from Reading, England, and, doubtless to preserve in the wilderness the memory of their old home, they called their settlement, made in 1639, near the shores of Lake Quannapowitt, after its name. Four years later the Colony Court incorporated the town, giving it an area of four miles square. This did not include the territory which afterward became North Reading, this being added by a subsequent grant.

The antecedents and characteristics of the first settlers were like those of all the founders of the Massachusetts Bay Colony. They possessed indomitable energy and untiring industry, and, more than all, were inspired by a purpose, which had no small part in the successes they achieved. They faced discouragement with unbending will and patient self-denial. Their adherence to duty, their general integrity and fidelity, formed the basis of those peculiar New England traits of character, which have justly merited the esteem of their descendants.

The need of food and shelter was immediate and pressing. A mill for grinding corn and sawing lumber was required. This want the early settlers at once proceeded to satisfy. In 1644, the year of incorporation, the town made a compact with John Poole, who had settled on the river near the site now occupied by the Wakefield Rattan Company, to guarantee him certain mill privileges, in return for which he was to grind the grists of the settlers; and the privileges were to be retained by him and his descendants as long as he continued to maintain such a mill.

Besides this provision for their material needs other things were not less important. A church must be established, and—that good order might be maintained, to the end that other families might be attracted thither, and the town thus grow in numbers and importance—a form of government must be adopted to regulate the public affairs. Hence, we find that even

previous to incorporation a rude meeting-house had been built and a pastor was soon called—the twelfth church in the Colony.

Two dangers threatened the inhabitants: one, assault by Indians, the other the ravages of the wolves and bears which filled the woods around them. To meet the first, a military company was formed in the town. This had been made obligatory upon every settlement, by the action of the Colony Court. Against the other, the town offered a bounty of twenty shillings per head for every wolf killed; and a public herdsman was appointed to guard the cattle from the wolves by night, and to see that they might not “eat up and destroy in the *Somer*, what should be for them in the winter.”

The first pastor, Rev. Mr. Green, having died, Rev. Mr. Haugh, a graduate of Harvard College, was called to succeed him. The question of hard or soft money, of currency or coin, did not trouble our fathers. It was agreed that the new pastor's rates or salary should be “payed him every quarter—one-half in wheat, pease and barley, and the other half in rye and Indian.” Even under this natural mode of payment it appears that, as happens in our day, some were backward in paying their allotment, for we read that “George Davis and Tho. Clarke were chosen to gather up that part of Mr. Haugh's rate that will not be freely *payed* without constraint.”

All persons were obliged to submit to a tax for the support of the pulpit, though leaving town before the year was out. The pastor was the head of affairs, and his advice was sought upon all important subjects. Notices of public meetings and proclamations of any sort were then, as is frequently the case now, posted at the church doors.

Attendance upon divine worship was strictly enjoined and enforced, and we read in the records that “Henry Felch, being convicted of departing the *publique* assembly when the ordinance of Baptism was about to be administered, was admonished by the Court of his sin and ordered to pay costs . . . two shillings.” And, later, “Saml. Dunton and wife were summoned in Court to answer for not coming to the *publique* worship of God on the Lord's day.”

Equally zealous were they in the management of civil affairs. The citizens were required to be present at all town-meetings under penalty of fine; and on one occasion “Geo. Davis was fined 1s. 6d. for absence.” Not only was their attendance required, but promptness was likewise enforced; for “Nicholas Brown, Edward Taylor, Zackery Fitch and Jonas Eaton were fined 6d. each for being late at town-meeting,” and in 1657 it was ordered “that there shall be two general town-meetings in every year; . . . and every inhabitant that absents himself from these meetings shall pay 2s. 6d. if he be not there by 9 o'clock in the morning.”

Many of the laws which governed the town in its infancy are curious and instructive, showing the strict

manner of life of the fathers. For instance, the Colony Court enacted, "that if any young man attempt to address a young woman without the consent of her parents, or, in case of their absence, of the Colony Court, he shall be fined £5 for the first offence, £10 for the second, and imprisoned for the third." Under this law Matthew Stanley, of Reading, "for winning the affections of John Tarbox's daughter, without her parents' consent, was fined £5, with 2s. 6d. fees."

"Nicholas Pinion was fined for swearing," and, in 1649, three married women of Reading were fined five shillings each for scolding. The ducking-stool and stocks and the whipping-post were in common use for the punishment of minor offences, and a characteristic incident is related by Drake wherein one Edward Palmer, for asking an excessive price for a pair of stocks, which he was hired to frame, had the privilege of sitting in them an hour himself.

Humorous as these old laws seem to us, they had an important part in sustaining that purity of life and character to secure which no sacrifice was too great, no duty too hard.

During the first century of the settlement the Indians several times declared war upon the Colonists, and the men of Reading were never backward in responding to the requisitions from the Colony Court for aid in quelling the outbreaks. The most important occasion for such service was the noted "King Philip's War," which began in 1675, and to which Reading furnished its quota under Major Swayne. This Major Swayne won high honors in these Indian wars, and was afterward appointed commander-in-chief of the Colony forces, despatched upon an expedition against the Kennebec Indians, and furnished with ten pounds to fit himself for the undertaking.

Toward the close of the century occurred the celebrated witchcraft delusion, numbering among its victims many innocent persons who were put to death under the excitement of the time. Four women of Reading were arrested and tried upon this charge, at a time when to be suspected of such a crime was usually followed by immediate conviction. Fortunately, they were subsequently released.

In October, 1651, the territory now known as North Reading was added to the town.

In 1673 the first mention of "Wood End," long a local name for that part of the old town which now forms the present Reading, occurs in the records. In 1693 a public school was established, it being voted to assess "a rate of four pounds for a *scoole* in the *towne* for three months, and if longer time, proportionable—and two pounds for the west end of the town (wood end) and one pound for those that live on the north side of Ipswich river, if they set up a *scoole* for reading and writing." And in 1697 we read that "the selectmen did agree with Jonathan Poole for the keeping a *scoole* in this *towne* for to *tech* the young people to *wright*, to read and to cast

up accounts, *soe* far as *ye* said Poole could, and they *capable* to *larne* in the time."

The first school-house within the present limits of Reading, that is to say in the "west end" or "wood end" of the old town, was built, so it is supposed, in 1708, near the corner of what are now Woburn and Washington Streets. At this date the town voted to maintain a school at Wood End one-quarter of the time, and, that this section might receive representation, Ensign Nathaniel Parker was added to the School Committee.

During the latter half of the first century of the settlement many of its founders passed to their final rest, the first cemetery was provided for, and the little hamlet had experienced the three great events of life,—"weddings, funerals and christenings." The ties were rapidly forming to hold them to the new world of which they had become a part, and slowly the memories of the motherland were absorbed in the past as, over the horizon, came, day by day, the foreshadowing of that great future which to them was a sealed book.

The charter granted by Charles I. had given to the Colony self-government and a great degree of liberty in civil affairs. Under it progress had been steady and uninterrupted; education had been fostered. Each town was by law required to maintain a grammar school. The seaport towns were engaged in fishing. The interior towns, like Reading, were farming communities, Indian corn and flax being the staples. The first iron works in the country had been established at Saugus, where they had been a source of annoyance to the citizens of Reading, by stopping the fish "from coming up to refresh and relieve the people."

In the general progress Reading shared; the life of its people proceeded along uneventful lines, disturbed only by an occasional Indian outbreak, to which allusion has been made. The buildings, though rude and simple, were comfortable. Food, though plain, was abundant. Clothing was of homespun, made by the good wives of the households, from the flax raised upon the farms; the boots and shoes being of home-tanned leather.

Three special points existed around which the growth of the town proceeded. The first church had been built at the most southerly point, now Wakefield, and in 1696 the town had agreed that as soon as the number of inhabitants upon the north side of the Ipswich River should be such as to call and maintain a godly, learned, orthodox minister, they should be set off as a separate parish. This condition was reached in 1713, and the Second Parish (now north Reading) was set off at that time.

Meanwhile, Wood End had so increased that a desire had several times been expressed for incorporation as the Third Parish of Reading. Any further division of the town was opposed by the First or South Parish, and to prevent further agitation of the subject

it was voted in 1730 that Wood End be allowed "the sum of £17 a year for support of preaching among them in the winter season, out of the parish rate or treasury during the term of ten years, provided the said Wood End do give the said Parish no trouble at home or abroad, referring to a separation; and also the said Wood End do hereby oblige themselves to tarry with us during said term of ten years."

Still other concessions were made, for we read that the South Parish voted in the following year "to give the old pulpit cushion to the Wood End, which they have asked for in a Christian and charitable way."

For a time the Wood End people remained satisfied with this condition of things, but the distance between the respective settlements made it desirable that an independent church be established at the West End, and in 1776 another petition was presented to the parish, asking for a separation. It was refused.

More conciliatory measures followed in regard to apportioning the parish funds. In 1767 the parish voted to build a new meeting-house. An effort was made by the members from Wood End, among whom appear the names of Temple, Bancroft and Parker, to change the location of the site to a point half a mile westward; but this, like the petition, was unsuccessful. Soon after an appeal was made to the Colony Court to interfere and divide the parish. Division was recommended, but again the inhabitants of the south part of the parish would not consent.

In 1769, however, the Colony Court ordered that the parish be divided, and substantially the same territory that forms the present town of Reading was incorporated as the Third Parish.

At this time, therefore, the town comprised three parishes. The First afterward became South Reading and later, Wakefield. The Second consisted of that part of the town on the north of the Ipswich River; territory, which, as previously mentioned, had been annexed in 1651, and which now forms the town of North Reading. The Third Parish had been generally known as Wood End, and was destined to retain the name of Reading and to form the town existing at the present day. The history of the First and Second Parishes from 1769 down, is properly the history of Wakefield and North Reading, and will not be followed here except as it may be so interwoven with that of the Third Parish as to require incidental mention.

The first parish meeting in the third parish was held August 9, 1769, the moderator being John Temple. Parish officers were chosen and measures taken to provide materials and workmen to complete the new meeting-house. This building, originally located upon or near the Common, passed through many vicissitudes before its destruction by fire. It long stood upon Union Street after passing into disuse as a church, and was known to a later generation as Union Hall.

For many years, as the property of the town, it was devoted to school purposes, being once partially burned, then re-built and given a new lease of life. Superseded in 1886 by the modern school building now occupying its place, the old hall was sold, removed to Haven Street, near the railroad station, and there, with extensive additions, transformed into modern tenements and stores. The whole structure was burned to the ground in 1890.

At the date of its incorporation the Third Parish contained at least fifty-five houses. Those of the first settlers had given place to others more substantial,—types of the well-known earlier colonial architecture. What true home comfort lingers about the old stone door-steps and lilac-shaded windows of these houses, some of which are still standing, their weather beaten faces bearing the marks of the storms and sunshine of more than a hundred years. Within was the great fire-place with its crane and andirons, and in the corner the quaint buffet with its load of polished china, and mysterious cupboards—spicy with the fragrance of old-fashioned herbs. There, too, were the broad-backed settle and rush-bottomed chairs; the high-posted bedstead with patch-work coverlid; the little round-topped stand, bearing the well-worn family Bible; the high mantle finished with delicate carving, and over it, the little ancient mirror, flanked by two tall candlesticks of silver. Outside was the old-fashioned garden, with its formal rows of hollyhocks and sunflowers, its marigolds and roses, and perhaps, in a sheltered corner, a little bed of sage and marjoram, of coriander, rosemary and rue. The wide-gabled barns, filled in autumn with the ripened harvests and sweet-scented hay, add to the picture of a quiet, pastoral life, pursued under the benign influences of peace.

One by one the old landmarks have disappeared, and of the houses in the Third Parish in 1769 but few survive. Of these some of the best known are the houses of Clifford P. Weston, and the Captain George Bancroft house, so-called, on West Street; the Abram Temple house, on Fremont Street, now occupied by Mr. Batchelder; the Sweetser house, on Washington Street, near the railroad; the James Davis house, on Ash Street; the Emory Bancroft house, on Lowell Street; the Aaron Parker house, on Walnut Street, and the house of George Grouard, on Woburn Street, near the Common, which was the parsonage of the parish. It has, however, been extensively remodeled.

The Sweetser house has, perhaps, a more interesting history, as it is certainly a more picturesque structure than either of the others. In its present condition it retains practically its original form. It was probably built by Ephraim Parker about the time of his marriage, in 1749; but this is uncertain. He lived here, however, ten years later, and after his death the estate fell to his son, Ephraim, known as "Master Ephraim," who, in 1807, sold it to Thomas

Sweetser, Esq., now deceased, who was the father of Kirke Sweetser, its present owner. In Revolutionary days it was a tavern, and, indeed, had been a public-house prior to that date. Tradition reports that certain British prisoners were quartered within it during the war.

The Prescott house, on Summer Avenue, is one of the best preserved of the old houses. It was the homestead of Joshua Prescott, an esteemed citizen and well known lawyer of former days, and is now occupied by his daughters. Mr. Prescott married the daughter of Widow Abigail Eaton (afterwards the wife of Colonel Nathan Parker). Mrs. Prescott's great-grandfather was Thomas Eaton, whose father, Joshua, being one of the early settlers in this part of Reading, lived on Summer Avenue, nearly opposite the junction of Oak Street, where traces of a cellar still remain. The Prescott house, being one of the second series of houses in the parish, must have been built since 1700, and was probably erected by Captain Thomas Eaton, Jr., grandson of Joshua, at about the time of his marriage, or 1756. His brother Joshua, another grandson of Joshua, Sr., lived in the old "Murray" house, on Oak Street, long a landmark, but recently removed, and this was probably built by him about the same time, as he was then married and settled there. His son, the third Joshua, was killed at the battle of Saratoga, October 7, 1777.

A house probably older than either of those mentioned stood until a comparatively recent date at the corner of Washington and Woburn Streets, being torn down to give place to the residence of Wendell Bancroft. From an honorable origin, this house, known in later years as the "Jaquith House," passed through various stages of decadence until for a considerable period antecedent to its removal it was given up to cheap tenancy. The following tradition relating to it is contained in Eaton's "History of Reading:"

"It is not known when this old house was built, but it is traditional that the Rev. Richard Brown, who died in 1732, used to come up from the South Parish and hold meetings in it. . . . It was supposed to be haunted by evil spirits some forty or fifty years ago. Such apparitions were seen and noises heard that children were afraid to pass directly by it, and would go around through the fields. It is said that old Mr. Daniel Bailey, on a certain occasion, came running at full speed into E. Weston's store, about half a mile distant from the old house, badly frightened and much exhausted. When he had wiped the perspiration from his face, and his nerves had become somewhat quieted, and he had recovered sufficient breath to speak, he related his adventures as follows: He said 'he did not intend to be frightened at anything till he saw it, and, as he was passing the Jaquith house, he thought, if the old devil was at home, he would like to see him. He accordingly went up to an open window to get a view of him. Whereupon the old spinning-wheel began to go and to buzz. In an instant his hair stood on end and raised his hat, so that he had to hold it on as he ran.'"

The house on Franklin Street now owned by Henry Cook, is one of the oldest, if not the oldest house, in Reading. It was built about 1725, by John Parker, who afterwards exchanged it with his brother for the homestead of his father at the southern end of the town. It remains practically unchanged in outward

form, and its internal arrangement and finish sufficiently evidence its antiquity.

Notwithstanding their peaceful life the Colonists were not untrained in war. The troubles with the French and Indians, and the expeditions against Canada, caused many calls to be made for troops. In all these struggles the men of Reading were represented, and were thus preparing to take their proper place in the more important contest that was to follow. When, after the gradual encroachments of the English ministry, the obnoxious Stamp Act was passed, the town of Reading sent to Ebenezer Nichols, its representative in the General Court, the following instructions:

"That you cheerfully join in every proper measure that may have a tendency to a repeal of the Stamp Act, which imposeth such a grievous burden among the American Provinces and Colonies, and that you endeavor, by all possible means, consistent with our allegiance to the King, and relation to Great Britain, to oppose the execution of it, until the remonstrances, petitions, and cries of these distressed colonies shall reach the ears of our Sovereign. And, Sir, we cannot think it advisable to agree to any step for the protection of stamped papers or stamp offices. We have already good and wholesome laws for the preservation of peace and good order among his majesty's subjects, and are not apprehensive of any further tumults and disorder, to which we have a steady aversion.

"Moreover, we must enjoin it upon you, that you use the strictest care to prevent all unconstitutional drafts upon the Public Treasury, at this time of uncommon difficulty and distress; but in all actions to maintain our rights as free-born Englishmen."

This document—the simple, straightforward expression of opinion sent by a little country town to its political representative—carries on its face an epitome of the time. Observe its character, note the sturdy spirit it manifests, the disposition it implies to obey all proper mandates of the King, but, at the same time, the determination to protect their rights as free-born citizens.

The Stamp Act was repealed, but the struggle was only delayed, not averted. Steadily and surely the day approached, and again the town instructs its Representative:

"To use your utmost endeavor, in every constitutional way in the General Court, to procure a redress of our grievances and a restoration of that happy harmony which lately subsisted between Great Britain and her colonies; . . . but caution you against giving your consent to measures which may in the least preclude us or our posterity from asserting our just rights as men and British subjects."

And in June, 1774, the town voted "to maintain their Charter Rights in every constitutional way."

A Congressional Commission was called to consider the questions of the hour, to which the town sent as deputies John Temple and Benjamin Brown; also voting to adopt the sentiments of the Congress as their own, and to adhere to them. Still no relief came, and the following year the King declared that rebellion existed in Massachusetts; and a force of armed men was sent to Boston under General Gage.

The first resistance to British authority came, as is well known, at the North Bridge, in Salem. The English, under Leslie, marched from Marblehead toward Danvers, to secure cannon and powder supposed to be concealed there. The news spread like

wildfire through the country, and the company from Reading promptly moved toward Salem. After proceeding four miles, however, they were met by a courier, who informed them of the retirement of Leslie, and they returned home.

The promptness then manifested never flagged during the war. The men of Reading were true descendants of the hardy settlers who, years before, had braved danger and toil that they might maintain sacred principles. When, on the 19th of April, 1775, the thunders of cannon from Lexington were heard over their peaceful farms, the minute-men of Reading engaged in that famous pursuit of the British that has been celebrated in song and story. Dr. John Brooks, afterwards Governor of Massachusetts, was then a young physician in practice in Reading, where he married his wife, and he had organized a company, being chosen its captain. During the night of April 18, 1775, he received notice of the march of the British. He was the Major Brooks referred to in the following, from Hudson's "History of Lexington :"

"The British commenced their retreat from Concord about noon. For the first mile they were unmolested, but when they arrived at Merriam's Corner they encountered a party of minute-men from Reading, under Major Brooks, Col. William Thompson, with a body of militia from Billerica and the vicinity, coming up about the same time. The Provincials on the High grounds near the North Bridge, seeing the British leaving the village, went across the great field to the Bedford road, and arrived in time to support the troops brought up by Brooks and Thompson. Here may be said to have commenced the battle of the 19th of April."

When a call was made for troops for the Continental army, the citizens of Reading were ready, the sturdy Parson Haven preaching to the men of the Third Parish from these words of St. Luke: "And the soldiers likewise demanded of him, saying, And what shall we do; and he said unto them, Do violence to no man, neither accuse any falsely, and be content with your wages."

From Lexington forward, at Bunker Hill, Ticonderoga, and Valley Forge, to the day of Cornwallis' surrender, the soldiers from this town were at the post of duty. More than four hundred men from Reading served in the War of the Revolution. Her quota was always filled, and the familiar names of Brooks, Bancroft, Parker, Nichols, Flint and Wakefield appear upon the honored list.

The names of many of these gallant men are lost. Some never returned to their homes, others lie at rest in the village cemetery. But the memory of their deeds remains as one of the priceless heritage of the town.

Not alone by troops did Reading aid in the war. The records are full of accounts of stores furnished to the militia—of beef, hay and fire-wood—they gave freely of their produce to help the cause. Aid was furnished to citizens of Boston, Charlestown, Salem and Marblehead, who fled into the interior. Blankets were collected from house to house to send to the army, and through the whole seven years the town

never failed to respond to the calls of the Continental Congress for food and supplies.

After the war many grave political questions presented themselves for settlement. Two distinct political parties were formed,—Federalists and National Republicans. The inhabitants of the First or South Parish were mainly Republicans; those of the West Parish, Federalists. Political differences, growing out of this dissimilarity of party sentiment, soon caused a division in the town, the South Parish being incorporated in 1812 as a separate town, under the name of South Reading. In the same year war was again declared against England. The Federalists, among whom were most of the citizens of Reading, opposed the war, believing that the existing difficulties might be otherwise settled. Yet war having been declared, the town, from fidelity to the Government, supported it.

In 1844 both Reading and South Reading united in celebrating the bi-centennial of the old town, and, nine years after, North Reading was made a separate municipality.

In accordance with the practice which existed throughout the Colony, slaves were once held in the town. An interesting document from the hand of Samuel Bancroft, dated in April, 1776, reads as follows :

"Whereas I, the subscriber, have a negro man named Cato, who hath requested that he may in some future time be made free, I hereby declare it to be my purpose and design that if said Cato continues an obedient and faithful servant for the space of three years next after the date hereof, that, at the end of said term of three years, said Cato shall be set free."

When the evil effects of slavery in the South became apparent, it is recorded to their eternal honor that the women of Reading formed the first female anti-slavery society upon record. The officers of this society were : President, Mrs. Sarah Reid ; Vice-President, Mrs. Sarah Parker ; Secretary, Mrs. Hepzibah S. Temple ; Treasurer, Mrs. Esther Kingman ; Counselors, Mrs. Julia P. Eaton, Mrs. Susau S. Perkins, Mrs. Sophronia Kingman, Mrs. Susan W. Peabody and Miss Lucy Parker. The first male society, auxiliary to the New England Anti-Slavery Society, was also formed here, Dr. Horace P. Wakefield, long a respected citizen, now deceased, being its secretary ; and in the words of William Lloyd Garrison, "for some time Reading continued to be the banner town in the anti-slavery conflict."

When the War of the Rebellion began, again on the 19th of April, as in the days of old, the men of Reading were ready. Drill clubs had been formed in preparation for emergency, and on the date named the Richardson Light Guards left Wakefield for Washington, having among their number seventeen citizens of this town. The company performed guard duty at Washington and was present at the first battle of Bull Run. In the following year, 1862, a Reading company was enlisted under command of Captain Josiah W. Coburn. This company per-

formed nine months' service with the Fiftieth Massachusetts Regiment, being with General Banks in Louisiana and participating in the siege and capture of Port Hudson.

Through all the dark days of the war the record of the town was honorable and worthy to be placed beside that of the fathers. The War Committee was Horace P. Wakefield, Sylvester Harnden, Edward M. Horton, Gardner French, Benjamin M. Boyce, Stillman E. Parker and William Proctor. Of these only Messrs. Boyce and Parker survive. Thirty-four more men than her allotted quota were furnished by the town to the army. The total number, including reenlistments, was 411. Their record includes Fair Oaks, Fredericksburg, Lookout Mountain, the Wilderness and other hard-fought fields. Fifteen men were killed in battle and thirty-three others died of disease contracted in the service. To commemorate these a marble monument was erected at the close of the war upon a conspicuous elevation in the cemetery. The suggestion that such a shaft be raised was made by Abiel Holden, a prominent citizen, who, in the early years of the war, proposed such action. Mr. Holden died before the war closed, but in his will directed that \$500 be paid from his estate toward defraying the cost of the monument. To this the town added \$1000, and the monument was dedicated October 5, 1865.

While the men were in the field the women were not idle. Sanitary meetings were frequently held, and many packages of clothing and hospital stores were forwarded from their hands. One of these women occupies a place of special prominence. While some of the other sex around her, strong and able, shrank from the conflict, Miss Emily Ruggles being debarred from that active work with which she fully sympathized, furnished a representative recruit for three years' service.

After the war, the town, in common with most of the towns in Eastern Massachusetts, rapidly advanced in prosperity. The population in 1865 was 2436. This was less than in 1860, when it was 2662, the diminution being entirely due to the war. It was only slightly more than that of the old town, comprising South and North Reading also, in 1810, the figures in that year being 2228. The valuation of the town taken in 1863 was \$1,299,648.

The era of prosperity was marked by a rapid increase in the number of houses. New building lots were put upon the market, and many dwellings erected. The large plain just west of the railroad station then formed part of the Carter farm and contained no houses. The same was true of the estate just beyond it on Woburn Street, owned by the heirs of Abiel Holden. Reading Highlands, both east and west of the railroad, had but few dwellings. At present all this territory is covered. The growth in other parts of the town has been considerable, although perhaps not quite so great as in the sections named.

Woburn Street, at the close of the war, had but a single sidewalk, and this not continuous. Opposite the residence of William S. Richardson, which was not then built, was a steep bank, rising precipitously from the roadway and covered with brambles and bushes. Washington Street, from Woburn Street to the railroad, had but three or four houses, and was, in fact, an ordinary country road, without sidewalks and lined with a thick growth of wild cherry and birch. The railway station was an old-fashioned structure, spanning the track, and extending from it northward along the line of High Street, was an extensive wood-house open to the track and filled with fuel. This, together with part of the station, was burned in 1868. The present station was soon after built.

In comparatively recent years great improvements have been made in the outward appearance of the town. Roads have been improved, grades lowered and sidewalks built. The town, losing somewhat of its rural aspect, approaches more nearly the suburban type. The valuation is now \$2,829,427 and the population about 4100. Many of its streets are lined with trees and each year sees the erection of residences that add much to the attractiveness of the town.

INDUSTRIES.—It is chiefly as a place of residence that Reading is known, and its growth will probably continue along that line rather than in the direction of manufacturing. But while never important as a manufacturing centre, the handiwork of her workmen has gone over the entire country, and the boots and shoes, cabinet-work and clocks from Reading have been found in all the markets of the South and West.

Among the former industrial enterprises of the town that of cabinet-making takes first rank. It has now almost entirely passed away. The pioneer in the business was Ambrose Kingman, long since deceased, and he was followed by his brother Henry, and nephew William, and by Luther Elliott, Hammond Flint, Amos Sweetser, Charles Carter, Henry F. Parker, J. W. Beers, S. T. Ruggles, John Cheney, Gardner French, D. B. Lovejoy, D. G. Richardson, James Davis, Charles Manning, Frederick Miller and others, among whom Dinsmore & Grouard and Sylvester Harnden hold prominent place. Mr. Harnden long conducted the old mill at the head of Haven Street, which was burned in April, 1884.

Dinsmore & Grouard owned the mill on Salem Street, originally built about 1850 by William Badger, and now, somewhat changed in form, carried on by John Holman & Co., under the superintendence of David Kendall.

In the days when the manufacture of tin-ware and stove fittings was of considerable local importance, Tristram Littlefield began the business in Reading, coming hither from Wakefield in 1843. He still continues, with the aid of his sons.

The boot and shoe manufacture is one of the most ancient industries of the town. It appears to

have been begun, independent from the usual household manufacture, about 1758, by Lieutenant Joseph Bancroft. Early manufacturers, during the period of the Revolution, were Ephraim Parker and Phineas Sweetser. At a later day and upon a broader basis, we find the names of Daniel Chute, 1792; Jonathan Temple, 1794; David Pratt, 1796; Silas Smith, 1796; Ephraim Weston, 1804; Warren Perkins, 1807; Isaac Upton, Lilly Eaton, Lorenzo Parker, H. G. Richardson, Wm. R. Perkins, John Adden, Abiel Holden, D. Farmer Weston, Thomas H. Sweetser and others, all of whom have passed away. Stillman E. Parker, George E. Leathe, Joseph L. Pratt, Gilman C. Coggin, Edwin Bassett, George A. Richardson, John Burrill, James H. Bancroft and Roswell N. Temple have, at various times, been connected with the industry, and Messrs. Jason W. Richardson, George M. Coburn (E. B. Richardson manager,) The Brown Shoe Company, Clifford P. Weston and Nathan Bancroft are leading manufacturers at present.

The manufacture of hats was at one time an important branch of industry here. Nathan Weston was the first who conducted it, beginning about 1812. He is said to have been the inventor and first maker of the silk hat. He was followed by Thomas Sweetser and Warren Perkins.

In 1840 the manufacture of coach lace was begun in Reading by William J. Wightman, who had a shop on Main Street near his residence, and who continued the business until 1857.

The manufacture of clocks, conducted by Messrs. Frost & Pratt, was, subsequent to 1832, of considerable local importance. Jonathan Frost began the business, manufacturing the cases only, purchasing the movements, and combining the finished article. Daniel Pratt soon became associated with him, and afterward carried on the business alone in Reading and Boston, where, after his death, his son Daniel and son-in-law, Benj. M. Boyce, succeeded him. The business in Reading was discontinued about 1859.

In thus briefly alluding to the former industries of the town we must not omit the name of Thomas Appleton, one of the pioneer organ-builders of America, whose genial face, once familiar, has now passed away; a man whose reputation for integrity was unspotted, and of whom it is said, "His organs were, like himself, honest clear through." Mr. Appleton conducted the business of organ-making in a factory on Prescott Street, west of the railroad, which, afterwards removed a short distance, now forms part of the Howard Brush Factory.

The leading industries of the present day, besides the manufacture of boots and shoes, to which allusion has been made, are organ-pipes, carried on by Samuel Pierce, who founded the business in 1847, and by Mr. Griffiths; neckties, founded by Messrs. Damon & Temple, in 1866, and others, and now carried on by Messrs. Joseph S. Temple, Charles Damon and associates; metallic brushes, founded by J. H. Howard

and others, and now carried on by James H. Horton and E. A. Hill; organs, carried on by George H. Ryder and John H. Sole, and the works of the Reading Rubber Mills and the Middlesex Rubber Company. Besides these the manufacture of fire-works is conducted by Hyde & Co., in factories upon Lowell Street, and Messrs. Horton and Damon each make considerable quantities of paper boxes.

The few industries of the town produce an annual product far larger than many suppose, and although the former leading employments have passed away yet others have taken their place so quietly as to be almost unnoticed. Many of the older citizens who remember the bustle and activity of the days before the war, when Reading was a sort of metropolis to some of the adjacent towns, lament the decline of the manufacturing interests which, it is supposed, has since occurred. They point to the flourishing cabinet business of that day, they remember the mercantile establishments conducted by Fletcher, Putnam and others, and see nothing in the present condition of the town to compensate for their loss. But, after all, this decline is fancied, not real. When aggregate value of product is considered, the industries of Reading were never so important as at present.

In 1855 Reading had thirteen establishments manufacturing chair and cabinet work, with an invested capital of \$68,000, employing 179 workmen and producing annually furniture worth \$205,000. At the same time the annual product of boots and shoes amounted to \$191,500, the industry giving employment to 267 males and 156 females. These were the leading industries of the town, and the war, cutting off trade with the South, seriously affected their prosperity. Thus, in 1865, we find the annual product of furniture to be worth but \$49,618, and of boots and shoes but \$157,741, both values being estimated in gold. It will be seen that the latter industry suffered least.

But though these industries declined, two others showed a marked growth. The production of organ-pipes and sawed lumber increased from an aggregate value of \$21,273 in 1855, to \$41,771, gold, in 1865. In the building trades also an enlarged product was shown, its value in 1865 being \$54,624, gold. These increased values, however, were not sufficient to overcome the decrease in turniture and other products, so that the total value of all manufactured goods showed a decline of nearly 31 per cent. from that reported in 1855. That this was due to the war is plainly seen from the statistics of the next decade. The cabinet industry partially recovered the ground it had lost, the value of products in 1875 being \$119,177. The value of boots and shoes made advanced to \$165,210. These industries, indeed, still showed a decline when compared with their position in 1855. This decline, however, was more than compensated by the growth of new industries, and by the expansion in the manufacture of organ-pipes, the annual product of which

rose from \$10,000 in 1855, to \$26,339, both values being in gold. The following table shows the growth of these industries and their annual product, with aggregates for each of the periods so far compared. The values for the years 1865 and 1875 have been reduced to a gold basis, so as to admit of just comparison with those of 1855:

INDUSTRIES.	Product, 1855.	Product, 1865.	Product, 1875.
Coach lace,	\$1,000
Furniture,	205,000	\$49,618	\$119,177
Boots and shoes,	191,500	157,741	165,210
Organ-pipes,	10,000	15,924	26,339
Tinsmithing,	10,000	637	4,464
Clothing, men's,	1,500*	3,057	2,143
Organs,	2,000*	892	.. .
Building trades,	20,000*	54,624	62,357
Lumber, sawed,	11,273	31,847	.. .
Pumps,	446	750
Neckties,	49,107
Tallow, rendered,	44,643
Brush handles,	714
Bread, bakers'	2,979
Cider,	2,250
Totals,	\$455,273	\$314,786	\$479,833

* Estimated from reliable data.

In this comparison no account is made of certain mechanical industries, classed in the State census of 1875 as "related occupations," except tinsmithing and certain building trades, it being impossible to obtain statistics of these industries for previous years. We also present a table showing the number of establishments in town at each period, together with the number employed, capital invested and value of product:

Classification.	1855.	1865.	1875.
Number of establishments	41	20	47
Number employed,	654	400	426
Capital invested,	\$100,000	25,800	129,357
Value of product,	455,273	314,786	479,833

In the number of establishments reported in 1865 those manufacturing boots and shoes are not included, and the amount of capital returned for that year is deficient as respects capital invested in the building trades. A minor portion of the capital invested in 1855 is estimated. All values are in gold.

Although the number of establishments, capital and product increased between 1855 and 1875, yet it is an interesting fact, clearly brought out in this table, that the number of employes decreased thirty-five per cent. In other words, 426 persons, working with twenty per cent. more capital in 1875 produced more goods measured in value than 654 persons in 1855. This decrease in number employed, while the value of product increased, is partly due to the influence of machinery in certain industries and partly to the change in the character of the industries themselves, as, for instance, the substitution of an employment like the rendering of tallow, in which the ratio of employes to product is small, for a distinctly mechanical industry, like cabinet-making, in which many workmen are required.

The facts as brought out in 1880 are presented in the following table:

Industries.	establishments.	No. of employes.	Capital.	Product.
Boots and shoes	15	150	\$24,450	\$105,566
Brushes	1	40	5,000	60,000
Building	1	3	2,500	7,000
Wagons	2	2	1,500	4,000
Clothing	3	113	10,424	98,410
Fireworks	1	17	10,000	30,000
Food preparations	4	7	9,400	73,740
Furniture	3	42	4,000	48,000
Leather	3	5	1,900	4,200
Metallic goods	5	10	7,500	14,000
Organ-pipes	1	14	13,000	18,600
Rubber goods	1	23	8,000	60,000
Tallow	1	7	6,000	57,000
Wooden goods	2	21	2,600	12,500
Totals	43	454	\$106,274	\$593,016

The item "clothing" includes neckties. No comparison between industries, except in a few cases, can be made with the years previously given, as the basis of classification employed in the national differs from that in the State censuses. The amount of capital here returned is probably below that actually employed, and in other respects the statistics presented in this table understate the facts. For instance, but one establishment engaged in building, having but three employes, is reported; but, notwithstanding these deficiencies, the important fact appears that the product has risen from \$460,273 as shown in 1855, the ante-bellum period, to \$593,016, or nearly twenty-nine per cent.; showing that the results of the industries in 1880, measured by the value of what was produced, considerably exceeded those of any previous time.

Nor has there been any decline since. On the contrary, the results of the latest State census, that of 1885, indicated further progress. The capital invested in industrial enterprises was then \$293,200, of which \$26,020 was credit capital; \$7374, land; \$40,601, buildings and plant; \$23,785, machinery; \$14,020, tools, and the balance, \$158,700, cash.

There were nine establishments manufacturing boots and shoes, the oldest dating from 1847. Other establishments were the following: Building, eight; clothing (including neckties), five; food preparations, two; furniture, three; metallic goods, seven; musical instruments and materials, two, and brushes, wagon-making and repairing, fireworks, harnesses, lumber, machines and machinery, printing and newspaper publishing, rubber goods and wooden goods, one each. The value of goods made was as follows: boots and shoes, \$115,506; building work, \$34,700; clothing (including neckties), \$130,003; food preparations, \$5,224; metallic goods, \$47,535; wooden goods, \$7,272 wooden; and metallic goods, \$14,300; other goods, \$337,100; or a total product of \$702,581. The persons employed numbered 402.

The agricultural property of the town at the same period was valued at \$576,881, of which \$313,229 represents land, and \$213,244 buildings. The agricultural product in 1885 was valued at \$93,341, of which \$27,816 was the value of dairy products.

Reading contains one of the largest and best nurseries of fruit and ornamental trees, shrubs and plants to be found in the country. This was established by its present proprietor, Jacob W. Manning, in 1854. Mr. Manning has for many years been one of the fruit committee of the Massachusetts Horticultural Society, and he is also a member of the American Pomological Society and of several other similar organizations.

BUILDINGS.—The public buildings of Reading, while neither numerous nor particularly imposing, deserve appropriate mention. Chief among these should be placed the edifice known as Lyceum Hall. This stands at the head of Haven Street, at the corner opposite Main Street. It is a large, somewhat awkward wooden structure, without architectural merit, but within its walls have been held most of the important public meetings of the last thirty-six years. It has virtually been the town hall, and in it the annual town-meetings take place, some of which have been memorable in the local annals. Here, too, occurred the patriotic mass-meetings in the early days of the late war, and the recruiting station was at one time located in a room upon the second floor. Social entertainments without number have been given here, comprising amateur dramatic performances which, under the auspices of the Reading Dramatic Association, an organization long prosperous, but now dead, achieved more than local notoriety; balls, among which those of the Old Assembly were in former days conspicuous; fairs and festivals of every sort. Some of the religious societies now occupying more appropriate quarters, began their existence in this building, and if its walls had memory and voice they might give back the eloquent words of Phillips, Emerson, Mrs. Livermore, Charles Bradlaugh and other famous orators who have here appeared upon the lecture platform. Being the only large public hall in the town, its uses have been universal and varied.

The building was erected in 1854 by a stock company, Stephen Foster and Sylvester Harnden being chiefly instrumental in raising the funds. The builder was Edward Safford, and in 1871 the structure was extensively remodeled and enlarged under his superintendence. At this time the ceiling of the main hall was raised and a gallery added. The first story has always been devoted to trade, and has contained some of the leading mercantile establishments of the town. The Atkinson grocery store is the lineal descendant of a "Union Store" or co-operative grocery, which was the first lessee at the time the building was completed. Miss E. Ruggles has for many years carried on the dry-goods business here. The corner store was for a long time the only drug-store in the village, and for many years was conducted by Captain Thomas Richardson, now dead. Fletcher's dry-goods store, a noted establishment in other days, for a time occupied part of the building, and altogether, the edifice, though scarcely worthy of mention apart from its history, is

a notable one in the mercantile and civic annals of the town.

The *Post-office* has for thirty years been located in it, being removed thither from a position farther up Main Street, by Lewis Gleason at the time of his appointment as postmaster in 1861, and continued by the present official, William I. Ruggles, who succeeded Mr. Gleason in 1887. We may mention in passing, that since the establishment of the post-office in Reading in 1811, it has always been located near the Common, except during a short time when it is said to have been kept in the house of the postmaster at "Hill End," so-called. The first postmaster was Colonel Nathan Parker, a man of note, who at the time kept a tavern on the site of the present bank building. The subsequent incumbents of the office, down to the appointment of Mr. Gleason, were John Weston from 1815 to 1849, John P. Sherman, Thomas Richardson, Horatio N. Cate and C. D. Brown.

The *Bank Building*, so-called, on Main Street, long occupied by the town offices, was erected by the *Reading Agricultural and Mechanic Association*, a loan and fund institution which at one time did a prosperous business as a bank of discount and deposit, but which was finally obliged to suspend, without loss to its creditors, however. The officers of the institution included Edmund Parker, Daniel Pratt and Thomas Sweetser, who successively held the position of president, and Cyrus Smith, Stephen Foster and Jonathan Frost, successive treasurers. Jonathan Frost and his brother Jesse were well-known citizens, who long carried on a dry-goods store in the building now occupied by Nathan D. Stoodley and others, at the junction of Main and Ash Streets.

In 1869 the *Reading Savings Bank* was incorporated, and began business in the bank building, remaining there until the termination of its active business in 1879.

The *Reading Co-operative Bank* is now the only banking institution in the town, and this holds its monthly meetings in this building. It is one of the most important adjuncts of the town's welfare. Organized in 1886, its assets May, 1890, were \$58,710, and its annual dividends to share-holders have never been less than six, and usually six and one-half per cent. A national bank is at present (1890) projected, and is likely to be established soon.

The *Public Library* is located in the bank building, and the upper story is devoted to the Masonic Lodge.

The *Old South Church*, at the head of the Common, is the oldest, as from its location it is one of the most prominent, of the public buildings of the town. It is the second church edifice built by the original church in the Third Parish, and was erected about 1818. It is now owned and occupied by the Methodist Society.

The *Congregational Church*, on Woburn Street, is in its present form practically a new structure. It was remodeled in 1887, from the building known as the

Bethesda Church, which was erected in 1849, being dedicated January 1, 1850. This Bethesda Church was considered an imposing building at the time it was built, occupying an elevated site, and having its main entrance through an open portico of classic design, approached by a broad flight of granite steps. It was, however, of composite architecture, combining traces of Grecian detail with the ordinary New England spire or steeple. All the prominent features of the old building have disappeared in the remodeling, and the entrance approach has been lowered to the sidewalk level.

The Baptist Church building, on Woburn Street, and the Christian Union Church (Unitarian), on Main Street, are both modern structures, erected in 1880 and 1871 respectively. The Church of St. Agnes, (Catholic), on Washington Street, is also of recent date, erected in 1887.

The public buildings owned by the town include the Municipal Building of brick, on Pleasant Street, occupied by the town offices and the Fire Department, erected in 1873; the new Union Street School building, 1886; the Prospect Street School-house, 1887, and the High School building, on the Common. The school-houses are modern structures of the best class, every attention having been paid in their construction to the requirements of heating, lighting and ventilation.

The High School building in its present form succeeds the original structure which was partially destroyed by fire in 1887. No change was made in the re-building so far as the general exterior is concerned, except in the rear, but the interior was entirely changed.

SCHOOLS.—Reading has always been noted for the excellence of her schools. After the incorporation of South Reading, the parent town consisted of two parishes, the North and South, the latter (the present town) in 1818 becoming an independent school district. It then contained two school-houses. In 1827, the growth of the town having rendered a further division desirable, the single district was made three, designated as the Centre, North and West Districts. In 1834 the South District, comprising that part of the town long known as "Hill End," was incorporated. In 1836 the Lowell Street District was formed, and in 1844 the North District was divided. These districts, six in number, were each independent of the others, so far as concerned the administration of school affairs, and so remained until the abolishment of the district system in 1864.

Since 1864 the town has been liberal in its appropriations for schools, and progressive in all things that tend to their efficiency. Its high school was established in 1856, the first regular graduation of a class occurring in 1863. The first principal was Harry A. Littell, who was followed by Philip C. Porter, now of Berkley, Massachusetts. Mr. Porter was succeeded by R. B. Clarke, who, in turn, was fol-

lowed by Luther B. Pillsbury. After Mr. Pillsbury, George L. Baxter, now of the Somerville High-School; Charles R. Brown, at present a physician in Lynn, and George W. Adams successively had charge of the school. Edward H. Peabody, now engaged in journalistic work, followed Mr. Adams. Cyrus A. Cole was appointed principal in 1868 and continued until 1880.

Since the resignation of Mr. Cole, George L. Perry, Edward P. Fitz, John B. Gifford and the present principal, Wilson R. Butler, have been in charge. The present assistants are Miss Olive A. Prescott, Miss Carrie E. Berry and Miss Emma Slack.

LIBRARIES—Among the educational influences of the town, the public library is prominent. Like similar institutions in other New England towns, this is the legitimate successor of the old school district libraries, founded by aid of the Commonwealth, and of private association libraries, which, to a degree, filled the place the present library occupies.

The first of these association libraries bore the name of *The Federal Library*, and was controlled by an association numbering sixty persons, formed September 27, 1791.

This was merged in a corporation in 1817, with an increase in membership. In 1831 the corporation was dissolved, the books being sold at auction. Ten years later, in 1841, an organization called the *Franklin Library Association* was formed, which supported a library for circulation among its members until the establishment of the town library in 1868.

In 1860 an Agricultural Library was established, owned and controlled by an association interested in the subjects to which it was devoted.

In 1868 the present public library was established by vote of the town, the books of the Franklin Library, 462 volumes, and of the Agricultural Library, 176 volumes, being donated to it.

Dr. Horace P. Wakefield had, in 1867, offered the sum of \$500 to be devoted to the purchase of books for such a library upon condition that the town would appropriate an equal amount. This sum, together with \$100, a legacy under the will of T. Ward Harts-horne, was now paid, and Loton Parker, Edward Appleton, Anna E. Appleton, Rev. William Barrows, John B. Lewis, Jr., and others interested in the movement, made liberal donations of books. In March, 1871, the library contained 2475 volumes. It had been opened in February, 1869, occupying a room in the High School building. The first librarian was Miss Mattie Appleton (now Mrs. Henry Brown), who was followed by Miss Alice Temple, and later, by the present librarian, Miss Lizzie Cox. The present assistant librarian is Miss Jessie Grouard. From the High School building the library was soon removed to the Perkins building, Woburn Street, and now occupies convenient rooms in the Bank Building. The present number of volumes is about 8000, and the circulation, as reported for the year ending March,

1890, is 15,075. The books are carefully selected and catalogued.

CHURCHES.—In connection with the influence of the school and the library it is proper to consider those of the Church. The mother of Reading churches was the Church of the Third Parish (later known as the old South Church), whose first pastor was Thomas Haven. Mr. Haven was succeeded by Rev. Peter Sanborn, who, although dismissed in 1820, continued to reside in the town until his death, which occurred in 1857. Pastor Sanborn was followed by the Rev. Samuel Green, 1820-23; Jared Reid, 1823-33; Aaron Pickett, 1833-50; Lyman Whiting, 1851-55; William Barrows, 1856-69; and others.

During the pastorate of Mr. Pickett a second Congregational society was organized, under the name of the Bethesda Church, the first pastor being Rev. Edward W. Clark, who was followed by W. H. Beecher, William H. Wilcox, W. B. Ely and the present pastor, Rev. Frank S. Adams. In 1886 a union of the Old South and Bethesda Churches was effected under the name of the *Congregational Church of Reading*.

The Baptist Church was formed in 1832. Prior to that date services had been held in dwellings and in the West School-house, but the sect encountered much opposition, owing to the prevailing intolerance of its peculiar tenets. Opposition seems to have strengthened the movement rather than to have discouraged it. In 1837, a church having been built during the previous year, Rev. Henry Smith became the first pastor. His successors have been Rev. O. Cunningham, J. Woodbury, John Upton, J. G. Townsend, John Cookson, E. K. Fuller, A. M. Higgins, William R. Davy, T. W. Crawley, H. P. Guilford, L. D. Hill, J. K. Ewer, C. T. Douglass and O. T. Walker.

Preaching under the auspices of the *Methodist Episcopal Church* began in 1866, with the missionary movement conducted by Rev. A. D. Merrill. He was followed by Rev. Andrew Gray, then settled in Wakefield, who preached regularly for several months in Lyceum Hall. After Mr. Gray came Rev. Daniel Atkins, Stephen Cushing and H. D. Weston. While the church was in charge of Mr. Weston the building on Ash Street was erected and dedicated. Subsequent pastors were the Rev. J. N. Short, W. H. Hatch, J. L. Hanaford, James F. Mears, William Silverthorne, Daniel Steele, J. H. Humphrey and the present incumbent, Rev. Fred. N. Upham. The Church now occupies the Old South edifice, having purchased it from the Congregational Society after the consolidation between the latter and the Bethesda Church.

The Roman Catholic Church of St. Agnes now in charge of Rev. J. E. Millerick, of Wakefield, was established here in 1886. Prior to that date the Catholics of Reading worshiped at the church in Wakefield.

The Christian Union (Unitarian) Church is the de-

scendant of the Third Congregational Society, formed in Reading, April 2, 1827, for the purpose "of promoting pure and evangelical principles of practical religion and morality." The original society numbered forty-six, and a church building was erected in 1827, afterward transformed into a dwelling house, still standing next to the house of the late Dr. F. F. Brown.

The pastors who for longer or shorter periods had charge of this early church were: Rev. Mr. Barbery, Dr. Peabody, Mr. Robertson and Mr. Damon. In May, 1838, a Universalist Society was organized in the town, and a union of the earlier church with this was then effected under the ministrations of Rev. Charles Gallacur. He was followed by Rev. G. G. Strickland and Rev. Mr. Waitt.

In May, 1840, "*The Liberal Ladies' Benevolent Association*" was formed, and when the liberal religious movement flagged, they were earnest in their efforts to keep it alive, until, in 1856, a new society was organized under the name of the *First Universalist Society of Reading*. Rev. N. R. Wright was the first pastor, services being held in Lyceum Hall. He was succeeded by L. M. Burrington, E. A. Eaton and W. W. Hayward. Mr. Hayward resigned in 1867, and the services of Rev. E. B. Fairchild, of Stoneham, were secured for afternoon preaching in Ellsworth (now Masonic) Hall. Under Mr. Fairchild the society was again organized under a new name, the "*Christian Union*" of Reading, a new church was erected in 1871, and since then its prosperity has been continuous. It is now regularly connected with the Unitarian denomination. After Mr. Fairchild's resignation, Rev. C. W. Heizer became pastor, followed by Rev. C. J. Staples, and the present incumbent, Rev. Don C. Stevens.

OLD FAMILIES.—Reading has felt but slightly the effect of the tide of immigration which has transformed many Massachusetts towns. In 1885, when the latest State Census was taken, out of a total population of 3539 only 503 were of foreign birth, and including these only 757 had both parents foreign born. The conditions have not materially changed since.

The town contains to-day many persons who are direct descendants of the first or early settlers. Certain family names are as familiar as household words. Among these none are more prominent, or have a more honorable lineage than the Bancrofts and Parkers.

Lieutenant Thomas Bancroft, who was born in England in 1622, came to Lynn, and early purchased land in Reading, although apparently he lived upon it for but a short time. By his second wife, who was Elizabeth Metcalf, he had several children, the eldest, Thomas, settling in Reading near what is now West Street. Here, subsequent to 1673, he built the fourth house in the parish, near the present residence of Mr. Batchelder. He was one of the parish deacons.

The great-grandson of Thomas was Lieutenant Joseph Bancroft, who was the immediate paternal ancestor of the existing families of that name. He was born in 1735, and marrying Elizabeth Temple, the daughter of a neighbor, settled upon a part of the homestead, namely, in the Captain George Bancroft house, so-called, where he lived at the time of the incorporation of the parish in 1769. It was the day of large families, and Lieutenant Joseph had five daughters and five sons. Of the sons, Joseph was the grandfather of John M. and Lewis H. Bancroft; and their cousins, Emory, Solon, Frederick and Alvin. Lewis H. Bancroft has held the office of selectman, representative to the General Court, and is now water commissioner. Solon Bancroft, Esq., is a leading citizen, a member of the Middlesex bar, special justice of the First District Court of Eastern Middlesex, and has held various town offices. Frederick, resident in Reading, is engaged in the brokerage business in Boston.

The second son of Lieutenant Joseph was Timothy, who was the grandfather of Newton, Charles, James, Nathan, Wendell and Moses. Of these Nathan is a leading shoe manufacturer, and has already been mentioned in that connection. Wendell, for a long time an extensive builder, is now engaged in the coal and lumber business, while Moses carries on the sale of sewing-machines in this and neighboring towns. Timothy was also the father of John Hart Bancroft, and the grandfather, through different lines, of Francis J., and William Hazen—all of whom are still living in Reading. Nehemiah, the fourth son of Lieutenant Joseph, was the father of James H., now residing on High Street, and the grandfather of Jas. A. Bancroft, land surveyor and formerly manufacturer of shoes, who has filled the positions of selectman and town treasurer and other town offices.

Upon his maternal side Francis J. Bancroft is also descended from Captain Jas. Bancroft, of Revolutionary prominence, who was a grandson of Dea. Thomas, the early settler. Captain James also settled upon a part of the old homestead, living at the time of the incorporation of the parish in a house which, about 1789, was succeeded by the present residence of Francis J. A son of Deacon Thomas, Samuel, born 1693, succeeded to his father's house, and was living there in 1769. His son was the father of Rev. Aaron Bancroft, a learned and noted minister, settled in Worcester in 1785, and whose son, George Bancroft, the historian, is thus connected with the Reading line.

The Parkers trace their descent from Thomas Parker, an early settler and, like the ancestor of the Bancrofts, also a deacon in the parish. He was the direct progenitor of the existing families. His fifth son, Nathaniel, settled in the West Parish at about the time of his marriage, in 1677, building opposite the Common, near the site of the Grouard mansion, the first house in the present Reading. He, too, was the first person buried in the present cemetery. Na-

thaniel, known as Ensign Parker, was the grandfather of Captain Nathan, who owned the Jaquith house, traditions of which we have mentioned, and also other houses and much land. To one of these houses, long known as "Captain Parker's Red House," now standing on Ash Street, and which we have previously mentioned as the James Davis house, his son, Colonel Nathan, succeeded, keeping there a tavern. He afterward conducted a public-house on the site of the present Bank Building. Colonel Nathan was in his day an influential citizen, and the first postmaster. His sons, Edmund and Rev. Nathan, were also prominent, the first being for several terms a member of the House of Representatives, and afterwards of the Senate and Governor's Council. His brother, Rev. Nathan, was a successful pastor for thirty years in Portsmouth, N. H.

Sergeant John Parker, who was the brother of Ensign Nathaniel, was the great-grandfather of Jonas, born 1728. This Jonas was great-grandfather of Jerome and Clarkson, and by different lines of Stillman E., Henry F., Samuel, Wyman, Warren, Edward, William C., William Strong, Solon A., Milton and Galen Parker and others—names that include some of the most well-known and respected citizens of the town. Walter S. Parker, now chairman of the School Committee, is the son of Henry F. The daughters of the families descended from Jonas have carried the Parker blood into divergent channels, the families of Henry and Gilman D. Kingman, of Howard, Wyman and Hartwell Nichols, and of Frederick and Rev. William Wakefield being connected with the line.

From Benjamin, who was an uncle of Jonas, are descended the families of Cephas, Theron and William Parker (long a well-known grocer), and also Loton, who died unmarried. In this line also came Loea Parker, Jr., who was the father of Gilman L., present secretary of the School Committee.

Another brother of Ensign Nathaniel was Lieutenant Hananiah, who was the first son of Deacon Thomas. His eldest son, John Parker, removed from Reading to Lexington and was the ancestor of Captain Parker, who commanded the Lexington company in the fight of April 19, 1775, and also of Rev. Theodore Parker.

The name of Temple is also a familiar one in Reading. The common ancestor of the family was Richard Temple, a son of Robert, of Saco, Maine, who was killed by the Indians there in 1676. Richard married a daughter of Deacon Thomas Parker and lived in the westerly part of the Third Parish. He had several sons,—among them Jonathan (born 1699) and John (born 1704). At the time of the incorporation of the Third Parish Jonathan lived on what is now the James W. Roberts place, Summer Avenue, and John occupied the farm to the southeast, now the residence of Jacob Roberts. From Jonathan are descended Deacon William, residing at

the corner of Woburn Street and Summer Avenue, and Deacon Mark M. and Calvin, both deceased. Calvin was long the station agent of the Boston & Maine Railroad, and his son, Joseph S., was one of the originators of the necktie manufacture here, which he still carries on. From John Temple are descended David C. Temple, the well-known builder, Warren, Fred (now deceased) and R. Dexter Temple, now of the selectmen, a position held by his ancestor (Richard) in 1734 and 1735.

Other early settlers, whose descendants have been numerous and more or less identified with the town, are Joseph Wakefield, who came to Reading from Boston, and whose son Thomas, apprenticed to Timothy Pratt, of Reading, whose daughter he married, was the father of Timothy, the ancestor of Deacon Caleb, father of Dr. Horace P. Wakefield; John Weston, who came to the southern part of Reading in 1652, and whose marriage to Sarah Fitch in the following year appears to have been the first celebrated in the town; and Richard Nichols, who also settled in the South Parish. By the marriage above-mentioned John Weston had eight children. From the first of these, John, born 1661, spring the descendants in the present Reading. His son Stephen settled on West Street, and here Stephen's son, Isaac, was living when the Third Parish was incorporated, on the Chas. Weston place. John, son of Isaac, lived near by. John Weston, Jr., great-grandson of the original John, also Jonathan Weston, another great-grandson, were living in other parts of the Third Parish. Charles A. Weston, road commissioner, is a direct descendant of Isaac.

Three of the sons of Richard Nichols—James, John and Richard—were represented by sons who, at the incorporation of the Third Parish, were living in the north part, near Franklin and Pearl Streets. From these have sprung a numerous progeny.

Timothy Pratt, Sr., son of John Pratt, an early settler, was the first of the Reading Pratts, the homestead being upon Wakefield Street, between Charles and Haverhill Streets. From him and from his brother Samuel, who lived upon the Herrick Batchelder place, on Haverhill Street, descend many of the name in Reading and elsewhere, among the number being Joseph L. Pratt, formerly selectman and a well-known citizen.

Of the men of the present century who have, by their energy and public spirit, helped to make the Reading of to-day, none are more conspicuous than Stephen Foster, Sylvester Harnden, Horace Poole Wakefield and William Procter.

Stephen Foster was born in South Reading, December 8, 1808. In 1823 he entered the employ of Abiel Holden, who was then carrying on shoe manufacturing in Reading, and remained with him as clerk and manager until 1834, when he began business on his own account, continuing it thereafter in Reading and Boston for many years. He was con-

nected with the Reading Agricultural and Mechanics' Association, as its treasurer, and was identified with nearly every public improvement undertaken in the town. With others, he was influential in causing the Boston & Maine Railroad to carry its line through the town in 1843, instead of by a different route at first proposed. This alone has been of great benefit to Reading. Of his connection with the erection of Lyceum Hall we have already spoken. To his public spirit and persistency in assisting to raise the necessary funds, the town is largely indebted for the beautiful shade-trees planted upon the Common and elsewhere in 1845. Mr. Foster was a man of strict integrity, and of liberal and progressive spirit. He took a deep interest in the public library, was one of its early trustees and afterwards president of the board, an office which he continued to hold until his death, October 30, 1889. In 1835 he married Louisa, daughter of Thaddeus B. Pratt. Mrs. Foster died in 1852. In 1857 he married Harriet N. Fullington, of Vermont, who survives him. By his first marriage he had two daughters, one of whom is deceased, and by his second, a son and daughter, both of whom reside in Reading.

Sylvester Harnden was born in Wilmington in 1804, but he became a citizen of Reading in 1823, engaging in cabinet-making with Luther Elliott, and afterwards with Amos Sweetser.

The factory occupied at that time was on Main Street, between the stable now controlled by Rufus Wright and the residence of the late William R. Perkins.

Mr. Harnden soon extended the business, and built a shop at the head of Haven Street, and in 1831 the house next to the store of M. A. Stone. Between this house and the shop a passage-way led to a lot in the rear, which, in the gradual extension of the business, was occupied with additional factory buildings—a dry-house, varnish-shop and mill. Another building on Haven Street, now the wheelwright, blacksmith and paint-shop of Brown, Totten & Danforth, was part of the establishment. Upwards of one hundred workmen were at one time employed by Mr. Harnden. During the years subsequent to 1856 the establishment was mainly devoted to the manufacture of refrigerators.

Mr. Harnden was actively connected with the prosperity of the town in whose welfare he took a lively interest. In his later years he occupied the residence at the corner of Maine and Pleasant Streets, now owned and until recently occupied by his son-in-law, Hon. Carroll D. Wright, commissioner of labor of the United States. Here he died May 19, 1873, leaving a widow and five children, the elder son, Frederick, for a time continuing the business.

Horace Poole Wakefield, M.D., born January 4, 1809, was the son of Deacon Caleb Wakefield, himself a man of distinction, who had been honored by election to the House of Representatives, besides

holding other responsible positions. Dr. Wakefield graduated at Amherst College in 1832, and became a physician, practicing first at Oakham, Mass., and afterward at Reading. Always interested in public affairs, he was elected to the House of Representatives for two terms while at Oakham, and afterward, while at Reading, to the State Senate. Both at Oakham and at Reading he was chosen to various town offices, and entrusted with numerous public duties. He was councilor of the Massachusetts Medical Society, and its vice-president; also president of the Middlesex East District Medical Society. He assisted in the formation of the American Anti-Slavery Society, and his name stands next to that of John G. Whittier among the signatures to its declaration of principles. Later he became an inspector at the State Almshouse at Tewksbury, and its resident physician, and afterward superintendent of the State institution at Monson. Dr. Wakefield possessed untiring activity and a strong will. He was always interested in agriculture, and for nine years a member of the State Board. After leaving Monson he retired to his farm at Leicester, Massachusetts, where he died in 1883. He was twice married, and a widow and one daughter survive him.

William Proctor was born in Deptford, England and, after service in the English army, came to Reading in 1859. He first engaged in the custom shoe business in Boston, and after retiring from that purchased a one-half interest in the wire-brush patents of J. E. Howard, of Reading, and began the manufacture of these brushes on an extensive scale, under the name of the Howard Brush Company. This was the era of invention in metallic brushes, and the Howard company was subjected to considerable competition which Mr. Proctor finally overcame by other purchases of patent-rights, and enlarged the business, associating with himself as manager Mr. Jas. H. Horton, who conducts it since Mr. Proctor's death. Mr. Proctor was an ardent Abolitionist, and a friend of Garrison and Phillips. An original Republican in politics, he represented the town in the House of Representatives in 1866. He was a liberal thinker in religion and an active supporter of the Christian Union (Unitarian) Church. He was also one of the trustees of the Reading Savings Bank, and one of the original promoters and trustees of the public library. He died in February, 1889, after a protracted illness, leaving a widow and two children.

Other men, now deceased, who were prominent in local affairs within the last fifty years, were Reuben Weston, an original Abolitionist; Daniel Pratt, town clerk from 1831 to 1852, heretofore mentioned as a manufacturer of clocks; William J. Wightman, town clerk from 1853 to 1856 and from 1862 to 1874; Gilman C. Gleason, for many years undertaker and superintendent of the cemetery, and Hiram Barrus.

Mr. Barrus was a native of Goshen, Mass., born July 5, 1822, and became a resident of Reading in

1863. He was always interested in antiquarian research, and collected much valuable material concerning the history of the town, which found a place in Eaton's "History of Reading" and in other publications. He also prepared and published a history of his native town. Appointed to a position in the Custom-House in 1861, he afterward became assistant cashier, which position he held until his death. He was a member of the School Committee of Reading for several years, and one of the trustees of the public library. He died in March, 1883, leaving a widow and three children.

Reading now contains many men who are fitly succeeding those who have passed away, and who are doing their full share toward advancing the prosperity of the town. Of these in detail it is not our province to speak; their work has not yet passed into history.

The town, from its position upon the main line of a railway connecting it with Boston, is a desirable place of residence for those who do business in the city. It has an abundance of excellent building land, pure air and beautiful scenery. Its moral tone is of the highest, its schools of the best, and its future growth as a place of homes for those who desire such advantages is assured. Its debt is nominal and its tax rate moderate. Its streets are well-cared for and lighted.

It is now introducing a system of public water supply, provided for at a meeting of the town held early in the present year, and soon to be completed. It possesses a first-class local paper, *The Reading Chronicle*, established in 1870 and now conducted by W. H. Twombly & Son, the senior editor being a veteran journalist.

Among its social advantages it has the usual number of organizations and societies. A Veteran Association, formed of the survivors of the late war, became, in 1889, Veteran Post, No. 194, of the Grand Army of the Republic. There is also a Woman's Relief Corps. Reading Lodge, No. 566, Knights of Honor, was organized in 1877, and has seventy-three members. What Cheer Colony, U. O. of Pilgrim Fathers, received its charter January 26, 1881, and has 110 members. Besides these, the Order of Ægis is represented by Reading Lodge, No. 13.

Masonry in Reading began with the formation of a lodge which, in the excitement of the anti-Masonry agitation, was allowed to decline. In October, 1871, a new lodge was constituted under the old name,—Good Samaritan Lodge, Free and Accepted Masons,—under a charter granted September 13, 1871.

Odd Fellowship is represented by a lodge recently formed, and the Improved Order of Red Men by Quannapowitt Tribe, No. 50. Besides these there are several temperance organizations and an encampment of the Sons of Veterans. Reading also possesses an Athletic Club, organized in 1886, and occupying a convenient and well-equipped club-house on Ash Street.

In conclusion, we quote the following from the pen of a citizen of Reading—Henry G. Kittredge, editor of the *Boston Journal of Commerce* :

"Reading has a tradition, like all New England towns, simple, sturdy and patriotic. Her society to-day possesses all the ennobling characteristics of its Puritanic origin. What constitutes the best town to live in depends on the peculiar circumstances of him who seeks a residence. There are natural and artificial advantages belonging to every town that forcibly appeal to some of the wants of men, and no one can claim exclusive jurisdiction over all the gifts of nature or the privileges of society. . . . Reading is far enough from Boston to have a sociability of its own, independent of city attractions."

To which we may add the hope that its future may, like its past, be honorable, if not exciting; and, if not particularly eventful, may still be worthy of the fathers who laid the foundations of the town.

CHAPTER LXIV.

NORTH READING.

BY HORACE C. WADLIN.

SEVEN years after the incorporation of Reading, in October, 1651, the Colony Court granted to its inhabitants additional territory on the north side of the Ipswich River, till then the northern boundary of the town. This territory in time became the Second or North Parish of old Reading, and finally, at a comparatively recent date, the town of North Reading. Formal confirmation of the grant was made by the Court in 1666, on the 23d of May, in the following language:

"Whereas, the Honorable General Court having formerly granted to the town of Reading a Tract of Land of two miles, lying between their grant of four miles and Mr. Bellingham's farme and the great (Ipswich) river, and also ordered them to have it laid out sometime before this Court sate; at the request of the Town that this Platt of Land is laid out and returned, buttled and bounded as followeth: running from a Pine tree at A, north by the compass, six hundred rods, joynes to the Town of Reading land unto B, to the top of a rocky hill; and from B, East two hundred sixty-eight rods to an oak tree at C, marked R. B., and joynes the Andover land; and from C, South South East 8 deg. = 30 — to E five hundred seventy-six rods, this joynes upon the Governor's farme to a black oak tree at D, marked R. B; and this line joynes upon Mr. Bellingham's farme; the fourth line runs from D, E. b. N., two hundred thirty-six rods to a walnut tree at E, and joynes also on Mr. Bellingham's farme; the fifth line from E, South East and by South, two hundred and four rods to a black oak in Salem line at F, which joynes upon the farme of Thomas Fuller; the sixth line runs from F, west south west, 24 S., four hundred and twenty rods to a black oak at G, the which line is Salem bounds. The 7th line from G., West by North, 74 No., five hundred and sixty-eight rods to a pine tree at A (the place of beginning), alongt the river (Ipswich) side."

This return was made and signed by Elisha Hutchinson, and the Court allowed it, "provided it intrench not on any former grant."

The early history of Reading, and indeed the entire history of that town down to 1853, when North Reading became independent, may properly be considered the history of the latter town also; but as this has been sketched in connection with the parent town, it will not be followed here, and we shall confine our

attention to the North Parish and to the present town of North Reading since its incorporation.

Some years after the grant of territory had been made the Colony Court ordered a second survey to be made of it, and to defray the charges or costs of such a survey the town gave to Shubael Walker, who performed the work, a tract comprising some 300 acres. The title to this land was afterward involved in a legal contest, wherein Captain Ephraim Savage, an influential citizen, sued the town for possession, claiming it under right of his wife. His suit was lost, however.

The limits of Reading now extended from the point of original settlement below Lake Quannapowitt, northward some eight miles to the Andover line, and the first church having been built in the southern end of the town, the towns-people living on the new grant had a long distance to travel for the purpose of attending public worship. In 1696 the parish formally recognized this in these words:

"The glory of God being the chief end that all men's actions ought to aim at, and the promotion and upholding of the public worship of God being one great part of our duty, we, the free-holders and other inhabitants of Reading, having considered the great distance of such in this town, as live on the north side of Ipswich river and Bare Meadow, from the place of God's worship among us, whereby they many times labor, under great difficulty in coming to God's house, oftentimes cannot come, and seldom can bring their children, do therefore, at a general town-meeting, held by the proprietors and other inhabitants, on the 2d of March, 1695-96; we, for ourselves, our heirs and successors, vote unanimously, agree and order, and be it hereby enacted, ordered and continued, that all that tract of land, in our township, lying on the North side of the Ipswich river, so called, that is to say: bounded westerly by Woburn, by Andover northerly, and by Salem line easterly; as also all that land in our township, lying on the north side of Bare Meadow, commonly called 'Suller's Neck,' as it is bounded by Lynn line of township with us, and so to river aforesaid:— we say that when, and as soon as that there is such a suitable and competent number of inhabitants settled on the tract of land aforesaid; that when they do call and settle and maintain a godly, learned, orthodox minister, that they shall be free from paying to the minister or ministry in the town, or on the South side of the aforesaid river, and that for so long as they so do."

In 1711 the inhabitants on the north side of the Ipswich, believing that the time had come when the intent of this vote should be carried out, petitioned to be set off as an independent parish, but without success.

The division was made, however, without opposition in 1713, and the new parish was styled the "North Precinct," or Second Parish of Reading. The first parish meeting was held November 27, 1713. At this meeting Sergeant George Flint was chosen moderator, John Harnden being clerk.

The settlement of the precinct had gone steadily forward since the land had been granted by the Colony Court. Six families were located there prior to 1680, and before the close of the century many others were added. These early settlers comprise the Uptons, Flints, McIntires—names still familiar in the town. There were thirty-nine members of the church in 1720, and a house of worship having been undertaken, concerning the location of which the advice of the

town had been asked and duly given, the new parish extended a call to Rev. Daniel Putnam, of Danvers, who was a graduate of Harvard, 1717, and who, no doubt, was a "godly, learned orthodox minister," such as had been contemplated in the original vote passed antecedent to the incorporation of the parish. At the date of Mr. Putnam's ordination there were fifty-three tax-payers in the precinct.

As an inducement for Mr. Putnam to settle in the parish, he had been given twenty acres of land, and there had been built for him a house, "twenty-eight feet long, nineteen feet wide, and fifteen feet stud." This building was of the usual primitive type, having a "lean-to" or kitchen extension on the rear, one-story in height. It was to have three chimneys from the ground, besides a chamber chimney, and it was stipulated in the vote providing for its erection that Mr. Putnam should find nails and glass for the building.

The town having given to the parish £30 toward the erection of the meeting-house and parsonage, a request was also made that the common land in the precinct be dedicated to parish uses. The form of this request is characteristic of the time, and as far removed as possible from the style that would be now employed. After recognizing the goodness of the Lord, who had inclined the hearts of the towns-people towards the general gift of money, and formally returning the thanks of the parish therefor, the petition proceeds as follows:

"And if it might please the Lord to incline your hearts, now in our beginnings, to give us the common land that lyeth in our Precinct, near our meeting-house, for ministerial use, so we may be a building a minister's house, we shall readily accept it and account it an act of your Christian charity and compassion towards us, who are and remain your humble servants."

Notwithstanding the best intentions the parish found it impossible to render Mr. Putnam the financial support he needed. Aid was from time to time solicited and rendered by the First Parish, and in 1724 it was voted to apply to the Governor and Council in relation to Mr. Putnam's troubles. In 1730, with the intent of strengthening the parish, it has voted "to petition the General Court for part of Reading, part of Lynn, and part of Audover, to be sett to them to help support the gospel in said Precinct." This threatened encroachment was resisted by the First Parish, which chose a committee to oppose the petition before the Court.

Other things than parish matters occasionally disturbed the usual even current of events. In 1721 there was an alarming epidemic of small-pox, and on the 29th of October, 1727, there began an earthquake which, according to the parish record, "lasted at times, three months, and at the end of three months, very hard." There was then no local press to register important events, and the church record often bears items intended to perpetuate occurrences of extraordinary interest.

In 1740 the parish contemplated the erection of a

new church, but not till 1751 does it appear that an effective vote to undertake it was passed, and the following year the building was raised. It was to be forty-eight feet long and thirty-six feet wide, covered with shingles.

Rev. Mr. Putnam died in 1759, and was succeeded by Rev. Eliab Stone, who was ordained May 20, 1761.

In 1771 there were sixty-six voters in the parish, three more than in the Third Parish (now Reading), and fourteen less than in the First Parish (now Wakefield).

During the controversies with the mother country which preceded the Revolution, the North Precinct shared with the rest of the town the active duties of the hour. When, in 1774, the town voted "to maintain their charter rights in every constitutional way," George Flint, David Damon and Benjamin Flint, residents of the Third Parish, were joined to a committee to draft a memorial that should fitly express the sentiment of the town respecting the grave questions at issue. The report of the committee took strong ground against the unjust taxation of the Colonies, but deemed it inexpedient for the town to adopt any particular measures for their future conduct in opposition to the action of Parliament until after the report of a congress of commissioners from all the Colonies, then proposed, had been made.

During the previous session of the General Court Deacon Daniel Putnam, of the North Precinct, had represented the town, and had received from his constituents instructions which have been set forth in the historical sketch of Reading, enjoining him to be firm in resisting any encroachment upon the chartered rights of the Colonists, and cautioning him not to give his consent to any measure that might limit the liberty of the people.

Either in 1774 or in 1742—the date is doubtful—a burying-place and training-field had been set out in the parish, and the committee appointed to perform this duty also laid out five "needful and necessary public ways" or roads. One of these led from Flint's mill to the Lynn line, and was a new alignment of an older road; another extended "from George Flint's out to the ten-pole way before Samuel Dix's house, near the corner of Jona. Flint's land." A third ran from the saw-mill between the farms of Samuel Dix and Samuel Lues, Jr., to the road last mentioned. A fourth was a bridle-way from the road near Richardson bridge up to Samuel Hartshorn's, and from thence up to a road leading from Jonathan Batcheller's to the meeting-house, and the last led from said Batcheller's to the ten-pole way by or near "Nod Mill."

All mere local or parish interests were subordinated to the struggle for independence that in 1774 enlisted the energies of the Colonists.

Reading North Precinct, although only a parish of the town proper, was represented in every conference of the citizens respecting the issues involved in the

war. The names of Benjamin Flint, Daniel Flint and Benjamin Upton are prominent among the rest, and Amos Upton, another resident of the parish, is said to have been in the battle of Bunker Hill, one of the first men of the number furnished from this precinct toward the town's quota.

After the war the parish resumed the even tenor of its way. The population was somewhat scattered and devoted to agriculture, without manufactures, except boot and shoe-making, which to a limited extent, has been followed in later years.

In 1853 the precinct was incorporated as the town of North Reading. The population of the town in 1855 was 1050. In 1860 it was 1193 and the valuation of the town for purposes of taxation was then \$527,890. The years that have since passed have brought little that was eventful, and the town preserves much the same character that it possessed when incorporated. To the War of the Rebellion the town gave more than its share of patriotic men, the total number being 137, or seven more than the required quota.

The town, though small, has given birth to men of influence in their day and generation, and whom any community might claim with pride. Such a man was Sergt. George Flint, the early settler, who has been previously mentioned, and in the same line at a later date, Benjamin Flint, 1746-1858, "noted for his great firmness of purpose and determination of will, and much respected for his blameless life and personal worth;" Col. Daniel Flint, born 1671, who "possessed in an uncommon degree, a strong and vigorous intellect, with indomitable perseverance and great native force of character;" Rev. Jacob Flint, 1768-1835, "a good patriot, a well-read theologian, a faithful minister and a pious Christian;" Rev. James Flint, 1779-1855, "as a scholar, a preacher, a poet and a critic, eminent and distinguished;" Rev. Timothy Flint, died 1840, pastor of the Congregational Church at Lunenburg "well known in America and on the other side of the Atlantic as the author of various works that have given him a rank among the most distinguished writers of the country," and besides these Charles F. Flint, born 1808, died 1868, who was one of the most enterprising citizens of the town, and well known and highly esteemed outside its limits. After his death his wife presented to the town, as a memorial of her husband, the Flint Memorial Hall, erected opposite the Common and containing the public library, to which Mrs. Flint also gave \$1000. The hall contains memorial tablets to the honor of the deceased soldiers and sailors of the town, and the library comprises a well-selected collection of books. The building was dedicated October 21, 1875.

Benjamin Upton, also a descendant of the early settlers, was another citizen of sterling intelligence and worth whose name should be noted here.

The town takes an honest pride in its schools, and

has voluntarily established and maintained a High School, although not required to do so by the statutes.

During the school year ending in 1889, the amount raised by taxes for the support of schools, including expenditures for all school purposes, was \$2335, the town ranking above the average for the State in the percentage of its taxable property applied to the support of schools.

The churches of the town are the Congregational and Baptist.

The Congregational Church was the original church of the parish, and its first meeting-house was built in 1717, as we have noted. This stood upon the Common until 1752, when the second church edifice took its place. The third building was erected in 1829, and was occupied until 1836, when a division occurred in the parish, resulting in certain members, who held Universalist views, retaining the old building, and the others erected in that year the church which is still in use.

The old building became the present town-hall, although religious services are occasionally held in it.

The Baptist Society was organized in 1817. It encountered the usual opposition at that time manifested toward those who held the doctrines of that church. It gradually grew in strength, however, and in 1828 erected a church building. The first pastor was Rev. J. M. Driver, who has been followed by many others. The present church edifice was built after the destruction of the former one by fire in 1860.

The manufacturing and mechanical industries of the town are unimportant. Classed as such in the State Census of 1885 are fourteen establishments, having an invested capital of \$32,760. The value of goods made in that year was \$105,997. The agricultural products amounted to \$103,269; the value of farm property being \$483,943, of which \$241,706 was the value of agricultural land. The town is located about four miles north of the central village of Reading, with which it is connected by a stage line, running from the station upon the main line of the Boston and Maine Railroad. The Salem and Lowell Railroad runs directly through the town. The present population is about 850.

BIOGRAPHICAL.

CHARLES F. FLINT.¹

One of the names that North Reading will ever hold in grateful and honorable remembrance is that of Charles F. Flint. Born of one of the old families of the town, he loved its woods and streams, its lakes and hills, and the people among whom he was nurtured, with no common affection.

¹ By Chester W. Eaton.

Portrait of a Man

Charles Frederick Flint was the son of Peter and Mary Flint, and traced his descent through captains and deacons of the earlier days from Sergeant George Flint, one of the leading citizens and pioneers of the North Precinct of ancient Reading. Mr. Flint was born at the old homestead of the family, in what is now North Reading, January 18, 1808, and obtained his mental acquisitions and training mostly in the district schools of his native town.

By labor on the home acres, and under good influences, there developed in the young farmer a robust, moral character, as well as strong physical health, and a worthy ambition to mingle with busy men in the great world, and do a man's part in his day and generation.

He early became prominent in the affairs of his town, where his influence was felt as that of a progressive, liberal and sagacious citizen. In occupation a farmer, he was noted for his unwearied industry and sound judgment, and favored with ample returns. His restless mind, however, sought for larger exercise than was afforded by the simple activities of his native village, and found scope in real estate and railroad enterprises in Middlesex and Essex Counties, and was especially interested in working for the success of the Salem and Lowell Railroad, which was laid out through the town of North Reading. Coming to the assistance of this enterprise when it greatly needed help, he worked for it with all his energies and all his means, and had at last the satisfaction of seeing the railroad a complete success and established on a sure foundation. He was chosen a director of this Railroad and president of the Company, and was for years an influential director of the Wamesit Bank in Lowell.

He died January 13, 1868, at the age of sixty years, after a brief illness, of congestion of the brain, resulting probably from a fall on the sidewalk in Salem. His loss was deeply lamented in the business circles in which he had moved, and was especially felt among the people of North Reading, where his loyal and generous public spirit had been frequently made manifest to the advantage and improvement of the town of his birth and his love.

Mr. Flint was married, in 1840, to Harriet N. Evans, daughter of Thomas and Phebe Evans, of South Reading. They had no children.

Mrs. Flint, deeply appreciating and sympathizing with her husband's affection for his native town, and desiring there should be some enduring memorial of the same, caused to be erected in 1875 an elegant and commodious edifice in the centre of North Reading at a cost of \$20,000, adapted to the holding of town-meetings, and with convenient apartments for the uses of a public library and municipal officers, and on October 21, 1875, she presented the building and a suitable lot of land to the town, with fitting ceremonies of dedication, the Hon. George B. Loring pronouncing an eloquent oration on the notable occasion. This

building is appropriately known as the "Flint Memorial Hall." Mrs. Flint supplemented the noble gift by the donation of a large and well-chosen selection of books, forming the nucleus of the present public library of North Reading.

Mrs. Flint now resides in Wakefield, and illustrates the character of a liberal Christian lady by numerous public and private benefactions.

CHAPTER LXV.

BEDFORD.

BY ABRAM ENGLISH BROWN.

The Parent Towns—Early Grants and Settlements—The Two Brothers—Discharge of Indian Claims—Garrison—Incorporation.

BEDFORD stands number twenty-five in the fifty-nine townships thus far incorporated in Middlesex County. It has a twin mate—Westford. They were both incorporated by the General Court September 23, 1729.

Bedford was taken from Concord and Billerica, but not until the parent towns had almost reached their first centennial. It then appears that the early history of the territory known as Bedford is included with that of the parental towns. That which may be designated as the south and west part of the town was taken from Concord, and the greater part of the north and east was from Billerica.

For nearly a century this territory comprised the outlying districts of Concord and Billerica.

It represents a part of the first inland town of Massachusetts and includes portions of very early grants.

A commendable pride prompts every true New Englander to seek for Puritan descent, and to date the settlement of his locality from the landing of those grand worthies. Hence, in considering the origin of Bedford, it may be admissible to repeat a few familiar facts of history, with their dates.

The Pilgrims landed in the year 1620. The charter of Massachusetts was granted in 1629, by King Charles I. In 1630 came Winthrop and Dudley with fifteen hundred passengers. September 2, 1635, Musketaquid (Concord) was granted to Mr. Buckley (Rev. Peter Buckley) and ——— Merchant (Major Simon Willard), with other families.

November, 1637, the Court made grants to Governor Winthrop and the deputy, Mr. Dudley. In the following spring the grants were located, the original having been somewhat enlarged.

In June, 1641, "Shawshin is granted to Cambridge, provided they make it a village."

The town of Bedford comprises a portion of the Musketaquid grant, the whole of the Winthrop and a portion of the Shawshin grant.

The first house occupied by English, within the present limits of Bedford, alluded to in a report made in 1642 as the "Shawshin house," proves that the first settlement was made here within twenty-two years after the landing of the Pilgrims.

The nature of the land included in the above named grants is seen in reports and descriptions made about that time. Hubbard describes the Concord settlement as "right up in the woods," and Johnson as "in desert depths where wolves and bears abide," and the journey to it he describes as "through watery swamps, through thickets where the hands were forced to make a way for the bodies passage, and their feet clambering over the crossed trees, which when they missed, they sunk into an uncertaine bottome in water, and waded up to their knees, tumbling, sometimes higher and sometimes lower."

Of the grants made to the Governor and deputy (lieutenant), the whole of the former is included in the present limits of Bedford. Its western boundary being Concord River. The grants were located 1638, May 2d, as follows:

"It was ordered by the present Court that John Winthrop, Esq', the present Governo', shall have 1200 acres of land whereof, 1000 was formerly granted him. & Thomas Dudley, Esq', the Deputy Governo', has 1000 acres granted to him by a former Courte, both of them about 6 miles from Concord, northwards; the said Governo' to have his 1200 acres on the southerly side of two great stones standing neare together, close by the ryver side that comes from Concord."

The deputy's was north of it within the present limits of Billerica. Winthrop has given us an account of the location of these farms in his journal.

"Going down the river about four miles, they made choice of a place for one thousand acres for each of them. They offered each other the first choice, but because the deputy's was first granted, and himself had store of land already, the Governor yielded him the first choice. So, at the place where the deputy's land was to begin there were two great stones which they called the Two Brothers in remembrance that they were brothers by their childrens marriage and did so brotherly agree, and for that a little creek near those stones was to part their lands."

A little later the Court added two hundred acres to the Governor's part, and still later he received an additional portion of sixty acres of meadow "within a mile or two of his farme, beneath Concord, towards the southeast of the said farme."

In 1636 Matthew Cradock expressed a desire to obtain a grant of two thousand acres "at a place called Shawe Shynn," and in 1637, August, "Capt. Jeanison & Leift. Willi: Spencer were appointed to viewe Shawshin & to consider whether it be fit for a plantation." The report was not made, however, until after it had been granted to Cambridge. The

explorer's experience is thus described by Sewall as taken from Woburn records: "As they were engaged Nov. 9, 1640, shortly after their appointment, in exploring the land about the Shawshin river they were overtaken and lost in a snow-storm, and in this sad dilemma they were forced as night approached, for want of a better shelter, to lye under the Rocks, whilst the Raine and snow did bediew their Rockye beds." The following is the report of the committee, which is not as valuable for accuracy as it is helpful, in locating the Shawshin house:

"Wee, whose names are underwritten, being appointed to viewe Shawshin & to take notice of what fitness it was for a village & accordingly to or apprehensions make returne to the Ct; wee therefore manifest thus much: that for the quantity it is sufficient, but for the quality in or apprehensions no way fit, the upland being very barren & very little meadow there about, nor any good timber almost fit for any use. Wee went after we came to Shawshin house, by estimation. Some 14 to 16 miles at the least, in compass; from Shawshin house wee began to go downe the ryver 4 or 5 miles near East; then we left that point & went neere upon north, came to Concord Ryver, a little belowe the falls, about one mile or neare; then we went up the ryver some 5 miles untill we came to a place called the Two Brethren: and from thence it is about two miles & 1/2 to Shawshin, & the most part of all the good land is given out already; more land there is at the south side of the house, between the side of Concord line & the hende of Cambridge line, but littell meadow, & the upland of little worth: & and this is what we can say heere.

"SAMON WILLARD.
"EDWARD CONVERS."

The signers of the report were not the ones appointed for this exploration by the Court in 1637, but the former, Willard was a prominent inhabitant of Concord and Convers was of Woburn, and as such may have had an eye to this territory for their own advantage and hence were unconsciously influenced in making their report, which is not an accurate description of the land. After receiving the report of the exploring committee the General Court renewed the grant to Cambridge and specified the bounds: "All the land lying upon Shawshin Ryver & between that and Concord Ryver, and between that & Merrimack Ryver, not formerly granted by this Court." May 9, 1644, the Court "ordered that the ryver at Shawshin shall be called by the name of Shawshin."

By a vote of January 2, 1654, a second division of land was made in Concord. "It was voted to divide the town into three parts or quarters;" as the east quarter, in part, fell to Bedford, it is to that division that we confine our investigation. The report of the committee to make the division is as follows: "The east quarter by their families are from Henry Farweles all eastwards with Thomas Brookes, Ensign Wheeler, Robert Meriam, George Meriam, John Adames, Richard Rice."

In 1663 the town voted "that every man that hath not his proportion of lands laid ont too him, that is due to him, shall gitt it laid out by an artis" before

¹ The spelling of this as of many proper names of early colonial days is variable. Shattuck, in his history of 1823, seems to prefer "Shawshien." Walcott in his recent work, "Concord in the Colonial Period," accepts Shawshin as the more approved. In following his good judgment we use the latter form.

1665; "and that each one should give to the town clerk a description of their lands." Mr. Shattuck's table, made from the records, is helpful in showing some of the divisions that fall to Bedford: William Hartwell had 241 acres; John Hartwell, 17; Wm. Taylor, 117; Joseph Wheeler, 357; Caleb Brooks, 150; Thos. Pellet and Joseph Dean, 280; Eliphalet Fox, 106; others are indicated as being in the east quarter, but are omitted, as there is no reasonable certainty of their exact location. Each quarter had the care of its own highways and had a board of overseers to look after its interests. Mr Shattuck says: "Regulations were established in each quarter, similar to those in wards of a city. Each chose its own officers, kept its own records, made its own taxes," etc. The first overseers for the east quarter were Ensign Wheeler and William Hartwell (without doubt William I.).

The Governor Winthrop grant remained intact, and probably unoccupied until 1664, when it was sold by Fitz John Winthrop to Job Lane for £230. Mr. Lane was distinguished as an "artificer" and a "house wright." He paid for the Winthrop farm by erecting a mansion for Fitz John Winthrop at Norwich, Connecticut, and he built one of the college buildings at Cambridge. His skill and reputation are acknowledged in being selected as an "able and honest artificer for erecting a bridge over Billerica River." The contract made January 11, 1667, shows that he was to receive for the work "seven score and five pounds sterling;" "ten in cash, ten in wheat, ten in malt, and the remainder in corn and cattle."

The discharge of obligations, of importance like the two cited above, by the use of barter, suggests the state of the currency at that time. The conveyance of the Winthrop farm is made on vellum, now in the possession of the heirs of Mary Lane Cutler; the deed is in an excellent state of preservation, and after having lain in folds 225 years and changed custodians many times, can be read with comparative ease. It begins as follows:

"This indenture, made the second day of August, in the year of our Lord, one thousand six hundred and sixty & four, in the sixteenth year of the reign of y^e Sovereign Lord Charles the Second, by the grace of God, of England, Scotland, France and Ireland, King and defender of the faith. To wit: Between Fitz John Winthrop, of New London, in the Colony of Connecticut, in New England, Esq., on the one part, and Job Lane, of Malden, in the County of Middlesex, in New England, carpenter, on the other part."

The purchaser of the Winthrop farm was from Rickmansworth, in Hertfordshire, England, where he inherited property from which he received an annual income that he bequeathed to his son John.

Job Lane built a house very soon after he came in possession of the farm, 1664. The Hiram Dutton house is supposed to mark the spot, if it is not in part the original house. It was the only house in Biller-

ica south of Ralph Hill's at the time of King Philip's War. Job Lane went to Malden some years before his death, which occurred in 1697, and established a home. He gave by will, the Winthrop farm to three of his heirs. They agreed to a division of the farm, which was found, by survey, in 1706, to contain 1500 acres. Each had a portion of upland, meadow and woodland, and many of the odd-shaped lots of land of to-day are the result of that division. Capt. John Lane had 750 acres, Samuel Fitch had 375 and Matthew Whipple had 375. The former, Capt. John Lane, was son of Job; Fitch and Whipple were grandsons, who represented deceased daughters of Job Lane.¹

There is no evidence that Whipple settled on his portion, but the others did, and some of the lots are held, in 1890, by their descendants, (the sixth generation).

The Shawshine grant included all of the remaining land that was set off to Bedford at the incorporation. Two small accessions were made later. It does not appear that Cambridge took action towards the settlement of Shawshine until April 9, 1648. Only those grants known to be in Bedford are mentioned here. Gookin (Gooking), had 500 acres; it comprised the northeast section of the present town of Bedford. The grantee was Capt. Daniel Gookin, and was thus publicly recognized as a valuable servant of the Colony. He was a faithful friend of the natives and a co-worker with the Apostle Eliot, and had a great influence with the Wamesit Indians. His name appears as Magistrate in 1684, before whom depositions were taken in regard to the Musketaquid purchase of 1636. Rev. Joseph Mitchell had 500 acres. This was all purchased by Michael Bacon, in July, 1682, for £200. Nathaniel Page bought a grant of Grimes, in 1687. It contained 500 acres. Edward Oakes had a grant of 300 acres, extending from the Page land southward to "Concord Old Line." Thomas Oakes had 150 acres, extending from the Bacon purchase to Winthrop farm on the west. The Bedford Springs covers this grant.

"The great meadows," east of the Poor Farm, including sixty acres, constituted the last grant to Governor Winthrop. With the exception of the Winthrop meadows, all of the land remaining between Thomas Oakes, (Bedford Springs) and "Concord Old Line," bounded on the east by Page and Edward Oakes, and on the west by the Winthrop Farm, was known until 1708 as Billerica Commons, (the squadron south of Oakes farm) Bedford Village is included in this.

Dr. Page, in his "History of Cambridge," has the following: "Michael Bacon, of Woburn, bought of Rodger Shaw a farm in the northwesterly part of Cambridge (now Bedford), including all the meadows adjoining to the great swamp near the east corner of

¹ The law of Massachusetts gave to the oldest son a double portion of a parent's estate, which may account for the unequal division.

Concord bounds that falls to Cambridge. The Shawshine River runs from this swamp."

This must have been a second purchase of land in this town by Mr. Bacon. There still remains about 700 acres of the Shawshine grant within the limits of Bedford, the section east of the Page purchase and the Rev. Joseph Mitchell grant. This must include some minor grants, among which, doubtless, is that of thirty acres to John Wilson, in 1685, "for encouragement towards his corn-mill." The Billerica Common lands or "Squadron South of Oakes farme," before mentioned as including the village of Bedford, containing 600 acres, was divided in 1708. The allotment, according to Hazen's Billerica, was as follows: "It is agreed that Lt. John Stearns should attend the laying out of the lots as fast as might be, and to carry the hind end of the chain, (*only* as to his own) and Daniel Hill or Henry Jets to carry the chain for said Stearns's lot."

"The first lot was granted to Lieutenant Samuel Hill including seventy-six acres bounded two hundred and forty rods on Concord, and sixty-four rods on Winthrop Farm. The main street in Bedford was afterwards located on the north line of this lot, and the 'old line' of Concord is now to be traced sixty-four rods south of that street and parallel with it." The second lot of twenty-three acres was Fassett's, "Patrick Fassett's," and became the property of Israel Putnam, as did the third, granted to Joseph Hill. The two included fifty acres. The fourth lot was ninety-one acres, laid out to Jonathan Hill, next to Oakes Farm; and others following south¹ were Nathaniel Hill, Joseph Farley, Daniel Hill, John Stearns, Henry Jets, John Parker and Job Lane, the last reaching Mr. Page's farm.

INDIAN CLAIMS—Having obtained the English right to the territory the pioneers had an obligation to their predecessors, the Indians, to discharge; this may be regarded by some as only the demands of the moral law, yet it has been gratifying to all subsequent generations that it was faithfully discharged and of benefit to those who participated as it doubtless prevented much anxiety and bloodshed.

The disease that had visited the Indians previous to the coming of the Pilgrims, had reduced them in New England from more than 18,000 warriors to about as many hundred. Of the five tribes that were located south of New Hampshire, the Massachusetts occupied the territory north of Charles River and west of Massachusetts Bay, and was supposed to number about 300. They were divided into villages of which Musketaquid was one. Its limits were designated by the act of the General Court passed September 2, 1635: "It is ordered that there shall be a plantacon att Musketaquid, & that there shall be 6 myles of

land square to belong to it." It embraced about two-fifths of the present town of Bedford, besides Concord and other lands. Of this tract of wilderness they obtained a quit claim from the natives in the following year. According to depositions taken in 1684 it appears that the deed from the natives was executed by Squaw Sachem a widow, who represented her late husband, Nanepashemet, Wappacowet, next in power to the King, who had claimed the widowed Sachem in marriage, and by others of the tribe. The Indian title according to deponents was given in consideration of "Wompompeag, Hatchetts, Hows, Knives, Cotton Cloath & shirts with a new suit of cotton cloath, a linnin band, a hat, shoes, stockings and a great 'coat" for the new husband of squaw Sachem, he was "the pow wow, priest, witch, soererer or chirurgeon" of the tribe. When considered in the light of the present, the compensation was trifling, but it satisfied the natives and the treaty of purchase secured friendly relations.

The Indian settlement of the Shawshine Grant was known as Wamesit or Weymesit, situated between the Concord and Merrimack Rivers, being a favorable location for securing sufficient food. There is but slight evidence that the Bedford portion was frequented by the Indians of any village, although it is probable that the broad open plains were annually burnt over and rudely cultivated, while the birchen canoe of the red man plied up and down the Shawshine and Concord. The long mound or breastwork now seen on the east shore of the Concord River, in Greenwood's Grove near Bedford line, is suggestive of Indian origin and may have been built to aid in hunting.

All of the aboriginal claims to the Shawshine grant were extinguished by the "Wamesick Purchase of 1685." Thus the entire territory of Bedford was honorably obtained from the natives.

Billerica had thousands of acres of common grounds that were apportioned at different times among the early settlers. Those who had come later bought of the grantees and settled in the outlying district (now Bedford). They had not shared in the allotments, while they had paid their proportion of the charges. They petitioned the General Court, and on Friday, November 16, 1705, it was ordered "That Capt. John Lane, Jonathan Bacon, John Wilson and other, the Petitioners that are Freeholders & Inhabitants of the sd. Town of Billerica, be Intitled to & have a proportionable share with other the Commoners Proprietors, & Inhabitants of the sd. Town in all future Divisions of all undivided and waste Lands belonging to the sd. Town, according to their Proportion to the Town charges for the space of seven years past." The town in 1707-8, January 29, granted to the purchasers of Cambridge Church Farm a ten-acre right "to promote and maintain peas and quietness among us." Captain Lane and others who thus secured a right, received their portion in the subse-

¹ This is practically correct, yet a divergence southwesterly beginning a little west of the Trinitarian meeting-house, is thought by C. W. Jenks, a careful student of early bounds, to establish the "old line" somewhat different, in that vicinity of the town.

quent divisions of the common grounds. Their portions seem to have been west of Concord River.

An accession was made to the town on the extreme northwest by which a small tract of the Dudley Grant was obtained. This was the Edward Stearns farm, set off from Billerica in 1766. By this addition the historic and enduring landmarks, "Two Brothers," or "Brother Rocks" were secured to Bedford.

Evidence does not favor the supposition that the original grantees of Shawshine territory established homes or began the settlements included in this town and perhaps never viewed their landed possessions. "Extensive meadows bordering on rivers and lying adjacent to upland plains have ever been favorite spots to new settlers." A topographical survey shows that this territory offered attractions to settlers, and there is unmistakable local evidence that early settlers pushed out from the villages as soon as it was prudent and established homes near the winding Shawshine which in itself furnished power for industry. There are traces of roads long since discontinued. Depressions on the surface of neglected fields near which may still be seen the purple lilac and the thorny pear.

The General Court ordered in 1635 that no new buildings should be erected more than half a mile from the meeting-house "except mill-house and farm-house of such as had their dwelling-house in some town." This was a precaution against the Indians and lasted about eight years. This leads to the conclusion that the settlements in Bedford territory, previous to 1643 were confined to the Shawshine house. The "Corne mille" with its adjacent buildings, antedates King Philip's war (1676), and according to Billerica records the Bacon, afterwards Fitch mill was located before 1633. It is mentioned thus: "16: 1: 63. Will^d Tay & George Farley are Apoynted to Lay out a highway from the Towne, leading to Mr. Mitchell's farme, and to y^e laud y^e was Lay^d out for Mr. Edward Oaks' farme, on y^e south East end of Mr. Winthrop's great meadow, to be layd out four polls wide."

The Shawshine House was one of the Indian trucking houses which preceded the first settlements of New England, where the natives bartered furs, etc., for English merchandise. And as appears by the report of the exploring committee was within the present limits of Bedford and possibly the Kenrick dwelling marks the site. The records of Billerica furnish evidence that it was occupied by a family, as Hannah, infant daughter of Henry Jeffs died "y^e first weeke of May, 1653." This is the earliest event noted in Billerica Records. The first birth recorded was that of Samuel, son of George Farley, (March, 1654). The former, Henry Jeffs, may be the same person who has been shown as having a portion of the common lands in 1708, and the surname of the latter, Farley, we have seen in connection with a portion of the same land.

Michael Bacon, who purchased the Mitchell grant must have been located on the estate before he became the possessor, as births of his children are recorded as early as 1671, and if the first mill was built by him he must have been there before 1663, and then or very soon had neighbors as appears from the following record in Billerica, showing the assignment of families to garrison ("No. 10").

"13 6^o, '75 (1675).

"At a publick Towne Meeting—

"The Towne, considering the providence of God at the present calling us to lay aside our ordinary vocations in providing for our creatures and to take special care for the preserving of our lives and the lives of our wives and children, the enemy being near and the warnings by gods providence upon our neighbors being very soleme and awfull, do therefore order & agree joyntly to prepare a place of safety for women and children, and that all persons and teams shall attend y^e said worke untill it be finished; and account of y^e wholl charge being kept it shall be equally divided upon the inhabitants with other Towne charges."

At a meeting of the selectmen and a committee of the militia, held "14. Sm. 1675," a list of garrison-houses is reported, in which is the following:

"Also, Timothy Brookes house is allowed for garrison & to entertain Michael Bacon's family, & to have two garrison soldiers to defend y^e mill & himself, y^e master of the garrison. (Timothy Brooks bought of George Farley a part of the Oakes Grant in 1673)."

In the assignment of families to garrisons the records show that "Also, Job Laine was allowed to fortify his own owne house, and to have two soldiers for garrison-men to defend his house, in case y^e country could spare them."

The settlements increased so that in 1728 an effort was made to secure the formation of a new town. Following the custom in forming a new township, petitions were made to the inhabitants of Billerica, by the settlers on that side of the proposed township, and to Concord by the settlers on the Concord side. The petitions were substantially as follows:

"To the gentlemen, the Selectmen and other inhabitants of Concord, in Lawful meeting assembled: the petition of sundry of the inhabitants of the northeasterly part of the town of Concord humbly sheweth: That we, your humble petitioners, having in conjunction with the southerly part of Billerica, not without good advice, and, we hope, upon religious principles, assembled in the winter past, and supported the preaching of the gospel among us, cheerfully paying in the meantime our proportion to the ministry in our towns, have very unanimously agreed to address our respective towns, to dismiss us and set us off to be a distinct township or district, if the Great and General Court or assembly shall favor such our constitution.

"We, therefore, the subscribers hereunto, and your humble petitioners, do first apply to you to lead us and set us forward in so good a work, which, we trust, may be much for the glory of Christ and the spiritual benefit of ourselves and our posterity. Our distance from your place of worship is so great that we labor under insupportable difficulties in attending constantly there, as we desire to do. In the extreme difficult seasons of heat and cold we were ready to say of the Sabbath: 'Behold what a weariness is it.' The extraordinary expenses we are at in transporting and refreshing ourselves and families on the Sabbath has added to our burdens. This we have endured from year to year with as much patience as the nature of the case would bear, but our increasing numbers now seem to plead an exemption; and as it is in your power, so we hope it will be in your grace to relieve us. Gentlemen, if our seeking to draw off proceeded from any disaffection to our present Rev. Pastor, or the Christian Society with whom we have taken such sweet counsel together and walked unto the house of God in company, then hear us not to-day. But we greatly desire, if God

please, to be eased of our burdens on the Sabbath, the travel and fatigue thereof, that the word of God may be nigh to us, near to our houses and in our hearts, that we and our little ones may serve the Lord. We hope that God, who stirred up the spirit of Cyrus to set forward temple work, has stirred us up to ask, and will stir you up to grant the prayer of our petition, so shall your humble petitioners ever pray, as in duty bound, etc."

The petition had seventeen signatures, all from the Concord side. As many more petitioned from the Billerica side to their town. Concord granted her consent without objection, but Billerica clung to her outlying acres with more tenacity. This may be accounted for by the fact that she was being shorn of lands in other directions, and this new proposition, if successful, was to take some of her most valuable citizens. Their remonstrance did not avail at the Court, and the Act of Incorporation was passed September 23, 1729.

CHAPTER LXVI.

BEDFORD.—(Continued).

Name—Boundaries—Beneficiaries—Records—First Meeting-house and Minister—Churches Formed—Taxes—Some Old Families and Sites.

WHY the petitioners prayed to have the new town called Bedford, is chiefly a conjecture; but we seem to see in it an act of reverence for the memory of the first minister of Concord, who was from Bedfordshire, England. The part which he had taken in moulding the character of the early settlers, must have had an influence on the succeeding generations, as the language of the petitioners for the new town seems to imply. The session of the General Court, which granted the act of incorporation, was held at Cambridge, and began August 28, 1729. The new town was vested with all the "powers, privileges and immunities that the inhabitants of any of the towns of this province are or ought by law to be vested with: provided that the said town of Bedford do, within the space of three years from the publication of this act, erect, build and finish, a suitable house for the public worship of God, and procure and settle a learned orthodox minister of good conversation; and make provision for his comfortable and honorable support, and likewise provide a school to instruct their youth in writing and reading."

By subsequent divisions Lincoln and Carlisle were taken from Concord, and Burlington from Woburn, so that Bedford is bounded at present on the north and northeast by Billerica, east by Burlington, south-east by Lexington, south by Lincoln, southwest and west by Concord, and northwest by Carlisle with Concord River as a division between Bedford and westerly towns. "The newe towne" known as "Newtowne," 1631; "Cambridge," 1638, and "Lexington," 1713, cornered upon Bedford, and later gave up a small portion to her. In the records of March, 1758, we see that Benjamin Farley and Joseph Fassett were

granted the right to straighten the line between Lexington and Bedford, and the latter town then acquired the dismal tract known as "Farley Hole." In 1766 Ebenezer Page's land was joined to Bedford; this was done to straighten the line. When one, Grimes, petitioned to have his land set off to Lexington the town voted in the negative, and also placed upon record their willingness "to refer it to the wise and judicious determination of His Excellency, the Governor, and the Honorable Court."

The forming of a new town occasioned expenses for which money was needed, and land was called for on which to erect the meeting-house and for other purposes. These needs had been anticipated as appears by the records:

"Bedford, January the 20th, 1730.

"This is the account of the money and land that was given to encouragement for the Town in the year 1729." Mr. Joseph Dean, Dea. Israel Putnam, Mr. Josiah Fassett, Mr. John Whipple, Mr. Benjamin Colburn, Mr. Samuel Merriam each gave land, and the following men are credited with gifts of money: Mr. James Lane, Cornet Nathaniel Page, Lieut. Job Lane, Mr. John Lane, Dea. Nathaniel Merriam, Mr. Job Lane, Mr. Joseph Bacon, Mr. John Hartwell, Mr. Jonathan Bacon, Mr. John Fitch and Mr. John Whitmore, of Medford. "The wife of Nathaniel Whittecor, of Concord, gave five pounds, old tenor."

With the records of the town-meeting of January the 7th, 1729-30, appears the following:

"Mr. William Hartwell gave five pounds and it was delivered to the selectmen, and 20 shillings of it went to pay Mr. Oliver Whitmore for Right in deeds and acknowledgin of them befor him, for the law Book, two pound; for town book, ten shillings, and the money Remaining is one pound, eight shiling and two pence in the hand of Mr. Nathaniel Merriam. The law book was ordered to be passed about according to the judgment of the selectmen. With a sufficient tract of land and £61 in the treasury these determined people began the work of building up their newly incorporated town."

The records of the town open with the following:

"In Council September 23, 1729, voted that Mr. Jonathan Bacon, a principal Inhabitant of the Town of Bedford, bee and hereby is fully Impowred and Directed to assemble the Freeholders and other Inhabitants of the Town to convene as soon as may be to elect and choose Town officers to stand untill the next anniversary meeting in March.

"Sent Down for Concurrence,

"J. WILLARD, Secry.

"In the House of Representatives, September: 26, 1729.

"QUINCY, Spkr.

"Read and concurred,

"Consented to. W. Dummer,

"A true copy—Examined, J. WILLARD, Secry."

The officers elected under the above call were:

"Moderator, Jonathan Bacon; selectmen, Samuel Fitch, Nathaniel Merriam, Jonathan Bacon, Nathaniel Page and Daniel Davis; town clerk, Samuel Fitch; constables, Israel Putnam and Stephen Davis; town treasurer, John Fassett; surveyors, Job Lane and Samuel Merriam; tithingmen, Daniel Cleever and Josiah Fassett; fence-viewers Obed Abbott and Benjamin Colburn; Hog Ref., James Wheeler and Jonathan Bacon; sealer of weights and measures, John Lane; field drivers, Thomas Woolley and John Whipple."

¹ The simple statement of a name does not identify in some families, hence we note in this connection that Jonathan Bacon was a son of Michael purchaser of the Mitchell grant. Samuel Fitch was the head of the family in town. Nathaniel Merriam, dea., 1730, was first of the numerous family in Bedford, was descended from Joseph, of Concord, who died in 1646. Nathaniel died in 1738. Nathaniel Page was the third of the name in Bedford. Daniel Davis was son of Samuel and Mary (Medows), born, 1673. Israel Putnam, cousin of General Israel Putnam, born, 1699, was deacon, 1730; married daughter of Jonathan Bacon. Stephen Davis was father of Deacon Stephen, died 1738. John Fassett, treasurer, was son of Patrick died 1736. It is a coincidence of interest that his brother Samuel, was first treasurer of Westford (Bedford's twin sister).

The meeting-house was so nearly completed before the act of incorporation was passed that the first town-meeting was held in it, and at a second meeting held seven days later "The town excepted of the meeting-house, as the former comety had agreed with Joseph Fitch, for four hundred and sixty pounds." Like the houses of worship of the early settlers of New England, this offered but few attractions, save a shelter from the storms; but the people made haste to put it in a more attractive condition. At the same meeting they chose a committee "To see the meeting-house perfected and finished," and also "provide a minister." They voted to raise "Forty pound to maintain preachin among us," and provided "for a Reat of fifteen pound to defray the charges that shall be or may a Rises in the Town." Another action of the same meeting "was to chous this four men: Mr. John Fassett, Mr. Nathaniel Meriam, Co^r. Nathaniel Paige, Mr. Josiah Fassett to tacke dedes of the land that is for the tow that is given or that is sold." In January, 1730, it was voted "to lot out the pue ground and seat the meting hous." The instructions to the committee were, "The man and his wife to set in the pue (excepting deacons), ther shall be but one poull to an esteat in seating the meting hous and pues, and they arc to have respect to them that are fifty years of age or upward; thos that are under fifty years of age are to be seated in the meting hous according to ther pay. The front foer seat in the galeree to be equal with the third seat below in the body of seats."

The progressive spirit of these early citizens of this town is seen in their willingness to allow the sexes equal rights in the pews. "Men's stairs" and "women's stairs" are often referred to in the records, but suggest the division among the singers. In the absence of a floor-plan the descriptive location of the pews is as follows: "Stephen Davis' pue is at the East End of the meeting-house, south of the east door going to the women's stayers." A committee was soon chosen to "treat with Mr. Hancock and with Mr. Rugels and Mr. Whiting in order to a fast, and thay appointed a fast on the 22nd day of January, 1729-30." The ministers of the neighboring towns assembled and held a "fast," and a call was soon extended to a young man who had been preaching for the people. "Mr. Bowes was choas to be our minister." The town agreed to give him "ninety-five pounnds the first year, an hundred pounnds the second year, and so on anuually: to give him five and twenty cords of wood yearly; that the money be all wayes in proportion to its present valuation and credit which is at eighteen shillings per ounce, that his salary be paid every half year." Mr. Bowes also had £200 as a settlement fee, which was partly paid by a deed of sixteen acres of land, at £8 per acre. Rev. Nicholas Bowes was ordained as the first minister of Bedford, July 15, 1730, and the church was organized on the same day. Rev. John Hancock, of Lexington (father-

in-law of Mr. Bowes), was moderator of the council. Rev. Mr. Appleton, of Cambridge had a part in the service.

Some time before the church was organized "the Brethren had met and proposed to form themselves into a state of church relation. They had voted that a person on entering the church should give in writing a confession of his faith which should be read in public. There were twenty-four foundation members. The foundation covenant was purely evangelical in spirit and the government was strictly of the Congregational order. The parent towns had equal representation in the new church.

August 4, 1730, Israel Putnam and Nathaniel Merriam were chosen deacons, and on the first Sabbath of September following, the ordinance of the Lord's Supper was first administered. At the first public Thanksgiving service on November 12, 1730, a collection was taken for the use of the church amounting to £6. "Thę good people of Coucord increased the sum and With the Consent of y^e Brethren of y^e C^{ou}, The Deacons purchased 1 Table Cloth; 1 Napkin; 2 Dishes; 1 Flaggon; 2 Pewter Tankards; 1 Bason." "Some time after They purchased another Flaggon & 2 more Pewter Tankards."

The town of Bedford was now fully organized and in complete running order, both as a municipality and an ecclesiastical body, and was early recognized as such by the Province and neighboring churches. December 23, 1733, the deacons were chosen to represent the church at the ordination of Rev. Mr. Ebenezer Hancock, of Lexington, and in October, 1735, at the ordination of Rev. Mr. Clapp, of Woburn. The first recognition from the Province in the way of a tax was in 1730, amounting to £20 13s. 7d. There was also assessed the town's proportion of the representative tax in 1729, which was £7 19s. 9d., the minister's salary, the expenses of the ordination of Rev. Mr. Bowes, the allowance to Joseph Fassett "for time spent at General Court in perfecting our township, together with his pocket expenses while there," and the county tax, making a tax of £188 9s. 6d.

The allowance to Jonathan Bacon for his time spent "in perfecting our township," was £8 8s. 3d., doubtless paid from funds in the treasury. Such a drain on the limited income of the early settlers of Bedford must have been a severe trial of their courage, and especially hard after the town tax of the first year of their existence as a municipality. In 1729 they paid "a Meting-hones Reat of £306 8s. 3d.," and a "town and minister Reat of £51 15s. 4d." There is no evidence that more than two voters lost courage, and they were refused an abatement of their proportion of the tax.

There are but few of the farms of the town that remain in the same family possession as at the incorporation and only two instances where the descent of possession has not occasioned a change in the surname

of the possessor. The estate owned by Josiah Davis has been in the family and name since 1696, when purchased by Samuel Davis (son of Dolor), one of the pioneers of Concord. It has passed through six generations from Samuel, in each of which there has been an Eleazer. Thirty-eight children in five generations of the name of Davis have been born on this estate.

The estate held by the heirs of Cyrus Page was purchased by Nathaniel Page in 1687. The present owners are of the eighth generation. The original dwelling is still standing. Mrs. Sarah Sampson owns and occupies the estate that came into the family possession about 1733, she is of the fourth generation of the family of Zachariah Fitch.

Lands on the Concord side of Bedford are still held by descendants of William Hartwell, who was among the pioneers of Concord, and the homestead was held in the family name and occupied by Hartwells continuously for two hundred years. The present house was erected in 1758.

The homestead of Benjamin Fitch has been held in the family and name since 1730, and the "corn-mill" of King Philip's War, on the Shawshine River, is still identified by modern buildings, but has passed from the family possession. Job B. Lane owns and occupies a portion of the Winthrop Farm that was purchased by Job Lane in 1664 and divided by his heirs in 1697.

"Stone Croft Farm," owned by Miss Caroline M. Fitch, came to the family by purchase in 1766. The dwelling was built about 1700. The mill site, on Vine Brook, near Shawshine River, was occupied by John Wilson as early as 1663.

The site of the first meeting-house is very nearly identified by the second, which is now standing.

CHAPTER LXVII.

BEDFORD—(Continued).

ECCLESIASTICAL.

Relation of First Church and Town—Dismissal of Rev. Nicholas Bowes—First Bell—Ministry of Rev. Nathaniel Sherman and Rev. Joseph Penniman.

THE ecclesiastical and municipal relations of the town are so thoroughly interwoven for the first century of her history that it is difficult to separate them; but as it is our purpose to briefly sketch the town's history, topically rather than in chronological order, we shall aim to treat of the social and political relations separate from spiritual and religious, now that we have combined the two sufficiently to show the steps of organization. By the early Provincial laws every tract of territory, when becoming a town, by the same act became a parish; hence the town of Bedford for little more than a century was the parish. They provided for the support of the Gospel at the

same meeting in which they made provision for building and repairing highways.

In our effort to separate the relations we shall class all that pertained to the house or service of worship as ecclesiastical.

The first three pastorates of the town were cut short for obvious reasons. Rev. Nicholas Bowes, the first pastor, was graduated at Harvard College in 1725, and ordained July 15, 1730, and was dismissed August 22, 1754, after a ministry of twenty-four years. Mr. Bowes came to the new town of Bedford under many flattering circumstances. He married Miss Lucy (Lucie) Hancock, the young and accomplished daughter of Rev. John Hancock, of Lexington. Soon after locating in Bedford, Mr. Bowes built a residence on the land deeded him by the town as a part of his settlement fee. It is now standing, and is a stately mansion, reminding one of the superior dignity attached to the pastoral office of that day. Eight children were born to Rev. Nicholas and Lucy Bowes while in this town. William, the oldest, born December 3, 1734, was baptized four days later by his grandfather, Rev. John Hancock. They all lived to maturity with the exception of Thomas, who died at the age of two years, eleven months. Of the pastoral acts of Mr. Bowes but little is known. The church and town grew and flourished; 161 were admitted to the church, and there were 303 baptisms. The rite was administered to all who owned the covenant and their children. Confessions were publicly made, but not carried to so great an extreme as in many New England churches. Intemperance and theft were frequently confessed. Mr. Bowes, together with nine other ministers in the vicinity of Cambridge, refused to admit Rev. George Whitefield to their pulpits in 1745, because of his denunciation of Harvard College and many New England clergymen. Through some indiscreet acts the pastor's usefulness was brought to a close, and satisfactory confession being made, he was dismissed, and it was voted—"That he be owned and treated as a brother in good standing and charity." He could not have lost his influence in the town, as he was employed to teach the school in the following winter. In 1755 he was chaplain in the Northern Army, at Fort Edward, and died at Brookfield on his return home. But little more is known of his family, save that his daughter Lucy went to live with her maternal grandmother, the widow of Rev. John Hancock, and there made the acquaintance of her grandfather's successor, Rev. Jonas Clark, of Lexington, and became his wife. The estate was sold to John Reed, and still remains in the family. It was near the close of the first pastorate before the town purchased a bell. In April, 1753, "Voted, to buy a bell not exceeding six hundred nor less than five hundred pound weight." They also "voted to build a house of sufficient height to hang the mouth of the bell sixteen feet from the ground." The "Bell-house" was some rods from the

meeting-house. The bell was ready for use at the time of the dismissal of the first minister, and in the treasurer's accounts of that year, Deacon Israel Putnam is charged with an order "for lamb for the council and hemp for the bell-rope, 5 shillings." The meeting-house was the shrine of these early settlers, doubly precious because of their great sacrifice to erect it, and because of the great distance formerly traveled to reach the house of God. On April 5, 1731, they voted "that it should be swept six times a year," and Deacon Israel Putnam performed the service for ten shillings a year. In 1743 the pay was increased to £1 15s., "Old Tenor," and John Mansfield hired to sweep it twelve times a year and "attend to opening and shutting the doors." In 1733 the young men were refused the "hind seat in the gallery," and the pew next to the pulpit stairs was made "a ministerial pew."

The town and church concurred in extending a call to Rev. Nathaniel Sherman, and he was ordained February 18, 1756, "having preached twenty-six Sabbaths, one Fast and one Thanksgiving" during his candidacy. He was given, as a settlement fee, £113 6s. 8d., and an annual salary of £53 6s. 8d., and twenty cords of wood annually, "after he shall come to need it for his own firing."

Mr. Sherman was brother of Roger Sherman, the distinguished patriot of Connecticut, and endowed with both talent and culture. As a young, unmarried man he entered the work of the gospel ministry in this place. He married Lydia Merriam, March 1, 1759. She was the daughter of Deacon Nathaniel Merriam, of this town. They had three children born here, one of whom, Thaddens, died August 22, 1765. Mr. Sherman was a man of feeble health, and labored under difficulties. Notwithstanding the oft-repeated breaks in his labors, his pastorate was regarded as very successful—forty-six were admitted to church and sixty-seven were baptized by him. It was during the ministry of Rev. Mr. Sherman that Hugh Maxwell, of Bedford, consecrated himself to the service of Christ and became the "Christian Patriot," whose biography, published in 1830, is a most inspiring work.

A controversy arose in the churches of New England, about the time of the settlement of Mr. Sherman, concerning the "half-way covenant," by which persons were admitted to the privilege of baptism without admission to the communion. November 6, 1765, the Bedford church voted "that there should be but one church covenant." Faith in Christ, repentance for sin, holiness and a belief in the Assembly's Catechism were required of all candidates.

Some of the changes were unpopular; the affections of the people were alienated from the pastor, and the relations entered upon for life were brought to a close. Upon the request of the pastor an ecclesiastical council was called and gave advice in the matter, in which the town concurred. The record of the

church is: "Upon the request of the Rev. Nathaniel Sherman, the church then dismissed him as a brother of the church and recommended him to the Church of Christ in Mount Carmel, New Haven." He was installed there and preached many years. He died at East Windsor, July 18, 1797, aged seventy-three years.

The dismissal of Rev. Mr. Sherman caused not only the severing of pastoral and social relations, but family ties were sundered, and the town had no settled minister for a period of three years, during which time the church agreed upon the terms of communion as follows: "This church will have but one covenant and therefore require the same qualifications in all; yet if any person can desire to enter into covenant and receive baptism for himself or children, and yet fears to approach the Lord's table at present, he shall be received, he promising (though he come not immediately to the Lord's table) that he will submit to the watch and discipline of the church."

Rev. Joseph Penniman was the third minister of the town, ordained May 22, 1771. He received a settlement fee of £133 and an annual salary of £66 13s. 4d., and fire wood.

In planning for the service of ordination the town voted "that the day should be religiously observed throughout the town in accordance with the solemnity of the occasion;" determined as much as in them lay to prevent "all Levity, Prophaneness, music, Dancing and frolicking and other disorders on ^{the} Day." A committee of five was chosen "to open the meeting-house and to keep the seats below the deacons' seat and town's pew for the church and council." A new pastorate was an occasion for advanced steps: 1773 "Voted to bring in Doct. Watt's versions for the present, and to have Messrs. Jeremiah Fitch and James Wright sett in the fore seat in the front gallery as they are appointed to begin the Psalm or tune." The fluctuation in the currency of the country made it necessary for the town to grant relief to their pastor, and in 1780 the town voted "to grant Rev. Mr. Penniman one hundred bushels of grane, fifty of Rye and fifty of Indian Corn." The people manifested their gratitude for a successful termination of the Revolutionary struggle by repairing their meeting-house. It was then clap-boarded and covered with a coating of "Bedford Yellow," a sort of mineral paint found in the town. The old bell and bell-house were also repaired. Like the people of the town, they had seen hard service during the war.

The bell had sounded the alarm on April 19, 1775; rung for liberty when the Colonies declared their independence; pealed forth its notes of rejoicing over the surrender at Yorktown, and by its cracked tongue and faltering notes, most fittingly suggested the sufferings of the people during the war, in its final attempt to swell the volume of thanksgiving, following the treaty of September 3, 1783. The pastorate of Rev. Mr. Penniman covered the years of struggle for free-

dom from the mother country, and was successful in many respects. Forty-one were added to the church and one hundred and eighty-three baptisms are recorded during his ministry.

Some of the public acts of Mr. Penniman gave evidence of extreme eccentricity, which increased by repetition until the church took the following action July 12, 1793:

"The church met at Deacon James Wright's and held a conference with each other respecting the unchristianlike behaviour of their Pastor, Mr. Joseph Penniman, the last Lord's day, it being communion day, and every member of said church being grieved thereat."

The conference resulted at length in the dismissal of Mr. Penniman October 29, 1793. In the light of the present, it would be declared that strong drink caused the trouble. Rev. Joseph Penniman was born in Braintree, and graduated at Harvard College in 1765; after his dismissal he removed from Bedford to Harvard, where he died. He was possessed of respectable talents. Social customs of his time aggravated natural eccentricities and led to extreme peculiarities of expression, particularly in public prayer. At the funeral service of his townsman, Captain Jonathan Wilson, who was killed at Concord, April 19, 1775, he is said to have uttered the following: "We pray thee, O Lord, to send the British Soldiers where they will do some good, for Thou knowest that we have no use for them about here." When visiting the school of the town he is said to have used the following expression in prayer: "We pray thee, O Lord, that these children may be well trained at home, for if they are not, they will act like Serpents when they are abroad." The act that led the church to close the doors of the meeting-house against the pastor brought the town into public reproach. While the people were seriously considering the circumstances a roughish fellow placarded the doors of the meeting-house with the following brief summary of affairs:

"A wicked priest, a crooked people,
A cracked bell without a steeple."

The bill for entertaining the Council at the dismissal of Mr. Penniman amounted to £33 *Os.* 4*d.* 2*f.* There were born to Rev. Mr. Penniman and Hannah Jackson, his wife, while in Bedford, four children, two of whom died here and were buried in the old cemetery. The epitaphs now seen upon the crumbling headstones are most suggestive of the peculiarities of the father. They are quoted in this connection:

"December 22, 1790, HANNAH, daughter of Rev. Joseph Penniman and Hannah, his wife, aged 18 yrs., 4 mos., 11 days.

"Ah! now, no notice do you give
Where you are and how you live!
What! are you then bound by solemn fate,
To keep the secret of your state?
The alarming voice you will hear,
When Christ, the Judge, shall appear.

Hannah! from the dark lonely vault,
Certainly soon and suddenly you'll come,
When Jesus shall claim the treasure from the tomb."

"August 21, 1778, MULLY, aged 3 yrs., 6 mo., 3 days.

"Ah! dear Polly, must your tender parents mourn,
Their heavy loss, and bathe with tears your urn,
Since now no more to us you must return."

CHAPTER LXVIII.

BEDFORD—(Continued).

ECCLESIASTICAL.

The Clergy of New England—Rev. Samuel Stearns—Page and Hartwell Fund—Will of Anna Page—New Meeting-house—Singing-School—Sabbath-School.

The clergy of New England, in its early years, constituted what may be styled an educated aristocracy and to a large degree circumscribed their order by intermarriage. The common people were so burdened in their struggles with the Indians and with foreign nations, together with their efforts to subdue the wilderness and maintain their families, that but little time was left them for self-culture. Their education was limited and they relied upon the clergy for much of their moral and religious sentiment. The fourth minister was Rev. Samuel Stearns and the last called by the town in its parochial capacity. He was ordained April 27, 1796. Mr. Stearns was a grand type of the New England clergy. He was the son of a minister, and his paternal and maternal ancestry were of the clerical profession. He had inherited a truly pious spirit and was possessed of a firm and decided nature. He was a graduate of Harvard College and studied theology with Rev. Jonathan French, of Andover, whose eldest daughter (Abigail) he married, May 7, 1797, "a lady of rare fortitude, energy, intelligence and practical wisdom, as well as piety." For nearly thirty-seven years Rev. Samuel Stearns was the teacher, leader and undoubted friend of this entire people, and no one person ever did more in this town to mould the character of the rising generation and lead the passing generation "into green pastures and beside the still waters of eternal peace." During this ministry so many reforms were introduced and grand changes made in both secular and religious affairs that they cannot be hastily passed by. In preparing for the ordination of the fourth minister the town voted to take down the cracked and useless bell, "sell the bell-house at public vendue, level the ground on the south side of the meeting-house and prop up the galleries." Interested people flocked from the neighboring towns; families of two or three, mounted on the back of one horse, were seen galloping in from different quarters and the meeting-house was filled long before the hour appointed for the service. The Common was covered with booths in which the venders of food and various

wares carried on a lively business. Rev. Jonathan French, of Andover, preached the sermon. His text was Isaiah xl. 1-5. The new pastor bought the estate occupied by his immediate predecessor in office and settled in the midst of his people. The large mansion-house which he occupied during his life and the surrounding acres are still in the possession of the family. Mr. Stearns received from the town as a "settlement" eight hundred and fifty dollars and an annual salary of three hundred and thirty-three and one-third dollars and twenty cords of fire-wood. Through a depreciation in currency the salary was changed at different times until it reached five hundred dollars per annum. Mr. Stearns also had a loan from the town of one thousand dollars, without interest, from 1801 till his death. The new minister's regard for order and system began to make an impression at once, as the church and town records plainly show. The custom of public confession of certain sins was abandoned and cases of discipline were conducted with the best of judgment. There was one case that kept the church and town in a state of disturbance for years and involved many important questions and resulted in cold-blooded murder. The light of the present has a mitigating effect on the case, for had the present scientific and humane treatment of incipient insanity been in practice the sad act might have been averted. Mr. Stearns was possessed of a fine musical talent, having a rich tenor voice, which contributed to awaken an interest for music in the town, particularly in sacred music. In May, 1798, the town voted "that the four pews in the front gallery are assigned to the use of the singers." A tuning-pipe keyed on A was then in use and held as a valuable piece of the town's property. November 1798, the town appropriated twenty dollars for singing-school. In 1815 the town's viol was placed in the hands of Deacon James Wright, "for the purpose of assisting in taking lead in sacred music." Mr. Stearns never voted in town affairs, but was conducted to the place of meeting by the selectmen and began proceedings with prayer, after which he retired.

September 6, 1812, the town chose a committee "to receive the donations given to the town by the widow Anna Page and Mr. William Page, deceased, and to take care of and apply the use of the same, agreeable to the wills of the donors." By these wills and that of Samuel Hartwell, probated in 1822, "The Page and Hartwell Fund" was created. The following is the preamble and clause relating to the town in the will of Anna Page. The others are similar in expression and provision:

"In the name of God, Amen.

"I, Anna Page, widow and relict of Thomas Page, late of Bedford, in the County of Middlesex and Commonwealth of Massachusetts, Yeoman, deceased. . . . I humbly commit and commend my soul to God my Creator, in and through Jesus Christ my Redeemer, whose righteousness and grace are all my hope for pardon and eternal salvation. My Body I recommend to a christian burial at the discretion of my Executor in the blessed hope of a joyful resurrection at the last day. . . .

"Taking into consideration the vast importance and necessity of supporting the Gospel ministry, it is my will that after my Executor shall have paid all the foregoing legacies—all debts, bills of cost and charge of every kind.—all the remainder of my estate of any kind and wherever found, be appropriated to that use, and accordingly I do hereby give and bequeath said remainder to the town of Bedford as a fund to aid in the support of the Gospel ministry, to be disposed of in the manner following. That is to say: The capital of the fund shall be put and always kept on interest, upon good security—with sufficient securities for the same. One-sixth part of the income arising therefrom shall be annually added to the principal as an increasing fund forever—the other five-sixth parts of the annual income to be appropriated annually in aid of the support of the Gospel ministry in the present standing order or congregational order forever, and no part of said fund shall ever be appropriated in aid or support of any other, than the present standing congregational order forever, and no part of the said fund shall ever be appropriated in aid of any suit at law or any contention whatever, and my will further is, that three persons, all belonging to the church, shall be annually chosen by the town as a committee to take care of the said fund, and that a Book shall be kept by the town clerk, for the time being in which shall be fairly entered this clause in my will and also the capital of the fund and the annual income thereof together with the annual appropriations and expenditures of said income, to be kept open for the perusal of all persons therein concerned forever—but my will further is, that whenever the income of the said fund shall be more than sufficient for the support of the Gospel ministry in Bedford, the remainder of the income of said fund shall be appropriated to support the Poor, Teaching Sacred Music, and the support of Schools or Public buildings, and my will further is, the said sum, whatever it may be found to be, shall be paid by my Executor to the committee to be chosen for the above purpose, in two years after my decease, and a true report of the said fund, with the annual appropriation and expenditure thereof, shall be annually made to the town by the Committee having the care of the same forever, which report shall be recorded by the town clerk in the Book which is kept by him for that purpose forever.

"Dated, signed and sealed, February twenty-third, 1810.

"ANNA PAGE."

The town being residuary legatee received from the estate of Anna Page \$663.93. The Samuel Hartwell legacy was \$300, and that from William Page was \$500. For some years the trustees of these funds were chosen in town-meeting and the record-book was kept by the town clerk, but for the last half-century the First Parish has appointed the custodians and the Unitarian Church received the income. The "Page & Hartwell Fund" (now 1889) amounts to \$2691.78. The church received by the will of Anna Page a solid silver flagon, costing \$140, and by vote of the church a second flagon was procured at the same cost. A silver cup was donated by Mrs. Hannah Merriam. By other donations and purchases the church was now furnished with an elegant solid silver communion service in place of the pewter dishes thus far used. Rev. Samuel Stearns was kindly remembered by this trio of public benefactors. The irregularity of the windows in the meeting-house is suggested by votes like the following: September 3, 1804, voted, "To allow Mr. Jeremiah Fitch to put a window in his pew in the northwest corner of the meeting-house in any part thereof." May 19, 1783, voted, "To allow Timothy Jones the liberty to put in a glass window in the meeting-house on the back side of his pew at his own cost." With the exceptions of such additions the people were contented in the old house of worship, but the great "September gale" of 1815 devastated the noble forests, and hundreds of stately pines lay prostrate. The people seized upon this as

an opportunity for procuring lumber at a reasonable rate, and the town voted to build a new meeting-house. The last service in the old house was in July, 1816, and in the following week the frame was stripped and demolished—such timbers as could be utilized were selected for the new house.

The frame was prepared and put together on the ground and pulled into place a side at a time, by the assembled multitude, who had gathered on the morning of July 8th, and at the appearance of the sun were ready for the order "Bear it up." On the 17th of the same month the people assembled for a service of Thanksgiving on the floor of the new house. When the house was completed, the town chose a committee—

"To appraise the pews by assessing the whole expense of building said house, including extra hills, etc. (levelling the common and hanging the bell-accepted), on the same according to rank and situation of said pews. . . It was further voted 'that no town-meetings nor trainings or choosing militia officers shall ever be held or done in the meeting-house, and no other town business shall be done in said house, except by permission of the selectmen for the time being, and that this vote shall be annexed to the article for the sale of the pews.' 'No person shall hang his hat on any post or on the wall of the house, or on any other machine about the railing of the pews on the lower floor, in the body of said meeting-house, nor on the front of the galleries, nor on the walls in the galleries.'"

The house was dedicated July 8, 1817. Rev. Samuel Stearns, the pastor, preached the sermon, which was, later, published in pamphlet form. This was the first dedication service held in the town, it being contrary to the New England spirit and custom when the first house of worship was completed.

James Wright, Jr., was appointed to the responsible position of "sexton." His duties were carefully defined, not the least of which was "to carry into the house the basin of water for the ordinance of baptism, when requested."

The bell, imported from London by Jeremiah Fitch for the town, was first rung on the morning of July 8, 1817. Mr. Fitch contributed the clock to the town, which is ornamented with a gold-mounted eagle and balls, and still marks off the hours in the meeting-house; but the bell, being rudely handled in a seeming display of patriotism, was rendered useless and sold in 1863, by the First Parish, and has not been replaced. The cost of the meeting-house was \$6623. The pews sold for a sum sufficient to liquidate the debt, and left a balance of \$487, which was assigned for a ministerial fund, by a vote of the town. The "Page Fund" was of use in providing an annual singing-school, and in 1818 Leander Hosmer was employed by the town "To perform sacred music for said town for ten dollars pr. year, on a Bass Viol, and furnish himself with a viol."

In July, 1818, a Sabbath-School was organized, which proved to be one of the first Church-schools in the country, the history of which, prepared by the author of this sketch, was published by the Trinitarian Sabbath-school, in connection with the celebration of its seventieth anniversary in 1888.

CHAPTER LXIX.

BEDFORD—(Continued).

ECCLESIASTICAL.

Separation Between Church and Town—Trinitarian-Congregational Society Organized—Their House of Worship—Work of Unitarian Church and First Parish—Death of Rev. Samuel Stearns—Stearns' Descendants—Church of Christ.

PROSPERITY followed the erection of the meeting-house, and peace and harmony prevailed until the autumn of 1831, when a difference in opinion, which had for years existed between the Trinitarian and Unitarian Congregationalists of New England, reached that point here, where the relation between the pastor and people was most severely tried. The love of the pastor of this town for his people, and their strong attachment for the one who had given the best of his life in their service, the regard of many for his feelings in his declining years, together with the unswerving fidelity of the pastor to the principles that he had proclaimed when ordained for the Gospel ministry in this town thirty-five years before, may be assigned as some of the reasons for the severity with which the storm beat upon the community. The church was rent asunder, and the remainder of the ecclesiastical history of the town, as regards the Protestant faith, will be viewed in two separate channels, viz.: The First Parish with the Unitarian Church and The Trinitarian Congregational Society with the Church of Christ. The First Parish, and church connected with it, held the meeting-house, all of the funds and communion service, while the Trinitarian Congregational Society and associated church began their work with empty hands. June 4, 1833, the two resident male members of the church who remained with the First Parish met and chose as trustees William Page and Charles Spaulding, and adopted a new covenant, and accessions were made to their numbers. After the stated supply of Rev. Mr. Davis and Rev. Robert Walcott, Rev. Joshua Chandler, a graduate of Harvard College, was settled over the church and society. He was succeeded by Rev. George W. Woodward. In May, 1846, he removed to Galena, Illinois, and a series of stated supplies followed—the last of whom was Rev. Jonas Whitman, pastor at Lexington, who continued in charge until his death, in 1848. Services were then discontinued and the house of worship closed, until it was remodeled in 1849.

In April of that year Rev. William Cushing accepted a call to act as stated supply. Mr. Cushing took a great interest in education, conducting a private school in connection with his pastoral work; his successor was Rev. George W. Webster, who was installed as pastor in August, 1860. Extreme peculiarities, tending to mental disease, impaired his usefulness, and after a year and a half, during which the

church and society relaxed in vitality, he left the charge and entered the Union army from this town. The house of worship was closed for a period of twelve years. It was reopened in the autumn of 1869, and Rev. Grindall Reynolds took charge of the parish in connection with his pastorate at Concord. His call to the position of secretary of the Unitarian Association necessitated a change. Revs. Milstead and Russell acted as stated supply until 1884, when Rev. George Piper assumed the pastoral care of the society in connection with that at Carlisle. During his pastorate the meeting-house has been thoroughly remodeled, the church revived, and the ordinances regularly observed. In addition to the income of the "Page and Hartwell Fund" the society is aided by the Unitarian Association.

The Trinitarian Congregational Society immediately erected a house of worship on land given by Mr. Jeremiah Fitch, of Boston, a native of Bedford. The building-lot was directly opposite the Stearns mansion, and was given in consideration of the regard of the donor for his neighbor, teacher, pastor and friend.

The relation between Rev. Mr. Stearns and the town was dissolved by a mutual ecclesiastical council, and he accepted a call from the Church of Christ and Trinitarian Congregational Society of the town, in their united capacity. Services were regularly held in the dwelling-house of Rev. Mr. Stearns until the society completed a meeting-house. Mrs. Hannah Reed presented the church with a suitable communion service. Many of the citizens, who had but fifteen years before, 1818, paid large sums for their pews in the town's meeting-house, had now freely given a titling of their possessions for the erection of another house of worship, and, free from debt, the church and society resumed the work of proclaiming the gospel in the Evangelical faith. Rev. Mr. Stearns died in December, 1834, and the fourth and most notable pastorate was brought to a close.

The body of Rev. Mr. Stearns was interred in the family vault in the old burial-ground, and there remained until the death of his widow, Madam Abigail Stearns, in 1858, when they were both deposited in cemented vaults on the western slope of Shawshine Cemetery.

Of thirteen children born to Rev. Samuel Stearns and Abigail French, eleven reached maturity. No other Bedford family has exerted so great an influence in the world of letters. They all received the highest advantages for education that the schools afforded. The five sons were all educated at Phillips Academy, Andover, and at Harvard College, and the four who became clergymen attended Andover Theological Seminary. Of thirty-one grandchildren twenty-three are living. Almost all have received a liberal education. Of the grandsons, two are professional men and one an artist of rare ability; five granddaughters became teachers, four married professional men; a number are authors of books or writers for leading periodicals. The

descendants in the third and fourth generations are numerous and prominent in the world.

The young man who, in the flush of youth, dedicated himself to the higher interests of the people of Bedford, had become old in their service and been gathered with the fathers. More than five hundred people of the town died and the entire membership of his church had been gathered during his ministry. There were admitted to the church one hundred and forty-three members while worshipping in the new meeting-house, before the separation.

Rev. Jonathan Leavitt succeeded Rev. Mr. Stearns, and has been followed by Rev. S. Hopkins Emery; Rev. Oren Sikes, who died in office December 15, 1852; Rev. Henry J. Patrick, now of West Newton; Rev. W. J. Batt, now moral instructor at the Massachusetts Reformatory; Rev. George Lewis; Rev. Edward Chase; Rev. Otis D. Crawford; Rev. George E. Lovejoy, now of Franklin, Mass.; Rev. Howard A. Hanaford, now of Winchester, N. H., and Rev. Edwin Smith, who took the charge August 1, 1886.

The church has a present membership of one hundred and eighty. That element in our nature which leads us to value things in proportion to their cost was plainly evident in the careful manner with which the people of this town who formed the Trinitarian Congregational Society guarded its interests, and that healthy activity that is generally found among societies that depend entirely upon their own efforts for support has been manifest through the half-century of its existence. No ministerial fund has been established. Small legacies bequeathed to the church have been applied to the promotion of the work and memorials of the donors added to the ornaments of the house of worship. In 1886 the house was repaired, enlarged and refurnished to suit the demands of the times, about \$7000 being expended.

Adherents of the Romish Church have gradually settled in town, constituting a very respectable class in society, among whom may be found some of the most thriving farmers. Becoming weary of a journey of five miles to attend worship (as were the first settlers of the town), they erected a chapel in 1885, which is well furnished and adapted to their use; they maintain religious services in connection with the church at Lexington, Rev. P. J. Kavanaugh being the priest in charge.

CHAPTER LXX.

BEDFORD—(Continued).

SCHOOLS AND LIBRARIES.

ONE of the highest of the municipal functions is education. This was incumbent upon the founders of Bedford by the act of incorporation: "Provided that the said town of Bedford do, within the space of three

years from the publication of this act, erect, build and finish a suitable house of worship, and procure and settle a learned orthodox minister of good conversation, and make provision for his comfortable and honourable support, and likewise provide a school to instruct their youth in writing and reading." Many of the founders of this town knew the worth of education through the want of it. Their parents had enjoyed literary advantages in the mother country, but in seeking religious liberty they had lost secular advantage, and in their struggle to establish homes in the wilderness had often failed to instruct their children in the rudiments of education. The children of the scattered settlers were by far the greater sufferers; situated four or five miles from the village, they could not attend the few weeks of school that were furnished, and doubtless some of the originators of this town never attended a school of any kind. Until 1733 the church was the only school, and during several succeeding years the principal means of education. The minister was the instructor, and he was well supported. In January, 1732-33 the town raised five pounds, equal to about three dollars (according to Shattuck), for public school that year. This must have been an act of the new town to comply with the incorporation act—"space of three years"—and have been a provision for the winter only, as appears from the following record: "Of the School Reat that was made by the assessors in 1733, there was committed to Mr. Jacob Kendall, constable, to collect £5 10s. 7d., and to Mr. Richard Wheeler £5 16s. 2d.," making a tax of £11 6s. 9d., which, according to the same authority, was equal to about seven dollars in the currency of that time. In December, 1733, it was voted "to settle a moving school and hire a master, for which purpose an appropriation of ten pounds was made.

For several years one school only was kept and moved about as justice and convenience demanded. The teachers were generally selected from the people of the town, but in one of the early winters, Rev. Ebenezer Hancock, of Lexington, taught the school and boarded with his sister, wife of Rev. Nicholas Bowes. The town bought a dwelling-house of Benjamin Kidder in 1741, for £12, old tenor, and arranged it for a school-house. In 1742 the school moved into the four quarters of the town, and £10 was expended for the teacher's salary, he "boarding round." In the following year the centre school was opened and £30 granted for its support. Previous to this but little attention was paid to giving instruction in any branch beyond those required by the ordinance of 1647, viz.: writing and reading. In 1744 a part of the appropriation was allowed for schools in the "quarters" to be taught by "school dames." In the succeeding fourteen years a school was kept at the Centre a few weeks in the winter and during the remainder of the year a "moving-school" was taught by a lady. Text-books were few and rule and the rod was applied without stint. One may judge of the monetary value of pro-

fessional services by the records of 1754-55, when Rev. Nicholas Bowes, the first minister of the town, dismissed in August 1754, taught the school in the following winter, five months for £9 6s. 8d., and boarded himself. In 1758 a "writing-school" was kept four months in the village and a "woman's teaching-school" six months in the quarters of the town, although it was years in advance of the legal requirements. The interest in education was not abated during the Revolution, yet in two instances the teachers' services were gratuitous. Intelligent women gathered the children of the neighborhood in their dwellings and were rewarded by a vote of the town after the war ceased.

The people in the "quarters" were obliged to furnish house and fire-wood without public charge in order to have a school. The district bounds were not arbitrary as yet, and the most ambitious children would follow the school from one quarter to another, which was allowed if they furnished a share of the fire-wood. The consequent attainments and usefulness of some families is evident in succeeding years.

In 1780, when Captain John Moore was chosen the first representative to the "Great and General Court," the town voted to have three months "writing-school" and six weeks "women's school" in each quarter of the town. The term "writing-school" was to designate this department of education from the merely fundamental instruction of the "women's school." In the former "cyphering" was taught as well as writing, and also the principles of language and "decent behaviour." The "sums" were "set" by the teacher and the work done on unruled coarse paper and carefully saved as trophies of victory seldom won by the gentler sex. In teaching writing, the instructor was required to prepare the copies, give advice in the formation of letters and also respond to the oft-repeated calls "Please sir, mend my pen?" In March, 1790, there was a partial awakening to the demands of systematic education. The school-tax was assessed as a distinct rate, and the town voted that "such school masters as the law required" should be employed four months in the year, and four months writing-school should be kept at the centre, "and when the master had a very full school he should attend principally to those that write and cypher."

In 1789 the Legislature provided for districting the towns, and Bedford undertook the task, which proved to be a difficult one. For sixty years the only accommodations for schools in the "quarters" were in private houses; but in 1792 a long and trying experience resulted in a vote to raise £100 with which to build a school-house in each quarter and made provision for a school to be taught in each. In 1793 the pride of the residents at the "centre" asserted itself in a vote "not to have any woman's school." The annual appropriation at the close of the century had reached the sum of \$300. The closing years of the eighteenth

century mark a very important epoch in the interests of education in Bedford. Rev. Samuel Stearns came, as the fourth minister to the town. He was an eminent scholar, young and energetic, and possessed of rare qualities for leadership, which he judiciously used. For more than thirty years every progressive step in education bears the impress of his cultured mind and careful hand. The limited advantages for education were not urged upon girls, and when one of the sex manifested a desire to push beyond the fundamental principles she was subject to ridicule. The evil, not confined to this town, received early correction here. In 1797 Rev. Mr. Stearns inaugurated a female seminary, which was one of the very early institutions of the kind in New England. Young ladies from this and neighboring towns were instructed by him in the higher branches, many of whom were fitted for teachers and made most commendable records in the profession. The vote of 1790 "To employ only such masters as the law requires," cut off many ignorant aspirants for the office, but it did not reach the question of methods, and Rev. Mr. Stearns soon began to exert an influence in that direction. Rev. William F. Stearns, D.D., of Amherst College, records the following method for teaching the alphabet in the opening years of the present century, as practiced upon himself: "The master pointed with his pen-knife to the first three letters and said: 'That's A, that's B, that's C; now take your seat and I will call you by and by, and if you can't tell them I will cut your ears right off with this knife.'" This was doubtless an extreme case, but the reform movement of the nineteenth century was well advanced before the youth were exempt from the caprices of teachers. In 1798 the town appropriated twenty dollars for a singing-school.

In 1804 the first system of by-laws for the government of the schools was adopted and put in force. Ignorance of teachers was guarded against. The winter school was regularly opened and closed with prayer. The Bible was read in all of the schools as often as once a day. The Assembly's Shorter Catechism was taught weekly, and every member under the age of fifteen years was obliged to carefully attend to such instruction. It was expected of all male teachers "that they frequently and carefully impress upon the minds of the youth the principles of virtue and piety, as connected with their responsibility and usefulness in life, and also highly essential to the support and well-being of our free Republican form of government, as required by law." For more than thirty years the Assembly's Shorter Catechism was one of the required text-books. Another text-book was Morse's Geography, the first book on the science published in America. In the scarcity of text-books the "School Fathers" required it to be used by the "first class" as a "reader." In 1806 a school-house was built at the centre, in place of the old building that had been remodeled for school purposes seventy-three years

before. The annual appropriation then reached six hundred dollars and sixteen weeks of schooling were provided; only two schools were in session at any one time, and pupils were not confined to district limits. This led at length to a bitter quarrel in the East District. The master lost all authority, and the committee failed to restore order or peace. The several sections were arrayed violently against one another. The east quarter boys were on one side called by their enemies "Shaberkins and Sharks." The boys from the centre and north were united as an opposing force and named, from their locality, "North-quarter hogs and city pigs." No day was without its battle. Many parents sided with their children and things grew worse and worse, until the town took it in hand and voted, April 5, 1813, "To set off the East part of the town as a school district, according to law, and that they draw their proportion of the school money according to the valuation of estates in that section." A town library, chartered by the General Court, was now in a flourishing condition. Each school district had a "prudential committee" to attend to the local interests of the school, and the town annually chose a committee of inspection whose duty it was to regulate the text-books, to provide supplies for poor children and adjust all difficulties. An examination of all teachers was required as to moral and literary qualifications. The by-laws were remodeled in 1819, and "master's schools" were required to be opened and closed with prayer, and the record further says, "which practice also is particularly recommended to the serious consideration of female instructors, who will be permitted to use an approved written form of prayer." It was found difficult to enforce rules and secure uniformity in text-books until 1827, when an agent was appointed to furnish supplies at cost, and was paid for his services, by the towns. This custom prevailed until 1884, when the State passed the law requiring towns to furnish all school supplies and made the schools literally free.

The people were now beginning to receive the benefit of the "Page and Hartwell Fund." A certain proportion of the income was required to be expended for teaching sacred music. A singing-school was inaugurated in 1827, and held annual sessions at the centre for the benefit of the whole town. In 1829 a two-story brick school-house was built at the cost of \$2216.43. This furnished ample accommodation for the schools and for town business. The annual session of the singing-school for the benefit of the whole town was held in the "commodious" building until 1837, when the income for teaching sacred music became a denominational benefit. The apparatus of the school-room was meagre, indeed, until 1841. The open fire-place had given way to a close stove which necessitated the cutting of cord-wood sticks once in two, but this, with the "master's desk" and "battered seats" constituted the entire furnishings. A primitive volume called "The School-Book"

was furnished each town by the State in 1806, in numbers equal to the districts. This town sold the volumes at "vendue." In 1840 the School Committee filed the first school report. In 1841 the sum of one hundred dollars was appropriated for maps and philosophical apparatus. Efforts were made in 1841 and 1850 to establish a High School, but without success. The first printed report of the School Committee was circulated in 1847, and in the following year each district was furnished with "Webster's Dictionary." The annual appropriation for schools reached \$800 in 1847, and \$1000 in 1856. This amount had been annually increased by the income of the "surplus revenue fund." An unsuccessful effort was made about 1850 to establish a free public library, but an association was formed and a library started, by which superior advantages were furnished for a small compensation.

In 1850 the town received an unexpected benefit through the will of Zadock Howe, of Billerica, by which a seminary was founded and endowed for the benefit of this as well as other towns. The public gratitude was manifested by spreading a copy of the will upon the town records, and individual appreciation was manifested by turning to the Howe School for higher instruction.

In 1852 the demand for a high school was gratified, and of \$885, the school appropriation for that year, \$285 was apportioned for the trial of the experiment. It was abandoned after a trial of two years. The school-house in each "quarter" of the town stood as "a ragged beggar sunning" after sixty years of hard service, and in 1854 new houses were built at the east and north, and the west was thoroughly repaired, and a new one was soon erected at the south. In 1856 the brick house at the Centre was torn down and the present building, combining two school-rooms with a town hall, was erected at a cost of \$8524. Mr. Charles Lane, of Boston, presented a valuable clock to the town for its use in the new hall. He was the same person who fell some years later, at his own threshold in Dorchester, by the assassin's bullet.

The dedication of the new building was an event of much importance, as the principal parts in the exercises were taken by sons of the town. Mr. Josiah A. Stearns gave the dedicatory address and Mr. John F. Gleason a poem; among other speakers was Mr. Charles Lane, the donor of the clock.

The efforts put forth in the erection of the new town building had a stimulating effect upon education among all classes of society. The youth were inspired with commendable ambition in school work and their elders sought improvement through the lyceum. The town appropriation now reached \$1000. This was increased to about \$1200 by the income of the surplus revenue, and the State School Fund, which was established in 1834. The town expended the "surplus revenue," and increased the annual appropriations to \$1100 in 1861. The half-day session of Saturday was

discontinued by the vote of the town in 1863. In 1872 an attempt was made to concentrate the directing power and to employ a superintendent, but this unfortunately resulted in an increase of the board of committee from three to six members. The results were not satisfactory, and a return was made to the original number as soon as the State law would admit. Women were first elected as School Committee in 1872, and have proved wise and efficient workers in the department of education.

At the annual meeting of the town, in 1885, it was voted that the schools should be graded, that an English high school course of two years should be adopted, and that the school year should begin with the opening of the fall term. This plan, put in operation September, 1885, had a most stimulating effect upon the students in the several departments, and led the parents to indorse a growing sentiment for consolidation.

In June, 1886, the first graduates were presented with diplomas. The course of study was altered and amended in 1889, so as to include three years of High School study, in which is the Latin language. The appropriation gradually increased until it reached \$2800, for ordinary expenses, to which is added the town's portion of the income of the "State School Fund." An annual appropriation is made for school-books and supplies.

After thirty-three years of service, the combined town hall and school building was declared inadequate to the pressing demands of the evening of the nineteenth century, and preliminary steps have been taken, 1890, towards the erection of a modern structure. In the schools of Bedford, thus briefly described, have been laid the foundations of some grand literary structures.

As the date is comparatively recent when progress has unbolted the doors of colleges to women, the list of those who have received a public education is confined to men.

In 1876 the Bedford Free Public Library Corporation was chartered for the benefit of the inhabitants of the town.

The property of the Bedford Library Association was donated and became the nucleus of a valuable collection of books and other publications. Every resident of the town having reached the age of twelve years has the right to draw books from the library without payment of fee. Appropriations by the town and private contributions have enabled the trustees to make frequent additions until in 1890 there are nearly 3000 volumes for circulation, besides many valuable works for reference, and a collection of antiquities, relics and articles of historic interest. The town has an annually increasing fund for the erection of a library building, much needed at present.

A local weekly paper, *Bedford Bulletin*, is published in connection with other towns, under the editorial care of Abram E. Brown. It is now in its thirty-

third volume. It has an extensive circulation in the town and in various sections of the United States where natives of Bedford are located.

CHAPTER LXXI.

BEDFORD—(Continued).

MILITARY HISTORY.

Indian Troubles—Individual Service—Experience of Mary Lane—Maxwell Family—French Neutrals—French and Indian Wars.

THE war cry was not an unfamiliar sound to the settlers of this territory. They were accustomed to hardships, many of them had done service in the early campaigns, and sacrificed blood and treasure long before the Revolutionary struggle burst upon the Colonies. Of the garrison-houses ordered by the "Honorable Council" in 1675, during the invasion of King Philip, four were within the present limits of Bedford. As the Bedford of to-day represents outlying sections of Billerica and Concord, the homes of these scattered settlers did not suffer from any general invasion in the Indian Wars. Many of the men were away in the service, and the women were compelled to do double duty at home.

It is impossible to make up a complete list of those who served in the early campaigns. Job Lane was "impressed," but doubtless allowed to return and aid in the protection of his own garrison, agreeable to the order of the "Honorable Council" of 1675-76. Sec. 4. "The said towns have their own men returned that are abroad and freed from impressment during their present state." Lieutenant John Wilson, who had a "corne mill" on Vine Brook, did good service "to the Eastward" in 1692-93. Lieutenant John Lane received the following order in August, 1693: "These are in his Majesty's name to require you forthwith to Impress eight Troopers with arms and ammunition for his Majesty's service, four of which are to be daily employed as a scout about your town, especially towards the great swamp."

In 1693 Lieutenant Lane received similar orders from the Lieutenant-Governor, and in 1702 he received the following order from Governor Joseph Dudley:

"CAMBRIDGE, 5 Nov., 1702.

"Sir: I desire you with two of your troops to repayr to the towns of Marlboro', Lancaster, Groton, Chelmsford and Dunstable, and there deliver severally the letters given you and encourage the officers in their duty, agreeable to the several directions, etc."

It is evident that the Governor of the Colony was personally acquainted with Major Lane, he having attained that military title at that time, and knew him to be a trustworthy man. In the Lane papers filed in this town is the following:

"A list of the names of the Troopers which served under my command to the relief of Dunstable. July

the fourth, seventeen hundred and six." Six of the twenty-nine were from Bedford side of ancient Billerica, viz.: Samuel Fitch, Josiah Bacon, Nathaniel Page, Nathaniel Bacon, Benj. Bacon, Josiah Fassett. In the succeeding August, under the same command, Josiah Bacon served as "Trumpetter" and Josiah Fassett with Benjamin Bacon were privates. The following anecdote was related by Leander Hosmer, a descendant of the heroine of the Lane family: "Mary, daughter of Colonel John Lane, was left during a season of alarm in the garrison with but one soldier on guard. Something behind a stump excited the suspicion of Mary, as she looked from a window in the roof. The soldier declined to open fire, and she took the gun and discharged it and saw a dead Indian roll into sight." The Lanes had an inherent love for military life. One writes from York, April 21, 1724: "Lt. John Lane has been so imprudent as to suffer his men to kill sundry creatures belonging to the people of the County of York." He afterwards made satisfaction for the rash act.

By an act of the General Court, November 17, 1724, men were allowed two shillings per day for time in service and £100 for each male scalp in addition to other premiums established by law. This offer of the government was an approved means of defence against the Indians, and aroused Captain John Lovewell, of Dunstable, to raise a company and set out into the wilderness. He made three expeditions, during which several Indians were killed and others were captured alive. The third and memorable expedition of April 15, 1725, proved the most disastrous to the company, nearly one-third being killed, among whom was their leader. In each of the expeditions Bedford men participated, and Josiah Davis was killed, Eleazer Davis wounded, and others experienced the most painful hardship.

From a published sermon of Rev. Thomas Symms, preached at Bradford, on the Sabbath following the return of the unfortunate company, the following account of the suffering of some of the number is taken: "Eleazer Davis, after being out fourteen days, came into Berwick. He was wounded in the abdomen and the ball lodged in his body. He also had his right hand shot off." A tradition says that, arriving at a pond with Lieutenant Farwell, Davis pulled off one of his moccasins, cut it in strings, on which he fastened a hook, caught some fish, fried and ate them. They refreshed him, but were injurious to Farwell, who died soon after. Josiah Davis, another of the four, was wounded with a ball which lodged in his body. After being out fourteen days, in hourly expectation of perishing, he arrived at Saco emaciated and almost dead from the loss of blood. He recovered, but became a cripple." This manner of dealing with the Indians must be severely questioned, and enlisting to pursue the scattered remnant of homeless natives for such a purpose as actuated Lovewell and his followers must be condemned;

but the narrative serves to show the hardships to which the founders of this town were accustomed and by which they acquired the habits of self-reliance so evident in their later history.

The Maxwell family furnished some brave military men during the French and Indian Wars, and also in the struggle for freedom from British oppression. Hugh Maxwell entered the service as a private, served five campaigns and held a commission from Governor Pownall as ensign, dated March 31, 1759. Thompson, brother to Hugh, was with "Rogers' Rangers" at the destruction of St. Francis and all through the French and Indian Wars. He entered the service at the age of sixteen years. Lemuel Shattuck says: "Several of the inhabitants of Bedford sustained commissions."

The descendants of Nathaniel Page, who settled here in 1687, were commissioned officers for several generations: Cornet Nathaniel Page, born in England in 1679, died in Bedford, 1755; his son, John, born in 1704, held commission as cornet from Jonathan Belcher, Colonial Governor in 1737. Ensign Josiah Fassett was at the relief of Fort Williams in May, 1758. Sergeant Page, of Bedford, was with Thompson Maxwell in 1758. Maxwell had a hand-to-hand conflict with two Indians,—he shot one and brought the other "to a halt." He says in his published journal: "Being exhausted, I reached a stream and Page swam across with me on his back with his gun and my own. I could not swim. In 1759 our suffering from cold and hunger cannot be described; thirty-seven of our number died on the banks of the White River in Vermont, where Royalston is now built. Sergt. Page was with us and a very stout man. He helped me or I doubt how it would have fared with me." "Nathaniel Merriam (son of Dea. Nathaniel) died at Lake George in his Majesty's service, Sept. 15, 1758, aged 19 years."

When the "French Neutrals" were taken from their Arcadian homes and portioned out in the Colonies, Bedford had her share to provide for. Joseph Fitch and John Moore filed the following bill: "The Province of the Mass. Bay Indebted to the Town of Bedford—To providing for the French Neutrals ordered to said town the 16 of Feb. A.D., 1760, 'till the 17th of June, 1761, £21 7s." Bedford men were at Crown Point, Ticonderoga and at the decisive engagement on the plains of Abraham, and also on the northern frontiers, where troops were kept to watch the Indians until the treaty of peace was concluded, in 1762, by which Canada became a British possession. It is gratifying to know that their services were appreciated as appears from the following:

Voted on March 2, 1763, "To abate Josiah Davis, his son Paul, lately deceased, and Joseph Wiison, their town and Highway Rate and all other soldiers their Highway Rate." Thirteen received abatements. In 1763 the people of this town entered into the "Thanksgiving" ordered by the King for the restora-

tion of peace, with the same will that they had manifested during the protracted war. They labored under the disadvantage of having no minister to inspire or guide them from 1766 to 1771. The minister was the vanguard in many towns. Concord had her Emerson, and Lexington her Clark, but in the absence of such a leader in Bedford, there was no faltering on the part of the people. Hugh Maxwell, the "Christian Patriot," came to the front with somewhat of the heroism and organizing power which inspired his father to lead his entire family across the ocean to escape oppression. There were other brave men whose names appear in the subsequent years of trial.

CHAPTER LXXII.

BEDFORD—(Continued).

Colonial Troubles—Boston Tea Party—Minute-Men—Concord Fight—Women's Part—Battle of Bunker Hill.

MARCH, 1768, the town voted "To concur with the vote of the town of Boston in October last, to encourage the produce and manufacture of the Province." The women were not behind in expressions of loyalty. They carried on spinning and weaving at an increased rate. A bride from one of the first families of the town is known to have been led to the marriage altar dressed in a "gown" of her own manufacture, the fruit of her own loom. The town sent no representative to the General Court until the Revolutionary struggle was well under way. The "letter of Correspondence" sent out from a Boston town-meeting asking for "a free communication of sentiments," was received and acted upon with a spirit of determination on March 1, 1773. In the following March the town voted "not to use any tea till the duty is taken off." In the "Tea Party," December 16, 1773, Bedford was represented by Thompson Maxwell, although not at that time a resident of the town. His journal reads thus: "In 1773, I went with my team to Boston, which was shut up (blockaded), with a load of provisions for the poor of the town. I had loaded at John Hancock's warehouse and was about to leave town, when Mr. Hancock requested me to drive my team up into his yard, and ordered his servants to take care of it, and requested me to be at Long Wharf at two o'clock P.M., and informed me what was to be done. I went accordingly, joined the band under Captain Hewes. We mounted the ships and made tea in a trice. This done I took my team and went home as an honest man should."¹

¹ Fearing that this narrative and others that will follow, might be regarded as too good to be credited, we have carefully studied the facts and have no doubt of the validity of the journal. John Hancock, the famous patriot and merchant of Boston, inherited the estate of his

When "Boston Port Bill" went into operation, June 1, 1774, the old bell pealed forth the sound of alarm over the hills of this town, and the already crumbling "Bell-House" lost its equilibrium, but not so the people. They met on the last day of June, "To know and determine what measures are Proper to be taken at this present time of Trouble and Distress," etc. They unanimously voted to adopt the covenant of non-intercourse. They chose the Committee of Correspondence, which consisted of Deacon Stephen Davis, John Reed, Joseph Hartwell, John Webber and John Moore.

The town was represented by four delegates at the county convention held at Concord on August 30th and 31st. On October 11th the town was represented by Joseph Ballard and John Reed in the first Provincial Congress, which had met by adjournment from Salem on the 6th. John Hancock was chairman and Benjamin Lincoln clerk. After a session of three days the Congress adjourned to meet at Cambridge, and then continued from October 17th to December 10th.

Devotion to a noble cause prompted the Representatives from this town, as there was no offer of compensation from a depleted treasury, but in March, 1775, the town voted "To allow Doct. Joseph Ballard four shillings per day, for twelve days at Cambridge, and four shillings for expenses at Concord."

January 18, 1775. They at first voted not to send a delegate to the Provincial Congress of February, but on the 27th, in a second meeting, chose John Reed, and, agreeable to a recommendation of the Continental Congress, chose a "Committee of Inspection" consisting of Moses Abbott, Thomas Page, Ebenezer Page, John Reed and Edward Stearns. At the Provincial Congress held at Concord and Cambridge, the plan was adopted for enrolling all the able-bodied men, and the order passed "that these companies should immediately assemble and elect their proper officers; that these officers, when elected, should assemble and elect field officers, and they enlist at least one-quarter of the men enrolled." These were the "minute-men." The people of Bedford gave hearty assent to the appointment of Henry Gardner, of Stow, as treasurer of the Province, and made payment to him rather than to the royal treasurer.

In March, 1775, the town voted "to pay twenty-five 'minute-men' one shilling per week until the first of May next,—they to exercise four hours in a week, and two shillings to be allowed two officers, they to equip themselves according to the advice of

uncle, Thomas Hancock. The warehouse alluded to, was a portion, and had been in the family for many years; here the country farmers had exchanged their produce for other wares, the Maxwells among them, very naturally, as they must have become interested in the family through Ebenezer Hancock, brother of Thomas, who had taught the Bedford school and boarded with the family of Rev. Mr. Bowes, whose wife was his sister. The mutual acquaintance had led John Hancock to confide the secret of destroying the tea to a worthy friend whose warlike spirit was gratified in this daring act.

the Congress." While John Reed was laboring in the interests of the town in the Second Congress, the minute-men were being faithfully drilled and the company of militia as well. The minute-men of Bedford were a fair specimen of those forces, so hastily prepared for war, of whom Lord Percy said: "We never saw anything equal to the intrepidity of the New England minute-men." The officers of the minute-men had no commissions, as did those of the militia already in service; hence their authority came through the suffrage of their associates. The Bedford minute-men organized by choosing Jonathan Wilson as captain and Moses Abbott as lieutenant; Cornet Nathaniel Page was standard-bearer.

The banner illustrated on this page was carried by Cornet Nathaniel Page in the company of minute-men from Bedford to Concord, April 19, 1775. It had, doubtless, been in the Page family in this town for nearly a century before the Revolution. It was returned to the Page mansion after the opening scenes of the war, and there kept until the centennial celebration at Concord, April 19, 1875, when it was carried with the Bedford delegation in the procession of that day. Ten years later, October 19, 1885 (the one hundred and fourth anniversary of the surrender by Cornwallis to Washington), it was presented by Captain Cyrus Page to the town of Bedford.

It was thus brought to the attention of the Massachusetts Historical Society at their meeting in the following January, when Mr. Appleton reported upon it as follows:

"It was originally designed in England, in 1660-70, for the three-county troops of Massachusetts, and became one of the accepted standards of the organized militia of this State, and as such it was used by the Bedford company." Mr. Appleton said that in his opinion "This flag far exceeded in historic value the famed flag of Eutaw and Pulaski's banner, and, in fact,

is the most precious memorial of its kind we have any knowledge of." The three county troops, referred to above, originated thus: In May, 1643, the whole Colony of Massachusetts Bay was divided into four shires—Middlesex, Essex, Suffolk and Norfolk, named from the English counties. In the same year, 1643, a new organization of the militia was determined upon, and the Colony forces were divided into three regiments. Middlesex had one, Suffolk one and Essex was joined with Norfolk in one. The valuable relic now owned by the town of Bedford is, without doubt, the banner carried by the Middlesex Regiment.

"By the rude bridge that arched the flood,
Their flag to April's breeze unfurled,
Here once the embattled farmers stood,
And fired the shot heard round the world."

--EMERSON.

The "Lexington Alarm List," in the archives of the State, gives Bedford credit for twenty-six minute-men, but has no record of the captain, Jonathan Wilson, who was killed on April 19, 1775. This unfortunate omission is, doubtless, to be accounted for by his brief service (the sacrifice of life being made about mid-day) and the few miles of travel, making the demand against the Province too small to receive the attention of the bereaved family.

The same list is authority in regard to the number of men belonging to the Bedford company of militia of the Seventh Regiment, together with their time of service.

According to the sworn statements of the commanding officers of the Bedford companies, there were, from this town, engaged in that part of the opening scene of the Revolution that took place at Concord, seventy-seven men in organized command, besides undrilled citizens who joined the ranks on that morning. If, as a recent writer of Concord fight has recorded, the Provincial forces "numbered possibly three hundred and fifty men" at half-past nine o'clock, more than one-fifth of them were from Bedford. Thompson Maxwell (before mentioned) was with the minute-men of Bedford on April 19th. His journal of that date is as follows: "I again happened in Bedford with my team. I left Boston the 18th, and got to my native town that night, and put up with my brother, Wilson (who married my sister), and was Captain of the minute-men. Next morning early he had orders to march with his company to Concord. He requested me to go with him. I went, well armed, and joined in the fight. My brother, Wilson, was killed. Next day I hired a man to drive my team home." His home was at Milford (then Amherst), N. H. He later adds in his journal, "I never went home until after the Battle of Bunker Hill." It is not certain how early the news of the movement of the Regulars first reached Bedford on the night of April 18, 1775, but it is very probable that the town was warned among the first. Nathan Munroe and Benjamin Tidd, at Captain Parker's re-

quest, went up to Bedford from Lexington, some time in the evening, and, according to the sworn statement of one of them, "notified the inhabitants." The people had but little sleep that night, and were astir long before the break of day.

There is a tradition that Maxwell's familiarity with war led him to be suspicious of certain movements that he saw in Boston, and that he and Wilson were sitting, late at night, discussing the condition of affairs, when the messenger reached the house. The minute-men rallied at the tavern in the village, kept by Jeremiah Fitch, Jr., and there had some hastily-prepared refreshments. The Captain gave the following encouraging command as the company left for Concord: "It is a cold breakfast, boys, but we'll give the British a hot dinner; we'll have every dog of them before night."

It is probable that the militia rallied at the home of their captain, on the Concord road, and were at the scene of action before Captain Wilson's company reached there. On the arrival of the two companies at Concord they assisted in removing stores to places of greater safety. It is said that Cornet Page laid down his flag and went to work, and when returning to look for it "found the boys had got it and were playing soldiers with it."

The Bedford men were on the ridge when they first saw the British, but, with all the Americans, soon turned and made haste to get to the other side of the bridge.

The Bedford companies met with no loss at the bridge, and were all in the pursuit of the retreating enemy. They left the "Great Fields" at Merriam's Corner, and engaged in the attack, then hastened in the pursuit, and were in the thickest of the fight near the "Brooks' Tavern," where Captain Wilson was killed and Job Lane wounded. It is not probable that they continued in pursuit of the retreating enemy, but, with saddened hearts, returned to their homes, bearing their dead and wounded. A British soldier said of them and others: "They fought like bears, and I would as soon storm hell as fight them again." Bedford homes were full of anxiety that day. The women were engaged in preparing food and sending it on to Concord. One good lady said, "All day long the bell was ringing and guns were firing; people were dashing back and forth on horse-back, and saying there had been an awful fight." She had doubtless seen the Reading and Wilmington companies and others as they passed through the town or halted to rest at Fitch's tavern.

Admitting the militia roll, taken twenty-six days after the opening scene of the war, to have been substantially that of a month earlier, it appears that all of the able bodied men of this town, between sixteen and sixty years of age, with the exception of eleven, were on duty in the organized companies at Concord, on April 19, 1775. Had this spontaneous uprising of the people been a mad craze for war they would have

rushed to Lexington; but it was rather the natural act of children hastening to the relief of a mother threatened by a common enemy.

They received no cheer from their minister. When the people were hastening to the scene of conflict, the pastor was comfortably ensconced by his fire-side, where he was found by a neighboring clergyman, who halted while on his way to Concord.

Both companies reported at Cambridge on the following day, and teams were soon on the road with supplies for the army. No Bedford men were at Lexington on the 19th. It fosters a sort of patriotic pride, that one of the daughters, Lucy Bowes, the wife of Rev. Jonas Clark, was the entertainer of Hancock and Adams. In 1776 the entire population of the town, including negroes and mulattoes, was 482. Assuming that to have been the number one year earlier, it appears that one-seventh of the entire population participated in the opening scene of the Revolution. Bedford had credit for seventy-three men, on May 1, 1775, in the regiment under command of Colonel Samuel Gerish.

The following is a letter from one of the selectmen :

"GOLL GREEN.

"SIR,—I have Received a few lines from you, wherein you requested me to take a list of all that are liable to Bare arms, and in compliance to your request I have taken a list of all that are betwixt sixteen and sixty, that are liable to do duty. There is eighty-eight in the list, including officers.

" Bedford, May the 15th, 1775."

January 1, 1777, the number of able-bodied men in town, from sixteen years upwards, was 131, including five negroes. In addition to the other burdens, this town had twenty-nine of the poor of Boston to support, during the siege of that city. A Board of Overseers of the Poor, separate from the selectmen, was first chosen at that time.

The Maxwell brothers were both in camp at Cambridge. Thompson went with the Bedford men to camp on the day following his experience at Concord, and there joined his company under Captain Crosby, from Milford, New Hampshire, in Colonel Reed's regiment. Hugh was senior captain in Colonel Prescott's regiment. Their experience in the Battle of Bunker Hill is told in Thompson's journal, and is to the honor of their native town :

"On the 16th of June 1776, Reed was ordered to Charlestown neck. About twelve o'clock the same day a number of our officers passed us and went on to Bunker Hill. General Ward, with the rest, returned and went to Cambridge. In the evening Colonel Prescott passed with his regiment. My brother Hugh stepped out and asked Colonel Reed and myself if we would come on to the hill that night. We did so; we went to Breed's Hill. We found Colonel Putnam there, with Colonel Prescott's command.

"Colonel Prescott requested my brother Hugh to lay out the ground for the intrenchment. He did so. I set up the stakes after them. Colonel Prescott seemed to have the sole command. Colonel Reed and I returned to our command on the neck about eleven o'clock P.M. At day, in the morning, we again went to the hill, found Putnam and Prescott there. Prescott still appeared to have command; no other regiment was there but Prescott's through the night. Captain Maxwell, after day, suggested, in my hearing, to Colonel Prescott the propriety of running an intrenchment from the northeast angle of the

night's work to a rail-fence leading to Mystic River. Colonel Prescott approved and it was done. I set up the stakes after my brother. About seven o'clock I saw Colonels Prescott and Putnam in conversation; immediately after, Putnam mounted his horse and went full speed towards Cambridge. Colonel Reed ordered his men to their commands; we returned and prepared for action. At eleven o'clock we received orders from Colonel Prescott to move on. We did so.

"We formed by order of Prescott down to the rail-fence and part on the intrenchment. We got hay and wadded between the rails, after doubling the fence by post and rails from another place. We remained there during the battle."

Maxwell also gives a detailed account of the battle, which is substantially the same as given in general history, and we omit it here.

In 1776 the town took action on the question of the Colonies declaring their independence, and voted thus: "That we, the said inhabitants, will solemnly engage, with our lives and fortunes, to support them in the measure."

The town hesitated on the adoption of a Constitution and form of government, but in August, 1779, chose John Reed, Esq., as their representative, "for the sole purpose of forming a new constitution." He served in this convention, which was held in the meeting-house at Cambridge, twenty-one days. In the following May the form of government was submitted to the people and received their approval in a meeting, three times adjourned, by a vote of twenty-five to one.

The Declaration of Independence was first read to the people by the minister from the pulpit of the old meeting-house, and is spread, in bold hand-writing, on the records of the town, "There to remain as a perpetual memorial," signed James Webber, town clerk.

CHAPTER LXXIII.

BEDFORD—(Continued).

MILITARY HISTORY.

Supplies for the Army—Financial Troubles—Vote for Governor under the Constitution in 1780.

In January, 1776, the town furnished six cords of wood and two tons of English hay daily for the army at Cambridge. With each load of hay or wood went packages from the loyal homes to the absent members in camp and the sufferers in the hospitals. Two of the strong young men of the town, who fought at Concord, fell early victims of camp-fever at Cambridge (Reuben Bacon and Solomon Stearns). The town offered a liberal bounty for volunteers in 1776, and at the close of the year voted "that those who had personally done a turn in any of the Campaigns without any hire be paid the amount of an average of those hired." The committee entrusted with the duty of equalizing bounty reported in November, 1777, a bill of £1746 16s. Families of the town cherish with pride the tradition that their grandsires were led by General Washington to Boston, after the

evacuation by General Howe, and aided in the shout of joy when the British flag gave way to the thirteen gorgeous stripes of red and white.

It is impossible to make up a complete register or state the exact number of men furnished by this town during the Revolution, and equally difficult to cast up her entire public expenditures. Bedford's Province tax from 1774 to 1776 increased more than five fold.

The opening of the war made a demand for money, and in May, 1775, the Provincial Congress empowered the treasurer to borrow and give notes of the Province as security. Soon Continental bills were issued by the General Government. These bills were readily exchanged for cash for a while, but the repeated issues of such bills by both State and nation, and no specie to redeem them, together with the darkening days of the war, caused a depreciation in their value. The British officers and those who favored the royal cause lost no opportunity to weaken the confidence of the people in the bills of credit, until it required about seventy-five pounds in paper to procure one in specie. £1 or 20s. was worth in January, 1781, only 3d. 1qr. The purchasing value of any sum during the war after January, 1777, can only be determined by referring to a table of depreciation reported once a month, agreeable to a law of the State for the settling of contracts:

January 1, 1777, \$1 in silver was rated as \$1.05 in currency; January 1, 1778, \$1 in silver was rated as \$3.28 in currency; January 1, 1779, \$1 in silver was rated as \$7.42 in currency; January 1, 1780, \$1 in silver was rated as \$29.34 in currency; January 1, 1781, \$1 in silver was rated as \$75.00 in currency.

In 1777 the town chose a committee at the March meeting to hire the soldiers that might be called for that year and empowered them to borrow money. The amount borrowed with interest was £377 3s. 3d., paid as follows:

	£	s.	d.
For the Continental soldiers' hire	256	10	0
For the bounty to the Rhode Island men	22	10	0
For the bounty to the men to Bennington	48	0	0
For one man to guard the Continental stores	6	0	0
For the thirty day men to join the Continental Army	24	0	0
For allowance for hiring the men	4	11	0
For fire-arms, lead and flints for town stock	35	12	3
	<u>£377</u>	<u>3</u>	<u>3</u>

The above amount was assessed and paid that year. An item appears in the records May 8, 1777, which serves to show the cost of powder: "Then renewed the Town stock of powder from Andover 72 weight at six chellings per pound £21 12s."

The town allowed for bounties, £293. It was divided as follows:

	£
1st Tour. 3 men, 2 months, to Rhode Island, May 1, 1777, no bounty voted.	
2d Tour. 8 men, 3 months, to Bennington, Aug. 21, 1777, each £15	120
3d Tour. 8 men, 30 days, "to take and guard the troops," Sept., 1777 (meaning Burgoyne's surrendered army), each £2	16
4th Tour. 5 men, 3 months, to Boston with Capt. Farmer, each £12	60
5th Tour. 8 men, 3 months, to Cambridge with Capt. Moore, April 1, 1778, £11 each	88

John Reed to Rhode Island, the same rate as those with Capt. Farmer	9
	<u>£293</u>

March 23, 1778, the town reimbursed Moses Abbot for money paid for guns, £18 1s. 3d.; also Joseph Convers for the same, £18 1s. 3d.

July 29, 1778, William Page is charged with the overplus of money in collecting clothing by subscription for the Continental soldiers, £9 15s.

Careful research proves that there was scarcely a campaign during the war in which Bedford was not represented by her own citizens, and supplies of boots, shoes, blankets and clothing were continually furnished by the people, who bravely endured hardships in their homes. The soldiers, who had enlisted for three years, were paid in the depreciated currency, of which it was said, "a hat-full of the stuff would not buy our families a bushel of salt," and many saw but little inducement to re-enlist; and in 1779 the duty of filling the town's quota became a serious matter. The town added to the commissioned officers three citizens to aid them in procuring men. They were Moses Abbott, Timothy Jones and Jonas Gleason. The commissioned officers were Captain John Moore, Lieutenant Eleazer Davis and Lieutenant Christopher Page.

November, 1779, the following bounties were allowed:

1st Tour. 2 men to Rhode Island, £39 each	78
2d Tour. 2 men to Rhode Island, 18 bushels of Indian corn, each @ £2 per bushel	84
3d Tour. 3 men to North River, two of whom have £300 each	600
The other to have 41 s cash and 51 bushels of corn at £2 per bush.	587
4th Tour. 2 men to Boston, to have £22 10s. each	44
5th Tour. 6 men to Chaverick 1 1/2 months, @ £80 per month	640
	<u>£2814</u>
There was added for interest	200
Total for year	<u>£3014</u>

June, 1780, the town voted to hire the men called for to fill up the Continental Army, and that the treasurer borrow money, if needed. In September the committee reported and it was voted to raise and assess £5500 immediately to pay the debt incurred.

	Bushels.
1st Tour. 7 men to North River, 6 months, to have each 120 bushels of corn	840
2d Tour. 8 men to Rhode Island, 3 months, to have each 90 bushels of corn	720
	<u>1560</u>

Oct. 2, 1780, "voted that ye sum of £8175 be immediately assessed and collected to enable the committee to procure the Beef required from this town for the army" £8175

By the resolve of December 2, 1780, Bedford was called upon to furnish eight men for three years or the war. The case now became doubly serious. The records show that previous calls for men had been met by citizens of the town, very generally; but the sight of their illy-paid neighbors returning from three years of service, and the knowledge that hostile fleets were in our ports, and hostile armies were upon our soil,

tended to dampen the most ardent patriotism. One man, Joseph Davidson, was hired by the town for \$200 in hard money. Then the town was divided into seven classes to secure the full quota.

The report of the chairman of each class, as filed in the State archives, is as follows :

"Class I. Capt. John Moore, chairman; provided a negro called Cambridge Moore (servant of the above), and agreed to give him, as a bounty, Twenty head of cattle, three years old, in case he continued in the service three years.

"Class II. Lieut. Moses Abbott, chairman, hired a negro called Cesar Prescott for the same number of cattle as the first class paid.

"Class III. Thaddeus Dean, chairman; hired one Henry Kueelon, at the same rate.

"Class IV. Capt. Christopher Page, chairman; this class, by reason of disappointment, have not provided a man, but are still in pursuit to provide one."

"Class V. John Reed, Esq., chairman; hired one James Ingles and gave him as a bounty fifteen head of cattle, three years old, and nine hundred and ninety pound in paper money.

"Class VI. Mr. William Page, chairman; hired one John Williams, and gave him, as a bounty, the exchange for two hundred and fifty hard dollars in cash.

"Class VII. Dea. Stephen Davis, chairman; hired one Joseph Ross and gave him, as a bounty, the exchange for two hundred and twenty hard dollars.

" WILLIAM MERRIAM, CHRISTOPHER PAGE,
" WILLIAM PAGE, SAMUEL LANE, JR.,
" Selectmen of Bedford."

While the several committees were at work procuring men, the town voted in January, 1781,

"To choose a committee to procure the portion of beef for the army, and directed the assessors to assess such sums as were necessary to answer the demands of the General Court or their committee then, or in the future.

"Agreeable to a Resolve of the General Court of ye 16 of June, 1781 hired one man to go to Rhode Island, he was a citizen of the town, Samuel Hartwell Blood, gave him a bounty of 419 10s

"June 30, 1781. The town sent seven men to join General Washington's army at West Point. They received 419 16s, each as a bounty 135 12

1781-2

"July 2, 1781. Town voted to raise 2100 hard money, to buy beef, and on the 16th of the same month voted to raise 345 hard money, to pay the above-named soldiers what they shall need before marching, and directed the assessors to make an assessment for the balance."

It is plainly seen that town-meetings and assessments occupied the time and minds of the people. In addition to the demands for the war there were the ordinary expenses. It required £3000 of the depleted currency to meet the ordinary charges in the year 1780.

The financial condition of the town became alarming, when in Sept., 1781, "Voted, to borrow £40 to pay interest on town notes." The town also held notes against individuals, received by constables in discharge of the oft-repeated rates.

Jan. 22, 1782, "Voted, that ye treasurer receive money of ye delinquent constables agreeable to the depreciation scale, only excepting such sums of money as they may have collected before this time and it remaining on hand." The same course was pursued in discharging the town's debts. The selectmen were directed to assist the treasurer in casting the notes and the interest. At the same time "Voted, to raise £225 for paying notes." Constables were authorized

to discount the rates of individuals from notes held against the town, when they could no longer respond to the calls with cash. While in the midst of the financial difficulty the people manifested their integrity in dealing justly with individuals who had entered the service in the early years of the war without regard for remuneration: "Voted, John Lane, Jr., fourteen pounds in specie, for his services in the army in 1776, and Oliver Reed and Elijah Bacon the same sums for hiring men in 1777, as those had who did personal service in that campaign, \$25 each." In January, 1779, the town voted "to abate half of Job Lane's war rates in consideration of his wounds received at Concord fight." In the following year voted "to abate his poll rates for every year since the war began." In 1783 voted "to abate Ebenezer Fitch's rates for being in the service in 1775." He was a "minute-man" at Concord, April 19, 1775, and at Cambridge ten days. March, 1782, the town was divided into three classes to hire three men to serve for three years or during the war.

That this obligation was readily discharged appears from the following: Springfield, July 3, 1782. "Reed, of Mr. Moses Abbott forty-five pound as a bounty to serve three years in the Continental Army for the town of Bedford. William Grant."

Boston, May 11, 1782. Receipt from Cesar Jones for bounty of sixty pounds for similar service.

Boston, May 13, 1782. Receipt from Zephaniah Williams for same amount as paid to Jones.

It is noticeable that three negroes, relics of the days of slavery in this town, not registered as liable to do military duty, were in the army during the greater part of the war—Cambridge Moore, Cesar Prescott and Cesar Jones.

Oct. 26, 1782. Town authorized their treasurer to take up a number of grain notes and substitute notes for hard money, allowing six shillings for each bushel specified and interest for said amount from the time the grain became due.

In justice to the Revolutionary fathers of this town it is recorded that not the slightest evidence can be found of inclination to repudiate the least obligation, either legal or moral.

From the evidence at hand it appears that the men of this town suffered the greatest hardship at the battle of White Plains, New York. Moses Fitch was wounded in the shoulder, and was being aided off the field when his comrade, Sergeant Timothy Page, was killed.

Thomas Cleverly, another Bedford man, escaped, but lost everything excepting what clothing he had on.

In December following this battle, Congress vested Washington with full power to raise an army and gather provisions and to take whatever he might want for the use of the army, if the owners refused to sell. He also had power to arrest and confine persons who refused to take the Continental currency. This was

the condition of affairs when Moses Fitch was able to leave the hospital; he returned to his home disabled for life, having received for his services a portion of the currency that had but little purchasing value. He was pensioned for life.

With a population ranging from 470 to 482 engaged in agricultural pursuits, it is wonderful that the town could meet the frequent demands for men and money. Besides the regular calls there were continual demands for delicacies for the sufferers in the hospitals and comforts that could not be furnished by the regular channels of supply. To these the straitened inhabitants were continually responding. The women were busy spinning and weaving. In 1776 the town furnished twelve blankets for the army by order of the General Court of January 4, 1776. Shirts, stockings, shoes and other articles of dress for the soldiers, in addition to the quantities of beef, were supplied by the people of Bedford. The treasurer's accounts show the cost of a blanket to have been £90, but according to the scale of depreciation, \$2½ in silver would have satisfied the busy housewife. In 1780 "Esq. John Reed" was allowed \$25 per day for services and expenses, twenty-one days, in forming the Constitution, but he actually realized less than one dollar per day, as one Spanish milled dollar was equal to forty-two of the old emission on April 1st, and before the close of that year was equal to seventy-four.

The \$1.00 bill, about two inches square, had on its face the Latin words "Depressa resurgit," which is, in our tongue, "The down-trodden rises."

Under the new Constitution of 1780 the vote in this town for Governor, taken on September 4th, gave the successful candidate, John Hancock, twenty-five ballots against two for James Bowdoin. "Esq. John Reed" was sent to the General Court in 1783 and granted five shillings per day for his services while he attended the court. The town chose a committee to give him instructions in relation to the return of absentees and conspirators.

To be eligible to the office of representative at this time, one must be an inhabitant of the town and be seized of a freehold of the value of £100 in the town or any estate to the value of £200. The representative was chosen in the month of May, ten days at least before the last Wednesday. The members of the Executive Department were chosen on the first Monday of April, and inducted into office on the last Wednesday of May following.

CHAPTER LXXIV.

BEDFORD—(Continued).

MILITARY HISTORY.

Shays' Rebellion and Subsequent Troubles—Civil War—Bedford's Honored Dead.

BEDFORD was reluctant in voting to adopt the Constitution, but having done it, she was true to its

provisions. In the County Convention at Concord, August 23, 1786, "to consult on matters of public grievance, under which the people labor," John Merriam and Timothy Jones represented the town. They were active in all measures adopted to quiet the minds of the people who attempted to oppose the government. Captain Christopher Page headed a large company of militia in Shays' Rebellion, and in the following year the town voted "to pay each man who went to Concord and Stow to join General Lincoln six shillings per day."

Foreign troubles and the war with the Western Indians were occasions for calls for soldiers by the General Government, and the town voted on August 28, 1794, "to give each soldier that shall voluntarily enlist the sum of eighteen shillings as a bounty, and to make them up \$8.00 per month, including the state pay, in case they are called upon to march, and for the time they are in actual service." The soldiers that enlisted were Moses Abbott, Jr., John Reed, Jr., Eleazer Davis, Jr., John Merriam, Jr., Job Webber, Asa Webber, William J. Lawrence and William Kemp.

In 1798 troubles with the French aroused the people in this town as elsewhere. Many leading citizens adopted and wore the constitutional badge of attachment to the Government. The town voted on November 5th "that the Selectman be directed to show out to the officers from the town stock as much powder and ball and as many flints as the law requires for each soldier of said company on their inspection days, and also that the selectmen be directed to furnish each soldier on muster days with sixteen cartridges out of said town stock." The alarm of war with Great Britain in 1807 was an occasion for action, and the town voted "to make up to the soldiers that may voluntarily turn out in defence of our country, \$14.00 per month as wages, if called into active service, and to give the men, ordered to be discharged from Captain Lane's Company, if they should voluntarily turn out, \$3.00 per man, as an encouragement to the same, whether they march or not."

December 27th the town "granted to Captain Lane's soldiers who should enlist in the defence of our country for the term of six months \$13 per month as wages during the time they are in actual service."

The 1812 or Madison's war, was a time of anxiety and increased military duty. The order came for the Bedford company to march at once for the defence of Boston; a night was passed in the preparation, women cooked, while men and boys made cartridges. It was on a beautiful Sabbath morning of September that the fife and drum summoned the militia together at the old meeting-house, Captain David Reed in command. With saddened hearts the entire people assembled for a brief religious service. After words of exhortation and earnest prayer from the patriotic pastor, came the partings and the march.

The last person who lingered outside the meeting

house, and watched with tearful eyes the departing troops, was the venerable deacon, who, still suffering from the wounds received in the Revolution, felt most keenly the parting from his son. It required but a few days to prove that the call had been a mistaken one, and the company were gladly received to their homes.

In 1815 the Commonwealth reimbursed the town "for rations furnished the militia when called to Boston."

Bedford saw but little of military life for nearly a half-century after General Jackson's victory at New Orleans.

The militia observed the spring "training," when officers were elected and the fall preparations for muster.

The full company of the town was in attendance at the reception tendered Marquis de Lafayette, in 1825, when the corner-stone of Bunker Hill monument was laid. For some years the military duties were but little more than a dull routine, unless enlivened by a sham fight, ending in a representation of the surrender by Lord Cornwallis to Washington. The town had no organized company after 1833. The sentiment of the town was with the Government in regard to the Mexican trouble. In March, 1847, resolutions were adopted and placed upon the records of the town. They begin as follows:

"Resolved,—That we approve of the course our government has pursued in prosecuting the war with Mexico for the attainment of negotiations for an honorable peace."

The years that followed the Mexican trouble furnished important subjects for debate, and the citizens of this town organized a lyceum, where perfect freedom of speech was enjoyed. The Fugitive Slave Law, the Kansas and Nebraska Bill and many kindred themes were earnestly discussed. The people heartily indorsed the acts of Charles Sumner, Henry Wilson and other unflinching defenders of the cause of freedom. The brutal attack of Preston Brooks upon Charles Sumner in the Senate Chamber, at Washington, was felt by the citizens of this town as a personal insult. A legal meeting of the voters was immediately called and resolutions adopted and placed upon the records.

The people carried out their bold sentiments in their public and private acts. The advocate of freedom for the slave always secured a hearing, and the homes of leading citizens were open to those who, early or later, espoused the cause of the bondmen. In the fall of 1860, when the two political parties, "Democrat" and "Republican," were sub-divided into four, this town gave her support to the Republican, and gave a large per cent. of her votes for Abraham Lincoln.

In the months that followed, during which the "Southern Confederacy" was formed, there was a feeling of deep interest in this small town bordering upon excitement.

The attack upon Fort Sumter, April 12, 1861, opened the War of the Rebellion and aroused a generation that had never felt the devastations of war or learned the evolution of troops. The young men of Bedford, true to their ancestral record, began to enlist, and eleven had entered the Union Army before the close of the year. Among them was Cyrus Page, then sixty years of age, and still bearing the honorary title of captain, conferred upon him by the old militia company of the town.

But fifteen days after the outrage upon Sumter, a "Liberty Pole" was erected upon the "Common" or "Training-Field." Oliver W. Lane, a descendant of the Laues of Indian and Revolutionary fame, contributed the most towering pine of his forest; every artisan and workman joined in the rally on April 27th, and raised the pole, from which the flag of the Union was unfurled and waved daily during the years of bloody conflict, now raising the spirits of the people as it waved from its highest point, and anon hushing them to silence, as, from half-mast, it betokened a nation's sorrow.

On June 27th, 1861, two months after the unfurling of the flag, and directly beneath its folds, occurred the first loss of life in Bedford, indirectly caused by the war. The alarm had led to a very general practice of firearms, and a young man injudiciously discharged his pistol across the Common and killed a bright boy of nine years, Samuel T. Hughes. The first recorded action on the part of the town was a vote instructing the selectmen to draw from the treasury, according to their discretion, for the support of the families of volunteers and a tender of the free use of the town hall "to the Ladies' Soldiers' Aid Society to hold their meetings to render aid to the sick and wounded soldiers of our army."

This society did most valuable service through the war, continually contributing through the various Christian and Sanitary Commissions. Some of the women gave personal service as nurses in the camp. In August, 1862, a bounty of \$100 was voted to each volunteer for nine months' service. In 1864 the town raised \$624 to fill her quota. The sums raised by a vote of the town indicate but a fractional part of the money expended by her citizens in the cause. Not less than \$5000 were contributed to the war by the town in addition to the long-continued drain by taxation. Besides the direct tax, there was the indirect or "Internal Revenue," which demanded, and vigilant officers collected rates upon almost every transaction. After the war closed, the Ladies' Aid Society turned its attention to procuring funds for the erection of a monument to the memory of those who had died in the struggle.

About \$1600 were earned and contributed for that purpose with which a suitable Scotch granite monument has been erected in Shawshine Cemetery. The inscriptions are as follows:

"Soldiers' Memorial, 1861-65. They gave their lives for us and their

country. The Ladies of Bedford pay this affectionate Tribute to their memory.

"Albert L. Butler, died 1862; Charles W. Goodwin, died 1862; Clark C. Cutler, died 1862; Henry Hosmer, died 1862; Thomas Isaac, died 1863; James Munroe, died 1863; Samuel W. Stearns, died 1863; Joshua Atwood, died 1864; John Byron, died 1864; Charles Coudry, died 1864; William F. Gragg, died 1864; Warren G. Holbrook, died 1864; Charles W. Lunt, died 1864; Charles A. Saunders, died 1864.

Memorial day is sacredly observed on each annual return, and the rapidly increasing list of graves of those who served their country in the war receives the attention of a grateful people.

At the memorial service of 1887, immediately following the death of Captain Cyrus Page, the following hymn was sung. It was composed for the occasion by Abram E. Brown, and "dedicated to the Memory of Captain Cyrus Page and other Brave men who honored Bedford in the war of the Rebellion:"

"All honor to our soldiers brave,
Who left their home and kindred dear,
Who nobly fought this land to save,
Of the oppressors' rod to clear.

"Their mounds we'll deck with flowerets bright;
Their noble deeds to children tell;
Through passing years and ages' flight
A country's pride their praise shall swell.

"The earthly file is narrowing fast,
The ranks of Heaven are gaining there.
Let's halt, and down our garlands cast,
While for the living raise a prayer.

"In Thee, O God, we're trusting still,
Our fathers' God, Thou too hast been,
With joy we'll own Thy sovereign will,
And following Thee, life's battle win."

There were enrolled as liable to do military duty in 1861, eighty names, and in 1862 the enrollment list reached eighty-seven.

In the army roll ninety names are registered to the credit of Bedford. Seventy-four of them were citizens of the town. Six were in the service of the navy.

CHAPTER LXXV.

BEDFORD—(Continued).

Financial Troubles—Old Tenor and Lawful Money—Slavery in Bedford—Bill of Sale of a Negro Boy in 1756.

BEDFORD was incorporated at the time when the currency of the Province was in a very uncertain condition. The General Court had been issuing paper money without an adequate provision to retain its nominal value; hence specie was growing scarce and the "Bills of Credit" were continually depreciating; but as these bills were almost the only medium of exchange, the people clamored for more and the majority of the Legislature seemed ready to gratify them despite the opposition of the Royal Governor, which, in 1740, occasioned a severe quarrel. Each new issue of "Bills of Credit" caused a decline in the value of the currency. In 1730 they had sunk more than

half below their nominal value and the depreciation continued until 1750. The fluctuation in the value of this currency was a source of general embarrassment, and contracts involving annual salaries were fulfilled with difficulty by the most scrupulous.

In agreeing with Rev. Nicholas Bowes, the first minister, the town voted "that our money shall be in proportion as it is now in value, rising, falling." The value at that time was eighteen shillings per ounce. The decline was so great that in 1749, the last year of the "Old Tenor" bills, the town voted to give Rev. Mr. Bowes £240 in place of £100, but he returned £20 for the use of the schools. In 1750 voted to give him "£50 13s. 4d. Lawful money."

The expectation of having the "Bills" exchanged for specie led many to hoard them, and it became difficult for the collector of taxes to get the dues of the Province, and the time for settling demands was necessarily extended. The following rhyme gives an idea of the change that was anticipated:

"And now Old Tenor, fare you well,
No more such tattered rags we'll tell,
New dollars pass and are made free;
It is a year of jubilee.
Let us therefore good husbands be,
And good old times we soon shall see."

The town paid for their minister's wood in 1749 35s. per cord "Old Tenor," and in the following year the price paid per cord was 4s. "Lawful money."

In 1749 the people worked out their highway "Rates," and were allowed during three summer months 14s. each man per day, and in the other months 8s. per day; a yoke of oxen with cart 8s. per day, "Old Tenor." In 1750 the allowance in "Lawful money" for a man was 2s. per day until the last of September, and in the rest of the year 1s. per day. For oxen and cart the allowance was 1s. 4d. per day. The scarcity of money was felt by the people possessed of property as well as others, and trade was carried on largely by barter. In the list of tax-payers reported in arrears in March, 1753, the names of leading citizens are found. By a law of the General Court the bills of credit were redeemed at a rate that was about one-fifth less than their lowest current value—that is at fifty shillings for an ounce of silver, which was valued at 6s. 8d., or an English crown.

Here originated the "Old Tenor" reckoning. March 31, 1750, marked the era of "Lawful money," after which date all debts were contracted on the specie basis of 6s. 8d. per ounce of silver and three ounces of silver were equal to £1.

With the currency restored to a metallic basis and to a uniform value the people were free from all such trouble for more than twenty years. The fluctuating state of the currency, dwelt upon at length in the military section, made it difficult to adjust the ministerial rates in the years of the Revolution as it was in the pastorate of Rev. Mr. Bowes. In May, 1778, the town added to Rev. Mr. Penniman's salary, for the

year ensuing, £66 13s. 4d. and reimbursed him for bad money paid to him by the collector, principal and interest amounting to £9 10s. In 1780, "on account of the decline in currency, the town gave him fifty bushels of Rye and fifty bushels of Indian Corn, to be delivered in January, 1781." In 1791 the selectmen were authorized to sell the Continental money at their discretion and the treasury was relieved of its burdensome paper for a nominal sum. £1032 9s. 6d. "old tenor" sold for £2 3d. 2f. A similar difficulty was encountered in the pastorate of Rev. Samuel Stearns. The town gave him a choice at first of \$333.33½ as an annual salary or the same amount in beef, pork, rye and Indian corn, but past experience led some of the people to object to an indefinite salary and Mr. Stearns accepted of the definite sum; his letter of acceptance was accompanied with the following: "Resting assured that the town will not willingly see me suffer by reason of the depreciation of the currency hereafter." Through the depreciation that soon followed, Mr. Stearns was obliged to sell land and went in debt for about five hundred dollars before he appealed to the town.

November 16, 1801, the town voted to lend him one thousand dollars, without interest, so long as he should supply the desk. In 1808 the town voted "to add the sum of three hundred dollars to his salary in semi-annual payments of fifty dollars each." They also added two cords of wood to his annual portion. This was both just and generous, and occasioned by the change in cost of supplies and the increase of the pastor's family. A fragmentary journal kept by Rev. Samuel Stearns in the first year of his ministry in Bedford shows one hundred and twenty-eight donations of family supplies during eight months. This shows how the minister was able to bring up and educate his large family.

Slavery existed in Bedford, as elsewhere, though not attended with the evils that accompanied the inhuman system in many parts of the country. The atmosphere of New England, especially of Massachusetts, was not favorable to its growth. Long before the spirit of liberty manifested itself in resistance to the mother country, and long before the adoption of the Constitution of 1780, individuals of Bedford had freed their slaves, who in the main were held as family servants, but were regarded as property, and in some families bought and sold like cattle. The extreme caution taken by towns in general, and this in particular, to prevent the settlement of paupers, obliged a person who desired to free his slaves, to give bonds that the freed persons should not become public charges. This requirement, no doubt, deterred some from giving freedom to their slaves, who were fully conscious of the injustice. "March y^e 23, 1761, Col. John Lane gave a bond to Stephen Davis, Town Treasurer, to save and indemnify the town of Bedford from any charge that may arise by reason of his negro man being set free." Colonel Lane was assessed in that year

for his "negro man's minister's rate, 2^s 6^d." A citizen of Bedford has the original, of which the following is a copy:

"To Mr. Harrison gray, treasurer for the province of the Massachusetts bay, sir, be pleased to give Mr. Moses Abbott, the bearer hereof, all the wages that is due to me for my negroman, torrey mora, being in the county service in the year 1757, under capt's peaser till he got to the cascel, and then went to Crown point under Capt. ellngleb, or give me an order to Mr. Moses abbott, coostebel of bedford, and this receipt shall be your discharge, and you will oblige your bumble servant,

"JOHN LANE."

It is evident that slaves had been kept in the Lane family, as well as in others, from their earliest settlement in this territory, and that Torrey was a family name for the colored race in their possession, as appears from the following copy of the original:

"This may certify to all persons that I, Mary Lynden, of Boston, do sell all my right in a boy called Torrey, to John Lane, given to me according to a county court record 1676.

MARY LYNDEN."

The following is copied from the original bill now filed in the town:

"Nathaniel Tay sold his negro to Mr. John Page for twenty pound in money and six pound in bill.

NATHANIEL TAY, 1691."

In 1764, Captain James Lane gave a bond freeing his slave. The records furnish other instances of slaves being set free by the voluntary action of the citizens of this town. Although treated as property, the colored people were permitted to enjoy many privileges with their masters. They had seats assigned them in the meeting-house. The rite of baptism was administered, and they were admitted to full membership in the church, upon "owning the covenant." The church records furnish proof like the following:

"Baptized, Ishmael, a negro (adult), July ye 4th, 1736." "Baptized, Quimbo, a negro man who confessed, etc., July ye 30, 1751." "Baptized, Torrey, a negro man, January ye 12, 1751-'52." "Baptized, Abraham, son of Jack, negro, Nov. ye 11, 1753." "Admitted into full communion, Hannab Drury, wife of Zehedee Drury and Lois Burdo (a negro), Sept. ye 5th, 1742."

The register of deaths kept by Rev. Mr. Bowes has entries as follows, which suggest ownership:

"Nov. ye 2, 1737, Cuff, a negro child belonging to Mr. Zacheus Whitney." "Aug. 3, 1749, Domiro, a negro boy, who belonged to Mr. John Lane."

There is evidence that slaves were retained by some families until 1780, when the Constitution adopted by the State declared in Article I, "All men are born free and equal, and have certain natural, essential and inalienable rights," etc. When the articles of the Constitution were acted upon by the town, there were three opposing votes to Article I, and the military records show that three slaves were serving in the army, while by the treasurer's returns of those years it is seen that Captain Moore collected bounty and pay for services of Cambridge (a negro man). Other similar records are found.

There is no evidence that any of the slaves of this town were permitted to accompany their masters to Concord on April 19, 1775, or that they were then enrolled as liable to do military duty; but when it be-

came apparent that war had really begun, and calls for men followed each other in rapid succession, the slaves were pressed into the service. Cambridge Moore, Caesar Prescott and Caesar Jones were early recorded as doing military duty, to the credit of their masters. When one campaign or tour was over, they were put into another, and so continued in the service until 1780. In December of that year they entered the army as free men, and received bounty and pay like their white neighbors. May 11, 1782, Caesar Jones signed, by "his X mark," a receipt for "sixty pound, E. money, as a bounty, to serve in the Continental Army for the term of three years." "A free negro," is the note appended. The following document is treasured in the town :

" Know all men by these Presents—That I, Joseph Fitch, of Bedford, in the County of Middlesex, in the Province of the Massachusetts bay in New England, Gentleman, for and in consideration of the Sum of Twenty-Four Pounds, Lawful money of New England, to me in hand Paid at and before the Sealing & Delivery of these Presents, by Joseph Hartwell, of Bedford abovesaid, Yeoman, the Receipt whereof I Do hereby acknowledge, Have bargained & Sold & by these Presents Do Bargain & Sell unto the Said Joseph Hartwell, a Negro boy about Five years old, called Jefferree, now living at the said Joseph Hartwells, to have & to hold the Said Negro boy by these presents Bargained the Sold unto the said Joseph Hartwell, his Executors & Administrators & assigns for Ever, & I, the said Joseph Fitch, for my Self, my Executors and Administrator's do warrant the above^d Negro boy unto the Said Joseph Hartwell, his Executors, Administrators & Assigns, against me, and said Joseph Fitch my Executors, Administrators & Assigns, & against all & every other Person and Persons What so ever, Shall and Will warrant & Defend by these Presents of which Negro boy, I, the said Joseph Fitch, have put the S^d Joseph Hartwell in full Possession by Delivering S^d Negro at the Sealing hereof unto the S^d Joseph Hartwell. In Witness Whereof I have hereunto set my Hand & Seal this Sixth Day of July, Anno Domini, One thousand Seven Hundred & Fifty Six, & in the twenty-Ninth year of his majesties Reign, &c. "

" Signed, Sealed and Delivered in Presence of
 " HUMPHREY PIERCE,
 her
 " SARAH X PIERCE,
 mark

" JOSEPH FITCH. "

It is doubtful if slaves set at liberty in advanced age, entirely inexperienced in caring for themselves, were benefited thereby. The records show that several of them became dependent upon public charity. They were treated with as much consideration by those in charge of the poor as were their white companions in misfortune. In 1820 "The Selectmen sold at vendue the wearing apparel of Dinah, a woman of color, deceased, amounting to \$7.84; also bought a Baise gown for the use of Violet, a colored pauper, for \$1.60, leaving a balance of \$6.24." Violet was the last freed slave who died in this town. She was supposed to have lived a full century, and died in 1842. John Moore, a prominent citizen of the town, had slaves of both sexes, and Violet is thought to have been the one for whom he made provision in his will in the year 1807, thus: "to daughters Mary Fitch and Lydia Bowers, the net of my personal estate, on condition that they support my negro girl in sickness and health, through life, and give her a decent burial." Violet's unusually long life may ac-

count for the violation of the provision made by her master.

The only memorial-stone bearing evidence that this race lived, served and died in Bedford was erected in Shawshine Cemetery by Josiah A. Stearns, A.M., in memory of Peter, an honored family servant, who was buried in the "African reservation" in the old burial ground.

CHAPTER LXXVI.

BEDFORD—(Continued).

Public Charity, How Dispensed—Taken Farm for Poor.

GREAT caution was used to prevent people from becoming paupers in the early days; but when public support was demanded, and a settlement established, the poor were well treated. When a citizen admitted members to his family he was obliged to report to the selectmen and secure the town against their support as appears by the following :

" Bedford, June 21st, 1736. I, Jacob Kendall, of Bedford, do promise and engage for me and my heirs to free and secure the town of Bedford from any charge that shall arise from the maintenance of my father and mother, Jacob and Alise Kendall, as witness my hand.

" JACOB KENDALL. "

People coming into town to settle, whose record was not fully clear, and means of support perfectly evident to the selectmen, were warned out of town in a legal manner, and caution entered at the Court where a record could be consulted. Thus families were compelled to go from town to town in a most unfriendly manner. The following is the form of warning used in this town and served by the constable on the order of the selectman :

" Middlesex, S. S., to A. B., one of the constables of the town of Bedford. Greeting :

" In His Majesty's name you are hereby required to warn D. E. and family that they forthwith depart this town, the selectmen refusing to admit them as Inhabitants. You are also to inquire from whence they last came, and what time they came to this town, and make return hereof under your hand with your doings therein, unto the selectmen or to the town clerk. Dated at B. the — day of —, Anno Domini. In the year of His Majesty's Reign.

" Per order of the Selectmen,

" G. H., Town Clerk. "

The records prove that parties were often warned from the town. "Seth Putnam and his family warned out of town and caution entered at March Court, on ye second Tuesday of March, An: Dom: 1748-9."

A warning cannot be considered as unquestionable evidence against a family; for we find the record of warning against parties that appear in subsequent records as occupying places of trust in the community. Young ladies were legally warned out of town who became, in subsequent years, wives of leading men.

That the selectmen were faithful in complying with the law is apparent by the following record: "Feb. 9,

1767—Mr. Thomas Page, who had received Dr. Ballard into his family, as a boarder, in March or April last, and never had informed thereof, being then present before the selectmen, it was proposed to him, by the selectmen, whether the Dr. Joseph should be warned out of town; and he, not desiring the same, the selectmen therefore agreed not to caution against the Dr. Joseph, nor yet to admit him as an inhabitant." Dr. Ballard was the second physician of the town, coming from Lancaster. He became a valuable citizen; was a delegate to the Provincial Congress, in Concord, 1774, and was a distinguished man. He died Jan. 29, 1777.

In the list of orders drawn upon the treasury it appears that the constables were liberally paid for "Entering Cautions;" one charge was seventeen shillings. In 1737 the town had its first lawsuit. It was with the town of Concord, over the support of a family by the name of Ross. Bedford lost the case, but a feeling of unjust dealing appears, from a record made later, when a committee was chosen "to attend to the witnesses who appeared against the town in the suit before the Superior Court." How Ross got a settlement in Bedford is not clear. The Lexington records show that he was warned from that town. The original of the constable's return is evidence that Bedford did not fail in trying to locate him in Concord:

"Middlesex, S.S. Concord, May 30th, 1737." In obedience to this warrant, I have conveyed ye within named Daniel Ross and his wife unto the said town of Concord, & delivered them to one of ye constables of sd. town and at ye same time delivered him a copy of ye within written warrant.

"EUBRAIM DAVIS,

"Constable of Bedford."

The inhumanity of such dealing with a man at the age of ninety years can but arouse the indignation of a reader at this day.

That the town furnished more than the necessities of life for this family appears from the treasurer's report of 1742. "For keeping of Ross £21 3s. 0d. For tobaka for Ross 15s.," and another charge in the same year "For tobaka for Ross 8s., and for a jacket £1." Rev. Mr. Bowes' register of deaths shows that Daniel Ross died "Oct. ye 27, 1748, aged 100 yrs." leading to the conclusion that the appetite, so generously gratified by the town, may have been acquired of the Indians long before the struggle with King Philip. For some years the care of the poor was let out annually by "public vendue," the contract being closed with the lowest bidder. As late as 1804 we find the following action: "Dorcas Bacon put to hoard with Simeon Stearns, until next March meeting, at sixteen cents per week, they to get what service from her they could." At length this plan gave rise to dissatisfaction, in that the worthy poor were liable to fall to the charge of irresponsible parties, and the duty of assigning homes for the paupers was referred to the selectmen with discretionary power. In 1823 a written contract was made with Thomas Page for the support of the poor, and bonds were required to the

amount of \$300. Some of the specifications of the contract are as follows:

"With regard to their diet, they are to be provided with a sufficiency of good and wholesome food, with tea or coffee twice in each day, if they choose, with sweetening; cleanly and comfortable lodgings, reasonable medical aid in case of sickness, and other things to make them comfortable as their condition may require."

Paupers were boarded by other towns in Bedford families. In 1741 twenty of such are recorded here, some of whom were from New Hampshire. The long distance from their place of settlement made it possible for great injustice to be done them by those who promised faithful care. In the early years of the town's history the needs of paupers were discussed in open town-meeting, and a detailed report made by the treasurer of each bill of charge for their relief.

The records show that the needs of a poor widow were annually discussed in town-meeting, for many years, without the slightest regard for her feelings. Further on the charge appears, "for Coffin, grave & gloves £1 5s., and a credit for the sale of her property at Vendue £2 13s. 4d."

The treasurer's account of 1802 has the following charge to the town: "Paid John Page for making a coffin for ——— child and fetching the corps, \$2.25."

In 1833 the town voted to buy a "poor farm and stock it." This being done, the care of the farm and support of the poor was placed in the hands of a board of overseers, who at the town's expense, employ a superintendent and matron, and public charity is dispensed according to the most approved plans. By a vote of the town, a simple stone, suitably inscribed, is placed at the grave of each pauper, thus preventing the increase of unknown graves in the burial-grounds.

CHAPTER LXXVII.

BEDFORD—(Continued).

BURIAL-GROUNDS.

A BURIAL-GROUND was indispensable to a well-regulated town, and the incorporators of Bedford hastened to assign a piece of ground convenient to the meeting-house for that use. October 23, 1729, "The selectmen met and laid out a burying-place in the land that Mr. Israel Putnam gave to the town." Later they changed the location a little, making mention of "a bridal way that leads from the road that runs from the meeting-hous to Woburn." In 1734 the town voted "to release John Mansfield's rates if he will keep the brush down in the burying-place." Thus the citizens early manifested a regard for this sacred spot. Having a central location, it has

never been allowed to show signs of neglect that are too often noticed in towns of New England. For one hundred and eighteen years this was the only place of interment in town. The most careful estimate, aided by authentic records, leads to the conclusion that not less than fourteen hundred bodies have been returned to their kindred dust within that enclosure. The town set apart a corner for the burial of the African race, and there in the "African reservation," in unmarked graves, are Cuff, Dinah, Violet, Jack, Ishmael, Quimbo, Toney, Abraham, Domire, Pomp, Caesar, Cambridge and others. In 1810 the town erected a house for keeping the hearse. It was in the southwest corner of the yard. The expense was \$48.50. The contractor agreed to prepare the ground and underpinning, in addition to erecting the house, which, according to specifications, was "to be built with good material and painted twice over." Here were safely kept the hearse, bier and pall. The old, cracked bell was stored here for a while, and here was stored the town's stock of powder and other military equipments, all of which were associated with death or a state of uselessness. The absence of a record of consecration leads one to the conclusion that the incorporators of this town, like the earlier generations of settlers in New England, neither consecrated their burying-ground nor dedicated their meeting-house by special religious service.

The only family reservations in the burial-ground were such as were secured through neighborly courtesy. The ground was extended according to the growing needs of the community. In 1795 John Reed and John Merriam were granted the privilege of erecting a family tomb; and in 1824 Capt. Robert Pulsifer built one adjoining it. In 1824 a private enterprise resulted in the erection of thirteen tombs, on land adjoining the public ground. These became the sepulchres of the leading families, and delayed the necessity of selecting a new place of burial for some years. In 1835 the first steps were taken towards ornamenting the grounds. The town appropriated the sum of fifty dollars, and trees were planted on the borders of the yard. In the early years of the observance of "Arbor Day" a large number of trees were planted and special care given to the ground then abandoned for the purpose of interments. The advance from the austerity of the Pilgrims, progress in art and improvement in the financial standing of the sturdy yeomen is in no way more evident than in the memorials erected and attention given to the place of burial. The grim "death-head" gave place to the "willow and urn." In 1837 the first white marble slab was erected in the yard. So conspicuous was it, in the midst of scores of primitive slate stones, that it was an object of general comment.

The tombs built for permanence became so unsightly through the crumbling of the exposed masonry that they were rebuilt in 1887.

In 1849 the town laid out a new burial-place, about a mile east of the village. It is the western slope of a commanding hill-side, which terminates in the valley of the Shawshine River.

Shawshine ("Shawsheen") Cemetery is of itself a fitting memorial of the perseverance and sacrifice of those who started the enterprise, all of whom now sleep without its borders. Both nature and art have contributed lavishly in making this cemetery an attractive spot. Burial lots are owned by individuals, subject to wise restrictions, and permanent care is insured by a deposit of funds with the town, agreeable to a statute of the Commonwealth. In 1852 John Merriam gave the town \$100 to aid in fitting up the grounds.

CHAPTER LXXVIII.

BEDFORD—(Continued).

Highways—Eridges and Railroads.

THE territory set off as Bedford in 1729 was inhabited by a good number of families who had established houses, but it was traversed by few public roads. The settlers had located their homes on the southern slopes and where they would be the least liable to attacks from the Indians. Neighborly intercourse was carried on by the shortest cuts through comparatively worthless fields, and by the same winding paths the scattered families reached the "country road." The principal roads from town to town were called country roads, and were the only highways that received public care. The ways for local convenience were designated as "Trodden Paths," and were obstructed by gates and bars. The road from Billerica to Concord was laid out "19 12^{mo}, 1660." The description of that portion of the road which was within the present limits of Bedford and on to Concord Centre, is as follows: "from ye entrance of Mr. Dudley's farme, until you come to Concord great swamp, it shall lye at least six pole wide; and from ye great swamp to Concord towne. Centre trees are marked aboute ye old road untill you come to the south corner of the widow foxes land; then leaving the old dirty road on the right hand, and passing through an opening of the swamp, acording vnto trees marked in y^e center of it, we continued to cram-field gate, and from thence, keeping the common road, to ye meeting-house."

If one would follow the road through Bedford at present, he should start at Herrick's corner and continue in the present highway to Proctor's corner and so on over the causeway road to the vicinity of the Sampson estate, entering the present highway east of the dwelling-house and so on in a southwesterly direction to the Henry Wood estate, and then continuing to the "Virginia road," which was doubtless

the road first laid from Cambridge to Concord, and over which the pioneers of Concord brought their families and goods. The "Loop" by Josiah Davis is given by some authorities as the section of the Billerica and Concord "Country" road, but local records do not support such opinions. It is evident that a road from Billerica to Concord was marked out some years later which crossed the higher land, very probably west of the present North Avenue. "September 9, 1743, the selectmen made bounds to the highway leading from Billerica to Concord, beginning at James Lane's" (Coolidge's), "and meeting the present highway at Joseph Fitches" (Wilkins' Hill). This way must have gone below Farrell's and past the mill site in Captain Lane's land.

A road from Billerica to Cambridge (Lexington) known as the road to Bacon's Mill, or Fitches' Mill, is first mentioned, "16 : 1 : 63"—"Will Tay & George Farley are Apoynted to Lay out a highway from the Towne, leading to Mr. Michell's farme, on y^e South East end of Mr. Winthrop's great meadow, to be layed out four polls wide." The condition of these early roads for many years is shown by an action of the town of Billerica, mentioned nineteen years later :

"23. 1^o. 82. Whereas Mr. Muzey makes a complaint for want of ye knowledge of ye highway from his farme, that hee bought of Timothy Brooks, to the town" (Brooks had a part of the Oakes grant now the Page estate), "The selectmen do order George Farley, that was one of the committee that laid it out at ye first, & corp^l J^o French, forthwith to go and reuew ye markes of y^e said way, that it may be obvious to all travellers; also to draw up a record as distinct that may bee, how it lies that so it may be found afterward without much difficulty."

It is obvious that a public way was marked out from Billerica to Wilson's Mill (Staples') about as early as to Bacon's Mill, as it was "made passable" in 1683, and quite probable that it followed the present discontinued highway from Frost's by Hunnewell's. In April, 1694, a committee was directed "to lay out sufficient highway from Mr. Michael's farm, through Mrs. Page's land to Shawshin River; and over Shawshin River unto Lt. John Wilson's Mill to Cambridge line; and from the same road to lay out a sufficient highway through Mrs. Page's land unto the land of Patrick Fasset, unto the house of Patrick Fasset, and from thence to state the highway in the most convenient place from Patrick Fasset's house leading up to Concord Road, and from there to Mr. Laines." This road may, doubtless, be traced at present over the hill by Wilson's house (Ladds') to the Cummings road, which led eastward to Woburn, and westerly by the present highway, by the cemetery, crossing the Lexington road at Fitches' corner, by Patrick Fasset's (William Page place), following the old road to Nathaniel Merriam's (Mudge's), and on to McGovern's, and over the discontinued road to the "Virginia" road to Concord. If "the road to Mr. Lane's" is understood as beginning at Fasset's, it may be indicated by the present highway from Mudge's to

the village; but if from "Concord road" to Mr. Lane's, it is the present highway from the Hartwell place to the village, which the town in 1734 tried to make William Hartwell "easy about." There was a road farther south from the Concord road towards Cambridge. It doubtless branched off at Proctor's corner, before mentioned, passed Samuel Huckins' estate, and over Pine Hill by the Brown estate to the Page dwelling, and so on by the cemetery to Fasset or William Page estate and to Lexington, then "Cambridge farms." Pine Hill road appears as a "country" road, in a deed of conveyance in 1721, proving that it was a highway before Bedford was incorporated. It is also described in 1718, in laying out a way from "Shawshin Bridge" to Concord River, near James Lane's house. A road from Concord to Woburn was undoubtedly in use before the incorporation, and followed substantially the present Main Street until it met the Billerica and Cambridge road at the Page dwelling, which it followed as far as Webster's (Kenrick's) and then passed over "Cummings' Hill."

Concord and Woburn road is mentioned in a deed as going by Josiah Fasset's in 1721. Charles Wood's estate was bought by James Wright, of Fasset, which aids in the above conclusion. The "burying-place" laid out in October, 1729, was bounded on the Woburn road; three months later the location was changed "a little to the northward," giving the present location of the burial-ground. "A bridal-way is allowed to goe from the road that leads from the meeting-house to Woburn." The bridle-way or horse track referred to represents, substantially, the present Spring Street, until it reaches the "country" road at Brown's corner.

The county roads or highways thus far mentioned constitute, very probably, all of the public highways at the date of incorporation.

The meeting-house, which was nearly completed before the act of incorporation was passed, naturally became the nucleus of the village. The site had been selected as a geographical centre, for it is apparent that the dwellings were as scattering here as in other locations; there is positive evidence of only two within the present limits of the village, Deacon Israel Putnam's, and Benjamin Kidder's, which was occupied by Mansfield, after Kidder built the house now standing and owned by Miss C. M. Fitch.

The meeting-house was the centre from which the early roads of the new town radiated. September, 1730, in laying out the land about the meeting-house, "a trodden path that goes to Deacon Nathaniel Merriam's from the meeting-house" is alluded to, and "Mr. Bowes' compliment of land is laid out on the west side of the trodden path to Deacon Merriam's, next to Concord Old Line," "leaving two poles for convenience for the highway." As Deacon Merriam's is represented by the Mudge estate of to-day, it appears that the "trodden path" was the only road to

the south part of the town. The reservation of two poles "for convenience for the highway" shows the width of the road later agreed upon. In 1731 the selectmen laid out the road from the meeting-house to Stephen Davis' (John Neville's) and on to Lexington line. This is substantially the present traveled highway from the village by the Mudge place to John Neville's where it may be traced in front (south) of the house, across the fields by a deserted cellar to Lexington line. The present traveled road from Neville's to Lexington is a more modern way. The front entrance of the house, when built, was convenient to the road as then traveled.

At the same meeting a road was laid out from the meeting-house to John Stearns' land. This may be the road which, at first, passed north of the present Main Street, in the rear of the Fitch dwelling, and connected with the "country" road after going northward to the present estate of Edward Butters.

A road was at once laid out from Kidder's (Miss C. M. Fitch's) to Joseph Fitch's (Wilkins' place), "and over to Cedar Swamp to the land of Davis & Taylor, to Concord River meadow path." This at once suggests the present highway from Wilkins' Hill to the Sampson place.

In the same year, 1731, a highway, two poles wide, was laid out from the meeting-house to Lexington, which may be the present road by the Hosmer and Muzzy estate, over the causeway a few rods when it branched off to the south and passed the Mead's place to Lexington. In the descriptive record of this road, a causeway from Woolley's to Hartwell's, twenty-five feet wide, is mentioned, over which the road passed for a short distance. All the remaining road was two poles wide.

In 1734 the road from Benjamin Kidder's (Miss Fitch's) to Ensign James Lane's (Cooledge) was laid out, and later, relieved of its curves, became the present North Avenue.

In 1738 the road passing in the rear of Kidder's dwelling was exchanged for the present street, passing south of the dwelling. It was widened at that time, and is the present Main Street from the Common to Wilson Park.

March 4, 1734, "Town accepted the way that the selectmen layed out from south side of Oakes' farm to Kidder's land, so on to Deacon Israel Putnam's land by the burying-place, and gave him (Putnam), in exchange for it, the Rangeway on the easterly side of his land." We here see, with slight alterations, the road from the springs to Main Street. In 1733-34 a road was laid out which corresponds with the present Concord road across the causeway (McGovern's).

From the descriptions thus far made, it appears that within the first decade of the town's corporate history highways were laid out to each quarter of the town, but this does not imply that they were in condition for travel; on the contrary, these acts had been little more than official indications of prospective highways.

In almost every case the owners of the land were allowed gates or bars; in some, however, the time for such accommodation was limited. It may be inferred by this that fences were to be built to divide possessions within a specified time.

The unimproved condition of the roads made it easy to change locations, as it seemed wise to do, after more mature consideration. Several decided changes were made during the first ten years, and some roads, of which there is record, are entirely lost.

September 18, 1732, the first highway rate was allowed (£50), and Cornet Nathaniel Page was the first highway surveyor, and in each succeeding year similar sums were appropriated for the roads, but the roads were improved slowly, as more than a score of miles had been laid out already.

The new town was favorably situated as regarded the building of bridges. The expense of preparing ways across the streams was very small for a good many years. In 1736 the bridge near the Kenrick place is referred to as the "great bridge on the road to Lexington."

The Hill's bridge "Episode," in which Billerica's first and perhaps only mob is seen, caused this town not a little anxiety, and in 1734 "Town voted that the way of Hill's Bridge is not a public good and benefit."

Perhaps the people of this town thereby escaped being forced to contribute to the building of the bridge and road which the Court ordered to be done.

In 1747 the selectmen laid out a road leading from Joseph Fitch's house southerly, by the cedar swamp to the Concord and Billerica road. It passed through "Hastings' improvement," where he was allowed "to have gates or bars for a period of four years and no more." The road was over a trodden path before-mentioned. The name suggests the means of conveyance of that time; the better roads were passable for carts, but very many of them could be traveled only on horse-back or on foot. Wagons were unknown, and the "one-horse chaise," which first appeared about 1800, was a luxury only enjoyed by the minister and a few wealthy citizens. A special tax was levied on a chaise, and the aristocratic owner erected a house for its safe keeping.

The system of supporting highways, which continued until the recent method of appointing a commissioner to direct the whole business, was early in practice here. A separate highway rate was assessed and men were allowed to work out their shares, but only on legal highways without a special vote of the town. In 1745 "Col. John Lane is allowed to work out his rate on the way between his house and the Country Road." In 1748 the wages allowed were established by vote in town-meeting: "In the three summer months fourteen shillings each man pur day, in the month of September Eleven shillings pur day." No one was allowed full pay unless he was sixteen years of age.

In 1748 a road was laid out by the Court's committee through land of William Reed and Timothy

Hartwell. It was the extension from the present Loomis estate to connect with the Billerica and Cambridge road at the present cemetery gate. Eleazer Davis (2d) lost his life in building this piece of road in September, 1748.

From 1750 to 1790 but few new roads were called for—those already laid out were gradually improved—gates and bars were discontinued and an occasional bridle-way was opened to the public travel and care.

About 1790 citizens of the District of Carlisle began to take steps to bridge Concord River. A letter from them, dated December 9, 1790, was discussed by the voters of this town and the subject-matter referred to a committee.

Before that committee was ready to report, a petition had been entered at the Court of General Sessions by the people of Carlisle and a meeting of the citizens of Bedford was held in December, 1791, when steps were taken to ascertain the best way to reach Concord River from the village. In the following February the committee reported that they had made surveys as follows: "From 16 mile-stone, near J. Fitches' to Brother Rocks, by Samuel Lane's (Huckins') two miles and one-half: From said mile-stone through the swamp by Job Lane's house (Farrell's) to the River meadow—Oak upland—one and a third miles and forty-eight rods; From said mile-stone over Zachariah Fitch's causway (Sampson's) to the River, near Oak upland, two miles and one hundred rods." The committee chosen to consider the feasibility of the plan of bridging the river made an extended report, from which the following is taken: "To put the bridge where it is proposed by the petitioners would require the building of a road through four hundred rods of meadow, deep mirey swamp and low, flat land, and the whole of the same lying in Bedford (saving eight rods), when we have neither stone nor earth suitable within a mile,—Therefore we think it very unreasonable and imposing upon the town of Bedford for them to think for to make us their slaves for ever, as we shall be, if we should be held to maintain a highway where they propose." The committee urged the way by the "Brother Rocks," saying—"however we are willing for to help them over the River when they may stand upon good bottom, and do something for them that we trust the Court's committee will think honorable to the town." The town opposed the plan most assiduously, but the Court ordered the road to be laid out in the way most objectionable to Bedford people, and they were obliged to plunge into the swamp and build the road and help bridge the river at an expense most trying to the people in the beginning. The town was divided into eight districts, with a superintendent for each, and the work of building the road from the "bar" to the river was assigned in equal portions.

The miry nature of the ground over which the road was built has occasioned continual outlays since the construction, which, with the oft-repeated calls

for repairs upon the bridge, have led later generations to believe that the investigating committee of 1792 was endowed with prophetic wisdom. The first bridge did not last twenty-five years, and Bedford was obliged to make an outlay of five hundred dollars to replace her portion in 1823. In 1873 the old mud-sill bridge was taken away and a modern pile-bridge put in its place, at an expense to this town of nearly three thousand dollars.

The road from Bacon's (Frost's) to Gleason's mill (Staple's) was opened as a public way in 1798 and from Hosmer and Muzzy's corner to Samuel Hartwell's (McGovern's) in the same year. In 1800 the road past the present East School-house first appears as a town road, and in the same year the road from Webber's (Kenrick's) to Lexington line over the hill was straightened.

At the opening of the present century a road from the main way to Oliver Reed's (C. L. Waits') was opened. The evidence of the records is that it was a town-way at times and at others it was private. Mr. Reed was allowed to work out his highway rates on this road by special vote of the town.

In 1802 the town voted "to open a road from John Sprague's and so on to Eleazer Davis', they to give the land, and fence the road, all but sixty rods, which the town should build." It was laid out two rods wide, and two years were allowed for its completion, proving that the "Loop" round by Josiah Davis' house was not a public way until 1804. Measures were being taken at the same time to have the road to Lexington straightened, which was done by order of the Court of Sessions in 1807. The cost paid by this town was \$1048.10. The straightening began at James Wright's chaise-house (Chas. Woods), and resulted in the present road over Shawshine River to Nathan Fitches' corner and direct to Lexington line.

The Middlesex Turnpike, a private enterprise, chartered in June, 1805, caused Bedford people a good deal of anxiety. A committee was chosen to protect her interests, believing the opening of such a thoroughfare would tend to draw away travel from the village and injure the town. It was located in 1806, crossing the town on its northeast border. The proprietors of the turnpike were actuated by a vain delusion that the new road built without regard for hills or ponds would attract all of the travel between New Hampshire, Vermont and Boston, notwithstanding the oft-repeated demand for "toll."

They enjoyed a measure of success for awhile, but professional teamsters were slow to abandon the familiar routes and discard the hospitality of the long established taverns in Bedford.

The opening of the Chelmsford road in 1823 was encouraged by this town, and measures were adopted to attract travel through the village, and the loss occasioned by the turnpike was more than made up to the town by the new route. Six and eight-horse teams were continually passing through the village

loaded with wool, butter, cheese and produce of the northern farms, in exchange for salt, molasses, dry goods, rum and the requisites of a "country store," and in early winter "the roads were full" of farmers' teams loaded with their own fat pigs and beef and other products of their own industry, to be bartered in the markets for a years' supply of family necessaries. The charter of the Turnpike Company was repealed in 1841, and the road became a public highway; by this, Bedford was burdened with another bridge and a section of road to maintain, which, because of its location, was of but little benefit to the citizens.

When the turnpike was opened this town was obliged to build two short lines of public road for the accommodation of families located near it. One of seventy-five rods, in the east part of the town, made a new opening to Burlington, and one in the vicinity of Abner Wheeler's (Ernststein's). May, 1822, the road from John Merriam's to Lexington, two rods wide, was made a town-way. But few additions were made to the highways after the opening of the Chelmsford road until the coming of the railroad.

A short cut from Vinebrook mill (Staples') to the village was made by opening the road from Lyon's barn across Shawshine River to the old road at Blodgett's house. This added another bridge to the town's care. The records show that while freed from building new roads, much attention was given to straightening and improving the old, but, fortunately, enough curves remain to preserve the rustic beauty of the town; these are appreciated when driving for pleasure, but often condemned by the ambitious farmer in his haste to reach the market. In 1874 the road going south from the village was widened and straightened to accommodate the travel occasioned by the opening of the Middlesex Central Railroad. Loomis Street was soon opened as an eastern approach to the railroad station.

"Webber" Avenue, built in 1884, and "Hillside" Avenue built, in 1888, were private enterprises, but were soon accepted by the town as public ways.

"Fletcher" Avenue, laid out by Matthew Fletcher, is still a private way, but enjoyed by the public.

RAILROADS.—In the summer of 1873 the ground was formally broken and work commenced on the bed of the Middlesex Central Railroad in this town. The town invested \$20,000 in the enterprise and has never regretted the step. In the autumn of 1874 the road was opened for travel from Concord to Lexington, where it connected with the "Lexington Branch of the Fitchburg." The stage-coach, which had lingered here much longer than in any other town within equal distance of Boston, was set one side.

In the autumn of 1877 a railroad of a two-foot gauge was opened between Bedford and North Billerica. A road of this kind had been operated in Wales with success, but none so narrow had been built in this country. The novelty of the road, its cheap con-

struction and equipments attracted much attention. Foreign philanthropists sought for the plans and returned to Europe with cheering reports. The rolling stock of the road consisted of two locomotives, "Ariel" and "Puck;" two passenger cars; two "excursion" cars and a few others for freight. For some months trains made regular trips over the road, and the experiment was a success as far as the working capacity was concerned, but it was a financial failure. According to a report in the *Scientific American* of March 16, 1878, the cost reached \$60,000 while the estimate was \$50,000 or \$8000 per mile. A portion of the subscription "proved unsound or fraudulent," which, with the extra cost, unplanned for, placed the road in an unfortunate condition before it was ready for service. It was unpopular from the starting of the trains and never succeeded in regaining the confidence of the people in general, although some judicious men never lost confidence in the road as an ultimate success pecuniarily, but time was not allowed to test the wisdom of the plan. The road was thrown into bankruptcy and the rolling stock sold by assignees for \$9000 in June, 1878. Thus the loss to Billerica and Bedford became a benefit to the Sandy River Railroad in Maine, where the rolling stock was put to immediate use.

Individuals were the only investors here, but they, with many mechanics of the town, lost heavily by the failure, while the owners of the land through which the road passed were in many cases liberally compensated for damages by holding the rails, etc.

In 1885 the Boston and Lowell Company, then controlling the Middlesex Central, built a line from Bedford to connect with their main line at North Billerica, following substantially, through this town, the abandoned bed of the "Narrow Gauge." The town invested \$2000 in this enterprise. By the addition of this line Bedford became a railroad junction, and is within ready access of Lowell and Boston, having abundant accommodations. As regards the time required for reaching the capital of the State, Bedford is to-day where Arlington was twenty years earlier.

CHAPTER LXXIX.

BEDFORD—(Continued).

Stage-Routes—Post-Office—Postmasters—Industries—Residential Town—Inventions.

THE opening of the Chelmsford road, so called, in 1823, contributed greatly to the facilities for travel, and Bedford Centre became a popular thoroughfare. Competitive stage-routes were established from Concord, N. H., to Boston, in one of which Bedford merchants were stock owners. This fact, together with the popular roads and well-kept taverns, led to the selection of Bedford as a way station, where relays of

horses were kept. Other stage lines passed through the village, one of which was from Lowell to Woonsocket. An enterprise, strange, indeed, to the present generation, was created by the regular coming and going of the coaches, loaded inside and out with merchants and tourists. A public conveyance led to the establishing of a post-office in Bedford and in 1825 Elijah Stearns, Esq., was appointed the first postmaster. The first mail that left the town contained but one letter. Postage was an item of importance, and with many people correspondence was necessarily limited. The rates ranged, according to distance, from six cents to twenty-five, and pre-payment was optional. A letter from Billerica to Bedford must necessarily go through Boston, incurring a postage of ten cents. A widow at Bedford received, in one day, letters from four sons, who were struggling for an education in different schools, and her bill at the post-office was one dollar. The postmasters in the order of their appointments are: Elijah Stearns, John A. Merriam, Reuben Bacon, Thomas Stiles, Jonas Munroe, Thomas Stiles, Henry A. Gleason, Marcus B. Webber, Charles G. Fox, Marcus B. Webber, Henry A. Gleason.

INDUSTRIES.—Bedford has always been classed with the agricultural towns of the State; although in common with all inland settlements during the colonial period, the people were largely engaged in supplying their own wants, hence every family conducted its own manufacturing. The cumbersome loom, with its oaken beams, spinning-wheels great and small, hetchel, cards and the like, were requisites here longer than in towns on the direct line of the first public coaches. With this primitive machinery the lamb's warm fleece was turned to cloth, and dyed with indigo at the chimney-corner, while the flax, from the fields, was made into snowy linen by the same deft hands that were equally skillful in manufacturing golden butter and savory cheese, not only for domestic use, but to exchange for other necessaries. The housewife had her annual season for preparing the year's stock of "tallow-dips" or candles and manufacturing soap for family use.

The blacksmith hammered out the nails of all sizes, and with the aid of the woodwright supplied the farmer with all his tools. The itinerant cobbler made the boots and shoes from leather tanned in the neighborhood vat. The village had its brick-kiln. Charcoal was manufactured and Tarkiln Brook (crossing the south part of the town) suggests a day when the sap of the early forests was boiled to tar and resin on its winding banks. When the brave pioneer's life was over the village carpenter made the coffin for his body. It was early in the present century that the people of Bedford began to contribute to the increasing demands of a growing population outside of its own borders. In 1805 Jonathan Bacon and John Hosmer began the manufacture of children's shoes for Boston market. They were both of an inventive

mind,—made their own lasts and prepared their own patterns. The business increased and other firms engaged in the enterprise: among them were Benjamin Simonds, Zebedee Simonds, Reuben Bacon, Chamberlin & Billings. Several hundred people of both sexes were employed. Young men from other localities were apprenticed in the service of the different firms, many of whom settled here and became leaders in public affairs. When the business was at its height the annual sales amounted to upwards of ninety thousand pairs, at an estimated value of fifty thousand dollars. This was all hand work, and the employés were, to an individual, American born. "No shoes were in better credit than those made in Bedford." When machinery was introduced elsewhere, and all classes of people were employed in producing all grades of work, the demand for the superior articles, made here, gradually slackened, and after a time the business entirely ceased. Another enterprise carried on here quite extensively, when the shoe business was at its meridian, was the manufacture of band-boxes. Women were employed chiefly and many young women were attracted to the town to engage in this employment. Not a few of them formed holy alliances with the young men of the shoe firms and together became the founders of some of the most enterprising families.

George Fisk in the north part of the town and Amasa Lane in the east carried on this line of manufacturing. At first thinly-shaved wood for the foundation work was obtained from New Hampshire, but later a machine was introduced and the whole work was done here. The size of the boxes varied according to the fashion of the ladies' bonnets, which was variable in those days, as at the present, and created a demand equal to the supply.

About the year 1812, inquiring minds were turned to a geological formation that had already been used for paint. The first meeting-house, when repaired after the Revolution, was painted with the material known as the "Bedford Yellow." As before mentioned, it was found in the largest quantities on the Sprague farm. Thompson Bacon and others engaged in the enterprise. For some years it was used as a mineral paint—yellow ochre.

A stratum of clay was discovered on the southern border of the town and citizens engaged in the manufacture of bricks for local use. The clay was teamed to the centre, where a kiln was prepared and sufficient quantities burnt to build several houses and chimneys for others. The manufacture of charcoal became an important industry at one time. David Rice, the village blacksmith, burnt the coal for his own forges in a field near Carlisle bridge, while in the south fields the business was carried on more extensively, a market being found in and about Boston.

About the year 1830, Jonathan Bacon invented and patented a blind fastener known to the trade as "Bacon's Patent Lever Blind Fastener." They were

made by hand and were the most approved article of the kind in the market for some years. In the year 1832 about 4000 sets were made in town. Mr. Bacon received encouragement from Edward Everett, who pronounced the first pattern exhibited to be an article of value, as it proved to be. This patent was a source of a good income to Mr. Bacon, and the manufacture of them gave employment to several workmen in iron. Tanning and currying as an industry was carried on in the latter part of the eighteenth century and the opening years of the nineteenth. It was carried on at the centre by James Wright, Sr. and Jr., successively, and by the Convers family in the south part of the town. It was chiefly of local interest and prepared leather for home market. The farmers' habit of wearing leather aprons and sheepskin breeches created a local demand, long since discontinued. The bark for tanning was ground by revolving stones after the manner of a corn-mill. The Wrights were succeeded by Benjamin F. Thompson, who in after years removed the industry to Woburn.

About 1840 a paper-mill was established on the site of the Wilson corn-mill, on Vine Brook, and the manufacture of coarse paper was carried on for a series of years, giving employment to many hands. The business was removed after the destruction of the mill by fire, causing the removal of one-tenth of the inhabitants of the town. After this calamity the industries, "with the exception of the manufacture of local necessities," were chiefly agricultural, until after the close of the Civil War. The opening of the Middlesex Central Railroad in 1873 furnished direct and easy communication with Boston, only fifteen miles distant, and prepared the way for a decided change, which is now rapidly taking place. Men, whose business centres are in Boston, are establishing homes, and the centre of the town is fast becoming a residential village.

The old system of farming is giving way to the culture of small fruits and vegetables, and acres are covered with glass for the purpose of securing early crops. The Colonel Jones farm of colonial days, in the west part of the town, comprising many acres of the "Great Fields" sought by the first settlers, is being used for the propagation of nursery stock.

Grazing has become an important feature of agriculture, and the production of milk for Boston market has increased rapidly with the improved facilities for transportation. About six hundred and fifty cans of eight quarts each are daily shipped from Bedford. Many tons of superior quality of hay are annually produced, for which there is a good local market. Acres are annually planted with cucumbers, for which a ready market is found at a packing-house where cucumbers, gathered when quite small, are manufactured into pickles.

A wood factory for the manufacture of miscellaneous articles, gives employment to several men, and the town has its complement of cartwrights, black-

smiths and other artisans. Several men are employed with teams in marketing wood, cut from the forests of the town, but the growth keeps even pace with the consumption. The "Bacon Snow Plow," invented by Isaac P. Bacon, is considered the best horse-machine in use for clearing snow from sidewalks, and is used in the large towns of the county. The inventor died without having secured a patent and the industry is lost to the town.

CHAPTER LXXX.

BEDFORD—(Continued).

Springs—Lakes—Ponds—Public-Houses—Bedford Springs.

THE streams of the town have never contributed very largely to its industries, although in the early days there were more places where the water-power was utilized than at present. Manufacturers have been benefited by damming the Concord River near its confluence with the Merrimack, while the people of Bedford have seen their broad meadows depreciate in value by the overflow of the banks. Peppergrass Brook, which drains the western slope of the village, furnished power for a saw-mill at the opening of the present century; the mill was located on the southerly portion of Winthrop farm and owned by Job Lane. The Winthrop, or Great Meadow Brook, was utilized by the early inhabitants; a remnant of the dam is now to be seen on the left side of the highway in going from the village to the East School-house. Farther down the same brook and near Sandy Brook bridge was another mill. There is evidence of an early mill near Farley Brook. The natural ponds cover but a small area. The dams at the saw-mills on Shawshine River and Vine Brook have aided in forming small ponds where ice is gathered for local use. "Spring Pond" or "Fawn Lake" covers several acres, and is fed by a succession of springs; it is a beautiful sheet of water and adds much to the attractiveness of the estate.

PUBLIC-HOUSES.—Benjamin Danforth and Walter Pollard were the inn-keepers of the town, very soon after the incorporation, and possibly furnished entertainment to travelers before the town was organized. The early records show that Danforth and Pollard each had bills against the town for entertainment as early as 1738. The former was doubtless located on or near the site of the "Shawshine House," and was succeeded in business by Captain John Webber and his son, John Webber, Jr. The Pollard Tavern was near the Job Lane Mill, and the Fitzgerald house of the present is thought to represent the original house, in part. It was re-located after the discontinuance of the highway from James Lane's to Thaddeus Fitches'. Tradition furnishes proof of the honesty of Pollard by

showing that he represented goods, offered for sale, in their true condition, thus: "Want to buy any yellow pork?" says Walter Pollard. "Think not," says Job Lane. Jeremiah Fitch, Jr., opened a tavern about the year 1766. It was there that the minutemen of the town lunched on the morning of April 19, 1775. The opening of the stage routes and the increase of teaming through the town led to the opening of a tavern towards the close of the eighteenth century. Its location was near the present corner of Concord Street and Park Avenue. It was first kept by Phineas Chamberlain; he died in 1809, and his successors were Stearns, Porter, Flint, Hurd and Phelps. The house was destroyed by fire in 1837. At the opposite end of the village David Reed opened a tavern in 1797, and conducted the business until his death in 1832. The present "Bedford House" was built in the first quarter of the present century, as a private house, by Joshua Page. It was soon enlarged and turned into a public-house, and has been so kept until the present. In 1888 the sale of intoxicating liquor was suppressed in the town, and the property purchased by a stock company. The house now furnishes the comforts of a first-class suburban hotel.

"Bedford Springs" is located about one and four-fifths miles north of and on the Billerica side of Bedford Village. The name is derived from three natural fountains strongly impregnated with mineral properties. This place was included within the Oakes farm, which consisted of 150 acres, granted by Cambridge to Captain Gookin, in exchange for his lot on the township, and by him sold to Thomas Oakes. It is evident that the lake and never-failing springs of pure water attracted the attention of the aborigines long before 1643-44, when "Shaweshin was granted to Cambridge."

Family traditions furnish unmistakable evidence leading to this conclusion.

The keen students of nature early detected the remedial properties of the bubbling springs. The Pawtucket Indians had settlements in this vicinity and their medicine-men resorted to these waters. Scattering remnants of the tribe made occasional visits long after the Wamesick Purchase of 1685, by which "all manner of Indian rights and claims to that parcel of land granted by the General Court to the town of Billerica" were honorably extinguished.

Mrs. Franklin Stearns, of Billerica, who was born in 1801, tells the following: "My mother, who lived near the springs, often told me that she remembered distinctly when the Indians came a long distance to fill their leathern bottles with water from the springs and told her, when stopping at her home, that it was medicine." These children of the forest also brought their sick to bathe in the waters. This evidence seems to have been lost sight of, and the instinct of the brute creation was needed to lead man to this fountain of health. About 1835 the farm was owned by Augustus Pierce. It consisted chiefly of woodland

and pasture land. The owner furnished pasturage for the villagers' cattle. It was noticed that the cattle always went to the springs for water rather than to the open pond, and that cows having access to the springs were in better condition and gave better milk than those confined in neighboring pastures, where the grass was better, but the water was taken from other sources. This led to the analysis of the water by Dr. Jackson, of Boston, whose report, confirmed by later chemists, gave rise to the present beautiful health resort.

A company was soon formed who bought the real estate, and a commodious building was erected for hotel purposes. The enterprise was never a financial success until the Billerica and Bedford Railroad was put into operation. The estate was purchased by William R. Hayden, M.D., in 1856. It then comprised forty acres of land with the hotel, stable, bath-house and bowling alley. It now comprises 175 acres, with buildings added, at a cost of \$25,000. An equal sum has been expended on the grounds, making one of the most attractive health resorts within equal distance of Boston.

Here is the laboratory of the New York Pharmaceutical Company, of which Dr. Hayden is president. They make here 350 different preparations for druggists and practicing physicians, of which Hayden's Viburnum Compound, The Uric Solvent and Phosphorus Pills are the principal. More than 25,000 pounds of the Viburnum Compound were shipped from this place during the last year (1889).

The Billerica and Bedford Railroad passes over the western border of the grounds, making the resort within convenient access of Boston and Lowell. The hotel, now under the proprietorship of William Adams, is filled with guests of prominence during the summer months. A post-office was established here in 1888, of which Dr. Hayden is the postmaster.

Bedford Springs is a distinct natural feature of the town, and the pharmaceutical works are entirely separate from all other enterprises, but they, together constitute the most attractive feature of the town. A sketch of the life of William R. Hayden, through whose perseverance natural possibilities have become realities, and whose fertile brain has produced a blessing world-wide in its extent, will be found elsewhere in this connection.

CHAPTER LXXXI.

BEDFORD—(Continued).

Fire-Engine—Enforcement of Laws—Drunk Custom—Witchcraft—Bounty for Crosses, etc.

THE first action of the town towards procuring a machine for extinguishing fire was in October, 1827,

when \$225 (two hundred and twenty-five dollars) were appropriated for that purpose, "providing the sum could be increased to an amount sufficient to purchase an engine with equipments for service." This was done by organizing a stock company of nineteen members, each owning a share, the par value being \$15 (fifteen dollars). Each owner of a share held a certificate which, by vote of the town, entitled the bearer (provided he be deemed eligible) to a preference in the appointment of engine-men, who were annually appointed by the selectmen, agreeable to the statutes of Massachusetts. In 1845 hooks and ladders were added to the apparatus, but fortunately there was but little use for the machinery, and but little attention was paid to it after a few years.

In 1879, after a disastrous conflagration, the town voted to buy a suction hand-fire-engine, and the sum of \$475 (four hundred and seventy-five dollars) was appropriated for it. This being done, the "Shawshoen Engine Company," of forty members, was formed, and paid an annual fee of \$2 (two dollars) each.

The "Winthrop Hook-and-Ladder Company" was also organized, and in 1883 the annual compensation was increased for the members of both companies to six dollars. Cisterns for the storage of water were built in 1888, and the town is well protected against the ravages of fire, at an annual expense of about \$300 (three hundred dollars).

Bedford has always been jealous of its good name, and made haste to mete out justice to any who, by violation of law, have brought reproach upon it. In March, 1797, and for several succeeding years, officers were chosen to prevent theft, with instructions to pursue offenders to justice at the public expense. At this time there was a family in town so addicted to larceny that its members would steal from each other. The vigilance of the officers is apparent, as one of the family was brought to condign punishment by being tied to an apple-tree (in the absence of a whipping-post) in the village, and publicly and legally whipped with thirty stripes. This was the second offence; a third was punishable "by the pains of death without the benefit of clergy." This act of justice was not sufficient to deter other members of the family from similar offences, and the town was not rid of the family until two farmers, whose estates joined that of the offenders, purchased their farm, upon condition that they should not relocate in the town.

A greater evil, the sale of intoxicating liquors, met with but little opposition until 1828. The customs of society here, as elsewhere, gave full endorsement to the free use of ardent spirits in public and private. The "flowing bowl" was prominent on both solemn and joyful occasions. The records are remarkably free from itemized bills for liquors, but the oft-repeated charges for "entertainment," together with

traditions, leave no room for doubt as to the nature of the entertainment furnished at the public charge. In 1804 the use of liquor at funerals was abolished by vote of the town. In 1822 a committee was chosen to repair the Common, free of expense to the town for labor; but they were allowed to furnish "those that do the work with some spirit at the expense of the town." It is doubtful whether it would not have been more economical to have paid for the labor. In 1834 the overseers of the poor were instructed not to furnish ardent spirits for the poor unless directed by a physician. The first temperance society was organized in 1830, and moral suasion was faithfully applied, but it was not until 1888 that the State law was made effectual, through the vigilance of the "Law and Order League." To remove unfortunate possibilities, public-spirited men purchased the Bedford House property and organized a stock company.

The witchcraft delusion, that had been such a scourge in the Colony, had left its effect upon credulous minds in this town. There were those who attributed every mysterious occurrence to an eccentric old woman. They believed she was responsible for the power that is now seen in a balky horse—refusing to advance, or a wheel to revolve on a neglected axle. There is a tradition that in the early years of the Revolution, when the British troops were stationed in Boston, this woman, in the disguise of a Tory, had a concerted meeting with some of the proud officers of the army. She represented to them that she had a great secret, which she would reveal upon their paying a heavy fee. The officers, anxious to engage in the enterprise, met her, upon agreement, at midnight near her own home. On being satisfied that the booty was in the chaise of the officers, she led them, by the dim light of a flickering candle, across a narrow plank which served as a temporary bridge over a swollen stream into a dark recess; she then extinguished her light, recrossed the bridge, which she pulled after her, secured the bags of English coin and went home. The ambitious officers, foiled in their undertaking, gladly left the town, but not until they had aroused a family and obtained aid in the search for their team and guidance back to Boston.

It appears that the early farmers of Bedford were greatly annoyed and their crops seriously damaged by the crows, blackbirds and squirrels. This was a prevalent evil in the Province, so much so that the General Court enacted a law in 1740-41 authorizing towns to pay a bounty on the heads of the little creatures, and were reimbursed from the Province treasury. There was allowed "for every dozen of blackbirds taken in their nests, and not fledged, twelve pence; for the like number of blackbirds grown and fledged, three shillings; for each crow, six pence, and for every water rat, gray squirrel and ground-squirrel, four pence." The town indorsed this law at once, and the boys, stimulated by a bounty for the work of destruction, entered upon a competi-

tive war of extermination. The treasurer's report of 1741 shows twenty-two orders "given to parsons for squirrels and birds," amounting to £12 14s. 8d.

The list includes the names of the leading men of the town. As orders were only drawn for the parents, the number of individuals enlisted in the work of destruction is not determined, but there were, doubtless, as many as one hundred, and the records show that the practice was continued for years. One boy, William Webber, in his eagerness, mistook an owl's nest for that of a crow's, and when about to capture the fledglings was attacked by the mother owl, which plucked out one of his eyes, subdued the youth and provided a priceless meal for her brood. In 1823 the town voted "not to allow Robbins to be killed in the town this year." In 1829 voted "to pay twenty cents for old and ten cents for young crow's heads, caught and killed within the limits of the town."

CHAPTER LXXXII.

BEDFORD—(Continued).

Profanity and Drunkenness Punished by Law—Tithingmen and their Duties—Minor Officers—English Right.

At the time of the incorporation of Bedford, profanity and drunkenness had become flagrant crimes in the Province, and occasioned special legislation. In 1734 the following act was passed by the General Court:

"Whoever shall be convicted of prophane swearing or cursing shall, for the first offence, forfeit and pay the sum of ten shillings; and for every such oath or curse after the first, uttered at the same time and in the hearing of the same person or persons, the sum of two shillings, and for a second offence the fine was ten shillings." The fine for drunkenness was ten shillings for the first offence, and twice that for a repetition. In order that the law should be enforced, tithingmen were annually chosen as town officers. Their general duty appears to have been to promote the Divine honor and the spiritual welfare of the people, by encouraging family worship and discipline, and checking profanity, Sabbath-breaking, idleness, intemperance and kindred immoralities. The official title, "Tithingmen, or tenth men," originated from their having a tithing, or a company of ten families, each to oversee, including their own. Two such officers only were chosen at the first town-meeting, and as subsequent records furnish no evidence of an increase in number, it may be inferred that the people were disposed to obey the laws here better than in some places.

The most respectable voters of the town, often the deacons of the church, were elected to this office and sworn to the faithful discharge of the duties.

They were required by law to make complaint to

the magistrate of what they saw amiss in any one under their inspection. Long poles or staffs were furnished as instruments of authority, and especially used in the meeting-house during public worship. In the expenses for 1742, Oliver Poillard has a charge of "4 shillings for tithing men's staves." The faithfulness of the officers appears in a record of 1764, in which Stephen Davis, treasurer, gives credit for "4 shillings for a fine for a prophane oath." It was the balance after deducting the cost of the prosecution. Tithingmen were annually chosen by the town until 1848, but their duties had long before fallen to other officers. In March, 1822, Deacon Michael Crosby, Zebedee Simonds, James Webber and Elijah Stearns, Esq., were chosen as tithingmen and sworn to the faithful discharge of the trust. They were instructed to keep such order on Lord's day in the meeting-house and the Centre School-house as they may think proper. By virtue of a law of the Province of 1739, deer-reeves were annually chosen with the other officers of the town. The record of December 17, 1739, has the following: Voted, "that violation of the act relating to killing of Deer in the province be legally prosecuted. Major John Lane and Mr. Thomas Woolley be for that service sworn to the faithful discharge of the trust." Hog-reeves were chosen at the first election of officers in the town, and annually thereafter. As the town voted that the swine should go at large, according to the restrictions of the law, the duty of the hog-reef was to see that the animals were properly yoked from April to October. The remaining months they were allowed to go free and untrammelled.

"The *English Right*," an annuity from estates in the mother country, was of great assistance to some of the early families. The Lanes and Pages were the beneficiaries for several generations. It originated in New England with Job Lane (before mentioned) and came to the Page family, through the marriage of a granddaughter with Nathaniel Page, the second of the name in this country, who was born in England and came a youth with his father, Nathaniel, to Boston in 1682, and to Bedford (then Billerica) in 1687. A fragmentary correspondence, consisting of scores of letters and bills, dating from 1651, between the custodians of the English estates and Job Lane, is among the interesting papers treasured in Bedford. The annual remittance was sometimes made in merchandise according to the requests of the owners, as appears from items preserved. "May 2, 1721, St. Stephen writes alone: Sende 6 large quarto bibles," one of which is now owned by Miss Sarah Chandler, of Lexington. It contains the Page family record. A letter dated "London Mar. 20, 1754, to Job & John Lane," expresses regret that "the Bibles did not suit."

"July 26, 1748, Zach. Bourryan sends Mathew Henry's Exposition on ye Bible 5 and 6 vols." Dress fabrics were often ordered and received, and two of

the ladies of Bedford appeared on important occasions attired in the "English Gowns." The arrival of the large leather-covered trunks were occasions of much interest to the several families. It is evident that the town did not fail to exact a tax on the income, as appears from the records of 1744: Voted "not to abate the Rates that the Lanes and Pages—gentlemen—were assest for their income from England." During the Revolution the income was not received and the privations of that period were felt more severely by those families than by others that had depended upon their own energies entirely; but after peace was restored with England the full amount came in one remittance. The English law of primogeniture was not transferred to this country. New England adopted the older rule of the common law, by which all the children shared alike in their parents' estate, except in Massachusetts, where the oldest son had a double portion. The legal claimants of the Lane income at length became very numerous, and the just division very difficult; hence the claims were sold in the early part of the present century.

Job Lane died in Malden, August 24, 1697, and his estate was inventoried at £2036 11s., the larger portion of which was in New England.

Other families received aid from England in the early years of the town's history, as appears from the following: "Feb. 23, 1756, Widow French's rates abated for income at England."

The following is a copy of the goods ordered by one of the heirs of the Lane estate:

"BEDFORD, September the 16, 1785.

"Mr. Lane, this is to Inform you what Articles I am Desirous to send to England for.

"Art. 1st. one Pice of Chents for one gound, ^{Very Dark.}

"Art. 2d. one Pice of Sattaia for one Cloak.

"Art. 3d. One half Pice of Base.

"Art. 4th. one yard & three-quarters of Scarlet Brad Cloth.

"Art. 5th. one Silk Handkerchief.

"Art. 6th. The Rest to fine Linnen.

"In So Doing you will oblige,

"CHRYST PAGE."

CHAPTER LXXXIII.

BEDFORD—(Continued).

NOTED OCCASIONS.

THE ordination services at the settling of the ministers, mentioned in the Ecclesiastical section, comprised all of the convocations of note previous to the year 1800. On the 22d of February of that year a most imposing ceremony was participated in by the whole town in honor of General George Washington, who had died in the closing days of the last century. Rev. Samuel Stearns delivered the memorial sermon.

In the various anniversary celebrations of Concord fight, held by the mother town, Bedford has been well represented. In March, 1850, ten leading men

were chosen to confer with the people of Concord in regard to the seventy-fifth anniversary, and three of the vice-presidents were from this town at that celebration. At the centennial, April 19, 1875, a good company of civilians was in the procession with banners. The one carried by Bedford minnte-men one century earlier was borne by Isaac E. Fitch, and one with the following inscription: "Captain Jonathan Wilson killed April 19, 1775. He died for us and Liberty," was carried by Abram E. Brown. Both standard-bearers were great-grandsons of those who fought on the memorable day at Concord.

On Memorial Day, 1874, the Soldiers' Monument was dedicated with imposing ceremonies. The parent towns of Billerica and Concord assisted in the services. The former furnishing a Post of the G. A. R. and brass band and the latter sent Company C, of the Fifth Regiment, and a brass band. Josiah A. Stearns, A.M., was president of the day; Ralph Waldo Emerson, Sampson Mason and Rev. William J. Batt were among the speakers.

The one hundred and fiftieth anniversary of the incorporation of the town was the grand jubilee day of its existence. At the autumn town-meeting, September 30, 1878, it was voted that the town would observe this occasion. Rev. Jonathan F. Stearns, D.D., one of Bedford's sons, was chosen to prepare an historical address, and a large committee of citizens was chosen to conduct the celebration. The committee organized with Josiah A. Stearns, chairman; Rev. George F. Lovejoy, secretary, and Oliver J. Lane, treasurer.

The funds for the celebration were obtained by subscription; more than six hundred dollars were contributed to the general fund; besides, there were many generous contributions for special objects.

When plans were so far matured as to issue notices and invitations, the committee called for a name for the celebration, and Mr. Elijah W. Stearns, the village druggist, called from his ancient Latin the numerical adjective "Sesqui" (one and a half). This gave the occasion a tinge of novelty and added spice to the post-prandial remarks.

August 27th, the day on which "the Great and General Court" that granted the charter for the town commenced its session, was selected for the celebration rather than September 23d, the date of the act of incorporation. This was to accommodate sons of Bedford engaged in literary work who were then enjoying their annual season of rest.

A mammoth tent was erected on the fields near the Common, where the exercises were held and the dinner served.

The occasion was replete with interest for young and old. For judicious planning and careful execution, the Sesqui Centennial of Bedford is recorded as an event that reflects credit upon all who contributed to its success. Chief among many were the historian and president of the day, both of whom,

RESIDENCE OF WALLACE G. WEBBER,
BEDFORD, MASSACHUSETTS.

with a brother, the last of the sons of Bedford's honored minister (Rev. Samuel Stearns), have, since that day, joined the great company that they labored to honor through that celebration.

The organization of the church, which took place in July following the incorporation of the town, was celebrated in July, 1880, by the Church of Christ, connected with the Trinitarian Congregational Society. Rev. George F. Lovejoy, pastor of the church, preached an historical discourse, which was printed in pamphlet form. At the conclusion of the services a thank offering was made and the society freed from debt.

The fiftieth anniversary of the gathering of the first Sabbath-school was held in July, 1868. It was an occasion of general interest. Rev. William F. Stearns, D.D., president of Amherst College, and other sons of Bedford, were prominent in the celebration.

The seventieth anniversary was another important event, when a general reunion was enjoyed. The history of the school, in pamphlet form, was issued at that time.

CHAPTER LXXXIV.

BEDFORD—(Continued).

Topographical and Miscellaneous.

BEDFORD is in about the central part of Middlesex County, fourteen miles northwest of Boston and twelve miles south of Lowell. It is connected with both cities by rail.

It has Billerica on the north, the same with Burlington and Lexington on the east, Lexington, Lincoln and Concord on the south, and Concord and Carlisle on the west, from which it is separated by Concord River.

The village stands on a slight elevation and constitutes a water-shed. Peppergrass Brook extends in a winding northwesterly course and Trout Brook in a southwesterly course to Concord River. Shawshine River enters the town from Lincoln at its extreme southern point and flows the entire length of the town, east of the village, entering Billerica at the north. It receives the waters of Tar Kiln Brook soon after entering Bedford, and after crossing Lexington Main Street it receives Elm Brook, which drains a long range of meadows on the Concord side and takes in Hartwell Brook on its course.

Spring Brook, an outlet of Fawn Lake at Bedford Springs, unites with Potash Brook or Ash Gutter in its southeasterly course to the Shawshine, which it reaches near the East School-house. Vine Brook enters the town from the east and becomes an important tributary of Shawshine River. Other small streams are tributary to either Concord or Shawshine Rivers. The only motive-powers, utilized at present are on the Shawshine River and Vine Brook.

"The soil," says Alfred C. Lane, of Boston, a grandson of Bedford, in "Notes on Geology of Bedford," "may be divided into three kinds—the dark peat of the swamps and meadows, boulder clay and high level sand-beds."

The peat is found on the lines of the water-courses, where a considerable portion of the surface appears to have been formed of vegetable matter and was used for fuel, before the development of coal-mines; a firm white sand subsoil which underlies this vegetable deposit made it comparatively easy to cut out the peat or turf in convenient pieces to stack for drying. It is also used as a very good fertilizer for the sandy soil of high lands. The cranberry and an inferior quality of grass are natural productions of this soil, and turned to some profit by the farmer. The boulder clay is composed of sand, pebbles and boulders, together with clay varying in quantities according to the location. This is supposed to have drifted here with the ice and been deposited during the glacial period. The underlying ledge crops out in some locations and shows unmistakable signs of the southerly course of the ice-fields. The most noticeable is in the vicinity of the North School-house.

The boulder clay is the soil found in the northerly part of the town, more generally than elsewhere; it is hard to cultivate, but productive when broken and fertilized; if left in its natural condition it produces the huckleberry and other small fruits of comparatively little value.

The sand, besides forming the subsoil of the peat lands, is thrown up many feet above the stream level and found in beds; by digging in these beds one may easily detect layers of successive deposit, which indicate the action of the water when the ice was disappearing, before any well-defined water-courses had appeared and this territory was an inland lake. The pine trees seem to be the natural production of this soil, which is light and dry, but when enriched becomes productive and is easily cultivated.

In general the geological formation is calcareous gneiss and sienite, in which are found good specimens of garnet. "In Bedford the strike of the gneiss is northeast and the dip nearly perpendicular." Hitchcock mentions the yellow ochre in connection with a rusty mica schist.

Bedford is indicated as a locality for garnet by Dana and Hitchcock both, and at one time the attention of the people was turned to this formation, as of merchantable value, but it was not remunerative. The iron and sulphur springs indicate the decomposition of certain mineral properties that are visible in some locations about Bedford Springs.

The village is well drained and free from miasmatic influences. It is classed among the very first localities of the State in point of healthfulness. No destructive contagion has visited the town since about 1750, when a throat distemper baffled the skill of physicians and brought sorrow to families in the east part

of the town. Longevity is noticeable in the families that represent the first settlers and particularly in the Davis, Lane, Page and Hartwell families.

TREES.—Besides the pine already mentioned, there is the white cedar, that takes kindly to the peat of the low lands in the vicinity of Concord River, and the red cedar found in small quantities, making its slow growth in the boulder clay, where oak, maple and birch flourish the most abundantly; the elm flourishes here, having been planted by the early settlers for shade, and many venerable specimens are standing—useful monuments of the past. *Flora*: The following is condensed from a local work, "Some of the Wild Flowers of Bedford," by Charles W. Jenks, a careful student of the soil and productions of his ancestral territory:

"The wild flowers of Bedford are neither numerous nor rare. We have few deep valleys of rich soil, and few running brooks falling over rocks, both of which localities are the chosen haunts of many species. The earliest, perhaps, of all our flowers is one rarely noticed, the skunk cabbage, which may often be found in March, with its peculiar spathe of yellow or red, peeping out from some damp or swampy place.

"Soon after, along the banks of ditches or in low meadows, the cassandra or leather leaf, with its long line of heath-like bells; this plant, if gathered in fall or winter and kept in a warm room, will blossom freely. Together with this is generally found the sweet-gale, a low shrub with small and insignificant catkins, but having a delicious aromatic fragrance. Then, after the hazels and alders have flung their delicate tassels to the wind, the whole array of spring flowers is upon us—seven species of violets, blue and white (the yellow I have never seen in the town limits, though I have found it in the neighborhood); the wood anemone, with its neat and prettier relation the rue anemone, the columbine or honeysuckle, the houstonia, the false Solomon's seal, often called wild lily of the valley, and that little marvel of beauty and color, the fringed polygala, the marsh marigold, under the false name of 'cowslip,' lighting up the meadows with its brilliant yellow, and occasionally, on some rocky land, the early saxifrage, the bell-blower with its pale yellow lily-like flower, and deep in some pine grove the moccasin flower or lady's slipper, one of the most curious of the remarkable family of orchids, the trillium or wake Robin, which among us is represented by its least attractive form, the nodding species—these, with many others, make up what may be called the spring flowers. Then the shrubs begin to blossom—the shad-bush, the rhodora, with its purple flowers, followed by the many viburnums and cornels, the wild cherry, the choke, and the more palatable black or rum-cherry, the barberry, with its nodding raceme of yellow flowers, whose sensitive stamens throw the pollen on to any insect visiting it, to be borne to some other flower; the low

and high bush blueberry, huckleberry and the azalea, with its clammy white and spicy flowers.

"About the middle of June, in the meadows, will be found the side-saddle flower, more commonly known as huntsman's-cup or pitcher-plant; about the same time of the year, and generally with the side-saddle flower, are found two of our early orchids, the arethusa and pogonia or adder's-tongue, resembling each other in shape,—the former of a deep magenta color and the latter much paler, but with a delicious fragrance. A little later, in these same meadows, will be found the yellow lily, the tall meadow-rue, the trumpet-weed with its large heads of dull purple and the button-bush with its globular head of flowers, while hidden in the grass, but making itself known by its odor, is the meadow mint. Then along some water-course, either ditch, brook or meadow, bursts forth the flaming cardinal flower, one of the brightest and most brilliant of all our flowers, and never so handsome as when seen in abundance in its native place. With this fore-runner of autumn come the goldenrods; the clematis, clothing the bushes over which it climbs with a beautiful wreath of white flowers, followed by the feathery fruit; the ground-nut, with clusters of fragrant chocolate-colored flowers; the clethra or white alder lining the road in some swampy place and sending forth a rich spicy odor from its pure white spikes; then the asters, purple and white, along the roads, the woodlands and meadows, of as many species and as difficult of determination as the golden-rods; the gerardias, the tall yellow and the smaller purple species; the gentians, the deep blue with its closed flower, and among our latest, if not the last of all, the fringed gentian, by many considered our most exquisite flower. The only companion of the gentian is the witch-hazel, with its weird-like yellow blossoms, which comes late in the fall and does not mature its fruit till the next season.

"The plants found in and along the river seem worthy of special mention. Among the earliest is the yellow water-crowfoot, which is found in May, and resembles a large buttercup. Later in the season the shores are lined with the blue pickerel-weed and the white arrow-head, while farther out are the white and yellow pond lilies,—the latter in two species, one much larger than the other; the bladder-worts are also found. "In August the hibiscus or swamp rose-mallow may be found on its banks, while in the river itself is the water-marigold and the beautiful floating-heart.

"The family of composites is largely represented at all seasons of the year. The dandelion, golden-rods, asters, cone-flower, wild sunflower, trumpet, iron-weed, thistle, hawk-weeds, climbing hemp-weed, elecampane, white-weed or ox-eye daisy, and tansy are of this family. Among the orchids are the lady's-slipper, pogonia and arethusa, four or five species of rein-orchis, including the ragged-fringed and the pur-

ple-fringed, the rattlesnake plantain, two species of ladies' tresses, the calopogon and rarely the coral-root.

"There are a few parasitic plants found in Bedford, the dodder being one of the commonest; the Indian-pipe is found in some of our woods and in many pine woods, the pine sap or false beechdrops, and rarely the one-flowered cancer-root. Rushes, sedges and ferns are also found here and furnish interesting study to any one enjoying the science of botany."

CHAPTER LXXXV.

BEDFORD—(Continued).

Early Method of Collecting Taxes—Some Early Customs and Improvements.

FOR many years the town was divided for the purpose of taxation into classes. They were designated as the south list and the north list. The two constables were the authorized collectors and the duty of levying the tax fell to the selectmen. The tax for each department of government was assessed by itself, which made the duties of these officers the most important within the gift of the town.

In the year 1736, after the expenses of organizing the town and church had been met, the rates and portions were as follows and entered upon the records as here given:

	£.	s.	d.		£.	s.	d.
Province tax					67	2	6
Nathaniel Page is to collect	36	6	3	North			
Daniel Taylor is to collect	30	13	9	South			
County tax					4	9	6
Nathaniel Page is to collect	2	8	3	North			
Daniel Taylor is to collect	2	1	3	South			
Rev. Mr. Bowes' salary					120	0	0
Nathaniel Page is to collect	64	14	2	North			
Daniel Taylor is to collect	55	5	10	South			
Town and School tax					91	9	0
Nathaniel Page is to collect	49	11	8	North			
Daniel Taylor is to collect	41	17	4	South			

Constables were required to use severe means, even to resort to imprisonment, to secure the collection of the "rates."

The following is a copy of the warrant issued to the constable for the collection of the taxes in 1743: (But two punctuation marks appear in the original, and they might be regarded as accidental)

"Middx Sa. To Zacheriah Fitch one of the cons^t of the Town of Bedford Greeting In his Majesty's name you are Required to levy and collect of the several parsons named in the list herewith committed unto you each his respective proportion therein set down of the sum total of such list being fare assesment granted and agreed upon by the Inhabitants of the town of Bedford Regularly assembled for defreying the necessary charges arising with in the same and to deliver and pay lu the sum and sume which shall so levy and collect unto John Whitmore Town Treasurer or where you shall have orders from the selectmen, and to compleat and make up an account of your collections of the whole sum at or before the first day of June next in serving the date hear of and if any parson or parsons shall neglect or refuse to make payment of the sum or sume wherbeat he or they are Respectively assessed and set in the

said list to destrain the goods or chattles of such parson or parsons to the value thereof and the distress or distresses so taken to keep by the space of four days at the cost and charge of the owner and if the owner do not pay the sum or sume of money so assessed upon him with four days than the sd distress or distresses so taken you are to expose and openly sell at an out-cry for payment of sd money and charges notice of such sail being posted up in some publick place within the same Town Twenty fore hours before hand and the over plus coming by the sd sail if any be beside the sum or sume of the assesment and the charges of taking and keeping of the distress and distresses to be Immediately restored to the owner and for want of goods or chattels whereon to make distress you are to seese the bodle or bodies of the parson/or parsons so refusing and him or them commit unto the common goal of the said County there to remain until he or they pay and satisfie the several sum or sume wherbeat they are Respectively assessed as aforesaid unless upon application made to the Court of general Sessions of the peace the same or any part thereof be abatted

Dated in Bedford october y^e 17th day 1743
by orders of the assessors ISRAEL PUTNAM
Town Clerk."

The following is the tax-list of Bedford in 1748:

South List.—Samuel Bacon, Stephen Davis, James Dodson, Joseph Fitch, Zacheriah Fitch, Peter Fasset, John Fasset, Benjamin Fasset, Joseph Hartwell, Henry Harrington, William Hastings, James Houston, John Merriam, Anos Merriam, Samuel Merriam, Nathaniel Merriam, John Moore, Joseph Meads, Walter Powers, Paul Raymond, William Raymond, Edward Stearne, James Rankin, David Taylor, Thomas Woolly, Jonathan Woolly, Thomas Woolly, Jr., Richard Wheeler, Samuel Whitaker. North List.—Obed Abbot, Josiah Bacon, Josiah Bacon, Jr., Benjamin Bacon, Michael Bacon, John Bacon, Thomas Bacon, Jonas Bowman, James Chambers, John Corbet, Samuel Dutton, Benjamin Danforth, Cornelius Dandley, Benjamin Fitch, Jeremiah Fitch, Josiah Fasset, Jonathan Grimes, Benjamin Hutchinson, Timothy Hartwell, Benjamin Kidder, Deacon Job Lane, Col. John Lane, Capt. James Lane, John Lane, Jr., Job Lane, Jr., John Lane, (3d), Timothy Lane.

The basis of suffrage in 1810 appears in the warrant for the spring meeting: "To the freeholders and other votable inhabitants of said town, qualified to vote in town-meetings, namely, such as pay to one single tax, besides the poll or polls, a sum equal to two-thirds of a single poll tax."

In 1812 "a voter must have been a resident for the space of one year, and have been taxed during said time for his poll. The property qualification was then declared to be a "freehold income of ten dollars or other property valued at \$200."

The changes in the observance of funeral rites, as indicated by the records of this town, have been as great as in any direction. The custom of holding any religious service at the burial of the dead was not general when this town was incorporated, but it was the custom to furnish mourning friends with certain articles of wearing apparel, and the custom was observed in some families in a modified form until a much later date. The following receipt is self-explaining:

"Boston, June 24, 1715, Recd. of Mr. Job Lane, of Billerica, y^e sum of ten pounds, at twice, for gloves for y^e funeral of his father." "I say reced by me.—BENJ. FITCH."

Rev. Samuel Stearns was instrumental in breaking up the drink habit at funerals, which was carried to a most ridiculous extreme in some cases. In 1804 the town voted "That the practice of carrying round drink publicly or in a public manner, and also of inviting the bearers to return to the house of mourning after the funeral, be laid aside." It was also voted

"That notice be given to those who are desired to officiate as bearers, previous to the time appointed for attending the funeral. That two or more suitable persons be appointed by the town to superintend on these solemn occasions. That prayer be attended in one hour after the time appointed for the funeral." In 1817, after the erection of the new meeting-house, and purchase of the new bell, it was voted "That the bell should be tolled one hour before the time set for the funeral service. It was also customary to notify the people of the death of a fellow-citizen by tolling the bell and indicating the age of the deceased by the number of strokes of the bell. On the Sabbath following a death, all of the members of the family were expected to attend the service of public worship at the meeting-house and present written petitions for a remembrance in the "long prayer." The "note for prayers" was expressed according to the case—that of a widow was as follows: "Mrs. B. desires prayer that the death of her husband may be sanctified to her and her family for their spiritual good." Petitions were also sent in for prayers for recovery of the sick, or delivery from impending danger. It was expected that the pastor would make early calls on Monday following, upon all of the sick who had thus asked an interest in the public prayer.

In 1810 Mr. William Page gave a hearse to the town. Until that time the dead were carried to the burial-ground on the shoulders of men. When intoxicating liquor was too freely used the scene became most disgraceful. It was a repetition of these scenes that led to the action of reform by the town.

The erection of the frame of a building—"a raising"—was an occasion where the sublime and ridiculous were strangely combined. The people of the town assembled in large companies, and aided in putting the massive oak timbers together and pulling the frame into place, a side at a time. The minister was expected to attend and offer prayer during the work, and all were treated to as much liquor as they would drink. At the raising of Colonel Timothy Jones' house, about the year 1780, tradition says, the Rev. Mr. Penniman gratified his appetite for strong drink so much that he offered one of his most peculiar addresses to the Deity, and when returning home fell from his horse and lost his wig. This was found by the boys, and some days later put in a hollow log near his house, when the owner was called upon by the boys to assist in capturing a wood-chuck that had lodged in the log, and there found his much-needed article of dress, instead of the little animal.

BIOGRAPHICAL.

WILLIAM RICHARDSON HAYDEN, M.D.

The subject of this sketch was born in Salem, Mass., May 7, 1820, in a house on the opposite corner to the one in which White was murdered by the Knapps

and Crowninshield. In 1821 his parents removed to Moultonborough, N. H., where they lived a few years, and William was sent to the village school for a brief term. The family next moved to Boston, which was to be the scene of the boy's development into manhood. He attended the North Bennet Street School, under the instruction of "Master Capen." His father was lost at sea, and the family having no reserved means, the mother was thrown upon her own resources for their support.

About this time William entered the law-office of the Hon. James T. Austin & Sons, Joy's Building, as errand boy, for the liberal salary of one dollar per week, where he remained one year, at the end of which time he went to live in the family of Mr. Ansel Lucas, at South Abington, Mass., where he had the opportunity of attending school, and where he made good progress. At the end of eighteen months Mr. Lucas moved to Eel River, now Chiltonville, a suburb of Plymouth, where he remained until the death of Mrs. Lucas, who was a most estimable lady, and very much beloved by all who knew her.

William, who was then sixteen years old, returned to Boston, to be his own lord and master, with but little experience in the ways of the business world. Being of a sanguine temperament the future appeared to him to be all beauty and sunshine. Oh, Youth! Oh, Hope! angels of beauty and love, you are kind only to be cruel, and when dark clouds overcast your gorgeously painted sky, despair is near. William soon found that the price of honest bread was labor, and that he must find employment, which he did with Mr. Tucker, one of the original conductors on the Boston & Worcester Railroad, in delivering letters, packages and money parcels from the railroad to parties in Boston, dividing with Mr. Tucker the proceeds of this primitive express business. At that time Mr. Harnden was ticket master in the Boston & Worcester depot, which position he resigned to succeed young Hayden, and at that time commenced the regular express business between Boston and New York, which has now become so important and extensive.

The next scene was the pit of the old Flag Alley Theatre, and the first appearance of our hero in a play-house. The mimic world was a new revelation, and from that hour he was simply "stage-struck." Helung around the stage-door to see the tinsel kings, queens and villains enter and exit. They were the beings of romance.

The next scene was the old Fredonia Society, in Devonshire Street, where John B. Gough, William O. Eaton, John Salmon, George A. Wyatt and other noted amateurs delighted the "Hoodlums" and our subject played *Doric* in "A Race for a Dinner." The favor accorded to the Fredonia gave life to the Historic Society, which was well fitted up for the times in Castle Hall, corner of Castle and Washington Streets, which sent forth several noted actors, amongst them James Stark, Octavus Johnson, Harry Paul

W. P. Hayden

and others. There was a rivalry between Stark and Hayden for leading parts. At one time Mr. Stark, being manager, and desiring to play the leading part in the play called "The Seven Clerks; or, The Three Thieves and the Denouncer," cast Hayden in a minor comic part out of his line, much to his chagrin. Feeling the slight and that he should not do himself credit, he went on the stage sure that he would fail, but instead of that he made a brilliant success, playing the part twenty-one nights to overflowing houses. He was afterwards elected president and manager of the society, but as there was no income from amateur theatricals, he entered the Old National Theatre under William Pelby as a supernumerary and assistant property man.

The child prodigy, Miss Davenport, during an engagement at "The National," in one scene of a play in which she appeared had to pay off some factory help, who filed before her and received their tin money. Several passed her in due order accepting their pittance, when our hero, being the last and not being satisfied with his part and aspiring to be author and actor, accepted the coin with all the disdain of which he was master, threw it upon the stage, and with folded arms stalked down to the foot lights and out at the prompter's entrance. The audience saw the "gag" and cheered the "supe" to the echo. Manager Pelby was a witness of the *debut*, and coming down to Wright, the prompter, exclaimed, "Who in hell is that boy?" On being informed he said, "Give him some small business; he will rise." Desiring to obtain a position in the company of the Old Lion Theatre, there being no opening for a novice, he accepted a place as a supernumerary in the play of "Mazeppa." The actor who had a short speech to make as a sentinel on a bridge, being taken suddenly ill, the manager gave orders to have one of the supernumeraries placed on the bridge and when Mazeppa entered the wing and motioned him to go off, he should do so. Hayden was the one placed there, and having become familiar with the lines, he, instead of leaving the bridge, went on with the part, much to the surprise and satisfaction of the manager, and continued in the part until the piece was withdrawn. He next joined a strolling company of players as leading man and "did" some of the prominent towns in this State. The business was bad, the manager stranded, and his company with empty pockets were obliged to "foot it to Boston." Mr. Hayden established the *Dramatic Mirror*, which, however, after a few months, died of what the doctors would call "marasmus." He next became a clerk for Mr. George W. Redding, a news agent at No. 8 State Street, Boston.

When W. H. Smith, the eminent actor, was manager of the Boston Museum, he gave Mr. Hayden an engagement at that theatre, but on account of sickness this engagement was canceled, and, much to his regret, his theatrical career closed.

Dr. Hayden has been thrice married—first to Re-

becca Wyman Erskine, in 1840, by whom he had three children, one of whom still survives (Mrs. R. W. Rouse, of Port Richmond, New York). Mrs. Hayden died in 1847.

For his second wife, in 1850, he married Maria B. Trenholm, of Falmouth, a lady possessing remarkable intellectual abilities. In 1866 she graduated in New York as a physician, and for several years had a large and influential practice, and was on the Board of Medical Censors. Mrs. Hayden had four children, two of whom survive her, she dying in 1884.

In 1885, for the third wife, he married Sarah Holden Everett, by whom he has three children, who are now living.

In 1845 he commenced the study of medicine, graduating in New York City, where he followed his profession for eleven years, when he moved East to accept the presidency of the New York Pharmaceutical Company the laboratory of which is now in successful operation, making 350 medicinal preparations for the physicians and druggists, three of them being specialties from original prescriptions of Dr. Hayden, and are in high repute with the medical profession. They are THE COMPOUND PHOSPHORUS PILLS, THE URIC SOLVENT and HAYDEN'S VIBURNUM COMPOUND, the latter having a most extensive sale, and being of a remarkable character. The company has received and published the written testimonials of more than five thousand physicians, being more than was ever before given by the profession for any other special remedy in the history of medicine. At the end of the first year after the incorporation of the company it virtually failed, and proposed to close up the business. To this Dr. Hayden objected and endeavored to arrange to carry on the works on his own responsibility. After much negotiation a trade was made, which at the end of twenty-four years is a great success.

In 1867, when Dr. Hayden came to Bedford, there was no railroad nearer to Bedford and the Springs than Lexington (six miles distant). Dr. Hayden went before the Legislature and obtained a charter for a line from Lexington to Bedford, which was built by the Middlesex Central Railroad Company.

The next move was for a narrow-gauge road from Bedford to the Springs and North Billerica, which was also built, Dr. Hayden being the second president of the road, which practically was a success. Dr. Hayden, who desired this road changed to a standard-gauge road, enlisted in its behalf the co-operation and able services of Mr. Mellen, the general manager of the Boston & Lowell Railroad, without whose favor it would not have been done. Some idea may be gained of Dr. Hayden's labors when we state that at one time he was president of the New York Pharmaceutical Company; working chemist and pharmacist, doing all the compounding in the laboratory; landlord of the Springs House Hotel for sixteen years; having for six or eight years the larger part of the

practice in the town of Bedford, two miles distant; visiting Boston upon an average of five times a week; having for the past twenty-five years written all the company's hand-books and advertisements, attending to the general business, and carried on a farm of forty acres. During Dr. Hayden's residence in Bedford he has served the town one term on the Board of Selectmen, and two terms on the School Board, and received a very large majority of the votes of the town for the Legislature. During the past three years Dr. Hayden has built two laboratories and one of the most beautiful houses in the country, and made an extended tour of Europe, from Ireland to Italy, Austria, Switzerland, France, Belgium, Holland, Germany, England and Scotland.

Dr. Hayden has visited Europe several times and made the acquaintance of some distinguished men, among them Lord Lytton (Bulwer Lytton) Professor John Ashburner, Louie Blond, the Rev. James Smyth, and the great Robert Owen, Robert Chambers and many others, and in this country he enjoyed the personal acquaintance of William Lloyd Garrison, Horace Greeley, Theodore Parker and other reformers.

Bedford Springs, the residence of Dr. Hayden, is one of the most beautiful spots in New England, sixteen miles from Boston, on the Bedford and Billerica Railroad. The estate comprises about two hundred acres of cleared and wood land, one of the largest artificial lakes in the State, a summer hotel, three medicinal springs, railroad station, express and post-office, and is a little world in itself.

In religion Dr. Hayden is an agnostic, in politics a progressive Republican, believing in the party when it is in the right, but never when in the wrong. His creed is, "Right and Justice for all men and women alike."

JONATHAN BACON.

Jonathan Bacon was descended from Michael Bacon, who went from England to the north of Ireland, where he lived for several years, when, in 1640, he came to this country and settled in Connecticut. Michael Bacon, son of Michael, settled in that part of Billerica which is now within the limits of Bedford. He built a saw and grist-mill on Shawshine River, which was burned by the Indians in King Philip's War. At his request a military guard was detailed for his protection, and his mill was rebuilt. A saw and grist-mill, owned by Charles Clark, now stands on the site occupied by him. In the early history of Bedford, which was incorporated in 1729, the Bacon family was a prominent one. In a petition to the selectmen of Concord for permission to be set off as a new town, dated May 1, 1728, the name of Joseph Bacon appears, and at the first town-meeting of Bedford, held October 6, 1729, Jonathan Bacon was chosen one of the Board of Selectmen. Among the taxable inhabitants of Bedford, in 1748, were Samuel

Bacon, Josiah Bacon, Josiah Bacon, Jr., Benjamin Bacon, Michael Bacon, John Bacon and Thomas Bacon. In 1780 Jonas Bacon enlisted as a soldier in the Revolution, and Jonathan Bacon was one of the signers to the covenant of the first church in Bedford, organized immediately after the incorporation of the town. Benjamin Bacon, who was born December 6, 1713, and died October 1, 1791, was chosen a deacon of this church February 15, 1759.

Thompson Bacon, son of John Bacon, of Bedford, and a member of this family, married Martha Hosmer and had nine children—Jonathan, John, Reuben, Elbridge, Thompson, Eliza, Nancy, Octavius and Albert. Of these, Reuben was an extensive manufacturer of shoes in Bedford, and Albert is still living in his native town. Another of these children, Jonathan, the subject of this sketch, was born in Bedford April 15, 1785. With only the advantages of a common-school education, he was in his early life employed on his father's farm. Possessing a naturally thoughtful mind, his attention was soon turned to mechanical pursuits, in which he displayed an ingenuity which laid the foundation of his eventual success. Associated with John Hosmer, he was the first in this country to engage in the manufacture of women's and children's shoes, and his careful management resulted in the establishment of a profitable enterprise, which gradually increased and before many years was carried on by a considerable number of firms.

In connection with his shoe business he made patterns for lasts, and for shoes, which he manufactured himself, and thus opened the way for the display of his inventive powers in a broader field. He soon found that new mechanical enterprises, more congenial to his tastes, required the abandonment of his manufacture of shoes, and, selling out that business, he ever after devoted himself to inventive study and the manufacture of such devices as were its result, and their sale to the trade. George H. Gray, Joseph West, Charles Brooks and Horton, Hall & Co., of Boston, were among the principal dealers in his articles of manufacture. Among these devices were sash and blind fastenings, latches and various carriage appliances, of which the article known as "Bacon's Patent Lever Blind Fastener" has been for upwards of fifty years on the market, and has never yet been equalled by anything used for the same purpose.

Mr. Bacon married Abigail, daughter of Eben Clark, of New Ipswich, New Hampshire, an officer in the Revolution, and at one time on the staff of General Washington. His children were Abigail, who married William Ripley, of Abington; Clark, who married Emma C. Burr, of Hingham; Frederick, who married Ann Robbins, of Bedford; Caroline, who married Isaac Hurd, of Concord; Eliza, who married Prescott J. Bigelow, of Abington; Warren, who married Lucy A. Lawrence, of Bedford; Jerome A., who married Marion M. Darling, of Boston, Eliza F. Merriam, of Boston, and Anna R. March, of Bedford;

Jant Bawon

and Emma A., who married Sebastian Kramer, of Boston.

Mr. Bacon, though largely interested in public affairs, neither sought nor accepted office except such as he believed that he could administer for the benefit and welfare of his native town. He was chairman of the Board of Selectmen of Bedford for many years, only consenting to an election because he believed it the duty of every citizen to bear his share of town burdens, and to perform his part of a townsman's duty. Further than this he refused to go, and at one time declined a nomination (equivalent to an election) to the State Senate. In politics he was a Federalist and Whig, and as long as he lived, after the organization of the Republican party, he was one of its devoted members. Civil Service Reform, so far as a part of its policy is concerned, would, if he were now living, be no novelty to him.

As long ago as August 28, 1840, during the Harrison campaign, he drew up and signed a constitution for a political association advocating the election of General Harrison as President, in which opposition was declared "to members of Congress distributing executive patronage until two years after they had ceased to be such." He belonged to that class of men whom older readers well remember, distributed all over the Commonwealth, one in almost every town, who ruled the communities in which they lived, not by wire-pulling and trickery and self-seeking, but by advice and counsel, sought and followed on account of their wisdom, and by an honest and earnest effort to put the best men in office, and thus promote and secure the public welfare.

In theology he belonged to what was called in his day the liberal wing of Orthodoxy, and remained in the old church and parish when they became Unitarians and the conservative wing seceded. In the controversy which followed the division of the church, in which it was claimed that the property of the old territorial parish belonged to the town, he took an active part, and the claim, largely through his efforts, was successfully resisted.

It will not be difficult to portray the character of the man thus briefly sketched. With a mind elastic and susceptible of expansion and growth, with a training which had implanted within him a love of truth, integrity and faithful labor, he combined a tenderness of spirit and an affection for his family and home, a regard for public interests and a respect for the rights and comfort and welfare of those about him, which made him a conspicuous figure in his town, and one receiving the entire confidence of his friends and neighbors.

His son, Jerome A. Bacon, is one of the eminent and successful merchants of Boston. Receiving his early education in the public schools of Bedford and at the Lawrence Academy at Groton, at the age of nineteen, though fitted for college, he became the apprentice of his brother, Clark Bacon, who was engaged in

Boston in the manufacture of gold leaf, foil and plate. So faithful was he in his work that, after a few months, apprentices were placed under his charge, and at the age of twenty-three he removed to Bedford and there established the same business on his own account. After a few years, upon his father's death, which occurred in August, 1856, he removed to Boston and engaged in the manufacture and sale of paper, which he has since carried on with eminent success.

CHAPTER LXXXVI.

LITTLETON.

BY HERBERT JOSEPH HARWOOD.

THE origin of the Indian town of Nashobah, which once occupied the greater part of the territory now Littleton, is traceable directly to Rev. John Eliot, the apostle to the Indians and the translator of the Bible into the Indian language. He began to preach to the Indians in 1646 at Nonantum, a part of Newton. Many became converted to Christianity and expressed a desire to become civilized and to live more like white people. Eliot advised them to adopt the government which Jethro proposed to Moses for the Israelites in the wilderness (Exodus xviii. 21), and to choose rulers of hundreds, of fifties and of tens; he also advised that they live in towns apart from the white people, and accordingly obtained from the General Court a grant of territory at Natick, where the "praying Indians," as they were called, formed their first town in 1651.

Other towns of the same kind were formed soon after, and among them Nashobah.

The Indians of this neighborhood were among the first to listen to Eliot's preaching, and Tahattawan the elder, sachem of Nashobah, was, according to Shattuck's "History of Concord," one of the first converts.

Rev. Thomas Shepard, of Cambridge, in his "Clear Sunshine of Gospel," speaking of the Indians and Mr. Eliot's preaching, says: "The last effect was their desire of having a town given them within the bounds of Concord near unto the English."

Among the orders and regulations for the Indians, agreed to at Concord, January, 1646, is the following: "29. They desire they may be a town and either dwell on this side of Beaver Swamp (in Lincoln) or at the East side of Mr. Flint's Pond."

It would seem from these facts that the praying Indians of this vicinity had it in mind to form a town in or near Concord for several years before they were granted the Nashobah plantation, and that they had discussed different localities.

It would be interesting if we knew more about Eliot's preaching to the Nashobah Indians, that he

stood on such a spot on such a day, that he came again on such a day, etc., etc.; but I have been unable to find any record of his coming to this vicinity. That both Eliot and Gookin came here I have no doubt, for it is known that they were in the habit of going about to all the settlements of praying Indians.

From the fact that Tahattawan the elder was among the first of the converts we may conclude that he first listened to Eliot's preaching at Newton or in that neighborhood, and it may be that by his invitation the apostle afterwards came up into the wilderness beyond Concord; but these are mere conjectures.

In May, 1654, Mr. Eliot petitioned the General Court for the incorporation of several Indian towns; the part of the petition which interests us reads as follows: "First, therefore the inhabitants of Nashoba living 7 or 8 miles west of Concord, desire to have liberty to make a towne in y^e place, with due accommodations thereunto. And though Concord have some conditional grants of lands y^e way, yet I understand that we shall have a loving and Christian agreement betwixt them and the Indians."

The petition is dated Boston, 4th of the 3d (May), 1654.

In the General Court records, under date of 14th of May, 1654, is the following:

"To asse^s the petition of Mr. Jno. Elliott, on behalf of severall Indians, the Court graunts his request, viz.: liberty for the inhabitants of Nashob [Nashobah] and to the inhabitants of Oskoontiquokames [Marlborough] and also to the inhabitants of Hasnemesucloth [Grafton] to erect severall Indian townes in the places propounded, wth convenient accomodacion to each, provided they p^rjudice not any former graunts; nor shall they dispose of it wth out leave first had and obtained from this Court."

In reference to the incorporation of Nashobah, Mr. Shattuck, in his "History of Concord," says:

"Nashobah, lying near Nagog Pond, partly in Littleton and partly in Acton as now bounded, accordingly became an Indian town; and here a part of the Praying Indians in Concord, with others in the vicinity, gathered and adopted civil and religious order, and had a Ruler and other municipal officers, though no church was formed. Such as were entitled to Christiana ordinances probably went to Natick to celebrate the communion after a church was organized there in 1660."

Let us hope that the last part of the quotation from Mr. Shattuck is more trustworthy than the first; he gives no authority for saying that Nashobah was "partly in Acton," and I am inclined to think that he drew on his imagination for the statement, as I am unable to find any authority for it whatever, while, on the contrary, I have been able to locate the original Nashobah with tolerable accuracy, as I shall show hereafter, and am morally certain that the town of Concord never had a valid title to one inch of the land where the Indian town was laid out, and consequently that it was never "partly in Acton," which, as we all know, was set off from Concord.

We will drop the question of boundary for the present and take it up later. It may seem a little peculiar that the white people, who had taken pos-

session of all Massachusetts, with very little regard to the Indians, who had occupied it from time immemorial, should gravely grant back to them a small portion with restrictions; but such is always our "Indian policy."

The white people took possession of all the land in the Colony by virtue of their charter from the Crown of England, and the Crown protected them merely by its power.

Thus we see why it is that Indian deeds are and were of little value in conveying a title, for the Indians, having no stable government, had no power to enforce a title, and therefore a title acquired from Indians could not stand against one from the Crown.

Daniel Gookin, in his "Historical Collections of the Indians in New England," chapter vii. § 10, says: "Nashobah is the sixth praying Indian town. This village is situated, in a manner, in the centre, between Chelmsford, Lancaster, Groton and Concord. It lieth from Boston about twenty-five miles west north west. The inhabitants are about ten families, and consequently about fifty souls.

"The dimensions of this village is four miles square. The land is fertile and well stored with meadows and woods. It hath good ponds for fish adjoining to it. The people live here, as in other Indian villages, upon planting corn, fishing, hunting and sometimes labouring with the English. Their ruler, of late years, was John Ahatawance [Tahattawan], a pious man. Since his decease, Pennakennit [or Pennahannit] is the chief. Their teacher is named John Thomas, a sober and pious man. His farther was murdered by the Maquas in a secret manner, as he was fishing for eels at his wear, some years since, during the war. He was a pious and useful person, and that place sustained a great loss in him. In this village, as well in other old Indian plantations, they have orchards of apples whereof they make cider, which some of them have not the wisdom and grace to use for their comfort, but are prone to abuse unto drunkenness.

"And although the laws be strict to suppress this sin, and some of their own rulers are very careful and zealous in the execution of them, yet such is the madness and folly of man naturally, that he doth eagerly pursue after that which tendeth to his own destruction.

"I have often seriously considered what course to take to restrain this beastly sin of drunkenness among them; but hitherto cannot reach it. For if it were possible, as it is not, to prevent the English selling them strong drink; yet they, having a native liberty to plant orchards and sow grain, as barley and the like, of which they may and do make strong drink that doth inebriate them, so that nothing can overcome and conquer this exorbitancy but the sovereign grace of God in Christ, which is the only antidote to prevent and mortify the poison of sin.

"Near unto this town is a pond, wherein at some seasons there is a strange rumbling noise, as the Indians affirm; the reason whereof is not yet known. Some have conceived the hills adjacent are hollow, wherein the wind being pent, is the cause of this rumbling, as in earthquakes.

"At this place they attend civil and religious order, as in other praying towns, and they have a constable and other officers.

"This town was deserted during the Maquas War, but is now again re-peopled and in a hopeful way to prosper."

This, then, was the state of affairs in 1674, the date of Gookin's writing.

The pond where the rumbling noise occurred is, of course, Nagog. Traditions are plenty of rumbling noises, sometimes said to be like the discharge of cannon in the vicinity of Nashoba Hill, which is near Nagog Pond, but I have not heard of any occurring of late years. They were probably earthquakes.

John Ahatawance, mentioned by Gookin, was Tahlattawan the younger, son of the elder of the same name.

Pennahannit, also called Captain Josiah, was the "marshal general" of all the praying Indian towns.

In the year following Gookin's account came King Philip's War, which proved disastrous to the Nashobah Indians, owing to the distrust of their loyalty to the Colony, and fears of their joining Philip and perhaps endangering their neighbors, the white people. I have never found that there were any grounds for these fears; but no Indian was trusted, and the atrocities of the hostile ones made the name Indian odious everywhere.

In the Massachusetts Archives, vol. 30, page 185, I find the following under date of November 19, 1675:

"It is ordered By the Counsell that the comitte of militia of Concord and the select men of that towne with the advice of Major Willard do dispose & order matters referring to the Indians of Nashobah that have subjected to this Governon, & to settle & secure y^m in the towne of Concord under the inspection of John Hoare of Concord; (Who hath manifested himself willing to take s^y care of them & to secure them by day & by night) & to see they bee employd to laubor; for their lively hood that the cuntry may be eased; or in case they cannot or do not agree wth John Hoare aforesaid y^t they are impoured to contract wth any other person or persons in the said towne, for the same end, or to please the said Indians or ay of them to servise, provided the mayoe end bee attained vizt.: that the indians may be employed to laubor & perserved from dange & the cuntry & towne secured.

* Past by y^e Councel 19th of November, 1675.

"E. R. S."

Also the following :

"9 Dec., 1675. It is ordered that Major Willard, Capt. Gookin with Mr. Elliot by the first opportunity are to repayre to Concord and Chelmsford & to examin those Indians there, & to use their best endeavor to settle them in such a posture either at Deare Island or in the place where they live so y^t they who are friendly to the English may secured & and the English in those parts also secured & as much as may satisfied with their settlement and the said comitte or any two or three of them & impoured to effect this matter & they are to use their best indevor that those Indians may be employd & kept to laubor & take care they be all disarmed.

"9 December 75 Past by y^e Councel

"EOW. RAWSON, Secy."

In accordance with these orders, the Indians of Nashobah were taken to Concord and put in charge of John Hoar, who kept them employed and contented for a short time. Hoar was compensated for his trouble by being exempted from impressment and, perhaps, taxation.

Gookin, in his "History of the Christian Indians," gives the following interesting account of this episode :

"About this time there befell another great trouble and exercise to the Christian Indians of Nashobah, who sojourned in Concord by order; the matter was this. The Council had, by several orders, empowered a committee, who, with the consent of the selectmen of Concord, settled those Indians at that town, under the government and tuition of Mr. John Hoare; the number of those Indians were about fifty-eight of all sorts, whereof were not above twelve able men, the rest were women and children. These Indians lived very soberly, and quietly, and industriously, and were all unarmed; neither could any of them be charged with any unfaithfulness to the English interest.

"In pursuance of this settlement, Mr. Hoare had begun to build a large and convenient work-house for the Indians, near his own dwelling, which stood about the midat of the town, and very nigh the town watch-house.

"This house was made, not only to secure those Indians under lock and key by night, but to employ them and to set them to work by day, whereby they earned their own bread, and in an ordinary way (with God's blessing) would have lived well in a short time. But some of the inhabitants of the town, being influenced with a spirit of animosity and distaste against all Indians, disrelished this settlement; and therefore privately sent to a Captain of the army, [Captain Mosely] that quartered his company not far off at that time, of whom they had experience, that he would not be backward to put in execution anything that tended to distress the praying Indians; for this was the same man that had formerly, without order, seized upon divers of the praying Indians at Marlborough, which brought much trouble and disquiet to the country of the Indians, and was a great occasion of their defection; as hath been above declared.

"This Captain accordingly came to Concord with a party of his men, upon the Sabbath day, into the meeting-house, where the people were convened to the worship of God. And after the exercise was ended, he spake openly to the congregation to this effect: 'That he understood there were some heathen in the town, committed to one Hoare, which he was informed were a trouble and disquiet to them; therefore if they desired it, he would remove them to Boaton;' to which speech of his, most of the people being silent, except two or three that encouraged him, he took, as it seems, the silence of the rest for

consent; and immediately after the assembly was dismissed, he went with three or four files of men, and a hundred or two of the people, men, women and children, at his heels, and marched away to Mr. Hoare's house and there demanded of him to see the Indians under his care. Hoare opened the door and showed them to him, and they were all numbered and found there; the Captain then said to Mr. Hoare, 'that he would leave a corporal and soldiers to secure them;' but Mr. Hoare answered, 'there was no need of that, for they were already secured, and were committed to him by order of the Council, and he would keep and secure them.' But yet the Captain left his corporal and soldiers there, who were abusive enough to the poor Indians by ill language. The next morning the Captain came again to take the Indians and send them to Boston. But Mr. Hoare refused to deliver them unless he showed him an order of the Council; but the Captain could show him no other but his commission to kill and destroy the enemy; but Mr. Hoare said, 'these were friends and under order.'

"But the Captain would not be satisfied with his answer, but commanded his corporal forthwith to break open the door and take the Indians all away, which was done accordingly; and some of the soldiers plundered the poor creatures of their shirts, shoes, dishes, and such other things as they could lay their hands upon, though the Captain commanded the contrary. They were all brought to Charlestown with a guard of twenty men. And the Captain wrote a letter to the General Court, then sitting, giving them an account of his action.

"This thing was very offensive to the Council, that a private Captain should (without commission or some express order) do an act so contradictory to their former orders; and the Governor and several others apace of it at a conference with the deputies at the General Court. . . .

"The Deputies seemed generally to agree to the reason of the Magistrates in this matter; yet notwithstanding, the Captain (who appeared in the Court shortly after upon another occasion), met with no rebuke for this high irregularity and arbitrary action. To conclude this matter, those poor Indians, about fifty-eight of them of all sorts, were sent down to Deer Island, there to pass into the furnace of affliction with their brethren and countrymen. But all their corn and other provision sufficient to maintain them for six months, was lost at Concord; and all their other necessaries, except what the soldiers had plundered. And the poor Indians got very little or nothing of what they lost, but it was squandered away, lost by the removal of Mr. Hoare and other means, so that they were necessitated to live upon clams, as the others did, with some little corn provided at the charge of the 'Honorable Corporation for the Indians,' residing in London. Besides, Mr. Hoare lost all his building and other cost, which he had provided

for the entertainment and employment of those Indians; which was considerable." This was in February, 1675-76.

In another place Gookin relates that fourteen armed men of Chelmsford went to the Indian camp at Wameset, near by, and called on them to come out of their wigwams, whereupon they fired on the unsuspecting Indians, wounding five women and children and killing outright the only son of John Tahattawan, of Nashobah, a boy twelve years old, and wounding his mother, Sarah or Kehonowsquaw, then a widow, the daughter of Sagamore John, of Pawtucket.

She was then a widow for the second time, having had as her second husband Oonamog, ruler of the Praying Indians at Marlborough.

William Nahaton, or Tahattawan, a brother of John Tahattawan, was among the Indians at Deer Island, and was one of the six selected to serve as guides under Major Savage, in March, 1675-76.

Tom Dublet, or Napanet, was another of the Nashobah Indians who proved of great service to the English in treating with the hostile Indians and redeeming prisoners. He it was who procured the release of Mrs. Rowlandson and others.

For one of these expeditions, which was successful in ransoming prisoners, an order was passed by the General Court awarding him two coats.

His wigwam was near the present residence of Mr. Joel Proctor, and his favorite "hole" for fishing is pointed out some distance down the brook.

There were white people living at this time in the part of the present town of Littleton which we designate as Nashoba, but which was not within the Indian plantation, but was part of Concord Village, so-called, and was sometimes designated as Powers' Farm and Nashoba Farm.

The Reed house, the ruins of which are still to be seen at the foot of Nashoba Hill, was built as a garrison, probably about this time, for protection against hostile Indians.

A family by the name of Shepard was living in the vicinity during King Philip's War, and in February, 1675-76, Abraham and Isaac Shepard, two brothers, were killed by Indians as they were threshing in their barn. They had set their sister Mary, a girl of fifteen years, to watch on Quagana Hill, near by, but the Indians stole up behind, captured her before she could give an alarm and carried her away to Nashaway (Lancaster), where they encamped for the night. While the Indians slept she escaped, mounted a horse, swam the river, and rode home.

There may have been more of a village at Nashoba Farm than is now there. The ancient burying-ground, which was on the Reed Farm, was ploughed up several years since. Such desecration is shameful; but in the absence of records to show that it was ever set aside for a public burying-place, and never having been under the town's care, nobody felt

authorized to take action after the desecration took place; the contemplation of which was known only to the perpetrator, who claimed the land.

The tombstones were used in building a wall, and some were taken away as relics, so that now, probably, no vestige remains of the last resting-place of the earliest white settlers of this town.

East of where the burying-ground is said to have been may be seen a well-preserved dam, canal and mill-race beside the brook which runs through the woods.

Very few of the Nashobah Indians ever returned, but when released from Deer Island went to other places, the greater number to Natick. In the mean time white people moved into the deserted plantation, perhaps had done so to some extent before the Indians were removed, and settled there with no real right, save that of possession; for, though some bought land of the Indians, the latter had been expressly forbidden by the General Court to sell without its sanction.

Lieutenant Joseph Wheeler, of Concord, by trading with the Nashobah Indians while they still lived on their plantation, became their creditor, and petitioned the General Court in 1662 for a grant of two hundred acres of land in the south part of Nashobah in payment, but it was refused.

Peleg Lawrence and Robert Robbins, of Groton, were probably the first purchasers of Nashobah land from the Indians. A plan on file at the State-House, made by Jonathan Danforth, surveyor, and bearing date January 2, 1686-87, shows the Robbins and Lawrence tract as laid out in the northeast corner of the plantation, one-half mile wide by about two miles long; one side, the northerly, being just two miles, and the southerly a little longer.

It appears to have been supposed by these men and Groton people that the purchase of the land from the Indians brought it into Groton territory, and when, in later years, it was found that the jurisdiction over Nashobah lands was in question, and that other towns were preparing to annex it, Groton sought to strengthen her claim by getting possession of the Indian deeds. At a town-meeting in Groton, June 8, 1702, it was voted to give three acres of meadow land and ten acres of upland each to Robert Robbins and to the heirs of Peleg Lawrence, on condition that they give up their Indian titles to the town. Groton people or others who desired to belong to Groton also settled within the bounds of Nashobah, but outside of the Robbins and Lawrence purchase.

In the Middlesex County records I find that at court held at Charlestown, June 20, 1682, the following was entered:

"Captain Thomas Henshman, Lt. Jos. Wheeler & Lt. Jno. Synt surveyor, or any two of them are nominated & impowered a committee to run the ancient bounds of Nashobah Plantation, & remark the lines, as it was returned to the general court by said Mr. Synt, at the charge of the Indians, giving notice to the selectmen of Groton of time & place of meeting wch is referred to Mr. Synt, to appoynt, & to make return to next court at Camb. in order to a final settlement."

The return is as follows:

"We whose names are underwritten being appointed by y^e Honored County Court June 20th, 1682, To run the Ancient bounds of Nashobey, have accordingly run the said bounds, and find that the Town of Groton by their Secoud laying out of their bounde have taken into their bounds as we judge neer halfe Indian Plantation.

"Sevverall of the Select men and other inhabitants of Groton being there with us Did see theeres error therein & Do declare that laying out So far as they have Invaded the right of y^e Indians.

"Also we find y^e the Northwest Corner of Nashobey is run into ye first bounds of Groton to ye quantity of 350 acres according as Groton men did there Show us their Said line which they Say was made before Nashobey was laid out, and which bounds they Do Challenge as their Right.

"The Indians also have Declared them Selves willing to forego that Provided they may have it made up upon th^eire West Line.

"And we Judge it may be there added to their Convenience.

"2 October 1682.

"JOSEPH WHEELER,

"JOHN FLINT.

"Exhibited in Court & approved 3 : 8 : 82.

"T. D. R."

From a comparison of Jonathan Danforth's plan of Nashobah and the first plan of Groton, made by the same surveyor in 1668 and published by Dr. S. A. Green in his "Boundary Linea of Old Groton," with a modern county map, it will be seen where the 350 acres lay in which Nashobah and Groton overlapped each other.

The northwest corner of Nashobah was undoubtedly the same as the present northwest corner of Littleton, on the side of Brown Hill in Pingreyville, and very nearly a right angle. It was formed by the present westerly line of the town and a line whose general direction from the corner was easterly, and is laid down on Danforth's plan of Nashobah as a straight line, although records state that it ran by blazed trees which were *not* in a straight line.

The southeasterly line of Groton by Danforth's plan of that town ran from Forge Pond to a point near the Lactate factory, or between that and the "Newstate" railroad crossing; there it made an angle of about 150° and ran to a point at or near the present westerly corner of Littleton and northerly corner of Boxboro', from which point the Groton line ran northwesterly to what is now Shirley Village. It will be seen that the easterly end of Oak Hill and considerable land in the Pingreyville corner of the town must therefore have been included in the maps made by Danforth of both Nashobah and Groton.

To which plantation this 350 or more acres rightfully belonged is a question of great doubt.

The grant of the Indian plantation of Nashobah was in 1654, and though no area nor bounds were given, it was stated by Gookin in 1674 and by others to be four miles square; in reality it was only three miles on the north side.

The original grant of Groton was in 1655, and was stated to be a tract eight miles square, but when first laid out by Danforth in 1668 it was on the average about seven miles wide by eleven long.

Groton neglected to get Danforth's plan con-

firmed by the General Court until after Nashobah was incorporated for a second time as an English town in 1714, and then the overlapped territory had been confirmed to Nashobah.

In their report Messrs. Wheeler & Flint refer to a second laying out of Groton, by which, no doubt, was claimed the Robbins and Lawrence purchase and more too, as the amount of land within Nashobah claimed by Groton was stated in a legislative report by Jonathan Tyng, Thomas How and John Stearns in 1711 to be 7840 acres, and elsewhere that the line extended beyond Beaver Brook. It does not appear that Groton ever had any valid right to this tract, but after it was taken beyond their reach by the incorporation of Nashobah in 1714, Groton men had sufficient influence in the Legislature to procure the grant, mainly in lieu of it, of Groton Gore, so called—a tract not then included in any town, but in what is now Greenville, Mason, Brookline, Milford and Wilton in New Hampshire.

The next purchase of land from the Indians, after the Robbins and Lawrence tract, and the first one of which the deed is recorded, was made June 15, 1686, by Hon. Peter Bulkeley, of Concord, and Maj. Thomas Hinchman, of Chelmsford, who bought the easterly half of the plantation for the sum of £70. The Indian grantors were:

"Kehonowsquaw alias Sarah, the daughter and sole heiress of John Tahattawan, Sachem and late of Nashobah deceased; Naanishcow, alias John Thomas; Naanasquaw alias Rebeckah, wife to the said Naanishcow; Naashkinomenet, alias Solomon, eldest son of s^d Naanishcow and Naanasquaw, sister to the aforesaid Tahattawan; Weegraminomet alias Thomas Waban; Nackcominewock, relict of Crooked Robin; Wannuhew alias Sarah, wife to Neepanum alias Tom Dube let."

The description of the land is as follows:

"And it contains one moiety or halfe part of said Nashobah plantation, & the easterly side of it; It is bounded by Chelmsford plantation (about three miles & three-quarters) on the easterly side; by Concord village Land Southward, about two miles & three-quarters; Northward it is bounded by Land sold by the aforesaid Indians to Robert Robbins and Peleg Lawrence, both of Groton Town, which land is part of the aforesaid Nashobah plantation, & this Line is exactly two miles in Length & runs East three degrees Northerly, or West three degrees southerly, & the South end runs parallel with this Line: On the West-erly side it is bounded by the remainder of said Nashobah plantation; & that West Line runs (from two little maples marked with H for the Northwest corner) it runs South seven degrees & thirty minutes east, four miles & one-quarter; the most Southerly corner is bounded by a little red oak marked H, the north east corner is a stake standing about four or five pole southward of a very great Rock that Lyeth in the line between said Nashobah & Chelmsford plantation."

The great rock is no doubt the one in the orchard on the farm of the late Barnabas Dodge, a short distance south of the road, and that is now in the line between Littleton and Westford.

I am forced to the conclusion that Jonathan Danforth, whose plan of 1686 appears to have been made for the purpose of locating the Bulkeley and Hinchman purchase, made his plan more in the interest of his clients than of accuracy, and suspect that he did not measure the north line of the plantation at all, but assumed that it was four miles long and so meas-

ured off two miles for Bulkeley and Hinchman, and ran his other lines accordingly. My reasons for this belief are that the distance from the great rock mentioned to the northwest corner of Littleton on the side of Brown Hill, which all authorities agree is the original northwest corner of Nashobah, is only about three miles, and when it came to be surveyed under the direction of a legislative committee in 1711, the north line of the plantation is reported as three miles.

If the reader will look at a map of Littleton and note the following points, he will have the four corners of the ancient Indian plantation Nashobah: the northwest corner of Littleton on the side of Brown Hill, near the road to Ayer, was one corner; a point near the centre of Boxboro', found by prolonging the present west and south lines of Littleton until they meet, was another corner; the westerly end of Nagog pond was a third corner, and a point on the Westford line, between the Dodge place and Forge Pond, was the fourth corner. It was uniformly spoken of as four miles square, but was not exactly that, being, as we have seen, only three miles on one side, and having corners which varied slightly from right angles.

The purchases of Robbins, Lawrence, Bulkeley and Hinchman left in the hands of the Indians only that portion of the plantation which Danforth in his plan designates as "Nashobah the Indian part," being the westerly portion, four miles long on the west line two miles theoretically on the north line, but actually only about one, and 412 poles on the south line.

Deeds from the Indians covering this portion are on record at Cambridge as follows: Under date of May 9, 1694, from Thomas Waban, of Natick, to Walter Powers, of Concord, in consideration of fifteen pounds, and other things—

"A certain Tract of Land upland, Swamp, Meadow & Meadow Land, Containing one Quarter part of an Indian Plantation known by ye name of Nashoby within their Majesties Province of ye Massachusetts Bay. The easterly half of s^d Plantation being formerly bought of ye Indians by Major Hinchman and ye Westerly Quarter part of ye Plantation is yet in Possession of ye Indians being Challenged by John Thomas Indian and this Quarter part of the plantation by one now sold as above lies between ye s^d halfe that Major Hinchman bought of ye Indians and ye other Quarter part y^t said Indian John Thomas claims from End to End both upland and Meadow, ye Souther End bounds upon Pompsittaquitt, or ye Town Ship of Stow, and ye Northerly End runs [to] Groton Line."

And under date of May 10, 1701, from

"Solomon Thomas & John Thomas jr., both of Natick, to Josiah Whitcomb of Lancaster," "a certain parcell or Tract of Land lying and being in a place Commonly Called and known by the name of Meshonah [Nashobah] and is a Quarter part of a Tract of Land four miles square, It being four mile in Length and one mile in breadth be it more or less as it is bounded with Stow Land on the South and West and Wilderness Land on the North and the Land of Walter Powers on the East, and all that is therein and thereupon, and all rights, privileges, essements and appurtenances belonging to the thereby granted premises."

Solomon Thomas and John Thomas, Jr., were sons of John Thomas, and it is fair to assume that he had transferred his interest in this tract to them, as he was still living at the time.

A confirmatory deed of the Bulkeley and Henchman purchase was given in 1714 by Thomas Waban, John Thomas and John Thomas, Jr., to Major Henchman and the heirs of Peter Bulkeley, and states that the consideration was passed twenty-eight years before.

This deed, old and yellow, but still legible, bearing the signature of Waban, and the marks of the other two, is still in existence, and in the possession of the writer, to whom it was presented by his father, Hon. Joseph A. Harwood. It is an extremely interesting document, and was formerly owned by Mr. Samuel Gardner Drake, author of "Drake's Book of Indians," from whose hands it passed through one other only to Mr. Harwood.

What disposition to make of Nashobah seems to have been a troublesome question for the General Court to decide, and the conflicting interests which sought possession of the very desirable farming lands there lying idle were powerful enough to keep the question in suspense for many years.

It appears to have been a contest between Major Henchman and others, who had bought of the Indians and wished to colonize the place and form a town, on one side, and the neighboring municipalities, which wished to annex the territory, on the other. In the end the colonization interest won.

Reference is made to a petition from Concord people, who desired a grant of the land for settling on it, but it was stated not to have been pressed, owing to the "publick troubles that hath happened," referring no doubt to the troubles in England at the time of the accession of William and Mary; but in 1698 it was renewed by a petition signed by twenty-one Concord men and seventeen Chelmsford men, stating: "And your petitioners, for themselves or children, stand in need of an enlargem^{nt} & accommodations (who, if not accommodated neer home, must be necessitated to remove out of the Province), having also obtained the Indian Title of ye one-halfe of ye sd Tract, of ye Administrators of ye estate of Peter Bulkeley, Esq., deceased, and of Major Thomas Hinchman, . . . In order to the setting up of an English plantation."

Major Henchman endorsed the document to the effect that the petitioners had purchased the title to half the tract.

The matter was put in the hands of a committee to report to the next session, which again put it off in the same manner, and it seems to have come to nothing for several years after. The signatures, however, to the petition include many Littleton names, from which it is fair to assume that this was in a measure the party which was finally successful in getting the grant. I give the names in full:

CONCORD.—Joseph Estabrook, Thomas Dackin, John Wheeler, Jno. Jones, Eliphelet Fox, Synion Davis, Senr., Thomas Browne, Senr., Sam^l How, Sannel Prescott, Jn. Meriam, Samuel Hartwell, Nath^l Harwood, Moses Wheat, Roger Chandler, Walter Power, Senr., Wm. Wilson, Samuel Jones, Jno. Hore, Jno. Wood, George Robins.

CHELMSFORD.—Jno. Hartwell, Senr., Jno. Hold, Sam^l Stratton, Jona-

than Prescott, Junr., Jacob Taylor, Tho. Wheller, James Snedly, Thomas Clark, Joseph Farwell, Edward Emerson, Joseph Adams, Jno. Kidder, Steven Pierce, Abraham Parker, John Perram, Moses Parker, Eleazar Brown.

As has been stated before, Groton attempted to annex a large part of Nashobah, but was not successful. Stow also made an attempt to get the whole, and in 1702 petitioned the General Court, reciting the facts that Nashobah, a tract of land four miles square, was deserted by the Indian proprietors, who wished to sell; that certain English claimed it by purchase, and that Groton had of late extended their town bounds to take in a large part, especially of meadow, but that Stow, being small, stood in the greatest need of it, and praying for leave to purchase and join the land to Stow. The petition was granted on the part of the House, but negatived in the Council.

This left the matter still open, and people continued to settle in Nashobah, some by right of purchase and others without right. Of course they had no town government, though no doubt most of them associated themselves with the neighboring towns, where they attended church and paid minister's rates, and perhaps other taxes, as towns were allowed to tax outlying settlers not in other towns.

Jonathan Whitcomb, nephew of Josiah Whitcomb, who purchased of the Indians, settled where his descendant, Jonathan Hartwell Whitcomb, now lives, the farm having been handed down in the family ever since, and as he was a shoemaker, or "cordwainer" and kept accounts with his neighbors as early as 1708, I have been able to gather from them the names of many of the first settlers. Among them are the names of Robbins, Lawrence, Parker, Willard, Farnsworth, Pearce, Powers, Wheeler, Wetherbee, Stone, Davis, Whitney, Jewett, Woods, Gilson, and many others not now familiar. The next move for a grant of Nashobah, of which I find record, was in 1711, when twenty-three, who styled themselves "Inhabitants of Concord, Chelmsford, Lancaster & Stow, &c.," petitioned for a grant of Nashobah, "In a regular manner to settle a township," reciting that sundry persons had made entry upon the land without application to the government, and that others were intending to do the same.

The petitioners were:

Gershom Procter, Sam^l Procter, John Procter, Joseph Fletcher, John Miles, John Parlin, Robert Robins, John Darby, John Barker, Sam^l Stratton, Hezekiah Fletcher, Josiah Whitcomb, John Buttrick, Will^l Powers, Jonathan Hubbard, Wm. Keen, John Heald, John Bateman, John Heywood, Thomas Wheeler, Sam^l Hartwell, junr., Sam^l Jones, John Miriam.

Acting thereon the General Court, on June 7, 1711, "Ordered that Jo^s. Tyng, Esq^r., Thom^s. Howe, Esq^r., & Mr. John Sternes, be a Committee to view the Land mentioned in the Petition, & Represent the Lines or Bounds of the Severall adjacent Towns bounding on the S^d Lands, and to have Speciall Regard to the Land granted to the Indians, & to make report of the quantity & Circumstances thereof."

The report of this committee gives the best description to be found of the plantation, and the state of things at that time, and I therefore copy it in full:

"The report of the Comitty of the Hon^{ble} Court upon the petition of Concord, Chelmsford, Lancaster & Stow, for a grant of Part of Nashobe lands.

"Pursuant to the directions given by this Hon^{ble} Court bearing Date the 30th of May, 1711, The Comity Reports as followeth that is to Say, &c.

"That on the second day of October, 1711, the s^d comitty went upon the premises with an Artis and vewed (viewed) and servaid the Land mentioned in the Peticon, and find that the most Southerly line of the plantation of Nashobe is bounded partly on Concord & partly on Stow, and this line containe by Estimation upon the survey a bought three miles and 50 polle. The Westery lline Runn partly on Stow & partly on land claimed by Groton and containe four miles and 20 poll, extending to a place called Brown hill. The North line Runn a long curtain lands claimed by Groton and containe three miles, the Easterly lline Runn partly on Chelmsford, and partly on a farm cald Powersis farm, in Concord; this line containe a bought fouer miles and twenty-five pole.

"The lands a boue mentioned war shawed to vs for Nashobe Plantation, and there war ancient marks in the Senerall lines fairly marked, And S^d comite find vpon the Serry, that Groton hath Run into Nashobe (as it was Showed to vs), So as to take out nere one-half S^d plantation and the biggest part of the medows, it appears to ve to Agree well with the report of Mr. John Filut & Mr. Joseph Wheeler, who were a Commatty Employed by the Conoty Court in middlesex, to Run the bounds of said plantation. (June y^e 20th, '82), The plat will demonstrate how the plantation lyeth & how Groton come in vpon it, as also the quaintete which is a bought 7840 acres.

"And said Comite are of the opinion that ther may [be] a township in that place, it lying So remote from most of the neighboreng Towns, provided this Court Shall Se reason to continue the bounds as we do judg they have been maid at the first laleng out, And that ther be sum addition from Concord & Chelmsford which we are redy to think will be comply with by S^d Towns, And S^d Comite do find a bought 15 famelys Settled in S^d plantation of Nashobe, (5) in Groton claimed, and ten in the remainder, and 3 famelys which are already settled on the poweres farm, were convenient to joyn w^s plantation and are a bought Eight mille to any meting-house. (Also ther are a bought Eight famelys in Chelmsford which are allredy settled near Nashobe line & six or Sevau miles from their own meeting-house.

"JONATHAN TYNG,
"THOMAS HOW,
"JOHN STEARNS.

"In the House of Representatives Nov^m 2, 1711, Read.

"Oct^r. 23, 1713. In Council Read and accepted; And the Indian native Proprietors of the S^d Planta^{ns}, Being removed by death Except two or Three families only remaining, Its Declared and Deredcted That the said Lands of Nashoba be preserved for a Township.

"And Whereas it appears That Groton, Concord and Stow by Several of their Inhabitants have Encroached and Settled upon the Said Lands; This Court sees not reason to remove them to their Damage, but will allow them to be and remain with other Inhabitants that may be admitted into the Town to be there settled; And that they have full Liberty when their Names and Number are determined to purchase of the few Indians there remaining, for the Establishment of a Township accordingly.

"Saving convenient Allotments and portions of Land to the remaining Indian Inhabitants for their Settling and Planting.

"ISA. ADDINGTON, Secry.

"In the House of Representatives, Oct^r. 23th, 1713. Read."

It will be noticed that this report was not acted on by the Council for nearly two years after it was made and acted on in the House.

By this action the General Court decided that Nashobah should be a town for English people, and for the first time committed itself on the question.

The act of incorporation followed about a year later, that is, on November 2, 1714, under which date the following entry is found in the General Court Records:

"The following Order Pass^d by the Represent^{ms}, Read & Concur'd, viz.: Upon Consideration of the many Petitions & Claims relating to the Land called Nashoba Land; Ordered that the said Nashoba Land be made a Township, with the Addition of such adjoining Lands of the

Neighbouring Towns, whose Owners shall petition for that end, & that this Court should think fit to grant. That the said Nashoba Land having been long since purchased of the Indians by Mr. Bulkeley & Henchman, one-Half, the other Half by Whetcomb & Powers, That the Said purchase be confirmed to the children of the said Bulkeley, Whetcomb & Powers, & Cpt. Robert Meers as Assignees to Mr. Henchman according to their respective Proportions; Reserving to the Inhabitants, who have settled within these Bounds, their Settlements with Divisions of Lands, in proportion to the Grantees, & such as Shall be hereafter admitted; the said Occupants or Pr^sent Inhabitants paying in Proportion as others shall pay for their Allotments; Provided the said Plantation shall be settled with Thirty-five Families & an orthodox Minister in three years time. And that Five hundred Acres of Land be reserved and laid out for the Benefit of any of the Descendants of the Indian Proprietors of the Said Plantation, that may be surviving; A Proportion thereof to be for Sarah Doublet alias Sarah Indian. The Rev. Mr. John Leverett & Spencer Phips, Esq^r, to be Trustees for the Said Indians to take Care of the Said Lands for their Use.

"And it is further Ordered that Cpt. Hopestill Brown, Mr. Timothy Wily & Mr. Joseph Burnap, of Reading, be a Committee to lay out the said Five hundred Acres of Land reserved for the Indians & to run the Line between Groton & Nashoba, at the Charge of both Parties, & make Report to this Court; And that however the Line may divide the Land with regard to the Township, yet the Proprietors on either side may be continued in the Possession of their Improvements, paying as aforesaid; And that no Persons legal Right or Property in the Said Lands shall [be] hereby taken away or infringed.

"Consented to

J. DUDLEY."

From this act of November 2, 1714, we date the present town, afterwards, as we shall see, named Littleton.

The report of the committee finally establishing the bounds and laying out the Indian reservation was as follows:

"The following Report of the Committee for Running the Line between Groton & Nashoba Accepted by Represent^{ms} Read and Concur'd; viz.

"We the subscribers appointed a Committee by the General Court to run the Line between Groton & Nashoba & to lay out Five hundred Acres of Land in said Nashoba to the [sic] Descendants of the Indians; Pursuant to said Order of Court, hearing date Octob^r 20th [the opening of the session] 1714. We the Subscribers return as follows: That on the 30th of November last, we met on the premises, & heard the Information of the Inhabitants of Groton, Nashoba & others of the Neighbouring Towns, referring to the Line that has been between Groton & Nashoba & seen several Records, out of Groton Book, & considered other Writings, that belong to Groton and Nashoba. & We have considered all and We have run the Line (Which we account is the old Line between Groton & Nashoba;) We began next Chelmsford Line, at a Heap of Stones, where, we were informed, that there had been a great Pine Tree, the Northeast Corner of Nashoba, and run Westery by many old marked Trees to a Pine Tree standing on the Southerly End of Brown Hill mark'd N and those marked Trees had been many times marked or renewed, the they do not stand in a direct or strait Line to said Pine Tree on said Brown Hill; And then from said Brown Hill we turned a little to the East of the South, & run to a White Oak being an old Mark, and so from said Oak to a Pitch Pine by a Meadow, being an other old Mark; & the same Line extended to white oak near the North East Corner of Stow: And this is all, as we were informed, that Groton & Nashoba joins together; Notwithstanding the Committees Opinion is, that Groton Men be continued in their honest Rights, tho they fall within the Bounds of Nashoba; And we have laid out to the Descendants of the Indiana Five hundred Acres at the South East Corner of the Plantation of Nashoba; East side, Three hundred Poles long, West side three hundred Poles, South & North ends, Two hundred and eighty Poles broad; A large white Oak marked at the North West Corner, and many Live Trees we marked at the West Side & North End, & it takes in Part of two Ponds.

"Dated Decem^r 14, 1714.

"HOPESTILL BROWN
"TIMOTHY WILY
"JOSEPH BURNAP

"Consented to J. DUDLEY."

The two ponds referred to in the part laid out for the Indians were Fort Pond and Nagog Pond.

The town having been duly incorporated, we find, as in all the old towns, two record books started, the Proprietors' Record-Book and the Town Records.

The proprietors continued their meetings and records until the last of the common lands were divided in the part of the town known as "New State Woods," or more properly New Estate, a name I suppose applied about the time of the division of it into individual holdings. The last entry in the Proprietors' Record-Book was in 1755. The first entry begins by reciting the act of the Legislature of November 2, 1714, then follows

"No (2)

"To all Christian People before whome these presents shall Come Greeting Know y^e we whose names are underwritten having obtained y^e General Courts grant of a certain tract or parcel of Land comonly calld Nashoba which was long since purchased of ye Indian Proprietors of sd Land, by our selves & predissessors as may appear by our several Deeds. Do by these presents mutually agree to throw all in Comon for y^e good of ye Town, & so to draw our several proportions according to our several interests & former agreements—& y^e we do further agree to admit as associates according to former agreements, Paul Dudley Esq^r, Addington Davenport Esq^r & Mr John White all of Boston—& also to reserve two or three Lots where it is most convenient for y^e ministry Schoole or such other Public uses as may be thought Proper to be at y^e disposition of ye major part of y^e Propriety also to bare our proportion of all y^e Charge y^e hath or may arise on ye premises.

"To y^e confirmation of which we find & oblige our selves our heirs executors and Administrators firmly by these presents in witness whereof we have hereinto set our hands and seales this 15th of Decem^r 1714. Note that y^e lands calld Powerses farm is not by this instrument included

"Addington Davenport,* Jⁿ White,* Joseph Bulkely,* Robert Robbins,* Marah Wheeler,* Inceas Powers,* Jon^s Prescott,* John Hancock,* Daniel Powers,* Robert Mears,* Isaac Powers,* Thos Powers, Walter Powers,* Josiah Whitcomb,* Will^m Powers,* Joho Bulkeley,* Paul Dudley,* Eliezer Lawrence.*

"Signed & seald in preseuce of us

"DAN^L. LAWRENCE
"SAM^L. LONG."

The admission as associates of Paul Dudley, Addington Davenport and John White, "according to former agreements" shows that influence was required to get the measure through the Legislature.

A curious error seems to have been made in the act of incorporation which made the following action necessary, under date of

"SATURDAY, Dec^r. 3, 1715.

"Upon Reading the Petition of Josiah Whitcomb of Lancaster, importing

"That whereas the Great and General Court or assembly at the Session in Oct^r 1714, in consideration that the Land calld Nashoba Land then ordered to be made a Townsh^p was purchased of the Indians, one Half by Mr Bulkley & Mr Henschman, & the other half by Whitcomb (the Petitioner, who was supposed to be dead as he is informed) and that one Powers did Order that the said Purchase be confirmed to the Children of the said Bulkley Whitcomb & Powers & to Cap^t. Robert Mears assignee of Mr Henschman according to their respective Proportions, as by the copy of the Order of Confirmation of the General Court will more fully appear Humbly Praying that the General Court will please to revoke the Confirmation or Grant made to his Children & confirm to him his fourth part of the said Land, that he may enjoy what he honestly purchas'd & that he may have Liberty to make Disposition thereof according to his own Will & Pleasure.

"In Council, Read & Consented that the Prayer of the within Petition be granted, And Ordered that the name of the Townsh^p be hence-

forth called Littleton. In the House of Representatives Read & Concurred.

"Consented to

W= TAILER."

The date December 3, 1715, has been erroneously used for the date of the incorporation of the town, but the reader can see for himself that the former act of November 2, 1714, is the correct date, and that the new town bore the name Nashoba for one year.

It is said that the name Littleton was given as a compliment to Hon. George Lyttleton, M.P., one of the commissioners of the treasury, and that in acknowledgment he sent from England a church-bell as a present to the town; but on account of the error in spelling by substituting "i" for "y," the present was withheld by the person having it in charge, who gave the excuse that no such town as Lyttleton could be found, and sold the bell.

The first recorded town-meeting was held March 13, 1715-16.

The record begins somewhat abruptly, and it is by no means certain that the record-book, which is quite loose in the covers from age, has not lost a few pages bearing previous records. Isaac Powers was moderator, Samuel Dudley was chosen town clerk and first selectman, and the other selectmen were John Perum, John Cobleigh, Moses Whitney and William Powers. The other town officers were: Samuel Corry, constable; Samuel Barret, tythingman; Thomas Power and John Wheeler, surveyors of highways; Ebenezer Robbins and Jacob Powers, hog constables; John Barrett and Thos. Farr, fence-viewers, and Isaac Powers, sealer of weights and measures and treasurer.

Of these men, Isaac Powers lived first in the section of the town we call Nashoba, and afterwards in the Centre, where George Whitcomb now lives. Samuel Dudley lived beside the mill-pond, on land now owned by John A. Kimball and used by him for a pasture. A magnificent elm having a peculiar long horizontal limb a short distance above the ground, stands by the Dudley cellar-hole. He probably owned land extending from there to Fort Pond.

Moses Whitney lived where Frank Ford now lives, in the south part of the town. John Perrum or Perham lived probably in the southeast part of the town. Wm. Powers lived in Pingreyville; Jacob Powers lived at the Old Common.

One of the first things for the new town to do was to procure and settle a minister, and a town-meeting was held April 17th in regard to the matter, at which time it appears that Rev. Benjamin Shattuck was a candidate. A committee consisting of John Cobleigh, John Perham and Eleazer Lawrence were chosen to confer with the ministers of the neighboring townes, the Reverend Messrs. Eveleth, Stoddard, Trowbridge and Whitney, and get their advice in regard to Mr. Shattuck.

Their report is not recorded, but on May 9th, at a meeting called for the purpose, Mr. Shattuck was chosen minister, and the sum of £70 was appropriat-

ed towards his settlement to be "added to his lot." His salary was fixed at £55, to advance 20 shillings a year until it amount to £70 a year.

Rev. Benj. Shattuck accordingly took up his residence as the first minister of the town and completely identified himself with it. He had several daughters who married in town, and the Hartwell, Tuttle and Taylor families all trace their ancestry back to him. Mr. Shattuck was born in Watertown, July 30, 1678, graduated at Harvard college in 1709, and for the following six years was teacher of the grammar and English school in Watertown, at the same time studying for the ministry. He was ordained at Littleton, on Christmas day, 1717, and continued as the minister of the town until August 24, 1730, when it was agreed by mutual consent that a council be called for his dismissal. He continued to live in town, however, until his death, in 1763.

His residence was the house now owned by Mrs. Eliza Hartwell.

The first meeting-house was located on the Common, in front of John B. Robinson's present residence, where it was located to accommodate people from the borders of Chelmsford and Concord, who helped bear the cost of the building, and attended church here, and who, it was hoped, would be set off to this town by the General Court, which was petitioned to that effect for several years in succession, the people in question and Littleton citizens joining in the petition. There were six families from Chelmsford, and Walter Powers, John Powers, David Russell and John Merriam, of Concord, living on Nashoba Farm, who were for several years freed from their minister's rates in those towns, and allowed to pay in Littleton, and I find that at several of our early town-meetings, at which the town acted in its parochial capacity, a vote was passed allowing Concord, Chelmsford and Groton men to vote in the meeting, and at one time two Concord and Chelmsford men were chosen assessors to assist in making the rates.

Finally, in 1725, the General Court granted the petition for annexation so far as related to Concord families, and a large tract of land extending from Nagog Pond nearly or quite to the Old Common, was added to the town, enlarging the bounds in that direction, probably to their present position.

Mention is made of the meeting-house as early as 1717, and it was probably in an unfinished condition at the time of Rev. Mr. Shattuck's ordination, but was not completed until 1723.

It had entrances on three sides, after the custom of those days, with probably square pews all around the walls at least. No mention is made of bell, steeple nor gallery, and I am of the opinion it had neither.

The building committee appear to have taken matters rather leisurely, and the following vote was passed August 26, 1723:

"To accept the meeting-house on condition that previous committee

finish seats and claptord what is wanting as soon as possible, this fall & the ceiling [sic] by next fall, or make allowance of _____ to have it done. Committee to be acquitted when work done."

It looks as if the committee did the work themselves.

The meeting-house being finished, the great question was how to apportion the seats in a manner satisfactory to all.

It was decided in assigning the family pews, first, to have respect to age, and then the one having the highest income to have choice and so on. A committee having the matter in charge made a report which is recorded in full, giving location of the seats assigned to various persons as follows: Eleazer Lawrence, the pew on the left of the west door; Walter Powers, second pew from the pulpit, that is, as I understand it, at the side of the pulpit, and probably to the east; Joshua Fletcher, on the right of the east door; Major Prescott, the pew next Mr. Shattuck's, that is, probably on the west side, the minister's being next to the pulpit; Samuel Dudley, the pew on the east of the pulpit; Joseph Baker, the northeast corner pew; Isaac Powers, the pew at the right of south door; Moses Whitney, the pew at the left of south door; Robert Robbins, the pew at the right of Isaac Powers', which was given up to Robert Robbins by Thomas Powers, who took Robbins' seat, the "fore seat below," that is, front seat in the main body; John Perham, the pew at the right of west door; Samuel Hunt, the northwest corner pew; John Wheeler, the pew at the left of Moses Whitney's; Deacon Caleb Taylor, the pew at the left of the east door.

For years the seating of the meeting-house, that is, of those not having family pews, seems to have been a troublesome duty, which had to be done annually, and it was no uncommon thing to have the first attempt of the committee rejected. The women sat on one side of the house and the men on the other. In 1760 the rear seats were assigned to negroes by vote of the town.

An incident occurred in 1720 which made quite a sensation in town at the time. It was no less than a witchcraft accusation which might have proved still more sensational had it not been for the death of the person accused.

Joseph Blanchard, who lived on or near Mr. Elbridge Marshall's place, had at that time three young daughters—Elizabeth, aged about eleven, Joanna, about nine and Mary, about five or six years. These children, first the eldest, then the next, and finally the youngest, began to act in a very strange and unaccountable way. Elizabeth began by telling very strange stories of things happening at the time, or supposed to, and of strange dreams; she would also swoon into a trance and appear dead; she performed sleight-of-hand tricks and told fortunes; she would be found in strange places, such as in the top of a tree, or in a pond of water, asserting she flew to the tree or was

forced into the water, and in danger of drowning, at which she would cry out in distress. She also complained of pinches and prickings of the flesh, and showed wounds, and rents in her clothes, asserting she was bewitched, and accused Mrs. Dudley, wife of Samuel Dudley, town clerk, of bewitching her. When put to the test of reading Scripture she would read, but fall down apparently lifeless when she came to the words "God," "Christ," or "Holy Ghost." She would bite people, excepting Rev. Mr. Shattuck, whom she appeared to have no power to hurt.

About four months after Elizabeth began to act in this way, Joanna also began to do the same things, and once was found on the top of the barn, a place apparently impossible for her to reach by her own exertions, and whither she said she was carried up through the air. About two months later Mary began the same actions.

Elizabeth would often cry out, "There she is! there's Mrs. Dudley!" when Mrs. Dudley was nowhere visible. Once she told her mother there was a little bird in a certain part of the room; her mother, having something in her hand, struck at the place, at which Elizabeth cried out, "Oh, mother, you have hit it on the side of the head." It was afterwards found that Mrs. Dudley was at the same time hurt on one side of her face. Another time Elizabeth said to her mother, "There's Mrs. Dudley; she is just there; coming to afflict me!" Her mother struck the place with something and Elizabeth cried out, "You have hit her on the bowels."

It was found that Mrs. Dudley, at the same time, felt a pain, took to her bed and died in a few weeks.

On the face of this story it appears very mysterious and inexplicable by natural causes. Blanchard and his wife believed the children sincere and guileless, and though some wiser ones including, it is thought, Mr. Shattuck, advised separating the children by taking one or more to their homes, the parents would not consent to it, and the majority believed them bewitched. A few days after the death of Mrs. Dudley the strange actions of the two older children ceased.

It proved however, that Mrs. Dudley's death was perfectly accountable; she was in a delicate condition, and on riding horseback behind her husband at a rapid rate felt something break within her.

Though the children for a long time persisted that their stories had been true, and Elizabeth did not weaken, even when, requesting baptism, she was questioned by Mr. Shattuck about the circumstances, and told that some of her neighbors suspected her of falsehood; yet eight years after the girls confessed to Rev. Mr. Turell, minister of Medford, to which place they had moved, that their stories were all false and that their strange actions, begun in a playful spirit of mischief, had been continued because they were ashamed to own up.

When they heard of Mrs. Dudley's death, who, by the way, was a most estimable woman and against whom the children had no cause for ill-feeling, the two oldest children were thoroughly frightened, and for a long time lived in fear of a ghostly retribution.

Elizabeth told Mr. Turell that she got her idea of acting in the strange manner from reading about witchcraft, and the other children picked it up from her.

There appears to have been some friction between the town and Rev. Mr. Shattuck, the cause of which is not apparent on the records, but which led to his retirement from the ministry in 1730. For a year or two previous there was a growing opposition to him, manifested in the opposition to the customary vote of £10 to him annually, in addition to his salary, in lieu of paying the same into the Province treasury, and finally, at the April meeting in 1730, the town refused to appropriate his salary. Mr. Shattuck made a proposition to the town through Joseph Underwood, and in accordance with that a committee consisting of Capt. Isaac Powers, Robert Robins, Samuel Corey, Dea. David Russell and Dea. John Wood were chosen at a meeting May 11, 1730, to treat with Mr. Shattuck concerning his dismissal, and the meeting adjourned to the first Monday in June, when it was voted to refer the matter to the church, so that a church meeting might be called with Mr. Shattuck's son, for the purpose of calling a council to settle the affair.

The church, however, came to an agreement with the minister without the aid of a council, and upon the report of that fact to a town-meeting August 24th, it agreed to his dismissal by a council to be called, and his salary to the middle of the following May was voted.

The town began immediately, however, to hear candidates preach, and probably Mr. Shattuck did not officiate further.

With the prospect of a new minister the town began to consider building a new meeting-house, and in December, 1730, it was voted that when the town should think proper to build, the location should be on the Ridge Hill, as it was then called, describing the present location of the First Congregational (Unitarian) Church.

In the following July the town voted to call Rev. Daniel Rogers, who is previously referred to as "Son of y^e worshipfull Mr. Dan^l. Rogers, Esq^r.", which has lately preached at Byfield." The word "which" here refers, I think, to the son, as I cannot find that his father was a minister.

The town voted £200 for his settlement and a yearly salary of £100, but that does not seem to have been sufficient to secure him, and in October the offer of settlement was raised to £300 and of salary to £140 a year, to rise and fall with silver, the standard to be eighteen shillings per ounce. Mr. Rogers accepted and was ordained March 15, 1731-32.

There is a tradition that Mr. Rogers was descended from John Rogers, the martyr, but that is denied by so good an authority as Mr. John Ward Dean, of the New England Historic Genealogical Society. Mr. Rogers was, however, a grandson of Rev. John Rogers, president of Harvard College, and great-grandson of Rev. Nathaniel Rogers, who came from England about 1636, and settled in Ipswich, and was born in Ipswich October 17, 1706, and graduated at Harvard College in 1725. His first marriage was in 1734-35 to Mary, daughter of Rev. John Whiting, of Concord. She died three days after the death of her child in February, 1738. In May, 1739, Mr. Rogers married for his second wife, Mrs. Elizabeth Dummer, widow of Samuel Dummer, of Wilmington, and daughter of Rev. Samuel Ruggles, of Billerica,—they had nine children.

One of his sons, Jeremiah Dummer Rogers, a lawyer, was one of the addressors of Hutchinson in 1774, and removed to Boston. He was a Tory, and, after the battle of Bunker Hill, was appointed commissary to the Royal troops that continued to occupy Charlestown, and lived in a house on the present site of the Unitarian Church, corner of Main and Green Streets. At the time of the evacuation of Boston he went with other Royalists to Halifax, where he died in 1784. His son, of the same name, became a classical teacher in England, though a Harvard graduate, and had Lord Byron for one of his pupils. Daniel Rogers, another son of Rev. Daniel Rogers, continued to live in Littleton, and ended his days there.

An ordination in those days must have been quite an affair. The town entertained liberally and paid bills for the same to the amount of £41, for Mr. Rogers' ordination.

The meeting-house question came up again in 1738, and the question was whether to move the old one or build new. June 12th the town voted not to move the old meeting-house, and, on December 25th, voted to build a new one, and chose a committee of seven to see what to do with the old one and decide on dimensions of the new one. No money appears to have been appropriated for the meeting-house until November 5, 1739, and probably nothing definite was done until then, when £250 was voted in part. November 19th, £350 more was appropriated, and decided that the building should be forty by fifty feet with twenty-three feet posts. The Building Committee were Maj. Eleazer Lawrence, Deacon John Wood and Benjamin Hoar. £300 more were voted in December, 1740, to complete the meeting-house, making £900 in all. The building was not completed until 1742. Those who had private pews built them at their own cost, except Mr. Rogers and Mr. Shattuck, for whom and their families, the town built pews. Mr. Rogers had his at the foot of the pulpit-stairs and Mr. Shattuck in the rear, on the women's side.

This meeting-house had a gallery, which the former one probably had not, but I have no reason to sup-

pose there was any great change in the arrangement of pews from that in the old one.

About the time of which I am writing, a serious trouble arose between the proprietors of Littleton and the town of Stow about the boundary between the two towns, and quite a tract of land, in what is now Boxborough, was claimed by Stow, but finally relinquished after a long lawsuit lasting many years, and after attempts to get action in favor of Stow by the Legislature. I find records referring to the matter in 1732, 1740 and in 1750.

In this suit Littleton Proprietors' Record-Book was used as evidence, and by mistake was not returned to the town until Mr. Richard H. Dana, the second of that name, found it among some old papers, a century or more afterward. Littleton's counsel was Mr. Edmund Trowbridge, and I have been told that Mr. Dana married into the Trowbridge family.

An addition to the territory of the town was made January 4, 1738-39, when the General Court granted the petition of Peleg Lawrence and others, of Groton, so far as that they and their estates be set off to Littleton, thereby probably establishing the present line. Groton did not oppose that part of the petition, but opposed and prevented the establishment of the line as originally asked for, which they claimed would include part of their proprietors' land. Peleg Lawrence lived near the brook by North Littleton Station, where the cellar-hole may yet be seen.

A curious entry occurs in the town records under date of May 27, 1751, as follows:

"Voted to accept Jacob negro, son of Caesar, for an inhabitant of this town in case Mr. Peter Reed give up the bill of sale of a negro to the town and write a discharge."

That gives the town an anti-slavery record of early date. Slaves were owned in town, however, much later.

Within the first thirty-five years of the existence of the town a great many roads were laid out and recorded in the town-book. Most of them were merely paths, marked by blazed trees, following very tortuous routes, quite different from the present roads.

For instance, the road from Chelmsford to Groton was through the Old Common, turning beyond Mr. Shattuck's (now Mrs. Eliza Hartwell's) to the right through Turkey Swamp and across Beaver Brook to the Farr place, where Mr. Chas. P. Hartwell now lives, then through the New Estate, turning eastward to Saml. Dudley's, near the mill pond, from whence it went to Pingreyville; a branch probably turned to the left past Saml. Hunt's tavern, near Mr. Peter S. Whitcomb's house.

The first road to Newtown started from the Old Common, a short distance east of the house of the late Capt. Luther White.

The road to the south part of the town passed Joseph Baker's, which was at a spot now marked by a large elm, midway between Mr. W. H. Tenney's and the Haley place, from whence it went past a cellar-

hole and spring in the woods which locates the house of Capt. Joseph Harwood, and thence on through the valley to the place now owned by Mr. J. A. Priest, then owned by one of the Powers family, and so on.

Under the system of representation in the Legislature which was in force a century and a half ago the members of the lower House were elected by the towns, and Littleton was obliged to send a Representative once in a certain number of years, and also obliged to pay him.

The result was that the town very frequently failed to send a Representative and was repeatedly fined by the General Court therefor. The year following the fine the town would elect a Representative for the sole purpose, apparently, of getting the fine remitted. A fine or some question before the Legislature regarding Littleton's territory seems to have been the only incentive to representation. On one occasion the town voted to send a Representative if any one would go for half pay, and on another if for £12. In this last instance Captain Isaac Powers accepted the offer and was elected without opposition.

In the year 1749 the town offered, in connection with some of the adjoining towns, a bounty for wolves' heads in addition to that offered by the Province, with the condition that the ears be cut off to prevent a second claim for bounty on the same head.

Almost invariably previous to the year 1800, and frequently after that, it was customary to vote every March meeting that the swine be allowed to go at large the year ensuing.

Hog-reeves were chosen, whose duty it was to insert a ring in each swine's nose to curtail the amount of damage he could do by rooting.

Littleton was represented in the French and Indian War, as she has always been in every struggle in behalf of the State and the nation, by brave and able men.

Colonel John Porter, when only sixteen years of age, enlisted as a captain's waiter and was at the battle of Ticonderoga. He was taken with the small-pox, and his mother, on hearing of it, hired a man to go and care for him. This person took the money, but soon reported that young Porter was dead. The rascal had, in fact, never been near him, but in spite of neglect Porter recovered, and great was the surprise and joy of his family, who lived where Deacon Manning now lives, to see him appear one day, weak after his sickness and tired, sitting to rest on a log near the house.

The 19th of April, 1775, found him returning from Beverly through Lexington. The British troops had just marched out toward Concord. Porter procured a gun and ammunition of a Lexington farmer, leaving his horse as security, and joined the minute-men who fought the regulars on their return from Concord.

He served all through the Revolution, enlisting as ensign and working up to be lieutenant, captain,

adjutant and major. At one time he was a recruiting officer, and also served on the staff of Gen. Lafayette. He was at the battle of Bennington and afterward sent home three or four of the Hessians there captured, to work as laborers on his farm, while he remained at the front. He was present at the surrender of Cornwallis.

His title of colonel was acquired in the militia, after the war. Colonel Porter was a man of great force of character, but had only such education as he picked up himself.

It is said that his wife taught him to read.

Previous to the outbreak of the French War, on July 14, 1748, Jonathan Lawrence, Jr., and Ephraim Powers, of Littleton, were in a squad of seventeen men, who were traveling from Northfield to Fort Dummer and Ashuelot. They were attacked by Indians, who captured Lawrence and took him to Canada. Powers was stripped of clothing, arms and ammunition and wounded in the head. In the latter part of the war we find Jonathan Lawrence in Capt. Leonard Whiting's company in 1760-61 in the "expedition for the total reduction of Canada," and with him the following other Littleton men: Sergt. Peter Procter, Sergt. Peter Fox, Ephraim Corey, Jonathan Hartwell, who died in the expedition, George Hiber, Joseph Hartwell, Robert Procter, Josiah Procter, Moses Shattuck, David Stimpson, Samuel Tredwell, David Trull, Abel Whitcomb, Silas Whitcomb and Benjamin Worster. Captain Whiting then lived in Westford, but soon after moved to Littleton, where he kept tavern and was living here from 1764 to 1772 at least. He afterwards lived in Hollis, N. H., and was a Tory during the War of the Revolution.

By the courtesy of the Massachusetts Historical Society I am enabled to copy from the original journal of Lieutenant-Colonel John Winslow, dated Bason of Annapolis Royal, Nova Scotia, May 28, 1755, the names of many residents or natives of Littleton. It reads:

"A Return of Lieutenant Col^o John Winslowe Company in the First Battallion of his Excellency, Gov^r Shirley's Regiments, rais'd for the removing the French Encroachments from his Majesty's Government of Nova Scotia, Showing the names of the non-Commish'd officers and Private men their station age Place of Birth Last residence and occupation.

Capt. John Fox, of Littleton, was also in the French War. He returned sick from the expedition on the Kennebec River, and after six weeks' illness died.

Others of his family took the same disease from him, and on petition from his wife the Legislature granted money in aid of herself and family. Capt. Fox kept tavern in the Centre, and after his death his wife continued the business.

As we approach the period of the War of the Revolution, it is well to take, as far as we are able, a general view of the town. What was Littleton in those days, we ask? Not so very different from the Littleton of to-day.

The population varied not more than one hundred from the present, though the territory was larger, including a large section of Boxborough, and therefore the people were rather more scattered. In the year 1776 the population was 918.

The church stood on the same spot as the present Unitarian Church. The town had just bought a new bell, and had hung it not on the church, but on a convenient frame near by. The committee to buy it, reported that it was made in "this Province," and cost £78 0s. 9½d. Very many of the names now familiar were then in town, such as Robbins, Lawrence, Whitcomb, Tuttle, Taylor, Hartwell, Jewett, Harwood, Tenney, Sanderson, Reed, Brown, Proctor, Warren, Hoar, Dodge, Kimball, Patch and others. Even the farms are in many cases held in the same families now as then.

It is very interesting to trace the growth of public sentiment in town concerning the relations of the colonies with the mother country.

The indignation at the exactions and oppressive acts of the British government was spontaneous and unanimous; but later on, when protests, entreaties and demands had not availed, and matters wore a more serious aspect, when it began to dawn upon the colonists that their only hope for justice lay in revolution, then it was that a difference of opinion was evolved, which increased with the progress of events until the line between patriot and Tory was clearly drawn.

When we think of how the colonists, with their scanty resources and slight preparation, resisted, made war on and finally vanquished the greatest power on earth, it seems as if they accomplished impossibilities, which it would be madness to attempt.

It was not strange, then, that there were many conservative and intelligent people, who considered it folly to attempt to resist the government of England; they deprecated the state of affairs, but saw no prospect of relief in war, and in most cases were further influenced in their opinions by ties of friendship and relation to the mother country. That class was represented in Littleton by Rev. Daniel Rogers and at least one of his sons, also by Capt. Joseph Harwood, and his son of the same name, as well as by others. Mr. Rogers was then an old man, had been pastor for many years, and was universally loved and respected. He was a cultured and refined gentleman, a graduate of Harvard College, and connected with some of the best families in the Province. His sons were able and educated men, and took an active part in town affairs. Others of the Tory sympathizers were prominent men in town and, with Dummer Rogers, had been the leaders so long as matters had drifted along in the old way; but when the issue came, and feeling began to run high, they found themselves a small minority, and had to suffer the consequences at the intense feeling which prevailed against them.

They were suddenly dropped from the list of town officers and vigorously dealt with. Many of them were put under guard, including one of the writer's ancestors, and even Rev. Mr. Rogers was summoned by an armed squad to come out of his house and declare his principles. When he hesitated, perhaps considering it beneath his dignity to comply with such a demand, a volley was fired into his front door. The bullets passed through the door and entered the casing just below the stairs upon which Mr. Rogers was standing. He then complied. He lived where Mr. George Whitcomb now lives, in the house which has since been moved down the hill toward Mr. Frost's. Many persons, including the writer, have seen the bullet-holes in the old door, which has since been replaced by a new one, and those in the casing may be seen to-day.

Of the patriots, William Henry Prentice seems to have been one of the leaders. He kept a tavern at or near where Mr. Everett E. Kimball lives, and we may readily imagine that as the headquarters where each evening the earnest patriot farmers, many of them minute-men, gathered to hear the latest news from Boston and to discuss it excitedly over mugs of flip.

To go back now to 1770. The following article, copied from the *Boston Gazette* of March 12th, of that year, the same issue in which appeared an account of the Boston Massacre, so called, gives an idea of the unanimous feeling in the town over the taxes imposed by Parliament on imported goods:

"At a Meeting of the Inhabitants of the Town of Littleton, in the County of Middlesex, on Monday, Mar. 5, 1770, a Committee was chosen to prepare certain Votes to be passed by the Town relating to the Importation of British Goods who after retiring a Short Time into a private Room, returned and reported the following which was unanimously Voted.

"The grievous Impositions the Inhabitants of the British Colonies have long suffered from their Mother Country, strongly claim their Attention to every legal Method for their Removal. We esteem the Measure already proposed, viz.: the withdrawing our Trade from England, both economical and effectual. We do therefore Vote

"1. That we will not (knowingly), directly or indirectly, purchase any Goods which now are or hereafter may be imported contrary to the Agreement of the Merchants of the Town of Boston.

"2. That if any Inhabitant of the town of Littleton shall be known to purchase any one Article of an Importer of Goods contrary to the before mentioned Agreement or of any one who shall buy of any such Importer he shall suffer our high Displeasure and Contempt.

"3. That a Committee be chosen to inspect the Conduct of all Buyers and Sellers of Goods in this Town, and report the Names of all (if any such there should be) who shall violate the true Spirit and Intention of the above-mentioned Votes and Resolutions.

"4. That we will not drink or purchase any foreign Tea howsoever Imported until a general Importation of British Goods shall take Place."

The committee who reported these resolutions were Samuel Tuttle, Leonard Whiting, Samuel Rogers, Robert Harris and Nathan Raymond.

Matters went on from bad to worse throughout the Colonies, and in November, 1772, when Boston under the leadership of Samuel Adams came to an issue with Governor Hutchinson about the stipendiary judges, and the rights of towns to discuss such matters, and the Boston Committee of Correspondence was chosen, with instructions to appeal to all the towns in the Province, "that," as they said, "the collected wisdom and fortitude of the whole people might dictate measures for the rescue of their happy and glorious Constitution." A letter and pamphlet were received from the Boston Committee of Correspondence, and at a town-meeting in Littleton, December 31st, it was voted to choose a committee of five to consider the same and make a report to the town. The committee consisted of J. Dummer Rogers, Jona. Reed, Captain Joseph Harwood, Sr., Captain Josiah Hartwell and Samuel Reed.

From this time we must date the division of this town into patriots and Tories. The committee was divided in their report, which was made at an adjourned meeting for that purpose on February 1, 1773.

The majority of the committee, which we can confidently assume included Dummer Rogers and Captain Harwood, reported verbally "not to have the town act any further upon that article." That was the conservative view, represented by those who must thenceforth be called Tories. They feared a conflict with the authorities, and tried to smother the correspondence with Samuel Adams and the Boston patriots.

The town rejected the majority report, and then accepted the draft of a paper laid before them, and chose a Committee of Correspondence.

At the annual meeting, March 1, 1773, the draft, amended by the addition of more grievances, was accepted and ordered to be transmitted, with a respect-

ful letter of thanks, to the Boston Committee of Correspondence.

This amended paper was as follows :

"The British Constitution appears to us to be the best calculated to answer the ends which mankind proposed to themselves in forsaking the natural state of Independence and entering into Society than perhaps any form of Government under Heaven, as here we find a more perfect union of the three Great Qualities of Government than could be expected in any other form; it is therefore of high Importance that those who live under this Constitution should in all proper ways endeavor to preserve it Inviolable; it was the Happiness of our forefathers who came into this Land to bring with them the Liberties and Immunities of Englishmen and to be entitled to the Privileges of the British Constitution, under which they and their Descendants have enjoyed great Security and Happiness. But in consequence of some acts of the British Parliament, which are daily executing by officers and men unknown in the Charter of the Province, whereby a Revenue is imposed on this as well as the other Colonies, and extorted from us and appropriated to most destructive purposes, the establishing the salaries of several of the first men in this Province, and also of the Judges of the Superior Court, thereby making them independent of the people, and making them depend on the Crown for their support, the great extension of the power of the Courts of Admiralty, the unlimited authority of the Board of Commissioners of his Majesty's Customs; all which we look upon to be great grievances; the quartering of soldiers upon us in time of peace, without our consent; the demanding and giving up Castle William, our chief fortress, into the hands of those over whom our Governor has declared he has no control, is a great violation of one of our Charter Rights—for thereby the Governor for the time being has full power to erect Forts, and to furnish them with all things necessary, and to commit the custody of the same to such person or persons as to him shall seem meet. The frequent alterations of the Boundaries between this and the other colonies we think we have just reason to complain of; for thereby the property of many hundreds of the inhabitants of this province are invaded.

"We are greatly alarmed by a late act of the British Parliament entitled An Act for the better preserving his Majesty's Dock Yards, Magazines, Ships, Ammunitions and Stores; By this act any person may be apprehended on the most groundless pretence and carried to any part of Great Britain for trial; the thoughts of which is enough to make any person having the least sense of the freedom of an Englishman tremble. By this act we are deprived of one of the most essential of our Charter Privileges, that of Trial by our Peers in this Vicinity.

"We are further of the opinion that if the measures so justly complained of by the Provinces and the other Colonies on this continent are persisted in and enforced by fleets and armies, they will, in a little time we fear, issue in the total dissolution of the Union of the Mother Country and the Colonies, to the entire loss of the former, and regret of the latter—as the General Assembly is now sitting, who are the constitutional guardians of the rights of the people, we hope that Assembly will take every reasonable measure to obtain removal of all our grievances; we shall always be ready to join with the towns of this province in a regular and constitutional method in preserving our liberties and privileges."

Note how carefully the town considered the matter and of what importance it was deemed.

It was the decisive step in the policy of the town, and took three town-meetings to settle it, covering nearly the whole winter.

There was no wavering or vacillation, but no haste.

At the Middlesex Convention, held in Concord, August 31, 1774, Littleton was represented by Captain Josiah Hartwell, Oliver Hoar and Daniel Rogers, Jr., and in the first Provincial Congress by Abel Jewett and Robert Harris.

The town records show conclusively that with the opening of the year 1775 the approaching crisis was felt to be near at hand and was prepared for.

Had we any full and accurate history of the events

of that year, we should be astonished at the activity and careful preparation.

There were at least two companies in the course of that year officered by Littleton men, and made up, in a large majority, of privates from this town, a few being from the adjoining towns.

We may imagine them with the early spring, which was a month in advance of the usual season, holding frequent drills and musters, and the town must then have been aglow with military spirit and enthusiasm, which has never been equaled since.

The 19th of April came, and in the early morning a messenger on horseback rode into town with the news that the regulars were on the march to Concord.

The horseman then hurried over Beaver Brook bridge, near Mr. Frost's house, and proceeded to warn other towns.

The Littleton men mustered, ammunition to the amount of fourteen pounds of powder and thirty-eight pounds of bullets was dealt out of the common stock, and the whole squad, including many unenlisted volunteers, proceeded to Concord, and thence to Cambridge.

The following is the muster-roll of Lieutenant Aquila Jewett's company who marched that day :

Aquila Jewett, lieutenant ; John Porter, Matthew Brooks, sergeants ; Daniel Whitcomb, corporal.

Privates, Samuel Lawrence, Jonathan Lawrence, Charles White, Benjamin Warren, Joseph Robbins, Samuel Hartwell, Silas Whitcomb, Elisha Robbins, Joseph Worster, Peter Fox, Job Dodge, Joseph Jewett, Joseph Russell, Thomas Lawrence, Nathan Chase, Willard Merriam, Benjamin Moore, Maxi Jewett, Nathaniel Proctor, Moses Sanderson, Joseph Raymond, Ebenezer Phillips, Israel Hinda, Simeon Proctor, Samuel Tenney (4th), John Dix, William Tenney, Eleazer Lawrence, Thomas Russell, Benjamin Hnar, Benjamin Hartwell, John Green, John Whitling, Jr., Stephen Tuttle, Thomas Stearns, Sampson Warren, Daniel Tuttle, Peter Reed, Oliver Hartwell, Thomas Wood, Benjamin Worster, John Tuttle.

A few of the men dropped out at Concord, but the most of them are put down as having marched twenty-six miles and having served nineteen days.

Jonathan Warren and Nathaniel Whitcomb also received ammunition, and so were probably either in another company or went as unenlisted volunteers.

Among the rolls of the army at Cambridge made up to August 1, 1775, is another company, mostly composed of Littleton men, which was probably organized after the Concord fight. The list is as follows :

Captain, Samuel Gilbert ; Lieutenants, Joseph Gilbert, Joseph Baker, Jr. ; Sergeants, Daniel Kimball, Jacob Porter, Thomas Treadwell, Ephraim Proctor ; Corporals, Ezra Baker, Jonathan Cowdrey.

Privates, Joseph Baker, Cornelius Bachelor, Benjamin Cox, Lemuel Dole, James Dutton, Benjamin Durant, John Dinmore, Benjamin Dole, William Farr, Samuel Hunt, Joseph Heywood, Moses Holden, Isaac Lawrence, Peter Cummings Gilbert, Elijah Proctor, Jonathan Phelps, Samuel Phillips, Paul Robbins, John Robbins, Isaac Russell, Nathaniel Russell, Oliver Sawyer, James Whittemore, Peter Whitcomb, Isaac Whitcomb,—

with others from Lancaster, Dunstable and other towns.

This company of Captain Gilbert's was also in Colonel Prescott's regiment, and took part in the battle of Bunker Hill, in which were killed Peter Whitcomb,

Benjamin Dole, John Lawrence, James Whittemore and Isaac Whitcomb.

In addition to those whose names have been given, the following served for Littleton in the continental army, at various times, during the war :

Amos Atherton, Paul Brown, Peter Baker, Timothy Baker, William Burke, John Cavender, Joseph Carter, Henry Durant, Jason Dunster, Jesse Dutton, David Baker, John Brown, Lucius Blanchard, Scipio Chase, Hildreth Dutton, Joseph Dole, John Dodge, John Dix, Jonathan Fletcher, John Foster, Solomon Foster, Jonathan Langlee Fisher, James Holden, John Hartwell, Captain Aerou Jewett, William Johnson, William Johnson, Jr., John Kilburn, Abel Lawrence, Reuben Leighton, Joseph Lewis, Jonathan Longley, Joseph Longley, Scipio Negro, Thomas Nutting, Peter Oliver, Charles Phipps, Timothy Proctor, Samuel Pool, Abel Proctor, Amos Parling, Jr., Zachary Robbins, Jonathan Russell, John Russell, Jr., Lieutenant-Colonel Jonathan Reed, Samuel Reed, Samuel Reed, Jr., Artemas Reed, Nathaniel Reed, William Smith, Samuel Stearns, Levi Shepherd, Robert Sever, Amos Shed, William Tenney, Jeremiah Temple, Jonathan Tuttle, John Wood (3d), Sergeant Peter Wheeler, Peter Wright, Stephen Wright, Jacob Warren, Samuel White, William Whiting, Jonathan Wetherbee, Second Lieutenant Ephraim Whitcomb, Paul Whitcomb.

These names have been collected by the writer from the Revolutionary rolls in the State archives, and from town records and vouchers. The number is surprisingly large. That 150 men, or nearly seventy-five per cent. of the male population, of military age, should have taken part in the war, speaks volumes for the patriotism of the town, and, as well, shows the desperate character of the struggle. The male population of sixteen years of age, and over, was only 209 on January 1, 1777.

The smoke from the burning of Charlestown was distinctly seen in Littleton, and caused great alarm.

In May the town had voted to purchase a stock of fire-arms with bayonets, the number to be left to the discretion of the selectmen, who were that year Major Jonathan Reed, Jonathan Patch, Samuel Gilbert, William Henry Prentice and Aaron Jewett. Notice that three out of the five afterwards served as officers in the continental army.

At a town-meeting held June 17, 1776, at which William Henry Prentice was moderator, the following vote, in accordance with the recommendation of the General Court, was passed after some debate and motions to adjourn, which were not carried :

"If the Hon^r Congress should, for the Safety of the Colonies, Declare them Independent of the Kingdom of Great Britain, the Inhabitants of Littleton engage to support them in the measure."

On October 14th following, the town voted its consent to the plan proposed by a resolve of the House of Representatives that the Council and House should propose a State Constitution to be submitted to the people.

In March, 1777, the town voted a bounty of £18 in addition to the State bounty, for every three years' soldier who should make one for its quota, and also voted "to take up the matter at large from the 19th of April, 1775, and Chuse a Committee to apprise each Campaign and make an Everage according to their poles and Rateable Estates, as other Taxes are Levied, and that each man shall have credite for what he has done."

As the war progressed and more men were called for, it became difficult to procure them, and no wonder, when we consider the great number who went from this small town, and at one meeting it was impossible to choose a committee who would serve to hire men.

The fluctuations of continental money were extremely embarrassing, and a large number of bounties were paid in rye and other produce, which was preferred to paper money. As high as £2550 in paper money was paid for a single bounty.

On December 21, 1780, the town voted "100 hard dollars or other specie equivalent & 1 Pr. good shirts, shoes & stockings, to be delivered yearly in October, so long as they serve, to all soldiers who enlist accordingly."

By summing up the various appropriations for the payment of soldiers and purchase of supplies, as recorded on the town records, I find they amount to the enormous sum of £126,172 16s. 10d., or its equivalent in produce.

It must be remembered, however, that this was not all hard money, but much of it was continental paper currency. While on the other hand it is probable that this sum does not include a great deal of money which was paid out on account of the war, but did not appear under specific appropriations.

Captain Aaron Jewett was a delegate from Littleton to the Constitutional Convention of 1779. This gentleman, after serving in the war, became a Shaker, and was one of the founders of the Harvard Shakers.

Rev. Mr. Rogers, being quite advanced in years, asked a dismissal in January, 1776. Not desiring to have him sever his connection with them, the church voted not to dismiss him, whereupon Mr. Rogers proposed that he continue his relations to the church as minister, but relinquish his salary in future and be released from obligation to perform ministerial services.

This proposition was accepted, and the town began to look for a colleague, and it is noticeable that at this time the initiative in ecclesiastical matters was taken by the church meeting, which first took action, and afterwards the town voted on concurrence. After calling two ministers as colleagues, first Mr. Wheaton, then Mr. John Bullard, who do not appear to have accepted, and then waiting for some time, finally in October, 1780, Mr. Edmund Foster was called, and accepted, at a salary of £80 a year, based on the value of certain articles of consumption, such as corn, pork, beef, &c., as recorded, and a settlement of £200.

Mr. Foster was ordained at Littleton January 17, 1781, and succeeded to the ministry on the death of Mr. Rogers, in November, 1782.

Mr. Foster was born in North Reading, Massachusetts, April 18, 1752, and was left an orphan when seven years old; he worked his way through Yale College, and afterwards studied for the ministry. Both Harvard and Yale conferred honorary degrees

upon him. While a divinity student he shouldered his musket and went to face the enemy at Concord and Lexington.

He represented his district both in the Senate and House, after the War of 1812 (in which three of his sons held commissions); on one occasion he preached the Election sermon, and was a delegate to the Constitutional Convention of 1820. He died March 28, 1826, in the forty-sixth year of his ministry.

Mr. Foster assumed his duties as colleague to Mr. Rogers under very adverse circumstances; he was called against the opposition of a minority, who recorded a protest signed by forty-six persons. The town was impoverished by the cost of the war, and in 1782-83 by severe drouth, and was in the midst of the hardest times ever seen in this country.

It was found difficult to raise his salary, and he was obliged on one occasion to bring suit before he got it. The town settled and paid costs.

The hard times, as is always the case, made discontent, the church was badly out of repair, so much so that it had to be propped up, and furthermore a movement was started a few years before Mr. Foster came to set off the south part of the town for the purpose of forming a new parish, which resulted in the formation of first the district and finally the town of Boxborough.

The first reference to this matter appears in the town records under date of November 4, 1778, when the town chose a committee consisting of Deacon Josiah Hartwell, Jonathan Reed, Esq. and Mr. Daniel Rogers, Jr., to wait on the General Court and show reason why the south part of the town should not be set off as petitioned for. The same committee was chosen for the same purpose in the following February, and in July there was an article in the town warrant to see if the town would "vote off" that part of the town to form a new parish, with parts of Stow and Harvard. The town voted against it.

In October, 1780, a vote was passed to take the names of those who wished to be set off, and it is recorded that Bennet Wood, Phis Wetherbee, Israel Wetherbee, Abel Fletcher, Ephraim Whitcomb, Edward Brown and Boston Draper appeared.

In February, 1781, the town again chose a committee to oppose the petition to the General Court. This attempt to form a new town or parish was a failure, as had been the previous one, but in March, 1782, Silas Taylor and sixty-nine others petitioned the General Court again, stating that they were at a great distance from the meeting-houses in the towns to which they belong, to remedy which they had built a house for public worship in a convenient place and procured preaching much of the time for several years previous, but had not been excused from paying for the support of preaching in some of the towns to which they belonged, and praying to be incorporated into a town, district or parish. The petition was referred to the second session, in September, when the

committee to which it had been referred reported that the petitioners who belonged to the towns of Stow and Harvard should be incorporated into a district with such of the inhabitants of Littleton as were included in the petition, and should, within the space of twelve months, signify that they desired to belong to the said district and no other.

Littleton people had evidently been caught napping, but as soon as they learned of the report of the committee they sent to the General Court two remonstrances, one signed by the selectmen and the other by Samuel Lawrence, Elias Taylor, Thomas Wood, Daniel Whitcomb, Jonathan Patch, Nathaniel Cobleigh, John Wood, Solomon Foster and Jedediah Taylor, living within the bounds of the proposed district. It was, however, too late, and a bill was passed February 25, 1783, which, after stating the boundaries, said: "And all the Polls and Estates that are included within the said boundaries shall belong to said District, except those of such of the inhabitants of that part set off from Littleton as shall not, within the term of twelve months from the passing of this Act, return their names unto the office of the Secretary of this Commonwealth, signifying their desire to become inhabitants of the said District." The result of this was, that while a number returned their names as desiring to join the new district, yet others, to the number of thirteen or more, did not, but preferred to remain in Littleton.

In June, 1793, Boxborough, which had become a town, petitioned the General Court to establish an obvious and uncontrovertible boundary between that town and Littleton, against which the thirteen citizens of Littleton who had the right to join Boxborough, but had not done so, remonstrated, stating that they believed the object of the petition was "more to divide them from the town of Littleton than to ascertain more certain boundaries." Thereupon the Legislature passed the act of February 20, 1794, which gave the owners of such farms lying on the Boxborough side of the straight line which was originally proposed as the boundary, and who had not joined Boxborough in accordance with the act of 1783, the right to apply to Boxborough to have their polls and estates belong to that town, and the same was to be accomplished upon the vote of Boxborough and proper notice to the town of Littleton. This right was to go with the ownership of the land. In the course of time all the farms in question had been transferred to Boxborough save two, owned in 1868 by Henry T. Taylor and Wm. H. Hartwell. At that time Boxborough petitioned the Legislature to have those farms set off to her, but was unsuccessful. Another attempt was made before the Legislature of the present year, 1890. It was met by opposition on the part of the owners of the two farms, now Deacon Henry T. Taylor and Mrs. Olive Hall, and the town of Littleton, who remonstrated and filed a counter-petition, asking for a new line between the two towns,

which leaves the greater part of the two farms and the buildings on the Littleton side, as well as a small place, formerly in Boxborough, lying between them on Liberty Square, and owned by — Wiid, thus doing away with the previous provisions allowing a transfer to Boxborough. The Littleton petition was granted and a bill passed in accordance with it. The Taylor farm is the same which was owned, in 1783, by Deacon Elias Taylor, the ancestor of Deacon Henry T. Taylor, having remained in the family from that time. The Hall farm was then owned by Samuel Lawrence, and was the same where the Lawrence Tavern was kept, the sign which bore the legend "Pay To-Day & Trust To-morrow," with the picture of an officer with a drawn sword, below which was the word "Entertainment" and date 1768.

As has been stated, the meeting-house was out of repair at the time Mr. Foster came to Littleton, and for several years the question of building a new one or repairing the old one was agitated, and many votes on the subject were passed and afterwards reconsidered. Finally, on December 31, 1792, the decisive vote passed to build anew on the same spot, and the town proceeded to erect its third meeting-house, "40x55 feet, with a steeple and porches." It was completed in the summer of 1794, and was a very imposing structure and really fine for its period. A new bell was procured in 1808.

The meeting-house appears never to have been heated except by religious fervor or a town-meeting discussion until 1818, when, in January, the town voted to have two stoves, provided they were given by subscription. They must have been popular, for in October, 1820, it was thought best to vote "that the town considers that the stove pews are appropriated to elderly people."

The history of the way in which paupers have been cared for in this town is rather interesting. The first pauper on record was the widow, Thanks Dill, concerning whom there appears to have been a question between this town and Concord as to where she belonged. The poor woman was carried back and forth from one town to the other and finally died in Littleton in 1733, whereupon the town expended nine shillings for rum for her funeral and a further sum for gloves used on the same occasion. It was a common thing to carry paupers to other towns to get rid of them, and to warn out of town persons who were likely to become a charge against the town.

In 1737 paupers were put out by vendue, among them several illegitimate children. In 1798 the town voted to hire a house for the town's poor. The town farm was purchased in 1825.

Any one walking up Everett E. Kimball's lane to the top of Long Pond Hill will see the remains of a road which formerly ran where the lane is over the highest part of the hill to the Haley place. The records show that this road, from William Henry Prentice's to Edward Baker's, as it was described, was ex-

changed, in 1789, for the present road to Newtown, turning off by the present residence of William H. Tenney, and that the road was turned a little to one side so as not to obstruct Dea. Oliver Hoar's "outseller," thus showing the antiquity of Mr. Tenney's side-hill cellar.

In 1801 the town voted to buy a piece of land of Mr. Rogers and others in front of the meeting-house to enlarge the road and Common. The line, as then located, ran very close to where the rear wall of the town-hall now stands, and a strip was added to give space behind the building when it was erected in 1886.

The town records make no allusion to the War of 1812, but from other sources the names of three Littleton men who served have been obtained as follows: Sampson Warren, who returned from the war sick and died at home, Micajah Rice and Reuben Durant. No doubt others from this town also served in that war.

December 4, 1815, Rev. Mr. Foster preached a century sermon on the history of the town. It was an able and interesting discourse and the writer is indebted to it for much information. From it we learn that the post-office at that time was on the "great road," probably at the "long store," now the dwelling-house of Charles F. Watts. The town voted to print three hundred copies of Mr. Foster's sermon to distribute to every family and sell the rest for the benefit of Mr. Foster.

Up to 1822 there had been but one church, the town church, and as we have seen, church business was done in town-meeting by the town acting in its capacity as a parish.

On March 14, 1822, the Baptist Society was organized with twelve members. It had been intended to organize on the 7th, but the town voted to refuse them the use of the church for that purpose on that date. Rev. Benjamin Willard had preached for the Baptists previous to their organization at various times from 1820 and until 1823. There was also preaching in the interest of other denominations about this time.

In April, 1821, the town voted leave to Aaron Tuttle and others to have preaching in the West School-house on Sundays.

These inroads on his flock were naturally distasteful to Mr. Foster and he took vigorous measures to oppose them. On several occasions he attended the meetings and addressed the audience in refutation of the doctrines there promulgated, and once he took possession of the meeting with the announcement that he was the minister of the town, and proceeded to conduct the services and then dismissed the audience, so that they had no opportunity to hear the speakers who were present to address them.

In the church Mr. Foster had ruling elders appointed to assist him in bringing back to communion those who absented themselves to hear the "itinerant and disorderly preachers." A few were brought back, but

many joined the Baptist Society and all received individually a vote of public censure.

The Baptists built their first meeting-house in 1822, on the corner of the road leading to the north part of the town, where now stands the house of the late John P. Tuttle. It was built of brick, and was dedicated July 9, 1823. Rev. Amasa Sanderson was ordained their minister at the same time and continued his pastorate until March 23, 1831.

The succeeding Baptist ministers have been: Rev. Slias Kenney, 1831-34; Rev. O. Ayer, 1837-43; Rev. T. H. Lunt, April, 1844, to March, 1845; Rev. Aaron Haynes, April, 1845-47; Rev. B. H. Clift, June, 1847, to February, 1848; Rev. George Matthews, May, 1848-52; Rev. F. E. Cleaves, June, 1852, to October, 1857; Rev. D. F. Lamson, July, 1858, to April, 1861; Rev. C. M. Willard, August, 1861, to November, 1867; Rev. C. L. Frost, August, 1868, to June, 1869; Rev. J. F. Morton, September, 1869, to September, 1872; Rev. B. N. Sperry, January, 1873, to May, 1875; Rev. William Read, July, 1875, to May, 1878; Rev. Paul Gallaher, November, 1878, to November, 1880; Rev. W. H. Evans, December, 1880, to July, 1883; Rev. R. G. Johnson, December, 1883, to August, 1888; Rev. William J. Cloues, September, 1888.

The brick meeting-house was burned, probably by an incendiary August 5, 1840, and the present wooden one built at the Old Common and dedicated in June, 1841. Within a few years it has been raised and a ve-try built in the basement.

After the death of Mr. Foster the town voted, October 29, 1827, to call Rev. William H. White to settle as minister. He was born in Lancaster, Mass., in 1798, and lived on a farm in Westminster until he was twenty-one years old, when he fitted for college under the tuition of Rev. Dr. Stearns, of Lincoln.

Mr. White graduated at Brown University in 1824, and at Cambridge Divinity School in 1827. He received a call to preach in Kingston, Mass., but preferred Littleton, where he was ordained January 2, 1828.

It is said that it had long been his ambition to settle in this town and to win the daughter of his predecessor, Sarah Bass Foster, to whom he was married a year after his ordination.

He was an earnest, active and able man, and the church and town still feels and will feel the benefit of his ministry for years to come, if not for all time.

He was the founder of the Littleton Lyceum, of which an account more in detail will be given later, and of the first Sunday-school in this town. He died July 25, 1853, in the twenty-sixth year of his ministry. He was succeeded by Rev. Frederick R. Newell, September, 1854, to November, 1856; Rev. Eugene De Normandie, February, 1857, to July, 1863; Rev. Albert B. Vorse, June, 1864, to June, 1869; Rev. David P. Muzzey, October, 1869, to April, 1871; Rev. Timothy H. Eddowes, January, 1872, to December,

1872; Rev. Samuel R. Priest, January, 1873, to August, 1874; Rev. J. Wingate Winkley, March, 1876, to July, 1882; Rev. William I. Nichols, October, 1884, to November, 1889; Rev. E. J. Prescott, July, 1890.

In 1841 the society took down their old church and built the present one on the same spot, the fourth building of the First Congregational Society. In 1882 a vestry, with dining-room and kitchen below, were added to the rear of the church.

Within a few years of each other were formed three other religious societies in this town, of which only one has survived; they were the Universalist, the Unionist and the Orthodox Congregational.

The Universalists held meetings in the Centre School-house and in Chamberlain's Hall from 1830 until December, 1846, when they bought at auction the meeting-house the Unionists had built a few years previous, a short distance east of the present Union school-house, on the road between the Centre and Old Common. The meeting-house was burned probably by an incendiary in 1847, after which the society dispersed.

The Unionists or Millerites were an offshoot of the Baptists, in whose meeting-house William Miller first preached in town. They built the small house before-mentioned in 1840. They had set a time for the destruction of the world. The time came and passed, the society went out of existence, but the world still remains.

The Orthodox Congregational Society was formed March 22, 1840, and the church May 14th, of the same year, with thirty-two members, all or nearly all of whom had withdrawn from the town church, now the First Congregational, Unitarian.

They had held services for some time previously in the hall over the yellow store which stood a short distance west of Dr. R. H. Phelps' house, and continued to use it until their present meeting-house was completed in the fall of 1841.

Their pastors have been Rev. James C. Bryant, October, 1840, to March, 1845; Rev. James M. Bacon, October, 1846, to November, 1849; Rev. Daniel H. Babcock, April, 1851, to February, 1853; Rev. Elihu Loomis, October, 1854, to November, 1870; Rev. George Spaulding, November, 1870, to December, 1871; Rev. Henry E. Cooley, June, 1872, to October, 1874; Rev. George E. Hall, September, 1875, to February, 1877; Rev. William Sewall, March, 1877, to October, 1881; Rev. Nehemiah Boynton, October, 1882, to September, 1884; Rev. John C. Staples, November, 1884, to November, 1889.

In 1882 the church was raised, moved back and a vestry and kitchen built in the basement; a new organ was also added and the church re-dedicated in October of that year.

The church and society celebrated their fiftieth anniversary on May 14th of the present year, 1890, at which time addresses were made by Rev. William G. Tuttle, one of the founders of the church, by several

of the former ministers and a historical address by George A. Sanderson, to whom the writer is indebted for some of the facts here stated.

In ancient times a carriage was taxed as a luxury. The returns for the years 1786, '87, '88 and '89 show that in each of those years there were but two in town, both chaises, though not recorded as owned by the same persons in every year. The owners were: Captain Jonathan Davis, Mr. Jeremiah Cogswell, Captain David Lawrence.

The owners of slaves for the years 1770-71 were:

Nathan Chase, one slave; Captain Leonard Whiting, one slave; Joseph Harwood, two slaves; Captain David Lawrence, one slave; Captain John Russell, one slave; Captain Samuel Preston, one slave; Simon Tuttle, one slave.

A public school appears to have been first established in 1725, for on March 31st of that year the town voted that the selectmen should provide a school-master and "to agree with him," that is, as to pay. They hired John Powers. The following January the town again voted that there should be a school-master and chose a committee consisting of Deacon [Caleb] Taylor, Lieutenant Lawrence and Walter Powers to hire the school-master and, in connection with the selectmen, to order where the school was to be kept in the several parts of the town—in private houses, of course.

There was but one school, and to be fair to all, it kept in various parts of the town, thus usually moving three times during the short time it kept, which was only three or four mouths a year in all. In 1727 an article to see if the town would build school-houses was voted down. In 1732 it was voted to have school four months in one place—that is, not to move at all for that year.

From 1755 to 1757 Mr. Phillips Payson was the school-master. He was a graduate of Harvard College in the class of 1754, of which John Hancock was a member.

From 1758 to 1760 Mr. Samuel Payson was the school-master. He was a Harvard College graduate of 1758.

In May, 1760, the town voted "to abate Mr. Stephen Shattuck the Rates for his Son's Poll y^e last year on condition his Son Goes to college the next year." This was no doubt Benjamin Shattuck, who graduated at Harvard College in 1765.

Mr. Stephen Shattuck, Jr., was the school-master in 1761—he may also have been a Harvard graduate, as the class of 1756 contained that name.

As the town did not build school-houses of its own until the year 1796, the schools, during all the years previous, were kept in buildings owned by private individuals, but it appears that school-houses existed which were no doubt fitted up by their owners and leased to the town.

In 1772 it was put to vote to see if the town should be supplied with school-houses, "proper allowance being made to the present proprietors of the School-Houses," but the proposition was defeated.

It appears to have been quite the custom to have the school-masters of this early period Harvard College graduates who were studying for a profession, and sometimes undergraduates, as in 1785 Mr. Elisha Gardner taught in the Centre and graduated at Harvard the following year.

In 1790 James Green was the school-master. October 7, 1795, the town voted to build five school-houses, but in May following reconsidered and voted to build four. The matter was left in the hands of a committee to buy the land and plan the buildings, which was done probably soon after. This, however, did not settle the question of four or five schools, which caused much feeling and seems to have been carried first one way and then another. The contest was between the Centre people and others who wanted a school located there and the residents in the outer portions of the town, who wanted only four, located in the south, east, north and west parts of the town. The matter hung along until February, 1799, when an attempt was made to settle the dispute by leaving out to a committee from neighboring towns the question whether there should be four or five schools, or what number; but the proposition was voted down.

This, no doubt, came from Centre people, and at the same meeting a motion to appropriate money for a school, to be kept in the old school-house at the Centre, or give certain inhabitants their proportion of the school money was also voted down.

In May, however, the town voted \$100 for "women schools," and to divide it into five equal parts.

In May, 1801, the advocates of four schools again carried the day, and it was voted not to build a school-house in the Centre.

In March of the next year the Centre got its portion of the money for a "woman school" for summer, but in October the town refused them any.

In March, 1808, the appropriation for schools was \$400 for Grammar School, \$150 for Woman School—and these meagre sums were more than had been appropriated in some, or perhaps any, previous years.

The four school-houses built in 1796, or thereabouts, were located as follows: The North was on the great road, east of Beaver Brook, and near the long store, which is now a dwelling-house; the East, or Newtown, was at the corner of the road, a short distance south of Mr. Eldridge Marshall's house; the South was near Mr. J. A. Priest's; the West was near its present location.

All attempts to get a school permanently located in the Centre failed for many years; but Rev. Mr. Foster was earnest in his efforts for it, and was not the man to give up in such a contest; furthermore, the North School became overcrowded, at one time as many as 120 scholars attending in 1820-22, while Mr. Ithamar Beard taught. Finally, on the last day of the year 1821, a vote was carried, 54 to 52, to build a school-house near Daniel Kimball's, now Mr. A. P. Hager's, in the Centre, another in Nashoba, near

Shaker Lane, and to move the North, South and Newtown School-houses. This was reconsidered January 14th, by a vote of 68 to 53; but two weeks later another meeting was held, and the erection of the Centre School-house, though on a different spot, and the removal of the North School-house were agreed to, while other plans submitted by the committee were rejected, and the meeting adjourned to the following Thursday, January 31st, at which time the whole matter of school-houses was settled as follows: The Centre School-house to be built on the town land nearly opposite the church, where it stood until it was removed to make way for the town hall and library building, in 1886, and the bricks used in the hall; the North to be moved to very near the spot occupied by the present North School-house; a new one to be built at Nashoba—still standing, but used as a farm building by Mr. Allen Kimball; Newtown to be moved to Jeremiah Tuttle's land at the foot of the hill, and the South to be moved seventy-eight rods, to very near or at the spot where the railroad crossing now is.

The question has been a hard and vexatious one, and when finally settled the shrewd suggestion was made to build the houses of brick to prevent their being moved at any future time. It was immediately carried. In 1831 new school-houses were built in the north and south parts of the town, on the old locations, and in 1832 at Newtown.

In 1831 began the attempts to get a school-house at the Old Common, which were renewed in various forms, sometimes to get a corporate school district and sometimes to have the town build, until 1843, when, in April, it was voted to build at the Common and move the Nashoba School-house, or to sell it and build another.

This was reconsidered, but again carried, so far as related to the one at the Common. The Nashoba matter was put off, but carried the next year, at March meeting, and a school-house built on or near the present location. At the same meeting a committee was chosen to confer with the directors of the Fitchburg Railroad about moving the South School-house, as it was on or close by the location of the track. It was afterwards moved a short distance south.

As we have seen, the location of school-houses has always been a disturbing element in town politics, and any attempted change has called forth repeated and stormy meetings.

This was the case again shortly after the Civil War, when, after many meetings, it was decided to unite the Centre and Old Common Schools in a graded school, and build the present Union School-house, which was done in 1867. Within the next decade all the other school-houses were rebuilt. Additions were made in 1888 to the Union School-house of a room for the High School, and to the West School-house of another room in order to make a graded school of it.

A few years ago a High School was established and kept one term a year, for several years, in the old Centre School-house, which had not been used for school purposes for several years after the erection of the Union School-house. Now the High School is a regularly established school, keeping throughout the whole school year, and with a course of study arranged either to fit for college or to give an English course.

The present principal is Mr. C. H. Harriman, who was preceded by Mr. Ira A. Jenkins, Mr. Edwin C. Burbank and Mr. William H. Snyder.

For a few years the High and Centre Grammar Schools were, for lack of accommodations, kept as one school, with Miss Mary G. Tuttle as assistant.

Running back over some seventy years, the following have been prominent teachers at various times in the public schools:

Miss Josephine Newhall, Miss Nellie M. Jacobs (now Mrs. J. M. Hartwell), Mrs. Ellen F. Johnson, Mr. Albert F. Conant, and his wife (formerly Miss Patten, of Westford), the Misses White (daughters of Rev. W. H. White), Mr. Frank A. Patch, Mr. Laban Warren, Mr. Warren Bolles, Mr. George Stevens, Rev. William G. Tuttle, Mr. Benjamin Kimball, Jr., Rev. Edmund B. Willson (now pastor of the North Society in Salem) Mr. N. B. Edwards, Mr. Henry Prescott, Mr. D. A. Kimball, Mr. Noyes, Mr. Nathan A. Reed, Mr. Otis C. Wright, Mr. Stearns, Mr. Stone, Mr. Ithamer Beard, Mr. Joel Hoar, Mr. M. S. Hager and Mrs. Sophia K. Harwood (formerly Miss Kimball).

THE LITTLETON LYCEUM was organized at a meeting in the Centre School-house, Monday evening, December 21, 1829, after several preliminary meetings had been held, at one of which a constitution had been adopted. The officers chosen were Rev. William H. White, president; Rev. Amasa Sanderson, first vice-president; Hon. Jonathan Hartwell, second vice-president; Col. Nahum Harwood, treasurer; Deacon John M. Hartwell, recording secretary; Mr. Joel Hoar, corresponding secretary; Mr. Benjamin Kimball, Deacon Thomas S. Tuttle, Mr. Nathan Hartwell, curators.

The object of the Lyceum, as stated in the preamble of the constitution, was as follows: "We, the subscribers, feeling desirous of affording every possible facility for the improvement of our schools, feeling the importance of personal cultivation and the general diffusion of useful knowledge, and believing these objects can be best accomplished by united and continued efforts, agree to form a society, under the name of 'The Littleton Lyceum.'"

The founders were the leading men of the town at that time. Rev. Mr. White may be considered the father of the society, and for twenty-three years was its president.

The literary work of the Lyceum began January 5, 1830, with parsing and criticism and reading from

the *North American Review*. January 12th there was reading by the first classes of the schools throughout the town, and the reading of a portion of Hall's lectures on School-keeping. January 19th began a course of three lectures on Astronomy, by Mr. Abel Fletcher, of Boxborough. Two more evenings were occupied by reading on School-keeping, and one by a debate.

From that year down to and including the present the Lyceum has continued and flourished each year without a break, the only one of the many lyceums formed about that time throughout the State which has done so without the lapse of a year or more.

The exercises have changed somewhat, and of late years take more the form of a course of popular lectures and concerts, with, occasionally, a debate or an evening occupied by the schools, as a reminder of the original custom and purpose of the Lyceum. There is no permanent fund, and the money for the support of its lectures is raised each year either by the sale of tickets or by popular subscription—the more usual manner—and in that case the lectures are free and public to all.

During the winter months, Tuesday evening is, by common consent, assigned and set apart for the Lyceum, and rash, indeed, would be any one who should appoint any other public meeting for that evening.

Among the names of those who have lectured before the Lyceum are Ralph Waldo Emerson, Dr. Oliver Wendell Holmes, Mr. E. P. Whipple, Rev. James Freeman Clarke, Mr. A. Bronson Alcott, Judge E. R. Hoar, Mr. C. C. Coffin, Prest. C. C. Felton, Wendell Phillips, Mrs. Mary A. Livermore, Col. T. W. Higginson, Rev. E. E. Hale, Rev. Dr. E. H. Chapin, Rev. E. S. Gannett, Hon. N. P. Banks, Hon. Geo. S. Boutwell, Hon. John D. Long, Hon. Geo. B. Loring, Prof. Morse, Col. Thomas W. Knox, Hon. Wm. Parsons and a long list of other prominent men.

In 1879 the semi-centennial of the Lyceum was celebrated on December 23d. On that occasion Hon. Geo. W. Sanderson presided. An historical address was delivered by Miss Hannah P. Dodge, to whom the writer is indebted as authority, and other addresses were made by Hon. Geo. S. Boutwell, Hon. Geo. Stevens and Rev. Edmund B. Willson. The proceedings, including letters from invited guests, were printed in pamphlet form.

Littleton people are justly proud of this honored institution, which has been so well supported and has added much to the culture of the town.

It is interesting to relate the traditions about several of the large trees which beautify the town and are among the few landmarks connecting us with the past.

The great elm on Mr. John A. Kimball's land, near the mill-pond, marks the spot where lived Samuel Dudley, the first town clerk, and whose most excellent wife was cruelly accused of witchcraft.

The two largest elms on Colonel Joseph A. Har-

wood's lawn were set out by his grandfather, Captain Joseph Harwood, the younger, who, when a young man of about seventeen years, dug them up in the woods, carried them on his back and set them out where they stand, as well as two others which time has long since removed.

The elm by the house of Dr. R. H. Phelps, the most beautiful tree in town, was set out by Captain Kidder to serve the practical purposes of hitching-post and shade for his horse when he came to meeting. It is estimated to have been set out about the year 1810.

Captain Kidder kept the Tremont Tavern on the spot where the Baptist parsonage stands, and afterwards built the house owned by Mr. John W. Adams and occupied by him at the time it was burned by Scribner, the incendiary, in 1883.

The elm tree by the Baptist parsonage was set out by Mrs. Nye, the mother of the late Mr. Thomas Nye.

The elm tree on the sidewalk between Mr. Everett E. Kimball's and Mr. William Grimes' is the "Rogers Tree," so named by Mrs. Zadoc Rogers, who lived where Mr. Grimes does, and paid some young men five dollars to set it out where she designated.

The ash tree near the town hall door came from the valley on the west side of Long Pond and was brought on the shoulders of one of the young men of that time. Many of our older residents will remember a very large elm which formerly stood in the rear of the house of Mr. Eugene Felch. That tree was a memento of the courtship of John Hartwell and Mary Dix. Mr. Hartwell came along the road one day carrying some small elm trees, and meeting the lady who afterwards became his wife, gave her one which she set out, and which grew to immense size, and under it they both lived and died. The row of maples in the Centre, beginning at the Rogers tree and extending south on Foster Street, was set out in 1861. Littleton's record in the War of the Rebellion has not heretofore been fully compiled, as the town has only a partial list of the men who served as representing Littleton. The names here given, however, are believed to include all, both residents and others, accredited to the town as volunteers.

General Schouler in his "History of Massachusetts in the Rebellion," states that the whole number of men furnished by the town during the war was 117, a surplus of eighteen above the quota, but the following fifty-six are all the names which appear on the town book of record:

Charles E. Beard, Warren B. Ball, Daniel Brown, Luther Battles, Joseph A. Butterfield, Marcus Conant, [Maj.] Sherman Conant, Edward J. Card, James Costello, George W. Clark, Theodore C. Clark, Isaac N. Dodge, James L. Durant, Hallowell R. Donham, [Sergt.] James T. Estes, Daniel C. Fletcher, Charles Franklin, William L. Flagg, John Fowley, Warren W. Gilson, [Sergt.] Francis W. Goodwin, Barney Golden, Edward Golden, John S. Hartwell, Charles H. Holton, Elbridge H. Jeffs, Charles S. Jeffs, Sherman H. Jewett, Abel H. Jones, [Corp.] Geo. W. Knowlton, John M. Kidder, Henry A. Lawrence, George A. Loring, Calvin L. Latham, [Corp.] Albert B. Marshall, Patrick Moore, Nicholas O'Neal, [Corp.] George H. Patch, [Lieut.] Cyrus P. Pickard, [Corp.]

Herbert E. Preston, Oscar Preston, Ralph W. Parker, James Powers, [Corp.] Charles W. Reed, [Lieut.] George A. Reed, [Sergt.] Albert W. Robbins, [Corp.] Luther R. Searles, James C. Smith, Nathan F. Tuttle, [Corp.] Adams W. Tuttle, [Corp.] William C. Turner, Allen P. Whitcomb, Nahum H. Whitcomb, [Corp.] George L. Whitcomb, George White, Henry S. Willard.

The following forty-nine additional names have been collected by the author after careful and diligent search.

Corp. Edward D. Battles, Henry Bode, Charles P. Buckley, Henry O. Burham, Edward Cameron, Hugh Casey, Corp. John Clark, Hugh Connolly, John Curran, George M. Downe, Henson Dyson, Edwin C. Field, Thomas Geary, Michael Gubbins, William Haley, John Hawkins, John Henderson, Thomas Jones, Julius Keiser, Balthass Kellar, Joseph Kiehlamer, Stephen B. Knights, Charles A. Long, Edmund Mander, Jacob McAtee, Edward C. Magoren, Charles McCarthy, Eben S. McCleary, Alexander McGregor, George C. Monroe, Darius H. C. Nelson, Corp. James O'Brien, Cornelius O'Connor, William Parker, Calvin B. Paige, Asst. Surg. Isaiah L. Pickard, Sergt. Comfort Preston, Austin Richardson, Albert J. Robbins, Frederick Shaffer, Patrick Shorey, George Smith, William Smith, James Sweoney, John D. Sauborn, Humer A. Warren, Anton Wlach, August Vanderhyde, Edward Vansicklen.

Some of these never resided in town, and were merely engaged to fill the quota, or as substitutes from wherever they happened to come, without regard to residence. The number 117 was no doubt made up by re-enlistments, of which there were several.

The first town-meeting to consider matters relating to the war was held May 1, 1861, when it was voted to raise by taxation \$1000, and the selectmen were authorized to borrow \$2000, if needed, to pay each soldier belonging to the town \$10 a month while in the service, and to provide for their families.

In July a committee, consisting of the selectmen, who were John F. Robbins, John Cutter and James A. Parker, with the addition of Dea. Richard Hall, Francis P. Knowlton, Dea. Thomas S. Tuttle and Benjamin Edwards, were chosen to expend the money appropriated at the previous meeting.

A year later, in July, 1862, a bounty of \$100 was voted to each volunteer for three years' service, and again, a year later, in August, 1863, the bounty was raised to \$125.

At the same meeting resolutions were passed appropriate to the death of Nahum H. Whitcomb, of the Sixth Massachusetts Regiment, who was killed at Suffolk, Va., and the town voted to pay the expense of bringing home and interring his remains.

The town continued recruiting and paying bounties during the remainder of the war, and expended, exclusive of State aid, \$11,104.33.

In 1863-64-65 the selectmen were Joseph A. Priest, William Kimball and George W. Sanderson.

Though a small boy at the time, the writer well remembers the impressive citizens' meeting in Central Hall when the first volunteers, enlisted for nine months, took their departure. Speeches were made by prominent citizens, and the soldiers appeared in their new uniforms.

A Soldiers' Aid Society was formed under the presidency of Mrs. S. B. White, widow of Rev. Wm. H. White, and many boxes of clothing, bandages and comforts were forwarded to the seat of war.

LIBRARIES.—One of the earliest public libraries in this State was in Littleton, and was established previous to 1827, probably by an association. It was a small collection of books, several being on theology; there were also Josephus' "History of the Jews," "Gil Blas," with some of Scott's and other novels of a standard character, and was kept on a set of three or four shelves which were placed in the house of the person having them in charge for the time being, and given out to any citizen who called for them.

At the date above mentioned the library was kept in the house of Mr. Timothy Prescott, who lived in the Rogers house, on the spot where Mr. George Whitcomb now lives. The books were sold at auction in 1834 or '35. About this time was established another library which was in charge of Dea. James Kimball, town clerk in the house now occupied and owned by Mr. A. P. Hager, until the evening of Jan. 1, 1847, when the books were sold at auction and bought by different people in town. Many of the books are still in existence, and the writer has seen one with the original book-plate headed "Littleton Town Library" on the inside cover.

An agricultural library was also established, probably after the sale of the town library, and kept an assortment of books on subjects of interest to farmers on some shelves in the Centre store. This library was maintained and owned by an association, and was more of a book club than a public library.

For several years previous to the foundation of the Reuben Hoar Library the case containing the agricultural library, the books of which were little, if any read, had been kept in the old brick Centre School-house, which was used as a town office, and had also a vault for town books and records in it.

These were all turned into the Reuben Hoar Library, together with many books belonging to the town, which were in charge of the selectmen, and had also been kept in the brick school-house.

This lot of town books contained many valuable sets which had been issued by the State from time to time, such as the Massachusetts and Plymouth Colony Records, Hitchcock's "Ichnoogy of New England," and others.

We now come to the Reuben Hoar Library. Some time during the fall or early winter of 1884 a gentleman who desired to remain unknown communicated to Dea. George W. Tuttle his desire to assist in founding a free public library in Littleton, and requested Mr. Tuttle to consult with several citizens as to the best way to proceed, at the same time expressing his willingness to give the sum of \$10,000 under certain conditions.

Mr. Tuttle consulted with Hon. George W. Sanderson, Mr. Gardner Prouty, Mr. Shattuck Hartwell and Mr. Nelson B. Conant, who held several meetings in regard to the matter and communicated with the unknown gentleman through Mr. Tuttle. Before matters were in shape to lay before the town, Mr. Tuttle

was taken sick with what proved to be his final illness, and in the latter part of the winter the people of this town mourned in his death the loss of a highly respected and valued citizen. Before his death he communicated to Mr. Nelson B. Conant his son-in-law the name of the gentleman making the offer and negotiations were then carried on through Mr. Conant.

After deciding on a plan to propose, a citizens' meeting was called for Monday afternoon, March 23, 1885, at which time the donor's offer and conditions were announced as follows: \$10,000 to be appropriated by the town, \$2500 to be raised by subscription, \$10,000 to be given by a party (his name to be unknown), on condition that the library be called the Reuben Hoar Library, and that \$5000 be invested in books, and \$5000 be invested and kept as a fund of which the interest to be expended yearly in books to replenish the library.

None of the gift of \$10,000 to be expended on the building. The books to be kept insured by the town and all expenses attending the running of the library paid by the town.

The library and its funds to be in charge of seven trustees, viz.: the pastor of the Unitarian Church and one layman, the pastor of the Orthodox Church and one layman, the pastor of the Baptist Church and one layman; one of the selectmen.

The plan proposed by the gentlemen who called the meeting, that is the conference committee, was to accept the offer and to build, with the \$10,000 to be appropriated by the town, a town-hall and library building combined.

Some opposition was manifested, as many desired to see the plan modified so that the town would not be required to expend so much money on a building, but the plan of the conference committee was carried out and resolutions favoring the acceptance of the offer were adopted.

The committee and others then began a canvass for subscriptions toward the \$2500 to be raised in that way, and after sufficient progress had been made a town-meeting was held in Central Hall, Monday, June 8, 1885, to see if the town would accept the conditions of the gift and appropriate money for building a hall and library and other matters connected with the matter. After considerable opposition the offer and conditions were accepted and a building committee chosen consisting of Gardner Prouty, Joseph A. Priest, George W. Sanderson, Edward Frost and Herbert J. Harwood, with instructions to report plans and location for a building at an adjourned meeting two weeks later. At that time the committee reported in favor of the location opposite the Unitarian Church, and showed sketches by Hartwell & Richardson, architects.

The report was accepted and it was to build, and \$10,000 appropriated.

The committee then went to work, but care and caution marked its proceedings, which were also pro-

tracted by financial difficulties of the general contractor, so that it was two years before the building was completed and furnished.

For furnishing, the town made a further appropriation, which brought the cost of the building up to \$11,000 or thereabouts.

The building was dedicated July 28, 1887, with an oration by ex-Governor John D. Long, addresses by Hon. George S. Boutwell and Hon. Charles H. Allen, a letter from the founder of the Reuben Hoar Library, and other appropriate exercises.

The founder wrote as follows :

"About fifty years ago a resident of Littleton became involved and was obliged to fail in business.

"Reuben Hoar being his largest creditor was made assignee. After looking over the assets and finding that if sufficient time was given they might realize just about enough to pay the debts in full, Mr. Hoar said to the man, 'I will make you my agent; go on, collect and distribute until you have paid all their just due, and if there is nothing left I will furnish you with capital to start again.'

"For some two years the business was managed with the most rigid economy, during which time Mr. Hoar proved wise in counsel and generous in help.

"When the estate had been settled, leaving a sufficient surplus to pay Mr. Hoar his legal and proper commission as assignee, he refused all compensation.

"It is from the careful use of that small residue by two generations that the means have been acquired with which to found this Library in honor of Reuben Hoar. "By the donor."

In the mean time library trustees had been chosen on July 3, 1885, as follows: Rev. Robert G. Johnson, Rev. William I. Nichols, Rev. John C. Staples, Nelson B. Conant, Herbert J. Harwood, Hon. George W. Sanderson, Miss Hannah P. Dodge, who organized with Mr. Sanderson, chairman; Miss Dodge, secretary and Mr. Conant, treasurer; and proceeded to make a selection of books, and to invest the permanent fund. Miss Sarah F. White was chosen librarian, a position which she still honors.

After purchasing, classifying and arranging about 2200 volumes, the library was opened to the public a few days after the dedication of the building.

A printed catalogue was issued in December, 1889, and at that time the library had grown to about 4500 volumes. The benefits of the library are fully appreciated by the citizens of the town, and there are few people of eligible age who do not either take out books or frequent the periodical table, so that the total circulation of books is over 7000 a year in a population of 1000.

The library is open on Wednesday and Saturday afternoons and Saturday evenings. A fine oil portrait of the late Reuben Hoar, in whose honor the library was named, hangs upon the wall of the reading-room, the gift of his daughters,—Mrs. Adelbert Mead, of West Acton, and Mrs. Isaac Wright, of Harvard.

The library also received a bequest of \$1000 by the will of Augustus K. Fletcher, formerly of this town, and has also been favored with many gifts of books and some pictures, as well as a valuable manuscript collection of historical and genealogical matter be-

longing to the late Samuel Smith and given by his heirs.

The town is also the owner of five shares in the Boston Athæneum Library, presented many years ago by Dr. Shattuck, of Boston, a relative of the first minister of the town, by the use of which books can be taken out by Littleton people.

The three churches have each a library of Sunday-school books, and that of the Unitarian Church is also quite general in its character, and contains books for people of all ages.

Littleton is principally a farming town, but has at the depot village a factory for canning and pickling fruit and vegetables, operated by E. T. Cowdrey & Co., the plant being owned by a company of Littleton men. There are two saw and grist-mills owned and operated by Fred C. Hartwell,—one at the depot and the other at the old Warren mill-site. At the Common Village are located the factory for manufacturing elastic webs and suspenders and the apple evaporator, both owned and operated by Conant & Houghton. Conant & Co. have stores at the Common and depot. Thacher & Hazen, a new firm, recently succeeding A. W. & W. H. Sawyer, at the depot and C. C. Hildreth at the Centre.

A few years since a large and costly brick factory was built near the depot by the Avery Lactate Co., for the manufacture, by a new process, of lactic acid, but the company failed and the building and machinery stand idle, having been sold for taxes.

About the time of the War of the Revolution there was a factory for dressing cloth on the brook near the house of Peter S. Whitcomb; it was owned by a stock company, which had, in 1779, seventeen shareholders, mostly residents.

The population of Littleton in 1776 was 918; in 1860, 1063; and in 1885, 1067. The number of polls is 305 and the valuation \$849,273.

The town has been represented in the State Senate by Rev. Edmund Foster, Hon. Jonathan Hartwell, Hon. Joseph A. Harwood and Hon. George W. Sanderson, and in the Executive Council by Hon. Joseph A. Harwood.

The State engineer of the Hoosac Tunnel, completed in 1875, was Benjamin D. Frost, of this town.

Taverns have been kept in Littleton by Samnel Hunt, probably near Peter S. Whitcomb's house, mention of which is made in the early records of meetings held there as early as 1722; also by one Lawrence, probably Samuel, in the south part of the town as early as 1768, in the house now occupied by David Hall, of which previous mention has been made; by John Fox and after his death by his wife, in the Centre about the time of the French and Indian War; also by Capt. Leonard Whiting in the Centre, previous to the Revolution; by William Henry Prentice, in the Centre, where Everett E. Kimball lives, during the Revolution; by Samuel Gilbert and afterwards about the beginning of this century by Captain

Kidder, at the Common, called the Tremont House, which stood where the Baptist parsonage now is—the building continued to be used as a hotel until it was struck by lightning and burned in 1845; by Simeon Proctor, where Solomon S. Flagg now lives; by Madison Loring, who succeeded Captain Kidder, at the Common, in the house afterwards occupied as a dwelling by the late John W. Adams; by Samuel Smith, on the spot where Albert F. Conant's house stands, and later, in the same building, by J. M. Colburn, William Chamberlain, Boynton Needham and others, and last by George D. Brown, who owned the place when it was burned, in 1878, but had not kept it open to the public for several years previous.

William L. Mitchel now keeps a public-house at the Common and has for several years.

As before stated, the earliest cemetery in town was at Nashoba, and was plowed up a number of years ago. The second and oldest of the two present cemeteries, the one at the Common, was laid out in 1721 and is described as having for its "East Corner an oak tree by King St. so called." The other cemetery was purchased in 1801, but was used only for the interment of paupers until the year 1812.

The following epitaphs are to be found in the old cemetery at the Common:—

" Memento Mori.

Here lies the Body of Dr. Enoch Dole, of Lancaster, E 33 yrs. 5 mo. & 3 days, he unfortunately fell with 3 others y^e 9th of Mar, 1776, by a caouon Ball from our cruel & unnatural Foes y^e British Troops while on his Duty on Dorchester Point.

No warning giv'n
Unceremonious fate!

A sudden rush from life's meridian joys!
A wrench from all we are from all we love,
What a change from yesterday!

Thy darling hope so near (Long labored prize),

Oh, how ambition flushed Thy glowing cheek—ambition truly great
Of virtuous praise;

And Oh! y^e last (what can word express thought reach), y^e last, last
silence of a friend.

Meaning his entrance into Boston which so soon took Place & on
which his heart was much set."

" Here lies the body of Isaac Powers,
One of those sweet and pleasant flowers,
Who in his Lifetime Lived well,
But God did toll his mournful bell;
Let this be a call unto the rest
When God doth take from us the best
Who was a pattern to us all.
But God can give a louder call
All earthly parents now behold;
The price of Grace is more than gold.
Prepare to meet your children first
At the Resurrection of the Just.

Who died December 15, 1729, in the 29th year of his age,"

" Affliction sore, long time I bore
Physicians was in vain,
Till God did please
And Death did seize
To ease me of my pain."

" As you are now, so once was I,
Rejoicing in my bloom,
As I am now, you soon must be,
Dissolving in the tomb."

" Present useful
Absent wanted,
Lived desired
And died lamented."

BIOGRAPHICAL.

HON. JOSEPH ALFRED HARWOOD.

In Littleton the number of old families living on farms—which have been handed down from sire to son for many generations is remarkable, and among the oldest is the Harwood family, of which Hon. Joseph A. Harwood is the head.

Nathaniel Harwood, of English origin, was living in Boston in 1655, whence he removed to Concord. From there his son Peter and grandson, Captain Joseph Harwood, moved to Littleton and bought in 1737 the estate upon which the family now live.

Their first residence was in a lot since grown up to woods near the new road to Newtown from Littleton depot, and some half-mile east of Mr. Harwood's house.

The cellar-hole may yet be seen and the old well filled with stones, while a short distance away is a finespring which comes up through a hollow log set in the ground no doubt some 150 years ago. About 1754 a house was built near the present one by Captain Joseph Harwood, and his son, Captain Joseph Harwood, Jr., then a young man, set out the elm trees, of which two large ones are still standing, and under which Mr. Harwood's grandchildren, the seventh generation on the place, to-day play.

The Harwoods have always been prominent in town affairs, and have been pioneers in all movements of reform and improvement.

Colonel Nahum Harwood, the father of the subject of this sketch, was one of the first Abolitionists, and a co-worker with Garrison and Phillips. He was also one of the projectors of the Fitchburgh Railroad. His wife, Mrs. Sophia Kimball Harwood, who lived to the advanced age of a few days less than ninety-four years, used to relate many incidents of the olden time, among them how she wore crape, when a girl, for the death of George Washington, reminiscences of the last slave owned by the Harwood family, etc.

The old house above referred to as built in 1754, was destroyed by fire in 1874, together with a great number of relics and heirlooms.

It was one of those substantial square white houses, with an immense chimney in the centre, standing under the broad elms on the sunny southern slope of a hill, the style of house which, though now becoming

A. Hayward.

RESIDENCE OF HON. J. A. HARWOOD,
LITTLETON, MASSACHUSETTS.

scarce, has always been the typical New England farm-house.

From its windows were seen the smoke of the burning of Charlestown and the battle of Bunker Hill, and in its cellar the frightened inhabitants took refuge during the "dark day" of 1780. Many slaves were born and raised in the house, but the slavery was never like the Southern slavery, and the Harwoods were among the first Abolitionists.

Here was born Joseph Alfred Harwood, March 26, 1827. He attended the district school and afterward the academies at Westford, Groton, and Exeter, New Hampshire. It was intended to send him to college, but his father dying when he was fifteen years old, he came home to take charge of the farm.

Many old heads predicted failure for a boy with a large farm on his hands, and a fondness for fine horses and cattle, but the boy had a level head and managed well. He made many improvements on the farm "making two blades of grass grow where one grew before," draining old bogs and making them produce, heavy crops of fine English hay, plowing up huckleberry pastures and planting orchards, and similar things. Meantime he paid his bills, rent and interest on the portions of the farm belonging to the other heirs, and finally bought and paid for the whole. He found time to teach school for a number of winters, and was noted for his good discipline, and the ease with which he maintained it. A school in a neighboring town, containing a number of full-grown scholars, men in size, who had driven away two or three teachers, and vowed vengeance on the next who should come, was turned over to Mr. Harwood, when he was only seventeen years of age, to complete a term. He held his place without resorting to harsh measures, and left the school orderly, obedient and respectful.

The stock on Mr. Harwood's farm has always, since under his management, been of the best. He introduced among his cattle the first thoroughbred animals ever brought into Littleton, and by frequent additions of new blood has not only improved his own herd, but the stock on all the neighboring farms. He devoted himself almost exclusively to agriculture until 1868, when, in partnership with his younger brother, Nahum, under the name of J. A. & N. Harwood, he commenced the manufacture of leather board, their factory being at North Leominster, on the Nashua River, and their salesroom in Boston. The great Boston fire of November, 1872, found the firm moving a large stock of goods from one store to another; both were burned, but by good fortune and good judgment combined—for they always go together—their insurance was divided among a number of out-of-town companies and was all good.

During the panic of 1873 the firm stood its ground, while many of its neighbors succumbed.

On April 1, 1884, the Leominster factory was destroyed by fire, causing a loss to the firm and a fur-

ther indirect loss by crippling the business during rebuilding, but by good management all liabilities were promptly met and the business continued. A fine new factory was built, the firm was made into a corporation under Massachusetts laws, by the name of the Harwood Manufacturing Company, and has continued the same business, branching out somewhat in the manufacture of patent fibre chair-seats and chairs, and settees for churches, theatres and halls. Joseph A. Harwood is president and treasurer.

In all matters, both of public and private business, Mr. Harwood's policy has been liberal and expansive, encouraging all improvements such as new roads, public buildings or any project which will increase the business and prosperity of his town, and also in the improvement and adornment of his estate. After the old house was burned he built a large and elegant new one on the top of the hill, a few rods from where the old one stood. The wood-cut opposite gives an accurate idea of the house and surroundings. The view from the house in all directions is very fine, covering the park with its walks, drives and ponds, all planned and laid out by Mr. Harwood, who is intensely fond of landscape gardening, beyond which the eye passes over a large expanse of hills and valleys to Mounts Wachusett, Monadnock, Wataick and the Peterboro' hills.

Mr. Harwood has in his farm about 240 acres, a considerable part of which he has added within a few years by the purchase of land extending in the direction of Littleton depot, on which is located the United States Cattle Quarantine Station, which was moved from Waltham in 1885, as a result of his efforts and against much political opposition stimulated by those who wanted it elsewhere.

Mr. Harwood was postmaster of Littleton for about twenty years, and during the greater part of the time accommodated the citizens by sending the mail at his own expense to sub-offices at the Centre and Old Common, previous to the establishing of a regular office at Littleton Common. Through his influence a telegraph office was established in connection with the post-office, which could be done only in that way, and by his bearing a part of the expense of a clerk for both offices.

In 1873 Governor Washburn appointed Mr. Harwood on his staff, and he was re-appointed by Lieut. Governor Talbot when acting Governor for the unexpired term after the election of Governor Washburn to the United States Senate. Col. Harwood was elected to the State Senate in 1875 and re-elected the following year and was an active, practical and influential legislator. He served in his first year as chairman of the Committee on Military Affairs, and also on the Committees on Agriculture, and on Engrossed Bills, and in the following year was chairman of the Committee on Agriculture and a member of the Committee on Public Charitable Institutions.

An important matter that was carried through the

Senate largely through his influence and efforts was the building of the State Prison at Concord. During his second term occurred the celebration of the Lexington and Concord Centennials, and Mr. Harwood was made chairman of the joint special committee having the whole matter in charge for the Legislature, including the entertainment of President Grant and his cabinet.

General Grant, on his return to Washington, wrote him an autograph letter as follows:—

"EXECUTIVE MANSION, WASHINGTON, Apl. 27, 1875.

"HON. J. A. HARWOOD, Chairman Legislative Committee.

"Dear Col.:—Permit me through you—the chairman of the committee of the Mass. Legislature, appointed to meet the Cabinet and myself on the occasion of the late centennial celebration of the battles of Concord—Lexington, and convey to us the invitation of the State to be its guests for the time—to tender my thanks, and the thanks of the accompanying Cabinet Ministers for the courtesies received from his Excellency the Governor of the state, and staff, your committee and citizens generally. Nothing was left undone to make our short stay in the state most pleasant. With great respect,

"Your obt. svt.,

"U. S. GRANT."

At the expiration of Mr. Harwood's second term in the Senate, he was elected to the Executive Council from the Sixth Councilor District, and served in that capacity three years—the first two in Governor Rice's and the last in Governor Talbot's.

The first year he was on the Committees on Pardons, on Penal Institutions, on Military Affairs and chairman of the Committee on Accounts; in the two succeeding years he was on the two first-named committees, also on the Committee on Railroads and the Hoosac Tunnel, and chairman of the Committee on Military Affairs. During his third year he was one of the senior members of the Council and was considered Governor Talbot's right-hand man in that administration, which has been celebrated for its careful and business-like management and strict integrity.

In 1879 and again in 1882, Mr. Harwood was a prominent candidate for the Republican nomination for Lieutenant-Governor, and in the convention of the former year received 181 votes and of the latter 283.

He has always been a staunch Republican, and prides himself on having invariably voted the straight ticket in both State and national affairs.

In his whole career, both in business and politics, determined persistence has marked his course and has been the cause of his success.

He is now president and treasurer of the Harwood Manufacturing Company, president of the Live Stock Insurance Company, director in the Mutual Reserve Fund Life Association of New York, trustee of the New England Agricultural Society, trustee of the Middlesex Agricultural Society, trustee of Westford Academy and trustee of the Massachusetts Agricultural College. He has always been an active member of the Unitarian Society and Church, and was at one time a president of the North Middlesex Conference.

In personal appearance Mr. Harwood is tall, with

iron gray hair and beard, a full face and a sharp eye; he walks with a long stride and very fast. He is very cordial in manner and makes and holds many friends.

In 1852 Mr. Harwood married Lucy Maria Hartwell, of Littleton, daughter of Hon. Jonathan and Elizabeth Briard (Walker) Hartwell.

Two sons have been born to them—Herbert Joseph, who graduated from Harvard College in 1877, and is now associated with his father in business, also, with his wife and five children, living with his father and mother at the old place, and Edward Alfred, who died in infancy.

WILLIAM KIMBALL.

William Kimball, son of Deacon James and Rachel Hartwell, Kimball was born in Littleton December 6, 1817. The greater part of his life was spent in his native town, in which, for about twenty years of his early manhood, he kept a store, and during a portion of this time was postmaster. For many years he was justice of the peace. In 1845 he married Mary Adams Lawrence. Of their six children, four survive,—George A., William L., Myron A. and Mrs. Mary K. Harlow, the first and last living in Somerville, Mass., William L. and Myron A. residing in Littleton.

At the semi-centennial of the church of which Mr. Kimball had been a member, his pastor, in alluding to him, said: "His pleasant countenance was an inspiration."

The following resolution from the town records shows the esteem in which he was held by the citizens:

"Resolved: That in the lamented death of William Kimball we greatly mourn our loss of an exemplary and honored citizen, an experienced, efficient and upright official. Living most of his life of sixty-six years in his native town, by his sterling traits of character, his kindly spirit, his habitual courtesy, his modest manliness, his firm principles and proved integrity, his genuine and ready support of the public interests, and his earnest, simple, Christian faith and life, he gained and held the confidence and esteem of his townsmen, as shown in the continuous and unanimous choice of him to be their town clerk for more than a quarter of a century."

It was said by one who knew him well: "He walked among men one of earth's noblemen, whose integrity was so staunch and whose honor so true that there was none to point the finger of scorn at him or to impeach his honesty."

In 1869 he married Mrs. Lucy M. Houghton, youngest daughter of John Goldsmith, of Littleton. He died October 14, 1884, aged sixty-six years.

DEACON JAMES KIMBALL.

In presenting a sketch of the life of Deacon James Kimball, it seems suitable to prefix some account of his father, Deacon Daniel Kimball, the progenitor of the Kimball family in Littleton:

Daniel Kimball was born in Haverhill, Massachusetts, July 14, 1751. Soon after his removal to Littleton the Revolutionary War broke out. He entered

William Kimball

James Kimball

John Goldsmith

Chas. Manning

the army, in which he soon obtained the rank of lieutenant.

In 1779 he married Lucy Dutton, of Littleton. Of their twelve children, three died in infancy; the remainder all married and settled in Littleton. The following are their names:

Daniel, James, Benjamin, Jesse, Lucy (Kimball) Mead, John, Sophia (Kimball) Harwood, Sebia (Kimball) Goldsmith and Rebecca (Kimball) Fletcher.

At the present time (1890) more than sixty worthy descendants of Deacon Daniel Kimball reside in Littleton, and more than 125 are scattered through the States from Vermont to California. He died in 1813, aged sixty-two years.

In the archives of the town library may be found a funeral sermon preached by Rev. Edmund Foster, in which his character is delineated.

Deacon James Kimball, second son of Deacon Daniel Kimball, was born in Littleton in 1783.

He married, in 1807, Rachel Hartwell, of Littleton. Of their ten children, two—Sophia (Kimball) Hurter, of Jacksonville, Florida, and Elizabeth (Kimball) Stevens, for many years a resident of Lowell—are still living.

James Kimball was, while quite a young man, prominent in town and other public interests. He was one of the pioneers of the anti-slavery and temperance movements. From 1838 to 1851 he was town clerk.

He was an interested and active member of the Lyceum from its beginning: a society which for more than half a century has had an important educational influence in the town.

He was for many years chosen as one of the Board of Selectmen, and for a considerable period represented the town in the State Legislature. He was deacon of the Orthodox Congregational Church from its organization (which occurred in his own house), in 1840, to his death. He had previously held the office of deacon in the Unitarian Church.

His second wife was Mrs. Mary B. Harris.

He died in 1869, aged eighty-six years. His life fully warranted the estimate of his character shown by his father in the advice given his children upon his death-bed: "My children, take James for an example."

JOHN GOLDSMITH.

John Goldsmith was a native of Acton, Mass. He was a son of John and Maria (Houghton) Goldsmith, —the former being a native of Littleton and the latter of Harvard. It is supposed he was a lineal descendant of the Goldsmith family that was of the early settlers of the country, and which tradition states was of Irish descent. On the town records of Wenham is the statement that in 1659 Richard Goldsmith was taxed for the salary of the minister one pound, fifteen shillings. In 1731 Richard Goldsmith married Hannah Dodge, of Wenham, and in the old burying-ground at Littleton some ancient grav-

stones mark the spot where their ashes repose. Mr. Goldsmith was also a lineal descendant of Rev. Benjamin Shattuck, first minister of Littleton. The Goldsmith family moved from Littleton to Harvard, and John, the subject of this sketch, having been deprived of his father, through accident, in early life, was put in charge of his grandfather, who brought him up. In 1818 he was married at Littleton to Sebia Kimball, a daughter of Deacon Daniel and Lucy (Dutton) Kimball, both of Littleton. In early manhood he engaged in farming, and owned and occupied for sixty years the homestead where he died. His estate is situated about a half-mile easterly of Littleton Common. It is beautifully located, and the buildings and grounds indicate the thrift of their former proprietor. Mr. Goldsmith was a fine type of a New England farmer. He was industrious, economical and attended strictly to the interests of his farm. He made a business of farming, by which, together with safe investments, he acquired a large property. As a citizen he was public-spirited and had the confidence of his fellow-townsmen, who many times elected him to positions of honor and trust. He was a prominent member of the Unitarian Church, a constant attendant on its services and a regular contributor to its support. At his decease he left a sum of money for the benefit of the Littleton public schools, and the appreciation of the gift by the town is set forth by the following resolutions:

"WHEREAS, Our lamented townsman, the late John Goldsmith, bequeathed to the town of Littleton the 'Sum of Fifteen Hundred dollars,' to be holden and invested by the Selectmen and their successors, as trustees, the income of which he desired should be expended annually for education in the Common Schools of said Littleton—

"Voted, That the citizens of the town hereby express and record their grateful recognition of the value of Mr. Goldsmith's long life among them as that of an upright and honored citizen, of diligent industry, of sound integrity, and strict fidelity to every trust; of great wisdom in council, and excellence of heart, whose memory we cherish with just pride and whose sterling character and example we commend as worthy of personal emulation."

Mr. Goldsmith died at Littleton February 14, 1883, at the age of eighty-seven. His family, beside his wife, consisted of two sons, John and Daniel, both of whom died unmarried, and three daughters, Sophia, Julia and Lucy Maria, the latter being the only child now living. Sophia married Francis Conant; Lucy Maria, the youngest daughter, married Daniel P. Houghton, of Harvard, and later William Kimball, son of Deacon James Kimball, of Littleton, and now resides at her father's late residence.

OTIS MANNING.

Otis Manning was born at Littleton, Massachusetts, October 31, 1805, and was a son of Jonathan and Lydia (Howard) Manning, both natives of Chelmsford. His education was obtained at the district school, with the exception of one term spent at the Westford Academy. In early life he learned the wheelwright's trade, and for more than

half a century he followed this vocation, working most of the time in a shop that is still standing near his present residence, which is a little northerly of Littleton Common. December 10, 1833, he was married at Westford to Miss Ann Crosby Carter, daughter of Ezra and Anna (Jaquith) Carter. He has one child, Ann Maria Manning.

Mr. Manning is a Republican, but has never actively participated in political affairs, except to perform the ordinary duties of citizenship. In matters of reform he has always been on the right side—being an Abolitionist in the days of slavery, and an advocate of temperance in the early days of that reform.

When almost everybody was accustomed to use some alcoholic liquor, he was a total abstainer, and this practice he has followed through life. In his church relations he is a staunch Congregationalist. In early life he joined the church in Westford, and for some years was superintendent of its Sunday-school. He was one of the original members of the Orthodox Church in Littleton, which was organized May 14, 1840. Since the formation of this church he has held the office of deacon, and for years served as clerk and Sabbath-school superintendent. As a church officer he has been faithful and efficient, and as a Christian his life has been exceptionally commendable through these many long years of service for the Master. He has but rarely been absent from his place at church on the Sabbath, or at the weekly church meeting; and has been a ready and willing contributor for the maintenance of the institutions of his faith. Not only has he been devoted to the spreading of the Gospel at home and in his own land, but he has been much interested in the propagation of it in other lands. He has been a firm and substantial friend of the great missionary societies, and during a long life he has spent but few nights away from his native town except to attend religious conferences and conventions.

Few lives have perhaps been more exemplary than his; and in the quiet retirement of old age he still retains a lively interest in the causes that he has long helped maintain. He resides with his daughter, and, with the exception of the infirmities incident to advanced age, he is still in the enjoyment of robust health.

BARNABAS DODGE.

Barnabas Dodge, an old and respected citizen of Littleton, was of English stock, the ancestor of the American branch of the family, William Dodge, being among the company that landed at Salem in 1629, under the leadership of John Endicott.

His father, John Dodge, served in the War of the Revolution, under his father, Captain John Dodge. His maternal grandfather, Barnabas Dodge, was a captain in Colonel Gerrish's regiment, which was in service at the battle of Bunker Hill.

Mr. Dodge was born in Wenham, Massachusetts, in 1795. His father was a farmer, but in his youth had made several voyages to foreign countries, as was common with the young men in the coast towns at that time. The family came to Littleton in 1818, having bought the estate known as the Captain Cogswell farm, in the north part of the town. In his youth Mr. Dodge taught a district school. While in this employment he met, as his pupil, Miss Sarah Corning, of Beverly, who in 1820 became his wife. Mr. Dodge cultivated and greatly improved his farm, never seeking public life or honors. It has been said of the Dodge family, that they do not seek public office, but when it is conferred upon them, that they perform its duties with ability and fidelity. This was true of the subject of this sketch. He held various town offices, school committee, selectman, &c. He was the father of ten children, who lived to adult age. The eldest daughter became a teacher. After several terms in the district schools of Littleton, she became successively principal of the Townsend Female Seminary, whence she had graduated; Oread Institute, Worcester; Codman Hill Young Ladies' School, Dorchester; Ladies' Department Kalamazoo College, Michigan, and of Colby Academy, New London, New Hampshire. She was superintendent of schools in Littleton four years after her return to her native town in 1877. Another daughter was for several years teacher in the Winchester High School. She married Rev. E. B. Eddy, of Calais, Maine, and died in 1879. Two of the sons are in business in Cambridge; two remain in Littleton. Three of the daughters and four sons are still (1890) living.

Mr. Dodge was a man of more than ordinary intelligence, was a diligent reader, and assisted in forming two small town libraries, which, unfortunately, survived but a few years. His older children remember the interest which all felt when the father brought home a new book from the library, and their enjoyment of the winter evenings when he would read aloud from these, or the family newspaper, as they worked around the cheerful fire-place, filled high with glowing logs, over the ruddy heaps of living coals beneath. Mr. Dodge was an honest man. No one could ever bring against him charges of cheating or meanness in trade. He was truthful, sympathetic and a faithful friend. He was interested in the affairs of the town and of the state and the nation, never seeking to control them, but always on the side of what he believed to be the right. He died in 1873. His wife survived him fifteen years, dying at the old homestead, still in possession of the family, to which she had come as a youthful bride almost seventy years before.

GARDNER PROUTY.

Gardner Prouty was born at Spencer, Worcester County, Massachusetts, September 4, 1817, and was the son of Gardner and Ruth (How) Prouty, both of

B. Hodge

Charles Prouty

Spencer. He attended the common schools of his native town till about seventeen years of age, when he went to Westminster, where he spent one term at the Academy. After leaving school he learned the carpenter's trade, at which he worked about six years. In 1847 he went to Boston, and for a time engaged in the ice shipping business. Afterwards he was in the business of wharfinger, in which he continued till January 1, 1889. In 1864 he went to Littleton and purchased the place where he still resides. His house is pleasantly situated on the main street at Littleton Common; and connected with it is a farm of sixty-four acres, the care of which has afforded him ample opportunity for exercise since his retirement from his former business. June 3, 1851, Mr. Prouty was mar-

ried at Boston, by Rev. Thomas Starr King, to Clara D. Wheelock, of Calais, Vermont. Miss Wheelock was a daughter of Mr. and Mrs. Welcome Wheelock, formerly of Charlton, Worcester County, Massachusetts. He has one child, Gardner W., who is married and lives in Littleton. Mr. Prouty is a Democrat, and was a delegate to the Presidential Convention held in New York in 1868. He has taken an active part in the public affairs of Littleton, having been selectman and assessor seven years, and overseer of the poor six years, and five years chairman of these boards. For several years he was also a member of the School Committee, and was moderator of the annual town-meeting of Littleton twenty years. His paternal ancestor came to Spencer from Scituate.
